## FOREWORD

All India Educational Surveys have been a useful source of data in educational planning and formulation of educational policies. In addition to this, the data of these surveys are being widely used by researchers, social scientists and educationists. The present Survey, the sixth in the series, has been undertaken to fulfil these requirements.

The Survey provides data as on 30 September 1993. In the Survey seven schedules were canvassed for data collection. For the first time this Survey has used the computer facility of the National Informatics Centre (NIC) for communication and for processing of data.

The Survey data have been made available to the users by publishing the national tabulations in seven volumes and bringing out two analytical reports, viz, the selected statistics and the main report. The present document, the main report, presents an analysis of all the aspects covered in the Survey. It presents invaluable information to users as regards disparities across States and amongst social groups.

I express my thanks to the State Departments of Education and the State Centres of the NIC who played a crucial role in the execution of this project of such an enormous magnitude.

I express my appreciation of the team-work done by, and the spirit of cooperation between the teams in the NCERT, headed by Prof. R.R. Saxena, and in the NIC, headed by Shri V.V.Rao, in accomplishing this monumental task of great importance. The members of these teams deserve special appreciation.

My special thanks are due to Shri P.R.Dasgupta, Secretary (Education), Government of India, for his keen interest in the completion of the Survey work. I also express my gratefulness to Dr N.Seshagiri, Special Secretary and Director General, National Informatics Centre, with whose support we could accomplish this task.

A. K. SHARMA  
*Director*

National Council of Educational  
Research and Training

New Delhi  
20 October 1998

## PREFACE

Like in the earlier All India Educational Surveys (AIESs), this Survey, the sixth in the series, also aimed at providing a database for educational planning and research at micro as well as macro levels, with the reference date as 30 September 1993. With the participation of the National Informatics Centre (NIC) and the use of computers in data analysis, it became possible to create a uniform database on magnetic media for wider and more flexible dissemination of information.

This Survey covered a very wide spectrum of school education, comprising more than a thousand data items, by using the census mode for core variables (needed for micro level planning) and the sampling mode for issue-specific variables (needed for macro-level planning). These new features in this Survey provided rich experiences to the National and State-level teams in the accomplishment of this project of enormous magnitude. The Directors of Education/ Public Instruction of the States and the UTs extended all cooperation and help in conducting the Survey. Particularly, State Survey Officers and State Informatics Officers with their teams cooperated with each other to execute various activities of this monumental task. The officers-in-charge of education at the block level and school teachers put in painstaking efforts in collecting the data at their respective levels. I thank all of them for their important roles in the Survey.

The present report is an important outcome of the Survey providing analytical discussion on all the aspects covered in the Survey. The drafting of the report has been undertaken in the Department of Educational Survey and Data Processing (DES&DP), NCERT, as per the following chapterwise allocation.

<i>Chapter</i>	<i>Title</i>	<i>Author</i>
1	Introduction	Dr R.R. Saxena
2	Habitations in Rural Areas	Shri S.C. Mittal
3	Primary Education	Dr J.K. Gupta
4	Upper Primary Education	Dr V.K. Jain
5	Secondary Education	Shri Pushpendra Kumar
6	Higher Secondary Education	Shri S.C. Mittal
7	Teachers	Dr J.K. Gupta
8	Other Forms of Education	Shri O.P. Arora
9	School Buildings	Shri Pushpendra Kumar
10	Facilities	Dr Manju Trehan
11	Languages and Media of Instruction in Schools	Shri M.K. Gupta
12	Income, Expenditure and Fee Structure	Shri M.K. Gupta
13	Main Findings of the Survey	All the above Faculty Members

The draft chapters written by the faculty were edited by myself, Dr J.K. Gupta and Dr Manju Trehan.

The Survey activities started in the DES&DP with the designing of eight schedules and the preparation of guidelines for Survey Officers in collaboration with the Human Resource Development Informatics Division (HRDID) of the NIC. The items in these schedules were tested in a pilot study during the third week of October 1993 in Goa, for which the responsibility was assigned to Shri S.C. Mittal and Dr J.K. Gupta. Based on the experience of the pilot study, the major responsibility for preparing the guidelines for Survey Officers was shared by myself, Shri V.V. Rao and Dr J.K. Gupta.

The printing and distribution of schedules and guidelines numbering about 33 lakh, for collection of information from States/districts/blocks was done within two months by the Publication Division of NCERT.

The field work started with the training of the field staff in data collection, manual scrutiny of filled-in schedules and data preparation. This activity at the national level was organised by grouping the States/UTs into five zones and by constituting five teams as under:

- |   |  |
|---|--|
| 1. <i>North Zone</i><br>Haryana, Himachal Pradesh,<br>Jammu & Kashmir, Punjab,<br>Uttar Pradesh, Chandigarh,<br>Delhi | Dr C.L. Kaul<br>Shri O.P. Arora          |
| 2. <i>West Zone</i><br>Goa, Gujarat, Madhya Pradesh,<br>Maharashtra, Rajasthan, Dadra &<br>Nagar Haveli, Daman & Diu  | Dr Satvir Singh<br>Dr Manju Trehan       |
| 3. <i>South Zone</i><br>Andhra Pradesh, Karnataka, Kerala,<br>Tamil Nadu, Lakshadweep, Pondicherry                    | Shri S.C. Mittal<br>Shri Pushendra Kumar |
| 4. <i>North East Zone</i><br>Arunachal Pradesh, Assam, Manipur,<br>Meghalaya, Mizoram, Nagaland                       | Dr V.K. Jain<br>Prof. R.R. Saxena        |
| 5. <i>East Zone</i><br>Bihar, Orissa, Sikkim, Tripura, West<br>Bengal, Andaman & Nicobar Islands                      | Dr J.K. Gupta<br>Shri M.K. Gupta         |

The members of the DES&DP faculty guided the operations of data collection and manual scrutiny in the States and UTs as per the above allotment. The collection of data was completed by October 1994, whereas manual scrutiny took more time.

The NIC hired private data-entry agencies for the job of data entry. Data validation was undertaken at the NIC State Centres by officers of the State NIC units and error lists were corrected by officers of the State Survey units under the guidance of the faculty of the DES&DP. The job of data entry and computer validation was a mammoth task and all concerned officers have undertaken the work with high sincerity and in full earnest.

Due to certain considerations, the job of data entry for Jammu & Kashmir was undertaken in Delhi under the supervision of the faculty of

the DES&DP and officers of the HRDID of the NIC. The data validation was undertaken on the computer systems of the NCERT and the responsibility was shared by Shri O.P.Arora and the System Analyst of the NIC State Unit of Jammu & Kashmir.

The DES&DP faculty developed the National, State, District and Block level analysis plan for VIF, UIF, SIF-1, SIF-2, whereas the tabulations for the TIF schedule and the selected statistics were developed by Dr Satvir Singh and Dr Manju Trehan. The estimation procedure for SIF-2 and TIF was developed by myself, Dr J.K.Gupta, Shri Pushpendra Kumar and Shri M. K. Gupta. The faculty consulted Shri V.V.Rao on these tasks.

Software development for generation of statistical tabulations of VIF/ UIF and TIF was undertaken by officers of the HRDID, of SIF-1 by the Regional Computer Centre, Calcutta, and of SIF-2 by the Analytical and Modelling Division of the NIC. These software for the tabulation of various schedules were evaluated and finalised after a number of test runs on the data of the north-eastern States and one or two bigger States by the faculty of the DES&DP. Data were processed for generation of State-level tabulation at the NIC State Centres and of National-level tabulation at the NICHQ. The State-level tabulation for each State/UT was finalised by the DES&DP faculty as per the work allotted to them. In the case of SIF-2 and TIF, the complex estimation procedure required intensive checking by the DES&DP faculty and the processing of data for many States/UTs at the NICHQ. The faculty members of the DES&DP finalised the National-level tabulation and carried the responsibility for bringing out the seven volumes in print.

The generation of reports for such a large volume of data was undertaken in a phased manner. The first report of the Survey, the Provisional Statistics, was printed in December 1995, and the responsibility for this was shared by myself, Shri V.V. Rao, Shri S.C. Mittal and Dr Manju Trehan.

In addition to the above-mentioned publications, Shri M.K. Gupta planned and compiled a few Statewise educational indicators and published them as Educational Profile in May 1998. Besides, a compendium to the present document, an analytical report titled Selected Statistics was drafted by myself, Shri S.C. Mittal and Dr Manju Trehan, and was published in July 1998.

The mammoth task of uploading and retrieval of the State and National-level reports was undertaken by Shri Vishva Bandhu and Shri K. Murugan under the guidance of Shri O.P. Arora. Smt. Nirmal Mehta, Smt. Naresh Grover, Shri Sanjay Kumar, Smt. Mridula Gautam and Smt. Sneh Lata Dhami transcribed the manuscript of the reports on the magnetic media. Shri H.P.Sharma handled the matters related to accounts. Shri Ram Prakash, Shri Puran Lal and Shri Ghan Shyam extended full administrative support to the Section Officer and Assistant Programme Coordinator in completing the Survey successfully. Smt. Upma Sehgal, Smt. Padma Dalwani, Smt. Nargis Vohra, Smt. K.S. Rani and Smt. Usha Khanna of the department compared the proofs of all the publications received from the Publication Division.

For the first time, the tabulated information at the National level in the form of seven volumes and at State/ District levels has been put on the CD-ROM in an INTERNET-compatible format for access by a standard browser by the officers of the HRDID of the NIC. The flow of management of data for retrieving the information was developed by Dr V.K.Jain and Shri O.P.Arora. Software for preparation of these CD-ROMs were developed by the HRDID of the NIC. Besides this, aggregated and raw data in database

form at (.dbf) have also been prepared on the CD-ROMs by the officers of the HRDID, NIC. The department has also uploaded some selected statistics on the INTERNET, which were prepared by Dr V.K.Jain.

The above-mentioned activities did have their stumbling blocks but these were removed by the dedicated and unflinching perseverance of the National team and the supporting staff. I record my indebtedness to them for this remarkable achievement. In this context, I express my special thanks to Shri V.V.Rao, Senior Technical Director, and his team of officers for undertaking the responsibility of the entire computerisation work, and to Dr R.K.Gupta, Senior Technical Director, and his officers for the tabulation of the SIF-2 schedules.

The Advisory Committee monitored the Survey activities and provided expert advice at all stages, while the Steering Committee provided administrative support. I am grateful to all the members of both the Committees for seeing this project through. I am indebted to Prof. A.N. Maheshwari, Joint Director, NCERT for providing continuous guidance, support and motivation. Finally, I take this opportunity to express my gratitude and thanks to Dr N. Seshagiri, Special Secretary and Director General, NIC and to Prof. A.K. Sharma, Director, NCERT for giving all the needed support.

R.R. SAXENA

## CONTENTS

FOREWORD			iii
PREFACE			v
ADVISORY COMMITTEE			ix
NATIONAL LEVEL PROJECT TEAM			x
<b>Chapter 1</b>	<b>Introduction</b>	<i>R.R. Saxena</i>	<b>1</b>
	Need; All India Educational Surveys; Objectives of the Sixth AIES; Concepts and Definitions; Sampling Design of the Sixth AIES; Organisational Set-up and Execution; Computerisation of the Survey; Dissemination of Data; Administrative Bottlenecks and Limitations.		
<b>Chapter 2</b>	<b>Habitations in Rural Areas</b>	<i>S.C. Mittal</i>	<b>13</b>
	Habitations by Size of Population; Habitations per Village; Habitations Predominantly Populated by Scheduled Castes; Habitations Predominantly Populated by Scheduled Tribes.		
<b>Chapter 3</b>	<b>Primary Education</b>	<i>J.K. Gupta</i>	<b>16</b>
	Introduction; Growth of Schooling Facilities since First AIES; Rural Habitations and Population Served; Schooling Facilities in Habitations Predominantly Inhabited by Scheduled Castes. Schooling Facilities in Habitations Predominantly Inhabited by Scheduled Tribes; Statewise Analysis of Schooling Facilities; Villages with and without Schooling Facilities; Unrecognised Primary Schools in Rural Areas; Primary Sections; Primary Schools; Teachers in Primary Schools; Pupil-Teacher Ratio; Enrolment in Classes I-V; Age-Specific Enrolment Ratio; Net Enrolment Ratio.		
<b>Chapter 4</b>	<b>Education at Upper Primary Stage</b>	<i>V.K. Jain</i>	<b>32</b>
	Introduction; Schooling Facilities in Rural Habitations; Schooling Facilities in Different Population Slabs; Availability of Schooling Facilities in States/UTs; Schooling Facilities in Habitations Predominantly Populated by Scheduled Castes; Schooling Facilities in Habitations Predominantly Populated by Scheduled Tribes; Schools with Upper		

Primary Stage; Enrolment at Upper Primary Stage  
— Total, Girls and Boys, Scheduled Castes,  
Scheduled Tribes: Age-Specific Enrolment Ratio.

**Chapter 5      Secondary Education      Pushpendra Kumar      43**

Introduction; Schooling Facilities in Rural Areas; Schooling Facilities in Habitations Predominantly Populated by Scheduled Castes; Schooling Facilities in Habitations Predominantly Populated by Scheduled Tribes; Statewise Analysis; Schooling Facilities in Villages; Secondary Sections; Enrolment in Classes IX and X; Science Laboratories; Guidance Services.

**Chapter 6      Higher Secondary Education      S.C. Mittal      54**

Introduction; Rural Habitations and Population Served; Schooling Facilities in Habitations Predominantly Populated by Scheduled Castes; Schooling Facilities in Habitations Predominantly Populated by Scheduled Tribes; Schooling Facilities in Villages; Higher Secondary Schools; Sections; Enrolment in Classes XI and XII; Pre-University Classes (PVC) attached to Degree Colleges; Courses at +2 Stage; Laboratories at +2 Stage; Guidance and Counselling; Vocational Courses.

**Chapter 7      Teachers      J.K. Gupta      69**

Introduction; Teachers in Position and Sanctioned Posts; Female Teachers; Teachers Belonging to Scheduled Castes, Scheduled Tribes and Other Backward Classes; Voluntary/Contractual Teachers; Part Time Teachers; Attrition of Teachers; Physical Education/Training/Yoga Teachers; Teachers Staying Outside Village/Town where School is Located; Housing Facility to Teachers; Teachers Working at Primary, Upper Primary, Secondary and Higher Secondary Stages; Tenure of Service; Academic Qualifications and Training; Other Training; Inservice Training; Average Experience; Teaching Subject of their Post-graduation; Competency in Teaching of Science and Mathematics.

**Chapter 8      Other Forms of Education      O.P. Arora      89**

Introduction; Non-Formal Education; Pre-Primary Education; Education of the Disabled; Integrated Education Programme for the Disabled.

<b>Chapter 9</b>	<b>School Buildings</b>	<i>Pushpendra Kumar</i>	<b>99</b>
	Introduction; Condition of School Buildings; Ownership of School Premises; Additional Classrooms Required and Expansion Potential in Schools; Facilities — Urinals, Lavatories, Drinking-Water.		
<b>Chapter 10</b>	<b>Facilities</b>	<i>Manju Trehan</i>	<b>116</b>
	Introduction; Libraries; Schools Subscribing to Newspapers and Magazines; Textbook Bank; Blackboards and Supply of Chalk and Dusters; Availability of Almirahs and Trunks; Mats and Furniture for Students; Availability of Furniture for Teachers; Contingency Funds; Playgrounds and Sports/Games Material and Students Participation; Midday Meals; Free Uniform; Free Textbooks; Attendance Scholarship for Girls; Vaccination/Inoculation and Medical Check-up of Students.		
<b>Chapter 11</b>	<b>Languages and Media of Instruction in Schools</b>	<i>M.K. Gupta</i>	<b>158</b>
	Introduction; Language Policy; Languages Reorganized by the Constitution; Languages Taught in Schools; Schools Adhering to the Three-Language Formula; Schools with the First Language, the Second Language and the Third Language; Medium/Media of Instruction; Schools Teaching through the Mother Tongue.		
<b>Chapter 12</b>	<b>Income, Expenditure and Fee Structure in Schools</b>	<i>M.K. Gupta</i>	<b>175</b>
	Introduction; Fee Structure in States at Different School Stages; Income at District Level; Expenditure at District Level; Expenditure per Student.		
<b>Chapter 13</b>	<b>Main Findings of the Survey</b>	<i>All the above Faculty Members</i>	<b>180</b>

## GANDHIJI'S TALISMAN

"I will give you a talisman. Whenever you are in doubt or when the self becomes too much with you, apply the following test :

Recall the face of the poorest and the weakest man whom you may have seen and ask yourself if the step you contemplate is going to be of any use to him. Will he gain anything by it ? Will it restore him to a control over his own life and destiny ? In other words, will it lead to Swaraj for the hungry and spiritually starving millions ?

Then you will find your doubts and your self melting away."

*M. K. Gandhi*

## Chapter 1

### INTRODUCTION

#### 1.1 Need

**1.1.1** The education in the country during colonial rule served the purpose of fulfilling the administrative needs and was the privilege of a few elites. With the passage of time, the social pressure for providing education to the masses can be seen in the form of local efforts by the native educationists or through some institutions. However, in 1911, the then government proposed to provide the educational facility to the masses. The criteria for the location of schools were finalised. To assess the requirement of the country in fulfilling this goal, the government also proposed a countrywide Survey. This proposal does not seem to have materialised. However, this type of exercise was conducted in a sporadic manner in some states till the country attained Independence.

**1.1.2** Just after Independence, the country undertook the responsibility of providing education to the teeming millions through Article 45 under the Directive Principles of State Policy in the Indian Constitution. It promised free and compulsory education to all children upto the age of 14 years, i.e., Universalization of Elementary Education (UEE). This mammoth task needed planned efforts, for which it was necessary for the country to know the present position of the availability of the facility of elementary education. The database required for this purpose and for the planning of the educational facility was not available. To fill this data gap, the Government of India conducted the first All India Educational Survey (AIES) in 1957, with 31 March 1957 as its date of reference.

**1.1.3** The first AIES provided the basic input for planning of the schooling facilities in the context of UEE. Since then, the AIESs have come to stay as essential tools for scientific planning in the area of school education, with special reference to educational imbalance and inequality of opportunity, specially in rural areas across different regions and social classes.

#### 1.2 All India Educational Surveys

**1.2.1** For conducting the first AIES at the National

level a small unit was temporarily created in the Ministry of Education. It got the Survey executed through the active cooperation and participation of the officers of the State Survey Unit in each State/UT temporarily created by the respective State governments. The objectives of the survey were as follows.

- (a) Identification and enumeration of every distinct habitation and every primary, middle and secondary school;
- (b) Mapping out the location of schools;
- (c) Delimiting the area served by the existing schools;
- (d) Deciding on convenient location for the new schools and the area that would be served by the proposed new schools, by suitable classification and grouping of habitations;
- (e) Preparation of districtwise statistical tables showing the results of the survey.

The Survey used the habitation as a basis for fulfilment of the objectives (b) to (d). A habitation is defined as a distinct cluster of houses with a local name where people live in a compact and contiguous manner. Using this as a unit for provision of the schooling facility, the following criteria for proposing new schools or upgrading the existing ones were adopted.

##### (a) *Criteria for Proposing Primary Schools*

Habitations with a population of 500 or more were considered for a separate primary school in each of them. Habitations with population ranging between 300 and 499 were considered for separate primary school only in cases where there were no primary school (existing or proposed) within a walking distance of half a mile. Habitations with a population of less than 300 were tagged to existing or proposed schools within a distance of one mile (with a few exceptions). Alternatively, these habitations were grouped in such a manner that their

total population within a walking distance of one mile around the proposed school added upto at least 300. The area thus identified was labelled as 'Group School Area', and the schools belonging to this category were classified as Group Schools. Habitations not fulfilling any of these conditions were considered for peripatetic-teacher schools, the concept of which originated from the experiment conducted in the erstwhile Bombay State on a substantially large scale. The peripatetic-teacher school was conducted at two centres which were at any distance from about 1.5 miles to about 5 miles — a distance which a teacher would walk or cycle up to. The teacher used to hold the school in the morning at one centre and in the afternoon at the other. The other alternative, where the distance was long, the teacher was holding school on alternate days of the week for six days; she/he would hold school for three days continuously at one centre and the remaining three days at the other centre. In certain cases, a day in between for transit was also necessary.

(b) *Criteria for Proposing Middle Schools*

A habitation with a population of 1,500 or more was considered for a middle school. Habitations with a population of less than 1,500 each were grouped in such a manner that the total population of the habitations within a walking distance of three miles from the school added upto 1,500 or more.

(c) *Criteria for Proposing Secondary Schools*

A habitation with a population of 5,000 or more justified a secondary school. Habitations with a population of less than 5,000 each were grouped in such a manner that their total population within a walking distance of five miles from the school added upto 5,000 or more.

The First AIES was commenced in November 1957 and completed in April 1959. It covered all the States and UTs except A&N Islands, L.M. & A. Islands, NEFA, Naga hills, Pondicherry and West Bengal. Besides, 18 villages of Spiti and Lahul area of the then Kangra district of Punjab State were to be excluded from the survey because of their inaccessibility. Further, Goa, Daman & Diu and Dadra

& Nagar Haveli were also excluded because they were then under Portuguese possession.

**1.2.2** The need of the Second AIES basically arose to provide the baseline data required for planning the provision of educational facilities during the Fourth Five Year Plan. The responsibility of conducting the Second AIES was assigned to the National Council of Educational Research and Training (NCERT) which created the Educational Survey Unit for this purpose at the National level. This Survey was planned in the following three phases.

*Phase I:* To revise the data of the First AIES, and to collect the data for the preparation of the district development plans of education.

*Phase II:* To conduct intensive studies of the various problems of education.

*Phase III:* To conduct studies on Human Resource Development with a view to relating education to economic development, especially in the industrially developing areas.

The Second AIES had a wider scope than the First AIES. It used almost the same methodology as that of the First AIES except some concepts and definitions which were modified on the basis of the experience of the First AIES. These, as per the report of the Second AIES, are as under:

- (a) A habitation is a distinct cluster of houses with a local name. It is a centre where people live in a compact and contiguous manner. The habitations have been classified into rural and urban. In rural areas a village may include one or more distinct house clusters or habitations. Some villages may not have any habitation. These villages are supposed to be deserted or "bechirag". Habitations with a population of less than 25 have not been identified separately but have been shown as part of their respective nearest habitations in their villages, except in cases where the population of the village is less than 25. In such cases it will be considered as one habitation. Habitation registers have been prepared for all rural areas in all the blocks. A town or a town group has been treated as an urban habitation. Data regarding urban habitations have not been collected in the same detailed manner as for rural habitations, since the Second Survey did not lay much emphasis on schooling facilities in urban areas.

- (b) *The Indian Year Book of Education, 1964 (Elementary Education)* while reviewing the implementation of the First AIES, contained this note regarding peripatetic-teacher schools:

In one respect, the Survey has proved ineffectual, namely, in its proposal for the establishment of peripatetic-teacher schools. In no State have they been established anew; and even in the State of Bombay, on whose experience they had been recommended, their popularity has waned and their number has gone down. This, however, makes only a marginal difference in the result of the Survey because they served only 13,602 habitations (1.6% of the total) with a total population of 1.7 million (or 0.6% of the total).

In the Second Survey, the idea of the peripatetic-teacher schools was therefore dropped and primary sections were not classified as independent or group schools.

Phase I of the Second AIES had 31 December 1965 as the date of reference. The execution of the Survey at the State/UT level was undertaken by a survey unit temporarily created in each State/UT. Block Education Officers and teachers were deployed for data collection and tabulation. The report of this phase was published in 1967.

**1.2.3** The Advisory Committee of the Second AIES recommended that an educational survey of this type was to be organised during an interval of five years, preferably during the fourth year of every Five Year Plan, so that the data of the survey could be fruitfully utilised in the next Five Year Plan. Consequent to this suggestion, the Third AIES was launched in 1973, with 31 December 1973 as its date of reference.

As in earlier AIESs, the Government of India constituted an Advisory Committee for the Third Survey. The chairperson of the Committee was the then Secretary, Ministry of Education and Social Welfare, and the then Joint Director, NCERT was the Member Secretary. The Committee recommended to widen the scope of the Third AIES so as to have information about the entire education system right from pre-primary through university, including deemed university, non-formal education, unrecognised institutions, technical and vocational education, educational administration and inspection, and cultural education. The following agencies were entrusted with the organisation of the

survey covering the aspects mentioned against their names.

- (i) National Council of Educational Research and Training — School education and allied areas.
- (ii) University Grants Commission — Higher education at the first degree level and onwards, as also deemed universities.
- (iii) Institute of Applied Manpower Research — Technical and vocational education upto the undergraduate level.
- (iv) National Staff College for Educational Planners and Administrators — Educational administration and inspection.
- (v) Department of Culture (Ministry of Education and Social Welfare) — Cultural education.
- (vi) Department of Education (Ministry of Education and Social Welfare) — Non-formal education.
- (vii) Ministry of Home Affairs — Tribal education in the Sub-Plan regions under the Fifth Five Year Plan.

Each of the above-mentioned agencies was to plan and organise the Survey in their respective areas under the guidance of a separate Advisory Sub-Committee with Joint Director, NCERT as a member of each of these Sub-Committees. The Educational Survey and Data Processing Unit (ES&DPU), a constituent of the NCERT, was assigned the responsibility of coordinating the survey activities undertaken by each of the above-mentioned agencies. In addition to this, the ES&DPU collected data on the aspects allotted to the other agencies, such as: (i) Inspection and supervision of schools, (ii) Non-formal education, (iii) Tribal education, and (iv) Cultural education.

The objectives of the Third AIES for the area of school education and allied areas were as under.

- (i) To update the data of the earlier surveys in terms of the distribution and size of habitations and delimitation of school areas of the existing primary, middle and secondary schools and to collect data needed for developing district development plans.
- (ii) To study intensively the existing facilities on certain significant variables such as library, audio-visual aids, laboratories, pupil's age distribution, teachers' attrition

rates and other qualitative aspects of education.

The concepts and definitions used in the Second AIES were retained for the Third AIES except modifying the lowest limit of population as 10 in the case of hilly/sparsely populated areas for enumeration of a cluster of houses as a habitation.

In order to attain the above-mentioned objectives, the items of information included for collection of data were broadly classified into three categories on the basis of their depth about a specific aspect.

The survey used 26 schedules for data collection of the school education and allied areas. The survey used manual methods and also computers for analysis of data. The analysis of data on computers was undertaken by the office of the Registrar General of India. In this survey thematic reports were prepared on various themes. In addition to this, a publication giving provisional statistics was published much before the main report. The main report on school education was published in September 1979. The state-level tabulations generated by using computers were mimeographed and the survey data was stored on magnetic tapes for future use.

**1.2.4** The Fourth AIES was conducted during 1978-79, with the reference date as 30 September 1978. Like the Third AIES, this survey did not cover all the types and levels of education. It was confined to school education, and aimed at meeting the requirements of school education in the Sixth Five Year Plan. The specific objectives of the survey were as follows.

- (i) To assess the present position of the provision of educational facilities at various stages of school education in respect of coverage of school-going population, the distance to be covered by a child to have access to the school, enrolment of children belonging to the weaker sections of the society and girls' education;
- (ii) to assess the availability of minimum basic facilities in the school such as building, furniture, library, equipment, health and sanitation, and incentives;
- (iii) to prepare block maps with existing schooling facilities and to identify clusters of habitations where new schools ought to be opened or existing schools ought to be upgraded;

- (iv) to prepare the ground for conducting quarterly monitoring of information relating to school attendance, and systematic updating of data relating to enrolment and other educational facilities provided in institutions at block level, annually.

The survey used two schedules to collect data on various items, using the same concepts and definitions and created a temporary survey unit in each State and UT for conducting the survey. As in the earlier AIESs, the ES&DPU in NCERT shouldered the responsibility for planning, monitoring, training, etc., at the National level. Another schedule seeking information about enrolment and attendance in primary and middle classes was devised for the purpose of quarterly monitoring for meeting the fourth objective. Each Block Education Officer had to complete these schedules once in three months. The filled-in schedules were to be sent for consolidation to the National Informatics Centre (NIC), New Delhi through NCERT. The NIC was responsible for consolidation and report preparation for every quarter and for every State and UT. At a later stage, this process was curtailed because of a variety of difficulties faced in data transcription and report generation. The main report of the survey based on the two schedules was printed in July 1982. As in the Third AIES, a report giving provisional statistics on a few selected aspects was published much before the main report.

**1.2.5** The need of the Fifth AIES was felt in 1986 when the National Policy on Education was being formulated. Consequently the survey was undertaken with 30 September 1986 as the date of reference. The specific objectives of this survey were as follows.

- (i) To assess the present position of educational facilities at various school stages in respect of coverage of school-going population; the distance to be covered by a child to reach the school; enrolment in general, and of Scheduled Caste (SC) and Scheduled Tribe (ST) children and girls in particular.
- (ii) To assess the availability of physical facilities like school buildings, playgrounds, drinking water within the school, furniture and other equipment, facilities for medical check-up of students, incentive schemes and the number of beneficiaries.
- (iii) To assess the position of inputs like blackboards, chalks, libraries, laboratories, textbook banks etc.

- (iv) To know about the academic and professional qualifications of working teachers with special reference to the teaching of science and mathematics, and to determine attrition rates in the teaching profession.
- (v) To prepare block maps showing habitations, existing educational facilities, and proposed provision of facilities in a planned manner over a period of time.

To fulfil the above objectives, three schedules were developed to collect the relevant data. The organisation and methodology of the Fifth AIES were exactly the same as those in the Fourth AIES. The report of the survey was brought out in three phases, namely, selected statistics in February 1989, a concise report in October 1990 and the main report (two volumes) in 1992.

The above discussions indicate that the scope of each AIES varied depending upon the need identified by the Union Ministry of Education. However, Universalisation of Elementary Education remained one of the main themes. Further, the date of reference was 31 March for the First, 31 December for the Second and Third surveys, and 30 September for the Fourth and Fifth surveys. It is also evident from the preceding discussions that the periodicity was eight years in all the AIESs, except between the Third and Fourth surveys. However, all the five AIESs were conducted by creating a temporary survey unit in each State/UT and analysis was undertaken manually except in the Third survey wherein analysis was undertaken manually and also on computer.

### 1.3 Objectives of the Sixth AIES

**1.3.1** The Sixth AIES was undertaken with 30 September 1993 as its date of reference. The specific objectives of the survey are given below:

- (i) To create a database of education for use by different agencies.
- (ii) To develop MIS for use at various levels of administration.
- (iii) To assess the present position of educational facilities for various school stages in respect of population of rural habitations and their distance from the rural habitations.
- (iv) To know the enrolment of children in the general category, the Scheduled Castes (SCs), the Scheduled Tribes (STs), and particularly that of girls with special reference to UEE.
- (v) To assess the availability of physical facilities in schools, like school building, playground, furniture, etc.
- (vi) To assess the availability of basic amenities in schools, like drinking water, urinals, provision of medical check-up, etc.
- (vii) To assess the availability of incentive schemes and the number of beneficiaries.
- (viii) To assess the position of educational inputs, like availability of blackboard and chalk, library, laboratory, textbook bank, etc.
- (ix) To know about the academic and professional qualifications of teachers with special reference to the teaching of science and mathematics and to determine the attrition rate in the teaching profession.
- (x) To assess the availability of other educational facilities, like non-formal education, education for disabled children and pre-primary education.
- (xi) To assess the income and expenditure of schools.

**1.3.2** It can be seen from the above-listed objectives that it was attempted to make use of the benefits of present-day information technology by including development of databases of the Sixth AIES and providing an MIS system which, of course, were not attempted in the preceding five AIESs.

**1.3.3** The items of information on which data were to be collected became more than one thousand. The items required for micro level planning were termed as 'core variables' and the ones required for macro level planning were termed as 'issue-specific' variables. The data on core variables were collected on the census basis whereas the data on issue-specific variables were collected in the sampling mode. These data items were grouped appropriately in the seven schedules. The table on the next page gives the canvassing mode of each of these schedules.

Besides these seven schedules, another schedule, 'Educational Statistics—A Flash (ESF)', was developed to release some quick results. This schedule was filled by block/town level officers by compiling data from filled-in VIF/UIF, SIF1 and CIF schedules.

Schedules	Canvassing mode
1. Village Information Form (VIF)	All villages
2. Urban Information Form (UIF)	All urban areas
3. School Information Form 1 (SIF-1)	All recognised schools
4. School Information Form 2 (SIF-2)	Selected schools
5. Teacher Information Form (TIF)	All teachers in selected schools
6. College Information Form (CIF)	All degree colleges with Classes XI and XII
7. Educational Finance Form (EFF)	All revenue districts

#### 1.4 Concepts and Definitions

Some of the important concept and definition of terms used for data collection are given below.

**1.4.1 Urban area:** All areas which were identified as 'urban' at the time of the 1991 Census or subsequently notified to be so, are to be treated as urban.

**1.4.2 Rural area:** Areas which are not urban shall be treated as rural.

**1.4.3 Community Development (C.D.) Block:** The C.D. Block in this Survey connotes 'the Block under the community project administration'. In the States where the scheme of community development blocks is not in vogue, tahsil/taluk/mandals or their equivalent given in the 1991 Census will be the unit for collection of data.

**1.4.4 Village:** The term 'village' is used in the same way as in the 1991 Census. It represents a parcel of land whose boundaries are defined and settled for revenue purposes. A village with no population will be termed as 'bechirag' or 'deserted' or 'uninhabited'.

**1.4.5 Habitation:** A habitation is a distinct cluster of houses existing in a compact and contiguous manner with a local name; its population should not be less than 25 in the plains and not less than 10 in hilly or sparsely populated areas. In case a village has only one habitation, the population condition will not apply. A village may have one or more than one habitation except when it is a bechirag/deserted/uninhabited village. One of the habitations may bear the name of the village; this is generally known as the main habitation.

**1.4.6 Distance:** The distance between two habitations or between a school and a habitation is the convenient walking distance between the central points of the two habitations or between the school and the central point of a habitation.

If the aerial distance or the distance as the crow flies is one km between the central point of a

habitation and the school but the actual convenient walking distance by road or path is 1.5 km, then the walking distance between the two will be 1.5 km.

**1.4.7 Recognised School:** A recognised school is one in which the course(s) of study followed is/are prescribed or recognised by the Government (Central/State) or a University or a Board constituted by law or by any other agency authorised in this behalf by the Central or State Government and which satisfies one or more of the authorities, e.g., Directorate of Education, Municipal Board, Secondary Board, etc., with regard to its standard of efficiency. It runs regular classes and sends candidates for public examination, if any.

**1.4.8 School Stage:** The education pattern differs from State to State. The various combinations of classes of the school system constitute the primary, upper primary, secondary and higher secondary stages. Some of the States and Union Territories have provision for junior colleges, independent PUC and intermediate classes beyond the secondary stage. In this survey these classes/colleges will be considered along with the higher secondary stage.

**1.4.9 Sections:** The group of classes at the primary stage in a school constitutes the primary section; the classes at the upper primary stage constitute the upper primary section; and the classes at the secondary and higher secondary stages constitute the secondary and the higher secondary sections, respectively. A school with Classes I-X in Punjab has three sections — one primary section, one upper-primary section and one secondary section. Similarly, if there is a habitation, in Kerala, with a school having Classes I-IV and another school with Classes I-VII, then for the purpose of enumeration, this habitation has two primary sections and one upper primary section. However, the term 'section' has also been used for different divisions of a class to enumerate the facilities of blackboards, furniture for teachers and the students in the school.

**1.4.10 Management:** The authority which runs a school determines its type of management. It may be the government, a local body or a private body receiving government aid or not receiving government aid. Schools may, therefore, be classified according to their management as government schools, local body schools, private aided schools and private unaided schools.

**Government:** All schools run by the State Government, the Central Government, Public Sector Undertakings or Autonomous Organisations completely financed by the Government will be treated as government schools.

**Local Body:** All schools run by Municipal Corporations, Municipal Committees, Zilla Parishads, Panchayat Samitis, Cantonment Boards, etc., will be treated as local body schools.

**Private Aided:** A private aided school is one which is run by an individual or a private organisation and receives maintenance grant from a government or a local body.

**Private Unaided:** A private unaided school is one which is managed by an individual or a private organisation and does not receive maintenance grant either from a government or a local body.

#### 1.4.11 Type of School

**Boys' School:** A school is a 'school for boys' if boys are admitted to all classes and admission of girls is restricted to some specific classes only.

**Girls' School:** A school is a 'school for girls' if girls are admitted to all classes and admission of boys is restricted to some specific classes only.

**Co-educational School:** A school is 'co-educational' if boys and girls are admitted to all classes in the school.

**1.4.12 Trained Teacher:** A trained teacher is one who has successfully undergone a course of teacher training.

**1.4.13 Repeaters:** Those pupils who were in the same class in the previous year are to be treated as repeaters.

### 1.5 Sampling Design

**1.5.1** As mentioned in the preceding section, the SIF-2 and TIF schedules were canvassed on sampling basis. For this purpose a simple sampling scheme convenient in a large scale survey was adopted for selection of schools. The TIF schedule was filled by all the teachers of selected schools.

**1.5.2** For the purpose of sampling of schools, each

State/UT was stratified into rural and urban areas. Rural areas were further stratified into administrative regions. From each region, the requisite number of blocks were selected by using simple random sampling without replacement (SRSWOR). As far as urban areas are concerned, stratification was undertaken on the basis of the classification of towns/cities into six categories as per the 1991 Population Census. The requisite number of cities and towns belonging to Categories 2 to 6 were selected by using SRSWOR. In the case of class I cities, these being very big in size, three sampling procedures were adopted. In the case of Andhra Pradesh and West Bengal, lists of schools were available and the requisite number of schools from class I cities were selected by SRSWOR. In case of Bihar, Gujarat, Madhya Pradesh and Rajasthan, the class I cities were further stratified according to population and the requisite number of towns were selected by SRSWOR. The third sampling procedure was adopted in the case of each of the remaining States to divide each class I city into administrative zones and then the requisite number of zones were selected by SRSWOR from each of them.

**1.5.3** The sampling fraction for a specific category of schools was worked out by computing intra-cluster correlation coefficient by using the data of studies conducted under the District Primary Education Programme in the States of Uttar Pradesh and Punjab. It was used to arrive at the minimum sample size for 90 per cent precision in the estimates. The allocation of sampling units to each stratum was done by following the proportional allocation.

### 1.6 Organisational Set-up and Execution of the Survey

**1.6.1** The survey was conducted jointly by the Union Ministry of Human Resource Development (MHRD), the National Council of Educational Research and Training (NCERT), the National Informatics Centre (NIC), and the thirty-two State Governments and Union Territory Administrations. The MHRD provided financial and administrative support for the execution of the project. It also monitored the progress of the survey at the National level through the Steering Committee headed by the Union Education Secretary. In addition to this Committee, an Advisory Committee headed by the Director, NCERT was also constituted to help in organising the survey operation smoothly and to provide academic input at the National level. This

committee was represented by the major user organisations, the Registrar General of India, the Central Statistical Organisation, the National Sample Survey Organisation, and statisticians, educationists and the sample survey experts. The Head of the Department of Educational Survey and Data Processing (DES&DP) of the NCERT was the convener of both the Committees. The Steering Committee met four times and the Advisory Committee/Expert group had eight meetings during the course of execution of the Sixth AIES.

**1.6.2** The DES&DP undertook the planning activities such as development of schedules, drafting of guidelines for Survey Officers, development of sampling design, analysis plan and training strategy for the field staff. The Human Resource Development Informatics Division of the NIC coordinated and planned entire computerisation work of the survey. The responsibility of software development for data entry, validation, inventory management for all schedules and tabulation of VIF/UIF and TIF was undertaken by the HRDID of the NIC, while the generation of tabulation for SIF-1 was entrusted to the Regional Computer Centre, Calcutta, tabulation of SIF-2 to the Analytic & Modeling Division (AMD) of the NIC and for EFF to the State Unit of the NIC, Maharashtra. The DES&DP performed the job of software validation by intensive checking of the generated reports. Besides these, the DES&DP and the HRDID jointly monitored the progress of the survey activities every month.

**1.6.3** At the State/UT level, a temporary survey unit (SSU) was created in the Directorate of Education. The State Survey Unit was headed by a State Survey Officer who was assisted by a number of Assistant State Survey Officers (one for every 10 districts and part thereof), Statistical Assistant(s) (one for upto 10 districts and 2 for more than 10) and the other administrative staff. This Unit was assisted in each revenue district by a District Survey Officer (DSO), a Statistical Assistant and Block Education Officers (one for each C.D.Block/town). In the earlier AIESs, the staff deployed in SSUs worked on a full-time basis and their salary was paid from the survey budget, whereas in the Sixth Survey the staff in the State was paid honorarium from the Sixth Survey budget. They worked for the survey in addition to their normal duties. Each State Government and Union Territory Administration constituted a State level Advisory Committee to provide administrative and operational support to the State Survey Unit. This committee was headed by the State Education

Secretary. The Head, DES&DP of the NCERT and the Head, HRDID of the NIC were represented on this committee for better coordination and monitoring.

**1.6.4** After completing the pilot study in the State of Goa, the survey schedules were finalised in the meeting of the State Survey Officers. Then the training of the field staff was conducted by the faculty of the DES&DP. The responsibility of data collection from about 6 lakhs of villages/towns, from more than 8 lakhs of recognised schools and from teachers teaching in selected schools was shouldered by the staff of the State Survey Units. The DES&DP faculty frequently visited the States/UTs to help them in supervising the data collection. They also helped the States in expediting the process where the progress of data collection was slow. In an attempt to contain errors in the filled-in schedules, Block Education Officers were mainly required to scrutinise all the filled-in schedules; district-level officers, five per cent schedules; and the State Survey staff, one per cent schedules. The faculty of the DES&DP conducted scrutiny of those filled-in schedules which were already scrutinised by the field staff, on sample basis to reinforce scrutiny procedure. The next phase of the Survey was data transcription which was undertaken by the private data entry agencies commissioned by the State units of the NIC in most of the States and UTs. The DES&DP faculty helped the State NIC units in resolving various problems faced during this operation. These centres undertook data validation and State level tabulations with the help of the staff of the State Survey units and NIC State centres. The State tabulations were initially checked for consistency and correctness by applying exhaustive checking procedures by the staff of the SSUs and finally by the faculty of the DES&DP. The States/UTs for which data analysis was undertaken by the NIC HQ, the DES&DP faculty undertook the responsibility of checking of the tabulation for consistency and correctness. The job of National-level tabulation was undertaken by the HRDID and the Analytical Modeling Division of the NIC and checked by the DES&DP for correctness and consistency.

**1.6.5** In order to maintain uniformity in executing these activities, a number of documents were prepared and training programmes conducted for the staff of the State Survey units and the NIC State centres. These documents included the tabulation plan, the estimation procedure and the scrutiny/data validation instructions for data cleaning and tabulation

were prepared by the DES&DP and the software operation manuals were prepared by the NIC.

## 1.7 Computerisation of the Survey

### 1.7.1 Allocation of Location Codes

In an attempt to fulfil the first two objectives of the survey, all the eight schedules were developed in self coded format except the location codes. Codes for all administrative units of location like, Village, Town, Block, Tahsil, District and State were adopted from data of 1991 population Census to maintain uniformity and compatibility with other databases. New administrative areas created or modified between the Census date i.e. 31 March 1991 and the survey date i.e. 30 September 1993 were added to the list of location codes. Similarly, a unique five-digit school code was allotted for all schools within a district. Thus the school code was made as a unique code for future surveys for compatibility with other databases and to create time series data for schools to study their growth and progress. Since, administrative areas like, district, block, etc. undergo changes in geographical area, there is a need to make school code unique within a district. Therefore, the school code was made unique by prefixing the district code as on the date of the Sixth Survey to make it a seven-digit unique code as follows:

#### District Code (two digits) + school code (five-digits)

This seven-digit code for schools was adopted for all the schools included in the Sixth Survey. New schools established after the survey may be given unique codes by adopting a similar procedure.

A teacher filling TIF schedule was identified by the school code and the three digit serial number of the teacher within a school. No effort has been made to give a unique code for school teachers as information was collected on sample basis.

### 1.7.2 Handling of Forms

Systematic procedures for receipt and transfer of filled-in forms to Data Entry Agencies is an important activity of computerisation for the successful conduct of the survey. District Survey Officers and Block Education Officers were to adopt the following procedures.

- (i) Each type of the filled-in forms, viz. VIF, UIF, SIF-1, SIF-2, TIF, CIF, EFF and Educational Statistics — A Flash (EFS) were arranged as separate bundles at the Block/Town level. A bundle may consist of a maximum of 100 filled-in forms and it was given a serial number known as bundle.

- (ii) These bundles were transferred by Block/Town Education Officers to the District Survey Officers (DSOs) along with a covering letter.
- (iii) Receipt of all the filled-in forms according to the covering letter from BEOs were checked at District Office and in case of any discrepancy it was reconciled.
- (iv) All bundles of filled-in forms received from one Block/Town were clubbed together and given a serial number known as batch number.
- (v) These batches of bundles were transferred by the District Survey Officer to Data Entry Agency with a covering letter. Only after ensuring complete receipt of all the filled-in forms from all Blocks/Towns of district.
- (vi) The Data Entry Agency, on receipt of filled-in forms, was to check for completeness of data received and acknowledge the same to the District Survey Officer with a copy to the State Informatics Officer, NIC. In case there were any discrepancies, the same was to be intimated to the District Survey Officer.
- (vii) The raw data collected during the survey was first entered into the computer using Software developed in CLIPPER. The data files are then validated using software developed in Foxplus. For the purpose of generation of Block, District, State and National level reports of VIF/UIF, SIF-1/CIF, SIF-2 and TIF the Basic data are aggregated at the above mentioned levels. In case of VIF/UIF, SIF-2 and TIF the validated Basic Data files are imported to Oracle 7.0 platform where they are aggregated to generate reports at various administrative levels. In case of SIF-1/CIF schedule validated data files are aggregated at Block/District State/National levels using software developed in COBOL.

### 1.7.3 Checking and Correction of Errors

The Data Entry Agency entered data of all filled-in forms, viz. VIF, UIF, SIF-1, SIF-2, TIF, CIF, EFF and ESF in batches of districts. The data so entered was brought to the NIC State Centre.

- (i) A few runs of validation of data were done at NIC State centres. Validation involved checks for
  - (a) complete receipt of data,
  - (b) range checks for validity of codes of each data item.

- (c) correctness of totals,
  - (d) consistency of related items, and
  - (e) consistency between different forms like VIF/UIF with the 1991 Population Census data files, schools, schedules, etc.
- (ii) During the above stages computer printouts were produced known as error lists. These error lists were corrected by Officials of the Education Department of the States and NIC State centres.
- (iii) Various kinds of errors occurred at the final stage of tabulation. The data analysis involved generation of a large number of tabulations. Each table included two or more variables resulting in a complex data presentation. The data within the tables and between the tables were related, so errors crept in while tabulating the data. In order to overcome these errors, certain consistency checks based on interrelationship within and between tables were developed.
- (iv) Checking of tables were first done by State Education Department and finally by NCERT. A final clearance for generation of tabulation and transmission of data to the National level for further processing was done by the State Survey Officer.

#### 1.7.4 Data on Magnetic Media

Data of this survey are available on magnetic media and these are put onto CD-ROMs and floppies for dissemination to various users. The objective of preparing these CD-ROMs was to keep a permanent record of information in these databases on a magnetic media and distribute it to users. Further this information can be used as an effective tool for organisation of further educational surveys and studies and ensure the correctness of collection of information for each unit like a village and a school and develop a time series data. School codes developed for this survey can be used as standard school codes for all projects and studies to integrate data.

Two sets of CD-ROMs have been brought out. One set contains the statistical tables or reports generated. The second set contains databases of basic data collected for each unit and aggregated data created at macro level for various administrative units for generation of statistical tables.

- (A) CD-ROMs of statistical reports consist of text

reports and statistical tables. Statistical tables are available at National, State and District levels for four schedules, viz. VIF/UIF, SIF-1 and CIF and at National and State levels for SIF-2 and TIF. Entire National, State and District level reports in ASCII format comprising of almost 83,000 reports are converted into HTML format by software developed in C. Two CD-ROMs have been prepared: Volume I comprises reports of VIF/UIF, SIF-2 and TIF. Volume II contains reports of SIF-1 and CIF.

Entire information is in HTML format for access by the browser NETSCAPE 3.0 or higher versions. Information can be retrieved using a user-friendly menu. Statistical tables can be retrieved using a 'Hierarchical Tree Structure' menu.

Dynamic selection of State and District level reports have been done using software developed in JAVASCRIPT for obtaining the path of the particular report selected by the user at execution time. For each category of schedules, statistical tables are grouped and desired group is to be selected. Each group gives the table number and description. The desired table can be selected and the information can be retrieved. At all appropriate stages option for going back to previous stage or Home is provided. Pull down menus have been provided to get help of names of States, Districts, etc. Standard features of browser software can be used to 'cut' and 'paste' the desired information to a file or to take a printout of the whole table, etc.

(B) CD-ROMs of databases consist of basic data collected for each unit for six schedules, viz. VIF, UIF, SIF-1, CIF, SIF-2 and TIF. It also consists of databases of aggregated information of these schedules for various administrative units like Block, District, State and National levels, created for generation of statistical tables. In all 125 database files have been created.

Information is organised into a number of database files (.dbf) compatible to dbase-IV and other related RDBMS software. A user-friendly software has been provided to retrieve the information from basic data for each schedule, by selecting the relevant unit of data collection. This software is developed in Visual Fox Pro 5.0. In addition to this facility, a menu-driven information retrieval system has also been provided for the purpose of answering the various queries of individual users by providing different parameters from the basic data. This system will be limited to schedules of VIF, UIF and SIF-1 as they were canvassed on census basis and contain information

on core variables. The front end of the query system is Developer 2000 and the back end as Fox Pro 2.5.

### 1.8 Dissemination of Data

**1.8.1** In earlier surveys, the data were manually aggregated first at the block, and then at the district, State and National levels. These aggregated data were available for use at the respective headquarters. States and UTs printed analytical reports giving districtwise tabulated data. The NCERT published the national survey report giving statewide information and highlighting imbalances and other important features like rural and urban areas, school management, gender, etc. From the Third Survey onwards, the NCERT undertook publication of 'Provisional Statistics' much before the main report.

**1.8.2** In this Survey it was planned to publish some quick results based on the data collected through a separate schedule 'Educational Statistics — A Flash'. This schedule was filled at each block and town by compiling manually some basic data from the filled-in VIF, UIF, SIF-1 and CIF schedules. The report, titled 'Provisional Statistics' based on ESF was released in November 1995. In September 1996, a set of priority reports were also brought out to meet the requirement of the Ministry of Human Resource Development (Department of Education), Government of India, in connection with the discussions on the Ninth Five Year Plan.

**1.8.3** The data users of the Survey have been informed about the scope of the Survey and about the availability of results by submitting articles for publication in the *NIE Newsletter* and also in the *Indian Educational Review*. In addition to this, relevant information has been put out in the NCERT HOME PAGE on INTERNET.

**1.8.4** The data of each of the seven schedules for every State/UT are stored on the magnetic media at the corresponding State NIC centres. The tabulation plan for VIF, UIF, SIF-1 and CIF schedules provided aggregation at the block, district, State and National levels whereas in the case of SIF-2, TIF and EFF schedules, it provides estimates at the State and National levels. All the databases and tabulations will be available on the magnetic media for dissemination at the NCERT, NIC HQ and State NIC centres. The State and the National level tabulations of each schedule will also be available in the print form. The print form of the National-level tabulations of each schedule has been brought out in a phased

manner and in seven volumes as per the following scheme.

Vol. No.	Schedule	Aspect
I	VIF and UIF	Educational facilities in rural and urban areas
II	SIF-1	Schools and physical facilities
III	SIF-1	Teachers in schools
IV	SIF-1	Enrolment in schools
V	SIF-1 and CIF	Educational inputs and facilities in schools
VI	SIF-2	Age-wise enrolment, repeaters, incentive schemes, etc., in schools
VII	TIF	Teachers' qualifications and their service conditions

It was also planned to publish two analytical reports, viz., 'Selected Statistics' and the 'Main Report'. The former, a compendium to the latter, has already been published in July 1998, whereas this report is the 'Main Report' which covers all the aspects. A CD-ROM containing the National, State and district — level tabulations has been provided with this report. In addition, a four-page brochure titled 'Educational Profile', giving Statewise statistics, has also been published to provide important aspect of school education at a glance.

### 1.9 Administrative Bottlenecks and Limitations

The completion of the Survey has been delayed because of the following reasons.

- (i) The Survey time schedule was worked out at the planning stage for canvassing three schedules as was done in the case of the Fifth AIES. Finally, the quantum of work at every stage increased substantially due to the inclusion of many more data items than in the Fifth AIES.
- (ii) The first meeting of the Steering Committee was held in August 1993 to decide the scope of the Sixth AIES. The meeting of the State Survey Officers was held in December 1993 to finalise the tools of data collection and the strategy of implementation of the Survey. It is, therefore, evident that time for advance preparation was not available for the Sixth Survey which had 30 September 1993 as the date of reference.

- (iii) The time for data collection was not appropriate as it was started in the month of February in most of the states. DEOs and BEOs were busy in conducting examinations during this period. Thereafter, the schools were closed. This resulted in delay.
- (iv) In the earlier AIESs, the State Survey Officers and the other State-level officers worked for the Survey on a full-time basis. In the Sixth AIES, the staff in the states worked for the Survey in addition to their normal duties. In this situation, the Survey work did not get that overriding priority which was available in the preceding AIESs. Under this arrangement, the incidence of transfer of officers in the states was very high, thereby making training ineffective, specially when specialised jobs such as data entry and data validation were implemented for the first time.
- (v) The first phase of the Survey involved training the field staff, data collection on more than 1000 items through self-coded tools, manual scrutiny of filled-in schedules and inventory control of data. In the earlier AIESs, the schedules were not self-coded. The respondents in the Sixth AIES were not experienced in filling up the self-coded schedules. The workload of manual scrutiny increased manifold because of inclusion of large number of data items resulting in lengthy lists of checks for consistency of data. Inventory control being adopted for the first time, the block, district and state level

officers were inexperienced, lacked computer awareness, had an inadequate concept of coding, and were ignorant of the implications of non-adherence of the prescribed procedures of inventory control. The quantum of these types of work was grossly underestimated in the planning of the Survey.

- (vi) The second phase of the Survey involved data transcription through private agencies and data validation at the state units of NIC with the help of the staff of the State Survey unit. Hiring of data transcription agencies by the State NIC units, underestimation of workload by some agencies, discontinuation of work half-way by some of them, designing of the software at the NIC headquarters and distributed processing at the NIC State centres further enhanced the problem.
- (vii) In an attempt to meet most of the users' requirement, about 1,600 statistical reports were planned, and generation of these formed the third phase of the Survey. These reports were to be checked by officers of the SSUs and were to be finally approved by the NCERT after applying comprehensive checks ensuring consistency of these reports. Generation of these reports and their checking was a mammoth task which was grossly underestimated at the stage of planning. It took some time for the NIC to equip their State centres with suitable hardware. □

## Chapter 2

### HABITATIONS IN RURAL AREAS

#### 2.1 Habitation by Size of Population

**2.1.1** For the assessment of the availability of educational facilities in rural areas, the habitation has been the smallest unit in all the AIESs. This unit has been defined as a distinct cluster of contiguous houses existing in a compact manner, with a local name. The habitation is a part of a 'revenue village' which is the smallest unit of administration in a Taluk/Block/Tahsil. The revenue village has well demarcated boundaries with a piece of land, and has its own place in the Census. The village may have one or more cluster of houses, or it may even not have any house at all. Accordingly, a village has one or more habitations in it or it may be a habitationless village. As in the previous surveys, in this Survey also, a habitation with a population 10 or more in desert/hilly/sparsely populated areas, and with 25 or more population in plain areas has been identified as a separate habitation. The areas having less than the above-mentioned population have been merged in the nearest habitation of the same village. However, where a village has only one habitation, the criteria of minimum population has been ignored.

**2.1.2** As per the Sixth Survey, 10,60,612 habitations with a total population of 65,96,91,048 have been identified in 5,86,465 inhabited villages in the country. There were 9,81,864 habitations as per the Fifth Survey (30.9.1986). Thus there has been an increase of 8.02% in rural habitations during the intervening period of the Fifth and Sixth Surveys, while this increase was only 1.78% between the Fourth and Fifth Surveys. Of the 10,60,612 rural habitations in the country, 7119 (0.67%), 52,928 (4.99%) and 1,25,046 (11.79%) are in the population slabs of 5000 and above, 2000-4999 and 1000-1999, respectively. Further, 2,13,509 (20.09%) habitations have a population between 500-999, and the remaining 6,62,460 (62.46%) habitations have a below 500 population. This indicates that the majority of habitations are of small size, and the number of habitations with population 5000 and above is small. This may be due to the fact that most of the units having such a large population have already been declared as urban areas.

#### STATEMENT 2.1

##### Habitations in Various Population Slabs and Their Population

Population Slab	No. of Habitations	% to Total Habitation	Population	% with Total Population
1	2	3	4	5
5000 and above	7,119	0.67	5,16,83,856	7.83
2000 - 4999	52,928	4.99	15,02,68,300	22.78
1000-1999	1,25,046	11.79	17,06,11,891	25.86
500 - 999	2,13,059	20.09	14,92,87,852	22.63
300-499	1,82,438	17.20	7,00,27,151	10.62
100-299	3,19,397	30.11	5,91,30,415	8.96
Below 100	1,60,625	15.14	86,81,583	1.32
Total	10,60,612	100.00	65,96,91,048	100.00

**2.1.3** As regards people living in rural areas, 7.83% population is residing in the habitations of the biggest size having 5000 and above population, but these constitute only 0.67% of the total habitations. There are 16.78% habitations with population 1000 to 4999, and the majority of the rural population, 48.64% to be precise, reside in them. There are 20% habitations in the slab 500-999, where 22.63% of the rural population reside. The percentage of habitations with population 100 to 499 is 37.31, and about 20% of the rural population reside in them. The smallest-sized habitations with less than 100 population constitute 15.14% of the total population, where only 1.32% rural population reside.

**2.1.4** The State of Uttar Pradesh has the largest number (2,12,125) of habitations, followed by Bihar (1,09,058) and Madhya Pradesh (1,02,276). At the time of the Fifth AIES also, Uttar Pradesh had the largest number of habitations, followed by Madhya Pradesh and Bihar. The UT of Lakshadweep has the minimum (15) habitations, and next in ascending order are Chandigarh (36) and Daman & Diu (67) and the same were the ranks of these UTs during the Fifth AIES. Among the States, only two, Goa and Mizoram, have less than 1000 habitations; Arunachal Pradesh, Manipur, Nagaland and Sikkim have less than 5,000 habitations each; and Haryana, Kerala, Meghalaya and Tripura are the States having 5,000 to 10,000 habitations each.

**2.1.5** The size of habitation in terms of population varies from State to State. There is preponderance of large-sized habitations in some States while in some others small-sized habitations are in preponderance. In Gujarat (37.22%), Haryana (57.13%), Kerala (79.85%), Punjab (38.76%), Chandigarh (72.22%), Delhi (77.86%) and Lakshadweep (80%), more than one-third habitations have more than 1000 population, while this percentage at the National level is only 17.45. On the other hand, 62.46 per cent habitations in the country have less than 500 population, and the States/UTs of Arunachal Pradesh (90.45%), Assam (63.17%), Himachal Pradesh (95.25%), Jammu & Kashmir (74.76%), Madhya Pradesh (64.46%), Manipur (71.89%), Meghalaya (90.24%), Orissa (74.85%), Rajasthan (66.19%), Sikkim (83.72%), Tripura (77.14%), Uttar Pradesh (66.07%), West Bengal (65.08%), A&N Islands (77.53%), Dadra & Nagar Haveli (90.18%) have such habitations more than the national average.

## 2.2 Habitations per Village

There are 10,60,612 habitations in the country located in 5,86,465 inhabited villages. Thus, on an average, each village has 1.81 habitations, which is little more than that of Fifth AIES. Among the states, Tripura (7.95) has the maximum habitations per village, followed by Kerala (6.31) and Sikkim (3.19). Besides, the states of Andhra Pradesh (2.36), Goa (2.18), Himachal Pradesh (2.06), Jammu & Kashmir (2.30), Tamil Nadu (2.85), Uttar Pradesh (1.88) and West Bengal (2.55) also have more habitations per village than the national average. Among the UTs, only three, viz., Dadra & Nagar Haveli (6.88), Daman & Diu (2.79) and Lakshadweep (2.14), have more habitations per village than the national average of 1.81.

## 2.3. Habitations Predominantly Populated by Scheduled Castes

Habitations having 50% or more Scheduled Caste population have been termed as 'Predominantly populated by Scheduled Castes' ('SC habitation'). There are 1,20,517 SC habitations in the country, while this number was only 77,800 at the time of the Fifth AIES, showing a growth of about 55% of such habitations between the two AIESs. These (1,20,517) habitations constitute 11.36 per cent of the total habitations in the country. Meghalaya, Mizoram, Nagaland, A&N Islands and Lakshadweep do not have a single SC habitation. Himachal Pradesh (20.93%), Punjab (13.95%), Tamil Nadu (14.94%), Uttar Pradesh (14.17%), West Bengal (26.52%), Delhi (15.86%), and Pondicherry (33.77%) have a larger proportion of SC habitations than the national average of 11.36%.

## 2.4. Habitations Predominantly Populated by Schedule Tribes

**2.4.1** Habitations with 50% or more of Scheduled Tribe population have been taken as 'Predominantly Populated by Scheduled Tribes' ('ST habitation'). There are 1,94,733 (18.36%) ST habitations in the country, while this number was 1,64,129 at the time of the Fifth AIES. This shows that between 1986 and 1993, the number of ST habitations has increased by 18.64%. Further, Goa, Haryana, Punjab, Chandigarh and Pondicherry do not have even a single such habitation. However, all the habitations in Nagaland and Lakshadweep are ST habitations. Of the remaining States, Andhra Pradesh (20.94%), Arunachal Pradesh (92.36%),

Assam (21.42%), Bihar (22.32%), Gujarat (26.73%), Madhya Pradesh (42.07%), Manipur (66.22%), Meghalaya (98.57%), Mizoram (97.16%), Orissa (43.29%), Rajasthan (18.93%), Sikkim (26.01%), and Tripura (61.27%) have a higher proportion of such

habitations than the national average (18.36%). The Union Territories of A&N Islands (28.45%), Dadra & Nagar Haveli (91.41%) and Daman & Diu (29.89%) also have a higher proportion of ST habitations than the national average.

## STATEMENT 2.2

**Habitations Predominantly Populated by Scheduled Castes and Scheduled Tribes**

Population Slab	Habitations Predominantly Populated by					
	All Habitations		SC		ST	
	Number	% *	Number	% *	Number	% *
1	2	3	4	5	6	7
5000 & above	7,119	0.67	231	0.19	152	0.08
2000-4999	52,928	4.99	2,712	2.25	1,672	0.86
1000-1999	1,25,046	11.79	9,287	7.71	8,026	4.12
500-999	2,13,059	20.09	21,752	18.05	26,383	13.55
300-499	1,82,438	17.20	22,487	18.66	34,491	17.71
100-299	3,19,397	30.11	42,389	35.17	80,790	41.49
Below 100	1,60,625	15.14	21,659	17.97	43,219	22.19
Below 500	6,62,460	62.46	86,535	71.80	1,58,500	81.39
Total	10,60,612	100.00	1,20,517 (11.36%)**	100.00	19,47,33 (18.36%)**	100.00

\* Percentage with respect to the total in the preceding column.

\*\* Figures in parentheses are the percentages against the total of Column 2.

**2.4.2** Generally, habitations predominantly populated by Scheduled Castes and Scheduled Tribes are of smaller size than the other habitations. In the category of 'All habitations', 17.45% habitations have 1000 or more population, while this percentage is 10.15 and 5.06 for SC and ST habitations, respectively. In the next category of habitations also (with 500 to 999 population), the percentage of 'All habitations' (20.09) is more than SC (18.05) and ST (13.55) habitations. But the situation is reversed in small-sized habitations with population less than 500. In the population slab 300 to 499, the percentage of SC habitations (18.66) is more than that of ST and 'All habitations', their respective percentages being 17.71 and 17.20. In the next slab of population, viz., 100 to 299, the percentage of ST habitations is the highest, followed by SC habitations and 'All habitations'. In the slab of less than 100

population, the percentage of ST habitations (22.19) is more than that of SC (17.97) and 'All habitations' (15.14). In the habitations having less than 500 population, the percentage of ST habitations is the highest (81.39), followed by SC habitations (71.80) and 'All habitations' (62.46).

**2.4.3** Since the majority of ST habitations (63.68%) have less than 300 population, it may not be economically viable to open new schools in them in the near future. In the case of SC habitations, 53.14% such habitations have less than 300 population and it might be difficult to make provision of formal system of education in them also, in the near future. However, in such small SC and ST habitations provision of non-formal education centres may be made to enable children of these areas to get the minimum level of education. □

## Chapter 3

### PRIMARY EDUCATION

#### 3.1 Introduction

**3.1.1** The Directive Principle of the State Education Policy embodied in Article 45 of the Indian Constitution states that the State shall endeavour to provide within a period of ten years from the commencement of the Constitution, free and compulsory education for all children until they complete the age of 14 years. Since 1950, concerted efforts have been made to achieve this goal. There has been an enormous increase in the number of schools over the years. However, the goal of achieving universalisation of elementary education (UEE) has eluded us so far. In the National Policy on Education 1986 (with modifications undertaken in 1992) emphasis has been laid on achieving the target of UEE by the year 2000.

**3.1.2** There are three prerequisites for achieving the goal of UEE, viz., provision of schooling facilities within a convenient walking distance; to bring

children of school-going age to school; and to retain them in school. In this chapter availability of schools with primary stage within and outside the habitations and the rural population served by them have been discussed. Efforts have also been made to describe enrolment in Classes I-V, particularly of SC, ST and girls. Besides, information has been given about primary sections, teachers in primary schools, teacher-pupil ratio, age-specific and net enrolment ratios.

#### 3.2 Growth of Schooling Facilities since the First AIES

**3.2.1** In this section growth of schooling facilities at primary stage has been discussed in terms of percentage of population served by primary sections within the habitations themselves and within a convenient walking distance of one mile/kilometre during the first five AIESs.

STATEMENT 3.1  
Percentage of Population Served by Primary Sections during the First Five AIESs

Survey	Percentage of Population Served by Primary Sections	
	Within Habitation	Upto 1 km
1	2	3
First	59.75	83.09*
Second	71.48	94.96*
Third	76.12	90.34
Fourth	78.53	92.82
Fifth	80.38	94.45

\* upto one mile

**3.2.2** According to the First AIES (as on 31 March 1957), nearly three-fifths of the rural population had primary education facilities within the habitations themselves whereas 83.09% of the population had these facilities either within the habitation or in the neighbouring habitations within a distance of one mile (1.6 kilometre). The Second AIES was conducted after a span of eight years with reference date as

31 March 1965. During this period many new schools were opened. As a result the percentage of population served by primary sections within one mile rose to 87.23, and that served within the habitations themselves shot upto 71.48.

**3.2.3** At the time of the Third Survey (31 December 1973), although the distance criterion was reduced from one mile to one kilometre, the percentage of

population that had access to primary education within one kilometre increased to 90.34. This included 76.12% of the population that enjoyed these facilities within the habitations themselves. The Fourth AIES (30 September 1978) also showed an increase in the proportion of population served by primary sections. The percentage of population that had these facilities within one kilometre and within the habitations themselves rose to 92.82 and 78.53, respectively. The corresponding percentages at the time of the Fifth AIES (30 September 1986) were 94.45 and 83.84, respectively, showing a slight increase over the Fourth Survey figures.

The above discussions clearly indicate that there had been an increasing trend in the provision of schooling facilities at the primary stage during the intervening period between the two successive surveys.

### **3.3 Rural Habitations and Population Served**

**3.3.1** The primary stage comprises Classes I to V in almost all the States and Union Territories except Assam, Goa, Gujarat, Karnataka, Kerala, Maharashtra, Meghalaya, Mizoram, Nagaland, Dadra & Nagar Haveli, Daman & Diu and Lakshadweep, where this stage comprises Classes I to IV. In West Bengal, although the State has adopted the national pattern of Classes I-V, yet more than 95% primary schools are still running with Classes I to IV while Class V is part of an upper primary/secondary/higher secondary school. In such a situation, if a habitation does not have any primary school but has a school with the lowest Class as V, that habitation has been considered as being without the primary schooling facility.

**3.3.2** There are 10,60,612 habitations in the country, as recorded in the Sixth AIES, with a total population of 65,96,91,048. Nearly half of the habitations have primary education facilities within themselves which cater to 77.81% of the total rural population. Another 33.57% of the habitations, covering 15.95% of the rural population, are served by primary sections within a walking distance of one kilometre. Thus, 93.76% of the rural population is served either within the habitation or in the neighbouring habitation within one kilometre. At the time of the Fifth Survey, this percentage was 94.45. This shows a slight decrease in the percentage of population served within one kilometre during the intervening period between the two surveys.

**3.3.3** As per the Government policy, a habitation should have a minimum population of 300 for

opening a primary school. There are 5,80,590 habitations with a population of 300 or more accounting for a population of 59,18,79,050. Of these, 93.03% habitations, constituting 95.81% of the population, have access to primary schooling facility upto a distance of one kilometre. These include 73.24% of the habitations, covering 83.51% of the population, having this facility within the habitations themselves. Further, 6.97% of the habitations in this category still do not have primary schooling facility within one kilometre, including 2.09% not having upto two kilometres.

**3.3.4** Among the States, Andhra Pradesh (91.86%), Gujarat (96.03%), Haryana (91.04%), Karnataka (92.08%), Maharashtra (91.47%) and Mizoram (93.92%) have more than 90% of the habitations with population 300 or more which have primary schooling facilities within the habitations themselves whereas these facilities are available in less than 60% of such habitations in Tripura (56.06%), Uttar Pradesh (49.62%), West Bengal (54.76%), Dadra & Nagar Haveli (50.66%), and Daman & Diu (59.57%).

These facilities will now be discussed for the habitations and their population under various population slabs (see Statements 3.2 and 3.3 on page 18).

#### **3.3.5 Population Slab "5000 and Above"**

Of the 7,119 habitations in this slab, 96.26% covering 96.19% of the population have primary sections within the habitations themselves. Whereas 99.20% of the habitations catering to 99.26% of the population have these facilities within a distance of one kilometre. Thus, it can be concluded that universal provision of primary schooling facilities has almost been achieved as far as this population slab is concerned.

#### **3.3.6 Population Slab "2000-4999"**

There are 52,928 habitations in this slab which account for 22.78% of the total rural population. Of these, 93.57% habitations catering to 93.87% of the population have primary education facilities within themselves. Another 4.68% of the habitations, covering 4.46% of the population, have access to primary sections within one kilometre. Thus, the habitations of this population slab can also be considered as nearly having universal provision for primary education.

#### **3.3.7 Population Slab "1000-1999"**

In this population slab, there are 1,25,046

## STATEMENT 3.2

## Percentage of Habitations Served by Primary Sections

Population Slab	Number of Habitations	% of Habitations Served by Primary Sections		
		Within the Habitation	Within 1 km	Within 2 km
1	2	3	4	5
5000 & above	7,119	96.26	99.20	99.72
2000 - 4999	52,928	93.57	98.25	99.37
1000 - 1999	1,25,046	88.31	97.20	99.13
1000 & above	1,85,093	90.12	97.58	99.22

Total	10,60,612	49.79	83.36	94.08

## STATEMENT 3.3

## Percentage of Rural Population Served by Primary Sections

Population Slab	Population of Habitations in the Slab	% of Population Served by Primary Sections		
		Within the Habitation	Within 1 km	Within 2 km
1	2	3	4	5
5000 & above	5,16,83,856	96.19	99.26	99.74
2000 - 4999	15,02,68,300	93.87	98.33	99.40
1000 - 1999	17,06,11,891	88.87	97.32	99.16
1000 & above	37,25,64,047	91.90	97.99	99.34
500 - 999	14,92,87,852	75.54	94.01	98.29
300 - 499	7,00,27,151	55.90	88.01	96.36
100 - 299	5,91,30,415	30.66	77.66	92.64
Below 100	86,81,583	9.75	64.04	85.35
Below 300	6,78,11,998	27.98	75.92	91.70
Total	65,96,91,048	77.81	93.76	98.00

habitations which cover 25.86% of the rural population. Of these, 97.20% have primary education facilities within one kilometre, including 88.31% habitations enjoying these facilities within themselves. Population-wise, the corresponding figures are 97.32% and 88.87%, respectively.

### 3.3.8 Population Slab "500-999"

About one-fifth of the total habitations fall under this slab. These constitute 22.63% of the total rural population. More than three-fourths of the population

in this category are served by primary sections within the habitations themselves. Another 18.47% of the population has these facilities in the neighbouring habitations upto one kilometre. There are 3,846 (1.81%) habitations accounting for 1.71% of the population in this slab that do not have these facilities even upto two kilometres.

### 3.3.9 Population Slab "300-499"

There are 1,82,438 (17.20%) habitations in this slab, which constitute 10.62% of the rural population.

Nearly 56% of the population of this slab is served by primary sections within the habitations themselves. The percentage of population having these facilities either within the habitation or in the neighbouring habitations within one kilometre is 88.01. As many as 6,849 (3.75%) habitations, constituting 3.64% of the population, have these facilities beyond two kilometres.

### 3.3.10 Population Slab "Below 300"

Out of 4,80,022 habitations in this slab, only 21.42%, constituting 27.98% of the population, have primary education facilities within the habitations themselves. But these facilities are available to 75.92% and 91.70% of the population in the neighbouring habitations at a distance of one kilometre and two kilometres, respectively. More than one-tenth of the habitations

accounting for 8.30% of the population in the slab do not have these facilities even upto two kilometres.

### 3.3.11 Habitations and Population Not Served

Statement 3.4 reveals that 16.64% of the habitations covering 6.24% of the rural population are not served by primary sections within one kilometre. Among the States, the highest percentage of unserved habitations is recorded in Arunachal Pradesh (52.95%). Next in order comes Himachal Pradesh (40.56%), followed by Sikkim (25.52%), Rajasthan (25.42%), Tripura (24.52%), Meghalaya (23.92%), Uttar Pradesh (20.13%), Jammu & Kashmir (19.52%) and Madhya Pradesh (18.25%). The percentage of population not served by primary sections within one kilometre ranges from 10.32 in Kerala to 24.03 in Himachal Pradesh.

STATEMENT 3.4

#### Unserved Habitations and Their Population in Some Selected States

Not Served with a Primary Section within 1 km						
State	Habitations	%	Population	%	% of Hab. with NFE Centres	
1	2	3	4	5	6	7
1. Arunachal Pradesh	2,030	52.95	1,77,980	22.13	1.63	
2. Assam	5,879	14.28	24,29,176	11.39	8.59	
3. Himachal Pradesh	14,197	40.56	12,05,155	24.03	0.03	
4. Jammu & Kashmir	2,962	19.52	5,03,750	7.63	4.96	
5. Kerala	1,554	17.77	22,87,998	10.32	1.29	
6. Madhya Pradesh	18,664	18.25	34,57,813	6.45	15.49	
7. Manipur	410	12.17	82,822	5.88	12.68	
8. Meghalaya	1,573	23.92	1,89,983	12.03	10.24	
9. Orissa	12,859	17.58	17,96,877	6.26	14.81	
10. Rajasthan	16,259	25.42	26,65,588	7.45	3.81	
11. Sikkim	359	25.52	68,957	16.56	0.00	
12. Tripura	1,668	24.52	3,71,430	15.00	0.00	
13. Uttar Pradesh	42,704	20.13	1,32,68,752	11.40	8.85	
India	1,76,523	16.64	4,11,47,566	6.24	5.93	

In the present Survey information has also been collected about availability of NFE centres in those habitations which do not have facilities for primary education within a walking distance of one kilometre. It is found that out of 1,76,523 such habitations, 10,473 (5.93%), accounting for 9.16% of the unserved

population, have provision for NFE centres. Among the states, Madhya Pradesh tops the list with 15.49% of the unserved habitations have NFE centres within themselves, followed by Orissa (14.81%), Manipur (12.68%), Meghalaya (10.24%), Uttar Pradesh (8.85%) and Assam (8.59%).

### 3.4 Schooling Facilities in Habitations Predominantly Inhabited by Scheduled Castes

**3.4.1** There are 1,20,517 rural habitations predominantly inhabited by Scheduled Castes. These habitations cover a population of 5,39,93,578, which is 8.18% of the total rural population in the country. Of these, 82.30% habitations have provision for primary education within one kilometre, including 37.03% habitations having this facility within

themselves. Populationwise, the corresponding figures are 91.32% and 64.27%, respectively. This shows that there is no discernible difference between general habitations and the habitations predominantly inhabited by Scheduled Castes as far as the facility for primary education within a walking distance of one kilometre is concerned. The following paragraphs will give these facilities population-slabwise.

STATEMENT 3.5

#### Percentage of Habitations Predominantly Inhabited by Scheduled Castes Served by Primary Sections

Population Slab	Number of Habitations	% of Habitations Served by Primary Sections		
		Within the Habitation	Within 1 km	Within 2 km

Total	120517	37.03	82.30	94.49

STATEMENT 3.6

#### Percentage of Population of Habitations Predominantly Inhabited by Scheduled Castes Served by Primary Sections

Population Slab	Population of Habitations in the Slab	% of Population Served by Primary Sections		
		Within the Habitation	Within 1 km	Within 2 km
1	2	3	4	5
5000 & above	16,65,492	92.78	99.01	99.64
2000 - 4999	74,28,929	92.01	98.40	99.51
1000 - 1999	1,24,04,751	84.39	96.63	99.03
1000 & above	2,14,99,172	87.67	97.42	99.24
500 - 999	1,49,47,171	68.03	92.80	98.12
300 - 499	85,65,507	45.20	87.17	96.44
100 - 299	78,00,425	22.19	79.64	94.19
Below 100	11,81,303	6.81	68.74	89.03
Below 300	89,81,728	20.17	78.21	93.51
Total	5,39,93,578	64.27	91.32	97.54

### 3.4.2 Population Slab "1000 and Above"

Out of 12,230 habitations in this slab, 11,852 (96.91%) habitations, covering 97.42% of the population, have primary education facilities within one kilometre. These include 10,452 (85.46%) habitations, constituting 87.67% of the population, which enjoy these facilities within the habitations themselves. These habitations can be considered as almost having achieved the goal of universal provision of primary education.

### 3.4.3 Population Slab "500-999"

There are 21,752 habitations with a population of 1,49,47,171 (27.68%) in this slab. About 68% of the population has primary education facilities within the habitations themselves. Another 14.77% has these facilities within one kilometre. Thus, 92.80% of the population in this slab has the facilities either within the habitation or in the neighbouring habitations within one kilometre. Of the total habitations in the slab, 2.02%, covering 1.88% of the population, do not have these facilities even upto two kilometres.

### 3.4.4 Population Slab "300-499"

This population slab has 22,487 habitations, which cover 15.86% of the total population in the habitations predominantly inhabited by Scheduled Castes. The Survey figures reveal that 87.17% of the population has facilities for primary education within one kilometre, including 45.20% of the population that enjoy these facilities within the

habitations themselves. Further, 3.63% of the habitations, accounting for 3.56% of the population, have schools with primary stage beyond two kilometres.

### 3.4.5 Population Slab "Below 300"

There are 64,048 habitations in this slab which account for a population of 89,81,728, i.e. 16.63% of the total population. Of these, 74.47% habitations have access to primary education within one kilometre, including 15.31% within the habitations themselves. Populationwise, the corresponding figures are 78.21% and 20.17%, respectively. Further, 8.23% of the habitations covering 6.49% of the population do not have these facilities even upto two kilometres.

## 3.5 Schooling Facilities in Habitations Predominantly Inhabited by Scheduled Tribes

**3.5.1** There are 1,94,733 (18.36%) habitations, accounting for 9.72% of the rural population, predominantly inhabited by Scheduled Tribes. About 89% of the population is served by primary sections within a walking distance of one kilometre, including 71.43% having these facilities within the habitations themselves. Nearly 5% of the population, inhabited in 21,201 (10.89%) habitations, does not have these facilities within two kilometres. In the following paragraphs there will be discussions about the availability of primary stage facilities population-slabwise.

## STATEMENT 3.7

Percentage of Habitations Predominantly Inhabited by Scheduled Tribes Served by Primary Sections

Population Slab	Number of Habitations	% of Habitations Served by Primary Sections		
		Within the Habitation	Within 1 km	Within 2 km

## STATEMENT 3.8

## Percentage of Population of Habitations Predominantly Inhabited by Scheduled Tribes Served by Primary Sections

Population Slab	Population of Habitations in the Slab	% of Population Served by Primary Sections		
		Within the Habitation	Within 1 km	Within 2 km
1	2	3	4	5
5000 & above	103,8,298	97.01	98.86	100.00
2000 - 4999	45,21,261	94.82	98.49	99.45
1000 - 1999	1,04,65,346	92.50	97.51	98.86
1000 & above	1,60,24,905	93.45	97.87	99.10
500 - 999	1,79,01,979	86.50	95.30	98.14
300 - 499	1,30,89,060	70.11	88.68	95.62
100 - 299	1,46,50,668	39.90	75.07	89.70
Below 100	24,52,839	12.95	58.09	75.58
Below 300	1,71,03,507	36.04	72.64	88.10
Total	6,41,19,451	71.43	88.55	95.19

**3.5.2 Population Slab "1000 and Above"**

This population slab has 9,850 (5.06%) habitations, which cover one-fourth of the total Scheduled Tribes population in the rural areas. About 98% of the population has primary education facilities within one kilometre, including 93.45% population that enjoy these facilities within the habitations themselves. This shows that the habitations in this slab have almost achieved the universal provision of primary education.

**3.5.3 Population Slab "500-999"**

Out of 26,383 (13.55%) habitations in the slab, 25,059 (94.98%) habitations constituting 95.30% of the population have access to primary education within a walking distance of one kilometre. These include 22,616 (85.72%) habitations, accounting for 86.50% of the population, having these facilities within the habitations themselves.

**3.5.4 Population Slab "300-499"**

There are 34,491 habitations in this slab which cover 20.41% of the rural Scheduled Tribes population. Slightly more than 70% of the population in the slab is served by primary sections within the habitations themselves. These facilities are available to 88.68% of the population within a distance of one kilometre.

**3.5.5 Population Slab "Below 300"**

The majority of habitations (63.68%) predominantly

inhabited by the Scheduled Tribes population fall under this slab. These cover 26.67% of the population. The percentage of the population served by primary sections within one kilometre is 72.64, including 36.04% enjoying these facilities within the habitations themselves.

**3.6 Statewise Analysis of Schooling Facilities**

**3.6.1** The Survey figures reveal that the States of Gujarat, Haryana, Punjab, Tamil Nadu, Daman & Diu, and Lakshadweep have made provision of primary education facilities within one kilometre to more than 93% of their rural habitations, accounting for more than 98% of the population. From this, it can be concluded that these States have almost achieved the universal provision of primary education which is the first step towards achieving the goal of universalisation of elementary education. Besides, there are some other States such as Andhra Pradesh (97.62%), Bihar (95.51%), Goa (97.01%), Karnataka (96.58%), Maharashtra (95.82%), Mizoram (95.77%), Nagaland (95.05%), Chandigarh (96.07%) and Pondicherry (97.68%) which are not far behind as more than 95% of their population is served by primary sections within one kilometre. On the other hand, there are some States like Arunachal Pradesh (77.87%), Himachal Pradesh (75.97%), Sikkim (83.44%) and A&N Islands (81.75%) which are lagging far behind in providing facilities for primary education to the children of school-going age within one kilometre. This is perhaps due to the smaller size of the habitations in these States and to the fact that

opening schools in these unserved habitations is not economically viable.

**3.6.2** As regards provision of primary education facilities within a walking distance of one kilometre to the habitations predominantly inhabited by Scheduled Castes, the Union Territories of Chandigarh and Daman & Diu top the list with availability of these facilities to all their population. However, both the Union Territories have only three habitations each. Next in order come Tamil Nadu in which 6,657 (98.70%) habitations covering 99.59% of the population have such facilities, followed by Punjab (99.32%) and Manipur (98.37%) with more than 98% of their population served. Besides, Andhra Pradesh (97.17%), Arunachal Pradesh (97.61%), Goa (95.82%), Gujarat (96.27%), Karnataka (95.13%), Sikkim (97.69%), and Pondicherry (96.72%) have provision of such facilities for more than 95% of their rural population. Himachal Pradesh is found to be the most backward State as only 67.43% of its population is served by primary sections within one kilometre. There are no habitations predominantly inhabited by Scheduled Castes in Meghalaya, Mizoram, Nagaland, A & N Islands and Lakshadweep.

**3.6.3** Among the States with habitations predominantly inhabited by Scheduled Tribes, Delhi has provided facilities for primary education to all

its three habitations. While in Tamil Nadu and Lakshadweep almost cent per cent of their population is served by primary sections within one kilometre. Gujarat (97.70%), Karnataka (95.40%), Mizoram (96.22%), Nagaland (95.05%), and Daman & Diu (97.56%) have these facilities for more than 95% of their population. Arunachal Pradesh (78.13%), Himachal Pradesh (76.65%), Kerala (75.96%), Sikkim (79.62%) and Tripura (78.75%) are among the backward States with less than 80% of their population is served by primary sections within one kilometre. Goa, Haryana, Punjab, Chandigarh and Pondicherry, however, do not have any habitation predominantly inhabited by Scheduled Tribes.

### 3.7 Villages with and without Schooling Facilities

**3.7.1** Out of 5,86,465 villages in the country, 71.18% have primary schooling facilities within themselves. In fact, the problem of villages not having schools with the primary stage is not so serious in the case of the bigger villages as more than 92% of the villages with population "1000 or more" have primary sections in them. The problem becomes acute for villages of smaller size as only 29.98% of the villages with population "below 300" and 67.53% with population "300-499" have access to primary education within themselves.

## STATEMENT 3.9

### Villages Not Having Primary Schooling Facilities in Some Selected States

State	Villages Not Having Schools with Primary Stage	
	Number	Percentage
1	2	3
<b>MOST FORWARD</b>		
1. Gujarat	705	3.92
2. Kerala	57	4.12

500-999	A	25,722	79,245	31,886	7,631	2,585	1,47,069
	B	83.23	85.25	79.60	74.43	73.62	82.90
300-499	A	27,050	38,403	15,726	5,330	2,648	89,157
	B	70.09	70.80	61.82	55.35	52.45	67.53
Below 300	A	84,001	33,886	15,194	6,946	8138	1,48,165
	B	28.75	37.35	29.43	24.30	17.83	29.98
Total	A	1,49,451	2,86,813	1,08,362	26,847	14,992	5,86,465
	B	50.94	82.39	75.79	61.97	41.53	71.18

Note: A - Number of villages

B - Percentage of villages having schools with primary stage

**3.7.2** There are 1,69,043 (28.82%) villages without schools with the primary stage. Of these, 21,730 (12.85%) have NFE centres in them. Among the States, in Arunachal Pradesh and Himachal Pradesh more than three-fifths of the villages are without primary sections in them. Bihar (35.11%), Meghalaya (39.24%), Orissa (33.47%), Uttar Pradesh (46.38%), A & N Islands (55.16%) and Pondicherry (33.46%) are some other States where more than one-third of the villages are lacking primary schooling facilities. On the other hand, in the States of Gujarat (3.92%), Kerala (4.12%), Maharashtra (8.72%), Tripura (4.80%), and Dadra & Nagar Haveli (2.82%) less than one-tenth of the villages do not have schools with the primary stage.

### 3.7.3 Schooling Facilities in Villages according to Scheduled Caste Population

There are 41,839 (7.13%) villages predominantly inhabited by SC population. Of these, 54.64% have schools with the primary stage. Slightly more than one-fourth of the villages do not have SC population in them, of which 50.94% have primary schooling facilities. This shows that these facilities are available

to a larger proportion of SC-dominated villages as compared to villages without SC population. On examining the figures under various population slabs it is observed that among the villages with population less than 1000, a larger proportion of villages without SC population have primary sections in them than the villages predominantly inhabited by Scheduled Castes.

### 3.7.4 Schooling Facilities in Villages according to Scheduled Tribe Population

Out of 5,86,465 villages 98,184 (16.74%) are predominantly inhabited by ST population whereas 3,33,271 (56.83%) villages have no ST population in them. Statement 3.11 reveals that the ST-dominated villages have a slight edge over villages without ST population as far as availability of primary education facilities in them is concerned. A look at the figures under various population slabs indicates that a larger proportion of villages predominantly inhabited by STs have primary sections in them as compared to villages with ST population upto 25% or villages without ST population.

## STATEMENT 3.11

**Villages in Various Population Slabs according to Proportions of  
Scheduled Tribes and Availability of Primary Schooling Facilities**

Population Slab		Proportion of ST Population					Total
		Zero	1-25	26-50	51-75	> 75	
5000 & above	A	6,491	7,880	363	88	117	14939

Note: A - Number of villages

B - Percentage of villages having schools with primary stage

### 3.8 Unrecognised Primary Schools in Rural Areas

**3.8.1** Unrecognised schools are also contributing towards providing educational facilities to children of school-going age, particularly at the primary stage.

This phenomenon has been very common in urban areas. But it is spreading in rural areas too. Keeping in view the problems of data collection from unrecognised schools, it was decided to enumerate these schools in the rural areas only.

## STATEMENT 3.12

**Villages with Unrecognised Primary Schools**

Population Slab	Total No. of Villages	Villages with Unrecognised Primary Schools		Number of Unrecognised Primary Schools	
		Total	%	Total	Per village
1	2	3	4	5	6
5000 & above	14,939	2,095	14.02	5,271	2.52
2000- 4999	68,116	5,791	8.50	9,576	1.65
1000- 1999	1,19,019	6,542	5.50	8,700	1.33
500- 999	1,47,069	6,153	4.18	7,535	1.22
300- 499	89,157	2,974	3.34	3,302	1.11
Below 300	1,48,165	3,398	2.29	3,646	1.07
Total	5,86,465	26,953	4.60	38,030	1.41

**3.8.2** Statement 3.12 shows that out of 5,86,465 villages only 26,953 (4.60%) have unrecognised primary schools in them. Population-slabwise, the percentage of villages with unrecognised schools is the highest (14.02) in the population slab "5000 and above". This percentage gradually decreases for the successive lower-order population slabs and is the lowest (2.29) for the population slab "below 300". The total number of unrecognised primary schools in rural areas is 38,030. On an average, their per village number comes to 1.41. It ranges from 2.52 for the villages with population "5000 or more" to 1.07 for the villages with population "below 300".

### 3.9 Primary Sections

**3.9.1** While discussing educational facilities in Section 3.3.1, it has been stated that the primary stage consists of either 4 or 5 classes as per the State pattern. However, at the National level it has been considered as consisting of 5 classes. The school at the primary stage, hereinafter, will be referred to as 'primary section', whether it may be an independent unit or whether the primary classes may be a part of an upper primary, secondary or higher secondary school.

**3.9.2** The schools can be classified into the following ten categories depending on the stage(s) they have.

1. P — Schools having primary classes only.
2. UP — Schools having upper primary classes only.
3. S — Schools having secondary classes only.
4. HS — Schools having only higher secondary / intermediate classes, or junior colleges, or

independent pre-university classes (XI and XII) only.

5. P and UP — Schools having primary and upper primary classes only.
6. UP and S — Schools having upper primary and secondary classes only.
7. P, UP and S — Schools having primary, upper primary and secondary classes only.
8. S and HS — Schools having secondary and higher secondary classes only.
9. UP, S and HS — Schools having upper primary, secondary, and higher secondary classes only.
10. P, UP, S and HS — Schools having primary, upper primary, secondary and higher secondary classes.

**3.9.3** Statment 3.13 reveals that the number of primary sections in the country is 7,05,834 as against 6,31,308 at the time of the Fifth AIES. Thus the intervening period between the two surveys witnessed an increase of 11.81%. More than 80% of the primary sections are independent primary schools while 16.36% of them are part of upper primary schools and the remaining 2.82% are part of either secondary or higher secondary schools. Most of the primary sections (86.14%) are located in rural areas. It may be noted that the percentage of independent primary schools is much higher (83.48%) in rural areas as compared to that in urban areas (64.28%). But the percentage of primary sections attached to upper primary, secondary and higher secondary schools in urban areas is much higher than that in rural areas.

### STATEMENT 3.13

Primary Sections in Primary Schools or as Part of Composite Schools

Area	Primary Sections as Part of				Total
	P Schools	P and UP Schools	P,UP and S Schools	P,UP,S and HS Schools	
1	2	3	4	5	6
Rural	5,07,581 (83.48)	89,963 (14.80)	8,997 (1.48)	1,481 (0.24)	6,08,022 (100.00)
Urban	62,874 (64.28)	25,499 (26.07)	6,156 (6.29)	3,283 (3.36)	97,812 (100.00)
Total	5,70,455 (80.82)	1,15,462 (16.36)	15,153 (2.15)	4,764 (0.67)	7,05,834 (100.00)

Note: Figures within parentheses indicate percentages.

## STATEMENT 3.14

## Primary Schools according to Area and Management

Area	Government	Local Body	Private Aided	Private Unaided	Total
1	2	3	4	5	7
Rural	2,35,958 (46.49)	2,47,974 (48.85)	14,478 (2.85)	9,171 (1.81)	5,07,581 (100.00)
Urban	18,648 (29.66)	22,832 (36.31)	7,079 (11.26)	14,315 (22.77)	62,874 (100.00)
Total	2,54,606 (44.63)	2,70,806 (47.47)	21,557 (3.78)	23,486 (4.12)	5,70,455 (100.00)

Note: Figures within parentheses indicate percentages.

## 3.10 Primary Schools

**3.10.1** Statement 3.14 shows that there are 5,70,455 primary schools in the country as against 5,28,730 at the time of the Fifth AIES, showing an increase of 7.89% between the two surveys. Most of the primary schools (89.00%) are located in rural areas. More than 92% of the primary schools are managed either by the government (44.63%) or by local bodies (47.47%). A little less than 8% of the primary schools are run by private agencies. Further, 95.34% of the primary schools in rural areas are run either by the government or by local bodies as against 65.97% in urban areas.

## 3.11 Teachers in Primary Schools

Of the 5,70,455 primary schools in the country, 20.12% are single teacher schools and another 0.77% do not have any teacher at all. The corresponding percentages at the time of the Fifth Survey were 28.91

and 0.43, respectively. This shows a decline in the percentage of single-teacher schools since the Fifth Survey. NPE, 1986 envisaged that each primary school should be provided with two teachers under the Operation Blackboard (OB) scheme. The aforesaid decrease may be due to the impact of this scheme. The problem of 'zero'-teacher and single-teacher schools is acute in the case of schools in rural areas. Further, government and local body schools together have a larger proportion of 'zero'-teacher and single-teacher schools as compared to schools managed by private agencies. It is heartening to note that the percentage of single-teacher schools has decreased in all the States and UTs since the Fifth Survey. However, more than one-third of the primary schools in Andhra Pradesh (33.49%), Arunachal Pradesh (45.46%), Jammu & Kashmir (35.26%), Meghalaya (37.13%), and Dadra & Nagar Haveli (50.40%) are single-teacher schools.

## STATEMENT 3.15

## Primary Schools according to Teachers in Position

Area/ Manage- ment	% of Schools with Number of Teachers in Position						
	zero	1	2	3	4	5	More than 5
1	2	3	4	5	6	7	8
Rural	0.81	22.07	45.11	15.06	7.24	4.32	5.39
Urban	0.43	4.33	16.21	13.53	14.63	15.23	35.65
<b>Total</b>	<b>0.77</b>	<b>20.12</b>	<b>41.92</b>	<b>14.89</b>	<b>8.05</b>	<b>5.53</b>	<b>8.73</b>
Govt.	0.86	24.22	46.28	13.94	6.17	3.43	5.09
LB	0.73	18.71	42.54	16.10	8.74	5.43	7.76
PA	0.20	6.77	19.35	15.80	15.05	12.98	29.85
PUA	0.64	4.09	8.26	10.47	14.13	22.48	39.93

Of the total teachers in position, 41.92% schools have two teachers, 14.89% have three teachers and 22.31% have four or more teachers in them. Further, a larger percentage of schools with four or more teachers are noticed in urban areas than in rural areas.

### 3.12 Pupil-Teacher Ratio

There should not be more than 30 to 40 students

in a class for efficient conduct of teaching. If the class size is small the teacher can pay individual attention to students according to their needs.

It is observed from Statement 3.16 that the overall pupil-teacher ratio in primary schools in the country is 40. This ratio is higher in rural schools (41) than the schools in urban areas (37). Managementwise, it ranges from 42 in local body schools to 31 in private unaided schools.

STATEMENT 3.16

#### Pupil-Teacher Ratio in Primary Schools

Area	Government	Local Body	Private Aided	Private Unaided	Total
1	2	3	4	5	7
Rural	40.44	42.30	37.02	32.58	40.94
Urban	34.80	39.94	43.08	30.31	36.57
Total	39.64	41.93	39.76	31.04	40.00

STATEMENT 3.17

#### Pupil-Teacher Ratio in Selected States

State	Pupil-Teacher Ratio	State	Pupil-Teacher Ratio
1	2	3	4
1. Andhra Pradesh	49.26	1. Sikkim	11.49
2. Bihar	49.58	2. Nagaland	11.61
3. Haryana	47.22	3. Manipur	14.03
4. Punjab	42.29	4. A&N Islands	19.79
5. Uttar Pradesh	41.75	5. Goa	21.16
6. West Bengal	43.38		
7. Delhi	43.46		

Among the States, Sikkim has the lowest pupil-teacher ratio (11). Goa, Manipur, Nagaland, and A&N Islands are the other States which have kept the pupil-teacher ratio around 20 or less. On the other hand, the problem of crowded classrooms is acute in States like Andhra Pradesh, Bihar, Haryana, West Bengal and Delhi, where the pupil-teacher ratio is 43 or more.

### 3.13 Enrolment in Classes I-V

The total enrolment in Classes I-V is 9,70,29,235 as against 8,59,13,478 at the time of the Fifth Survey, showing an increase of 12.94% during the intervening

period between the two surveys. About three-fourths of the total enrolment is in rural schools. Since most of the primary schools (92.10%) are run either by the government or the local body agencies, their enrolment is nearly four times the enrolment in the schools managed by private agencies. While both the government and the private sector contribute more or less equally in enrolling students in urban schools, more than 90% of the enrolment in rural areas is in the government-sector schools. The contribution of the private unaided schools in rural areas is very meagre, i.e. only 2.78% of the students of Classes I-V.

## STATEMENT 3.18

## Enrolment in Classes I-V according to Area and Management

Area	Government	Local Body	Private Aided	Private Unaided	Total
1	2	3	4	5	6
Rural	3,09,72,024 (42.74)	3,46,27,133 (47.78)	48,56,130 (6.70)	20,17,695 (2.78)	7,24,72,982 (100.00)
Urban	55,59,866 (22.64)	72,77,067 (29.63)	54,14,067 (22.05)	63,05,253 (25.68)	2,45,56,253 (100.00)
Total	3,65,31,890 (37.65)	4,19,04,200 (43.19)	1,02,70,197 (10.58)	83,22,948 (8.58)	9,70,29,235 (100.00)

Note: Figures within parentheses indicate percentages.

**3.13.1 Distribution of Enrolment in Classes I-V**

The distribution of enrolment in Classes I-V is a crude indicator of the dropout rate at the primary stage. Of the total enrolment in Classes I-V, 27.97% is in Class I. This percentage gradually decreases in the subsequent classes and is only 15.28 in Class V. The gap between the percentages of Class I and Class V enrolment is 12.69. The corresponding figures for rural and urban areas

are 14.97 and 5.96, respectively. From this it can be concluded that the dropout rate at the primary stage in rural schools is higher than that in urban schools. At the time of the Fifth Survey, the gap between the enrolment percentages of Class I and Class V was 14.66, which is comparatively larger than that in the present Survey. This indicates that the retention rate has gone up since the Fifth Survey.

## STATEMENT 3.19

## Percentage Distribution of Enrolment in Classes I-V

Area	Sex	Class I	Class II	Class III	Class IV	Class V
1	2	3	4	5	6	7
Rural	Boys	28.75	20.84	18.95	16.60	14.86
	Girls	30.03	21.44	18.86	16.09	13.58
	Total	29.29	21.09	18.91	16.39	14.32
Urban	Boys	24.02	20.04	19.38	18.22	18.34
	Girls	24.10	20.37	19.50	18.19	17.84
	Total	24.06	20.20	19.44	18.20	18.10
Total	Boys	27.63	20.65	19.06	16.98	15.68
	Girls	28.41	21.15	19.03	16.67	14.74
	Total	27.97	20.86	19.05	16.84	15.28

**3.13.2 Girls' Enrolment in Classes I-V**

Girls constitute 43.16% of the total enrolment, showing an increase of 2.35% over the Fifth Survey percentage of 40.81. As expected, the percentage of girls in rural schools (41.96) is comparatively lower than that in urban schools (46.71). Further, the percentage of girls' enrolment has gone up in all the States and Union Territories except in Kerala, Mizoram, Lakshadweep and Pondicherry where it has declined marginally since the Fifth Survey. Meghalaya

has the highest percentage (50.14) and Rajasthan the lowest (33.75). Girls constitute more than 47% of the enrolment in Goa, Himachal Pradesh, Kerala, Mizoram, Nagaland, Tamil Nadu, A&N Islands, Delhi and Pondicherry besides Meghalaya. The States in which percentage of girls is less than the National average are Bihar (35.66), Jammu & Kashmir (42.60), Madhya Pradesh (42.57), Rajasthan (33.75), Uttar Pradesh (37.41), and Dadra & Nagar Haveli (40.16).

## STATEMENT 3.20

## SC, ST and Girls' Enrolment in Classes I-V

Category	Area	Boys	Girls	Total
1	2	3	4	5
All	Rural	4,20,62,680 (58.04)	3,04,10,302 (41.96)	7,24,72,982 (100.00)
	Urban	1,30,85,369 (53.29)	1,14,70,884 (46.71)	2,45,56,253 (100.00)
	Total	5,51,48,049 (56.84)	4,18,81,186 (43.16)	9,70,29,235 (100.00)
SC	Rural	88,67,825 (59.53)	60,27,912 (40.47)	1,48,95,737 (100.00)
	Urban	22,36,799 (54.03)	19,02,761 (45.97)	41,39,560 (100.00)
	Total	1,11,04,624 (58.34)	79,30,673 (41.66)	1,90,35,297 (100.00)
ST	Rural	46,39,100 (59.04)	32,18,528 (40.96)	78,57,628 (100.00)
	Urban	5,18,662 (54.48)	4,33,341 (45.52)	9,52,003 (100.00)
	Total	51,57,762 (58.55)	36,51,869 (41.45)	88,09,631 (100.00)

Note: Figures within parentheses indicate percentages.

## 3.13.3 Scheduled Caste Enrolment in Classes I-V

The enrolment of Scheduled Caste children in Classes I-V has increased from 1,47,04,908 during the Fifth Survey to 1,90,35,297, registering an increase of 29.45%. The corresponding increase between the Fourth and the Fifth Surveys was 25.23%. The SC enrolment is 19.62% of the total enrolment in these classes, showing a slight increase in their relative representation of 17.12% at the time of the Fifth Survey. Girls constitute 41.66% of the total enrolment, showing a slight improvement over the Fifth Survey percentage of 38.55. The percentage of girls is comparatively higher in urban schools (45.97) than in rural schools (40.97).

## 3.13.4 Scheduled Tribe Enrolment in Classes I-V

The enrolment of Scheduled Tribe children in Classes I-V is 88,09,631, which is 9.08% of the total enrolment in these classes. There is an increase of 30.80% in their enrolment over that of the Fifth Survey. The gap between the enrolment of boys and girls has narrowed down since the Fifth Survey. The percentage of girls in the enrolment of Scheduled

Tribes in the present Survey is 41.45 as against 38.07 at the time of the Fifth Survey. Further, schools in urban areas have a higher percentage (45.52) of girls in Classes I-V than in rural areas (40.96).

## 3.14 Age-specific Enrolment Ratio

The age-specific enrolment ratio for the age-group 6 to below 11 years, is the percentage of the number of students in the age-group 6 to below 11 years irrespective of the class in which they are studying, to the child population in the same age-group. It is an indicator of achievement of the goal of UEE at the primary stage. The overall age-specific enrolment ratio is 66.40. The corresponding figures for boys and girls are 73.20 and 59.13 respectively. Among the States, Manipur has the highest value (92.62), followed by Pondicherry (92.27), Lakshadweep (92.02), Tripura (91.84), Daman & Diu (87.85), Goa (85.99), A & N Islands (85.72) and Himachal Pradesh (84.95). On the other hand, it is the lowest in Nagaland (48.34), followed in ascending order by Uttar Pradesh (48.66), Jammu & Kashmir (52.50), West Bengal (56.57) and Rajasthan (56.94).

## STATEMENT 3.21

## Age-specific and Net Enrolment Ratios for the Age-group 6 to Below 11 years

Enrolment Ratio	Boys	Girls	Total
1	2	3	4
Age-Specific Enrolment Ratio	73.20	59.13	66.40
Net Enrolment Ratio	70.84	57.15	64.22

**3.15 Net Enrolment Ratio**

The net enrolment ratio, another indicator, for the age-group 6 to below 11 years is the percentage of the enrolment in Classes I-V in the age-group 6 to below 11 years to the child population in the same age-group. The Survey figures reveal that the overall net enrolment ratio is 64.22. Its value is higher for boys (70.84) than for girls (57.15).

Among the States, Tripura tops the list with its value as 91.76, followed by Pondicherry (90.73), Manipur (89.60), Lakshadweep (87.62), Himachal Pradesh (82.26), and Daman & Diu (80.24), whereas it is the lowest in Nagaland (47.10), followed in ascending order by Uttar Pradesh (47.55), West Bengal (50.10) and Jammu & Kashmir (52.09). □

## Chapter 4

### EDUCATION AT UPPER PRIMARY STAGE

#### 4.1 Introduction

The country has formally adopted a uniform pattern of education, i.e., 10+2+3 pattern more than two decades ago. It consists of 10 years of general education, followed by a two-year higher secondary or equivalent and a three-year degree course. The general education is comprised of the primary stage Classes I to V, the upper primary having Classes VI to VIII and the secondary having Classes IX to X. Still there are some States/UTs which do not follow the National pattern. Therefore, there is no uniformity in the number of years one puts in the three stages of general education. While all the States and Union Territories, except Andhra Pradesh and Nagaland, have a three-year upper primary stage, they differ in regard to their terminal class at the upper primary stage. Andhra Pradesh and Nagaland have two years (VI-VII) and four years (V-VIII) of schooling, respectively, at this stage. In 20 States and Union Territories (UTs) Class VIII is the terminal class of the upper primary stage while in 12 States and UTs it is Class VII. This creates some problems while reporting the progress of education at National level. While reporting the schooling facilities, the existing educational pattern of each State was retained.

However, Classes VI to VIII were taken as components of the upper primary stage in reporting the enrolment.

#### 4.2 Schooling Facilities in Rural Habitations

**4.2.1** In order to achieve Universalisation of Elementary Education, it is necessary that an elementary school is made available to all children within a convenient walking distance. In the first two All India Educational Surveys (AIESs) (1957, 1965), a distance of three miles (five kilometres) approximately was considered to be a convenient walking distance for children studying in Classes VI to VIII. This distance was reduced to three kilometres ever since the Third AIES (1973). While discussing the schooling facilities in this section, the habitation has been taken as the basic unit for providing with the schooling facilities.

**4.2.2** All the six AIESs conducted so far reveal that the percentage of habitations served by an upper primary school or section (hereafter called 'stage') within a distance of five kilometres have increased from 50.34 in 1957 to 90.28 in 1993. Statement 4.1 gives the percentage of habitations and population with schooling facilities at the upper primary stage in the different surveys.

STATEMENT 4.1  
Percentage of Habitations and Population with Schooling Facilities  
at Upper Primary Stage in Different Surveys

All India Survey	Year in which Conducted	Percentage of Habitations Served			Percentage of Population Served	
		Within the Habitation	Within a distance of 3 km	Within a distance of 5 km	Within the Habitation	Within a distance of 3 km
1	2	3	4	5	6	7
First	1957	3.13	—	50.34	—	—
Second	1965	7.07	—	72.39	—	—
Third	1973	8.69	58.26	78.43	28.86	71.97
Fourth	1978	10.74	66.86	85.52	33.47	78.83
Fifth	1986	13.13	74.00	89.84	36.85	83.98
Sixth	1993	13.87	76.15	90.28	37.02	85.00

**4.2.3** However, when viewed from the distance criterion of three kilometres, 76.15% of habitations were served in the Sixth Survey as compared with 58.26% in the Third Survey. Though the recorded growth could be considered encouraging, it reveals how distant is the goal of providing upper primary schooling facilities within a distance of three kilometres.

A similar growth is seen in percentage of population served with a school at the upper primary

stage within a distance of three kilometres. The facility has moved from 71.97% in 1973 to 85% in 1993. The eighteen per cent increase in the availability of the facility in habitation and 13% of the population in 20 years apparently appear to be spectacular. Still the goal of UEE is not within reach.

The above National averages do not, however, reveal a complete picture because the increase in these facilities has been in the habitations with a larger population (Statement 4.2).

#### STATEMENT 4.2

##### Schooling Facilities in Habitations in Different Population Slabs with and without Upper Primary Stage

Schooling Facilities	Population Slabs						Total
		5000 and Above	2000-4999	1000-1999	500-999	Below 500	
1	2	3	4	5	6	7	8
Within a distance of 3 km	Habitations	6,984	49,618	1,07,523	1,69,239	4,74,292	8,07,656
	Percentage thereof to Total	98.10	93.75	85.97	79.43	71.60	76.15
	Population	5,07,57,444	14,15,80,259	14,74,97,725	11,89,12,190	10,20,21,932	56,07,69,550
	Percentage thereof to Total	98.21	94.22	86.45	79.65	74.02	85.00
At more than 3 km	Habitations	135	3,310	17,523	43,820	1,88,168	2,52,956
	Percentage thereof to Total	1.90	6.25	14.01	20.57	28.40	23.85
	Population	9,26,412	86,88,041	2,31,14,166	3,03,75,662	3,58,17,217	9,89,21,498
	Percentage thereof to Total	1.79	5.78	13.55	20.35	25.98	15.00
Total	Habitations	7,199	52,928	1,25,046	2,13,059	6,62,460	10,60,612
	Population	5,16,83,856	15,02,68,300	17,06,11,891	14,92,87,852	13,78,39,149	65,96,91,048

**4.2.4** Of the total 10,60,612 habitations in the country, 62.46% have a population 'below 500', and the remaining 3,98,152 are in the population slabs 'above 500'. There are 2,52,956 unserved habitations, which have no school with the upper primary stage within a distance of three kilometres. Naturally, 1,88,168 (74.39%) of them belong to smaller habitations with a population slab 'below 500'. The remaining 25.61% unserved habitations are distributed among habitations with higher population slabs. It is, therefore, apparent that the progress of schooling facilities as represented by the National average, by and large, was confined

to the larger habitations. Consequently, the habitations with smaller population continue to remain unserved.

#### 4.3 Schooling Facilities in Different Population Slabs

**4.3.1** The habitations (7119), which have a population of 5000 and above, cover only 0.67% of the total number of habitations and 7.83% of the total population in rural areas. Of these habitations, 98.1%, accounting for 98.21% population of the slab, have a school with the upper primary stage within a distance of three kilometres.

**4.3.2** The population slab '2,000-4,999', which has 52,928 habitations, accounts for 44.99% of the total habitations and 22.78% of the total population. It is observed that 93.75% of habitations, covering 94.22% of the population in the slab, have schools with the upper primary stage within a distance of three kilometres.

**4.3.3** The population slab '1,000-1,999' contains 11.79% of the total habitations, which accounts for 25.86% of the total population. Of these habitations, 85.97%, accounting for 86.45% population, have the schooling facility within a distance of three kilometres.

**4.3.4** The population slab '500-999' which contains 20.09% of the total habitations, represents 22.63% of the total population. Of these total habitations, 79.43% account for 79.65% of the population in the slab which have schooling facilities

at the upper primary stage within a distance of three kilometres.

**4.3.5** The population slab 'below 500' has the largest number of habitations, viz. 6,62,460 with a population of 13,78,39,149. The habitations in the slab constitute 62.46% of the total number of habitations, whereas the population in this slab is 20.89% of the total rural population. Of these total habitations, 71.60% have the upper primary stage within a distance of three kilometres. The population of these habitations is 74.02%.

#### 4.4 Availability of Schooling Facilities in States/UTs

**4.4.1** Statement 4.3 provides statewise percentages of habitations and population served with upper primary schooling facilities within a distance of three kilometres. Some of the States/Union

#### STATEMENT 4.3

Percentage of Habitations and Populations Served with Upper Primary Schooling Facilities within a Distance of 3 km

State/UT	Per cent Habitations Served	Per cent Population Served
1	2	3
Andhra Pradesh	65.40	79.43
Arunachal Pradesh	28.35	54.39
Assam	85.54	87.16
Bihar	79.76	88.33
Goa	77.92	92.87
Gujarat	88.31	94.48
Haryana	86.14	93.26
Himachal Pradesh	64.75	78.22
Jammu & Kashmir	75.77	86.78
Karnataka	85.32	91.42
Kerala	89.00	91.84
Madhya Pradesh	62.01	72.60
Maharashtra	78.42	87.64
Manipur	66.79	82.24
Meghalaya	59.14	69.50
Mizoram	64.40	83.38
Nagaland	57.64	74.54
Orissa	77.24	87.88
Punjab	83.69	89.68
Rajasthan	64.43	79.00
Sikkim	71.93	79.01
Tamil Nadu	80.79	87.78
Tripura	74.55	85.59
Uttar Pradesh	78.68	82.09
West Bengal	84.78	87.51
A & N Islands	47.09	77.03
Chandigarh	97.22	99.30
D & N Haveli	68.92	76.05
Daman & Diu	100.00	100.00
Delhi	98.89	99.05
Lakshadweep	86.67	98.74
Pondicherry	92.88	95.76
India	76.15	85.00

Territories, namely, Assam, Gujarat, Haryana, Karnataka, Kerala, Chandigarh, Daman & Diu, Delhi, Lakshadweep and Pondicherry provide schooling facilities in more than 85% of the total habitations. The States lagging behind in this respect are Arunachal Pradesh, Himachal Pradesh, Madhya Pradesh, Meghalaya, Mizoram, Nagaland, Rajasthan and A&N Islands wherein less than 65% of the total habitations are served. In most of these States, the size of the habitations is not only small but they are scattered widely in the hilly terrain.

**4.4.2** The States, which have 20% or more unserved population which does not have the

schooling facility within a distance of three kilometres, are Andhra Pradesh, Arunachal Pradesh, Himachal Pradesh, Madhya Pradesh, Meghalaya, Nagaland, Rajasthan, Sikkim, A&N Islands and Dadra & Nagar Haveli.

#### **4.5 Schooling Facilities in Habitations Predominantly Populated by Scheduled Castes**

**4.5.1** According to the Sixth Survey, there are 1,20,517 habitations with a population 5,39,93,578, which are predominantly (50% and above) populated by Scheduled Castes. The position of schooling facilities in these habitations in different population slabs is tabulated in Statement 4.4.

STATEMENT 4.4

#### **Schooling Facilities in Habitations Predominantly Populated by Schedule Castes**

Schooling Facilities		Population Slabs					Total
		5000 & Above	2000 - 4999	1000 - 1999	500 - 999	Below 500	
1	2	3	4	5	6	7	8
Within a Distance of 3 kilometres	Habitations	223	2,462	7,854	17,470	65,562	93,571
	Percentage thereof to Total	96.54	90.78	84.57	80.31	75.76	77.64
	Population	16,12,414	67,86,417	1,05,21,718	1,20,24,059	1,36,21,266	4,45,65,874
	Percentage thereof to Total	96.81	91.35	84.82	80.44	77.63	82.54
At more than 3 kilometres Distance	Habitations	8	250	1,433	4,282	20,973	26,946
	Percentage thereof to Total	3.46	9.22	15.43	19.69	24.24	22.36
	Population	53,078	6,42,512	18,83,033	29,23,112	39,25,969	94,27,704
	Percentage thereof to Total	3.19	8.65	15.18	19.56	22.37	17.46
Total	Habitations	231	2,712	9,287	21,752	86,535	1,20,517
	Population	16,65,492	74,28,929	1,24,04,751	1,49,47,171	1,75,47,235	5,39,93,578

**4.5.2** It can be seen that 71.80% of these habitations accounting for 32.50% population belong to the population slab 'below 500'. It also reveals that 93,571 (77.64%) of the total habitations predominantly populated by those belonging to the Scheduled Castes have a school at the upper primary stage within a distance of three kilometres. It is a matter of satisfaction that this percentage is slightly higher than the corresponding one for general population (76.15%) given in Statement 4.2. However, the population served with an upper primary school in the case of Scheduled Caste

habitations is 77.64% as against 85.0% for general population. The difference is due to the fact that the habitations predominantly populated by these communities are smaller in size than those of the general population.

**4.5.3** The position of schooling facilities in each population slab has been discussed here. Out of 231 habitations in the population slab '5000 and above', 223 habitations (96.54%) accounting for 96.81% population, have an upper primary stage within a distance of three kilometres. In the population slab '2,000-4,999', 90.78% habitations

covering 91.35% population, have the schooling facilities. Similarly, in the population slab '1,000-1,999', the percentage of the habitations and the percentage of the population served are 84.57% and 84.22%, respectively. The corresponding percentages in the slab '500-999' are 80.31% and 80.44%, and in the last slab 'below 500', the figures are 75.76% and 77.63, respectively.

**4.5.4** Some of the bigger States like Andhra Pradesh, Madhya Pradesh, Rajasthan and Uttar Pradesh have 20% or more unserved population

predominantly populated by Scheduled Castes, which does not have the schooling facility within a distance of three kilometres.

#### 4.6 Schooling Facilities in Habitations

##### Predominantly Populated by Scheduled Tribes

**4.6.1** There are 1,94,733 habitations with a total population of 6,41,19,451 predominantly populated by the Scheduled Tribes. Most of these habitations, i.e. 81.39%, are in the population slab 'below 500', which covers 47.09% of the total population.

STATEMENT 4. 5

#### Schooling Facilities in Habitations Predominantly Populated by Scheduled Tribes

Schooling Facilities		Population Slabs					Total
		5000 & Above	2000 - 4999	1000 - 1999	500 - 999	Below 500	
1	2	3	4	5	6	7	8
Within a Distance of 3 kilometres	Habitations	140	1,512	6,347	18,562	90,207	1,16,768
	Percentage thereof to Total	92.11	90.43	79.08	70.36	56.91	59.96
	Population	9,53,316	41,19,959	83,45,736	1,26,59,522	1,81,33,560	4,42,12,093
	Percentage thereof to Total	91.82	91.12	79.75	70.72	60.06	68.95
At more than 3 kilometres Distance	Habitations	12	160	1,679	7,821	68,293	77,965
	Percentage thereof to Total	7.89	9.57	20.92	29.64	43.09	40.04
	Population	84,982	4,01,302	21,19,610	52,42,457	1,20,59,007	1,99,07,358
	Percentage thereof to Total	8.18	8.88	20.25	29.28	39.94	31.05
Total	Habitations	152	1,672	8,026	26,383	1,58,500	1,94,733
	Population	10,38,298	45,21,261	1,04,65,346	1,79,01,979	3,01,92,567	64,119,451

**4.6.2** Regarding schooling facilities, 59.96% of these habitations have access to the upper primary stage within a distance of three kilometres. The population covered by these habitations is 68.95%.

**4.6.3** It may be seen that out of 77,965 unserved habitations, 68,293 (87.59%) belong to the population slab 'below 500'. Further, out of total unserved population (1,99,07,358), 60.58% belongs to the slab 'below 500'. One can observe from Statement 4.5 that 92.11% and 90.43% of habitations are served by the upper primary

stage in the population slabs '5000 and above' and '2000-4999', respectively. This percentage goes down to 56.91 in the population slab 'below 500', covering only 60.06% population in the slab. It is clear from the statement that the habitations belonging to the larger population slabs have better schooling facilities within a distance of three kilometres than those belonging to the smaller population slabs.

**4.6.4** It is further observed that the percentage of the habitations having schooling facilities in the case of the general category, i.e., 76.15%, and that in the

case of the Scheduled Caste category, i.e., 77.64%, are much higher than the percentage in the case of the Scheduled Tribes, i.e., 59.96%. The Scheduled Tribes, in general, are scattered in the hilly terrain in smaller habitations, so it is not easy to provide a school within a distance of three kilometres for small and unviable habitations.

**4.6.5** Some of the bigger States, namely, Andhra Pradesh, Madhya Pradesh and Maharashtra, have more than 30% of unserved population predominantly populated by the Scheduled Tribes, which do

not have the schooling facility within a distance of three kilometres.

#### 4.7 Schools with the Upper Primary Stage

**4.7.1** According to the Sixth AIES, there are 1,62,805 upper primary schools. Besides, there are 44,808 secondary and 16,931 higher secondary schools which also have upper primary classes. Such secondary and higher secondary schools constitute 27.50% of the total number of schools with the upper primary stage. It can be seen from Statement 4.6 that out of 2,24,544 schools, 75.16% are in rural areas.

STATEMENT 4. 6

##### Schools at Upper Primary Stage in Rural and Urban Areas

Sl. No.	Type of School	Number of Schools		
		Rural	Urban	Total
1	2	3	4	5
1	Upper Primary only (UP)	39,283	8,060	47,343
2	Upper Primary with Primary (P, UP)	89,963	25,499	1,15,462
3	Secondary with Upper Primary (UP, S)	22,313	7,342	29,655
4	Secondary with Upper Primary and Primary (P, UP, S)	8,997	6,156	15,153
5	Higher Secondary with Secondary and Primary (UP, S, HS)	6,736	5,431	12,167
6	Higher Secondary with Secondary, Upper Primary and Primary (P, UP, S, HS)	1,481	3,283	4,764
Total		1,68,773	55,771	2,24,544

**4.7.2** The total number of schools with the upper primary stage has increased from 1,87,602 in the Fifth Survey (1986) to 2,24,544 at the time of the Sixth Survey (1993), showing an increase of 19.69 per cent in seven years. The increase was found to be 3% in urban areas. The corresponding increase in schools between the Fourth (1978) and Fifth (1986) Surveys was 27.4% in a time span of eight years.

**4.7.3** The number of schools at the upper primary

stage under each management are given in Statement 4.7. One can observe that 72.47% of schools with the upper primary stage are managed by government (44.94%) or local body (27.53%) managements, while 16.39% are private aided and 11.14% are private unaided. In rural areas, government and local body managements together have 81.52% schools, while 12.95% are private aided and 5.53% are private unaided.

STATEMENT 4. 7

##### Schools at Upper Primary Stage according to Management in Rural and Urban Areas

Management	Rural		Urban		Total	
	Number	Per cent	Number	Per cent	Number	Per cent
1	2	3	4	5	6	7
Government	85,104	50.43	15,806	28.34	1,00,910	44.94
Local Body	52,472	31.09	9,345	16.76	61,817	27.53
Private Aided	21,856	12.95	14,957	26.82	36,813	16.39
Private Unaided	9,341	5.53	15,664	28.09	25,005	11.14
Total	1,68,773	100.00	55,772	100.00	2,24,545	100.00

**4.7.4** In urban areas, government and local bodies together have 45.10% schools under them, while 26.82% are private aided and 28.09% are private unaided. It is clear from the above that the government has been giving a major thrust to the expansion of education in rural areas while private managements are playing an important role in urban areas. The Fifth Survey data also shows an almost similar trend.

#### 4.8 Enrolment at the Upper Primary Stage

**4.8.1** An important aspect of educational development, which attracts the attention of educational planners and administrators, is the enrolment. The gap in education between rural and urban enrolment, between the enrolment of boys and girls, and the enrolment in private and government schools has been apparent for some time. This Survey throws some light on this phenomenon too.

For the sake of uniformity at the National level, Classes VI, VII and VIII are considered to be constituents of the upper primary stage.

**4.8.2** A brief picture of the growth of enrolment from the Third to the Fourth Survey, from the Fourth to the Fifth and from the Fifth to the Sixth Surveys is given in Statement 4.8 for a better understanding of the trend. At the upper primary stage, the overall increase in enrolment between 1973 and 1978 was found to be 4.96%; between 1978 and 1986 was 6.48%, and between 1986 and 1993 was 3.56%. The corresponding annual growth between two consecutive surveys was found to be 4.68%, 7.72% and 3.02% in rural areas and 5.42%, 4.55% and 4.57% in urban areas. It has been noticed that annual growth in rural areas has declined from 7.72% in the period 1978-1986 to 3.02% in 1986-1993. The annual growth in urban areas did not change as it is 4.55% and 4.57% during these periods.

STATEMENT 4.8

Enrolment of Girls and Boys at Upper Primary Stage (Classes VI-VIII) in Rural and Urban Areas

Survey	Area	Boys	Percentage to Total	Girls	Percentage to Total	Total	Percentage Increase between Surveys	Annual Growth
1	2	3	4	5	6	7	8	9
Third (1973)	Rural	65,17,388	73.36	23,66,171	26.64	88,83,559		
	Urban	33,19,758	60.31	21,84,431	39.69	55,04,189		
	Total	98,37,146	68.37	45,50,602	31.63	1,43,87,748		
Fourth (1978)	Rural	79,10,325	72.18	30,49,879	27.82	1,09,60,204	23.38	4.68
	Urban	41,75,944	59.67	28,22,329	40.33	69,98,273	27.14	5.42
	Total	1,20,86,269	67.30	58,72,208	32.70	1,79,58,477	24.82	4.96
Fifth (1986)	Rural	1,20,89,291	68.19	56,40,427	31.81	1,77,29,718	61.76	7.72
	Urban	55,51,065	58.17	39,91,553	41.83	95,42,618	36.36	4.55
	Total	1,76,40,356	64.70	96,31,980	35.30	2,72,72,336	51.86	6.48
Sixth (1993)	Rural	1,36,51,758	63.57	78,23,354	36.43	21,4,75,112	21.12	3.02
	Urban	69,20,450	54.94	56,75,496	45.06	1,25,95,946	32.00	4.57
	Total	2,05,72,208	60.38	1,34,98,850	39.62	3,40,71,058	24.93	3.56

Note: 1. The Percentage Increase and Annual Growth in enrolment between Third Survey and Fourth Survey is given against the figures of Fourth Survey, and so on.

2. Annual Growth = Percentage Increase / Number of Years

**4.8.3** According to the Sixth Survey, the total enrolment at the upper primary stage is 3,40,71,058, out of which 63.0% belongs to rural areas. Statement 4.8 gives the enrolment of boys and girls at the upper primary stage in rural and urban areas.

**4.8.4** At the time of the Fifth, Fourth and Third Surveys, the percentage of enrolment in rural areas

was 65.0, 61.0 and 61.7, respectively. It can be seen from Statement 4.9 that the percentage of enrolment in rural areas to total enrolment has progressively decreased from 64.63% in Class VI to 63.54% in Class VII and to 60.33% in Class VIII. Consequently, the percentage enrolment in Classes VI, VII and VIII in urban areas is 35.37, 36.46 and 39.67, respectively which are in increasing order.

### Enrolment in Classes VI-VIII in Rural and Urban Areas

Note: Figures in parentheses indicate percentages.

stage in the Survey, are Rajasthan (25.4), Bihar (29.6), Uttar Pradesh (31.8) and Madhya Pradesh (34.7). In the Fifth Survey, the States with lowest percentage of enrolment were Rajasthan (19.75), Bihar (27.54) and Haryana (31.34).

**4.9.4** The States, which have shown enrolment of girls below 30% in rural areas, are Rajasthan (18.1), Bihar (26.5), Uttar Pradesh (27.4) and Madhya Pradesh (29.8). It is worthwhile to note that the above-named four States are the most backward States in respect of girls' education.

**4.9.5** The States, which have registered more than 48% of enrolment of girls at the upper primary stage in the Survey, are Kerala (48.8), Meghalaya (48.6), Mizoram (48.3), Nagaland (49.1) and Sikkim (48.8).

#### 4.10 Enrolment in Classes VI-VIII according to Management

**4.10.1** The management of the school plays an important role in the development of education in rural and urban areas. Statement 4.10 gives the percentage enrolment under different managements in the last four Surveys.

### Managementwise Percentage Enrolment at Upper Primary Stage in Four Surveys

[illegible]

**4.10.2** According to the Sixth Survey, the overall percentage in schools managed by government and local bodies is 58.02, while the Fifth, Fourth and Third Surveys indicate this at 58.3, 53.5 and 53.0 respectively. This shows only a modest increase in the percentage enrolment in the government and local body schools between the Third and Sixth Surveys. In rural areas, the percentage of enrolment in government and local body schools together has increased from 58.20 in the Third Survey to 67.71 in the Sixth Survey. It is obvious that the

government and local bodies are playing a major role in the development of elementary education in rural areas.

**4.10.3** Similarly, it was observed that the role of private managements in urban areas at the upper primary stage remained dominant. According to the Sixth Survey, 58.49% enrolment at the upper primary stage is in private aided and private unaided schools. The actual enrolment in Classes VI-VIII according to management in the Sixth Survey is given in Statement 4.11.

STATEMENT 4.11

## Managementwise Enrolment in Classes VI-VIII in Sixth Survey

Management	Enrolment in Classes VI-VIII		
	Rural	Urban	Total
1	2	3	4
Government	99,43,521	36,20,583	1,35,64,104
Local Body	45,97,430	16,08,501	62,05,931
Private Aided	55,41,912	49,99,795	1,05,41,707
Private Unaided	13,92,249	23,67,067	37,59,316
Total	2,14,75,112	1,25,95,946	3,40,71,058

**4.11 Enrolment of Scheduled Castes**

**4.11.1** According to the Sixth Survey, the overall enrolment of Scheduled Caste children at the upper primary stage is 53,01,922. The Fifth Survey reported the enrolment as 40,06,855, whereas the Fourth and Third Surveys reported it as 20,12,412 and 12,18,728, respectively. This shows 335% increase from the Third

Survey (1973) to the Sixth Survey (1993) in a time-span of twenty years, i.e. an average increase of 16.75% per annum. This rate of growth is much higher than that of enrolment of all communities which is only 6.84% per annum. Statement 4.12 presents the actual enrolment of SC and ST children in Classes VI-VIII in rural and urban areas.

STATEMENT 4.12

## Enrolment of Scheduled Castes and Scheduled Tribes in Rural and Urban Areas

Area	Enrolment in Classes VI-VIII							
	Sixth Survey		Fifth Survey		Fourth Survey		Third Survey	
	SC	ST	SC	ST	SC	ST	SC	ST
1	2	3	4	5	6	7	8	9
Rural	35,27,949	15,95,982	27,32,141	11,33,733	13,27,159	4,90,694	7,96,115	3,19,018
Urban	17,73,973	3,96,892	12,74,714	2,63,211	6,85,253	1,18,460	4,22,613	90,619
Total	53,01,922	19,92,874	40,06,855	13,96,944	20,12,412	6,09,154	12,18,728	4,09,637

**4.11.2** In rural areas, 66.54% enrolment of Scheduled Caste children was reported in the Sixth Survey, while the Fifth and Fourth reported 68.2% and 65.9%, respectively.

**4.11.3** Statement 4.13 presents the enrolment of boys and girls of Scheduled Castes and Scheduled Tribes. As regards enrolment of Scheduled Caste girls, the Sixth Survey recorded 36.3% girls in

Classes VI-VIII. In the Fifth and Fourth Surveys, the percentage was recorded as 31.1 and 25.8, respectively. Though the overall increase in enrolment of Scheduled Caste children is spectacular, it is not significant in the case of

girls where it has still remained low. The States, in which the percentage of girls' enrolment of Scheduled Castes remained low, are Bihar (22.42), Madhya Pradesh (29.70), Rajasthan (17.48) and Uttar Pradesh (25.68).

## STATEMENT 4.13

Enrolment in Classes VI-VIII of Boys and Girls of Scheduled Castes and Scheduled Tribes

Sex	Enrolment in Classes VI-VIII							
	Sixth Survey		Fifth Survey		Fourth Survey		Third Survey	
	SC	ST	SC	ST	SC	ST	SC	ST
1	2	3	4	5	6	7	8	9
Boys	33,79,781	12,80,017	27,59,724	9,76,031	14,92,745	4,44,844	9,23,623	2,94,733
Girls	19,22,141	7,12,857	12,47,131	4,20,913	5,19,667	1,64,310	2,95,105	1,14,904
Total	53,01,922	19,92,874	40,06,855	13,96,944	20,12,412	6,09,154	12,18,728	4,09,637

**4.11.4** The States, where the percentage of the SC girls' enrolment is higher than the national average are Assam (44.65), Kerala (48.34), Nagaland (44.53), Sikkim (49.44), Tamil Nadu (45.81), Chandigarh (44.95), Dadra & Nagar Haveli (47.03), Delhi (47.35) and Pondicherry (49.84).

#### 4.12 Enrolment of Scheduled Tribes

**4.12.1** Most of the Scheduled Tribes live in rural areas. The entire north-eastern states, besides the vast hilly tracts of Bihar, Orissa and Madhya Pradesh, are predominantly populated by Scheduled Tribes. Development of education among them in such places is a difficult task due to a number of constraints. The average annual increase in enrolment of Scheduled Tribes between the Third and Sixth Surveys is found to be 19.32%, which is slightly higher than that of Scheduled Castes (16.75%) and much higher than that for the general population (6.84%).

**4.12.2** According to the Sixth Survey, 80.1% of STs are enrolled in rural areas. The Fifth, Fourth and Third Surveys indicated the percentage of enrolment as 81.2, 80.5 and 77.9, respectively. These high percentages are due to the predominantly rural characteristic of the Scheduled Tribe population.

**4.12.3** The Sixth Survey recorded 35.8% of girls' enrolment among Scheduled Tribes, which is slightly higher than the Fifth, Fourth and Third Surveys where the percentage of girls enrolled was only 30.1, 27.0 and 28.1, respectively. This suggests that the

increase in enrolment of girls in Classes VI-VIII in comparison to boys is low.

**4.12.4** The States of Haryana and Punjab do not have any enrolment of Scheduled Tribe girls. The States which record less than 30% of girls' enrolment are Andhra Pradesh (26.76), Rajasthan (15.46) and West Bengal (29.78). The States which have recorded more than 48% of girls' enrolment, are Kerala (48.18), Meghalaya (49.62), Mizoram (48.39), Nagaland (49.24) and Sikkim (52.67).

#### 4.13 Age-specific Enrolment Ratios

**4.13.1** The age-specific enrolment ratio for the age group '11 to below 14 years' is the percentage of the number of students in the age-group 11 to below 14 years, irrespective of the class in which they are studying, to the child population in the same age-group. In the Sixth Survey, the ratios for 'Boys', 'Girls' and 'Total' (Combined Boys and Girls) belonging to 'All Communities' have been estimated for combined rural and urban areas and are given in Table 41 (Annexure).

**4.13.2** The overall ratio of the country is estimated as 65 for boys, 48.2 for girls and 57.1 for boys and girls combined. In other words, out of 100 boys in the age-group 11 to below 14, only 65 boys are going to school. Likewise, out of 100 girls only 48 girls, and in the combined population of 100 children only 57 children are enrolled in schools.

**4.13.3** The States, where even 50% of the children in the age-group 11 to below 14 are not going to

school, are Andhra Pradesh (41.2), Bihar (31.6) and Uttar Pradesh (42.4). The states, where the ratio is more than 90 per cent of the child population, are Kerala (94.3), Manipur (90.4), Lakshadweep (92.5) and Pondicherry (95.1).

**4.13.4** As regards the boys, the States, where the age-specific enrolment ratio is below 50, are Andhra Pradesh (47.9) and Bihar (40.6). The states, where it is more than 90, are Gujarat (90.6), Kerala (94.9), Manipur (95.3), Tamil Nadu (91.0), Lakshadweep (91.8) and Pondicherry (98.7).

**4.13.5** In the case of girls, the states, which have

not crossed the mark of 50, are Andhra Pradesh (33.8), Bihar (20.7), Jammu & Kashmir (41.4), Madhya Pradesh (37.5), Orissa (40.4), Rajasthan (27.0), Uttar Pradesh (29.8) and Dadra & Nagar Haveli (48.5), whereas the states, which have enrolled more than 90% of child population, are Kerala (93.7), Lakshadweep (93.3) and Pondicherry (91.4).

**4.13.6** From the above analysis, one can conclude that the smaller states are moving faster towards the goal of universalisation of elementary education than the bigger states which are not only lagging behind but are far away from this goal. □

## Chapter 5

### SECONDARY EDUCATION

#### 5.1 Introduction

The stage of secondary education, terminating at Class X, is most important for the future of an individual. In fact, the grades obtained at this stage often become the crucial deciding factor whether an individual should continue his studies in the future or enter the world of work. A detailed description of this stage is, therefore, given in the following paragraphs.

#### 5.2 Schooling Facilities in Rural Areas

**5.2.1** At the time of the First Survey (1957), 3,01,533 (35.9%) habitations were having facilities of secondary schools/sections within a walking distance of eight kilometres, including 4500 (0.54%) habitations which had these facilities within the habitation itself. By the time of the Fourth Survey (1978), 6,99,804 (72.54%) habitations were served by secondary sections within eight kilometres, covering 82.18% of the rural population. However, these facilities were available within the habitation itself in respect of 29,565 (3.06%) habitations only, which covered 14.58% of the population in rural areas. In the Fifth Survey (1986), 7,74,886 (78.92%) habitations had secondary-stage education facilities within a walking distance of eight kilometres,

including 43,541 (4.43%) habitations which had these facilities within themselves. Population-wise, 86.54% of the rural population had access to secondary education within eight kilometres, including 17.73% of the population which was served by the secondary sections within the habitations themselves.

**5.2.2** The figures of the present Survey, sixth in the series, reveal that 8,99,582 (84.82%) habitations have secondary education facilities within a walking distance of eight kilometres, including 53,505 (5.04%) habitations which have these facilities within the habitation itself. From the population point of view 59,40,95,069 (90.06%) rural population have access to secondary-stage education facilities within a walking distance of eight kilometres, including 12,06,78,479 (18.29%) population which has these facilities within the habitation itself. On comparing these figures with those of the Fifth Survey, we find that the facilities have been extended now to a larger number of habitations within the habitation as well as upto a distance of eight kilometres. In Statements 5.1 and 5.2, the position of availability of secondary-stage education facilities has been given in various distance slabs and population slabs, respectively.

#### STATEMENT 5.1

##### Habitations and Population in Rural Areas according to Availability of Facilities for Secondary Stage in Various Distance Slabs

Distance (in km)	Habitations Served by Secondary Sections		Population Served by Secondary Sections	
	Number	%	Population	%
1	2	3	4	5
Within Habitation	53,505	5.04	12,06,78,479	18.29
upto 2.0*	3,06,614	28.91	17,91,92,366	27.16
2.1-4.0	2,69,548	25.41	15,32,07,091	23.22
4.1-5.0	1,09,862	10.36	6,08,56,710	9.23
sub-total (upto 5 km)	7,39,529	69.73	51,39,34,646	77.91
5.1-6.0	67,593	6.37	3,45,49,586	5.24
6.1-8.0	92,460	8.72	4,56,10,837	6.91

More than 8	1,61,030	15.18	6,55,95,979	9.94
Total	10,60,612	100.00	65,96,91,048	100.00

\* But not within the habitation.

## STATEMENT 5.2

Percentage of Habitations and Population Served by  
Secondary Sections in Different Population Slabs

Population Slab	No of Habitations in the Slab	Population of Habitations	% of Habitations Served by Sec. Sections		% of Population Served by Sec. Sections	
			Within Habitation	Upto 8 km	Within Habitation	Upto 8 km
1	2	2	4	5	6	7
5000 & above	7,119	5,16,83,856	68.96	98.61	71.01	98.72
2000-4999	52,928	15,02,68,300	33.83	94.30	36.62	94.66
1000-1999	1,25,046	17,06,11,891	11.22	90.30	11.96	90.47
500-999	2,13,059	14,92,87,852	4.05	87.77	4.25	87.90
Below 500	6,62,460	13,78,39,149	1.21	81.93	1.58	83.62
Total	10,60,612	65,96,91,048	5.04	84.82	18.29	90.06

**5.2.3 Habitations Not Served**

Statement 5.1 shows that 15.18% of the habitations covering 9.94% of the rural population are not served by secondary sections, even upto a distance of eight kilometres. The corresponding figures in the Fifth Survey were 21.08% and 13.46%, respectively. This shows that the position in respect of the availability of secondary stage-education facilities has improved since the Fifth Survey. On going through the percentage of served habitations within a distance of eight kilometres for different population slabs in Statement 5.2, it is observed that this percentage is the lowest (81.93%) in the population slab 'below 500'. Considering the unserved habitations upto a distance of eight kilometres, we find that about 75% of them belong to the population slab 'below 500'.

**5.2.4** Statewise analysis reveals that all the States except Arunachal Pradesh (27.18%), Mizoram (45.96%) and Nagaland (45.50%) have secondary education facilities within eight kilometres in more than two-thirds of the habitations. From the population point of view also, more than 70% of the population is served by secondary sections within eight kilometres in all the States except the above three north-eastern States. The position is much better in the Union Territories as in all of them except A & N Islands (65.72%), more than 90% of the

habitations are served by secondary sections. Also, 90% or more of the population in all the Union Territories is served by secondary sections whereas in the Union Territories of Chandigarh, Daman & Diu, Delhi and Pondicherry, hundred per cent population is served by secondary sections.

**5.3 Schooling Facilities in Habitations Predominantly Populated by Scheduled Castes**

**5.3.1** As mentioned in earlier chapters, a habitation is considered to be predominantly populated by Scheduled Castes if 50% or more of its population belong to Scheduled Castes. Statement 5.3 reveals that there are 1,20,517 habitations predominantly populated by Scheduled Castes, and their total population is 5,39,93,578. Of these, only 2990 (2.48%) habitations, covering 8.50% of the population, have access to secondary-stage education facilities within the habitations themselves, while 1,05,491 (87.53%) habitations, covering 90.34% of the population, have these facilities within eight kilometres. In the Fifth Survey, 63,489 (81.63%) of the habitations, covering 85.58% population, were served by secondary sections within eight kilometres. This shows that the facilities for secondary-stage education have been extended to a large number of habitations covering more population during the period 1986-93.

## STATEMENT 5.3

**Habitations Predominantly Populated by Scheduled Castes and  
Population in Them according to Availability of Secondary  
Stage Schooling Facilities within Various Distance Slabs**

Distance (in km)	Habitations Served by Secondary Sections		Population Served by Secondary Sections

\* But not within the habitation

## STATEMENT 5.4

**Habitations Predominantly Populated by Scheduled Castes  
and Population in Them Served by Secondary Sections in Different Population Slabs**

Population Slab	No. of Habitations in the Slab	Population of Habitations in the Slab	% of Habitations Served by Sec. Sections		% of Population Served by Sec. Sections	
			Within Habitation	Upto 8 km	Within Habitation	Upto 8 km
1	2	3	4	5	6	7
5000 & above	231	16,65,492	51.08	97.84	53.96	98.35
2000-4999	2,712	74,28,929	22.82	94.25	25.15	94.61
1000-1999	9,287	1,24,04,751	8.55	91.36	9.11	91.47
500-999	21,752	1,49,47,171	3.14	89.83	3.30	89.84
Below 500	86,535	1,75,47,235	0.90	86.30	1.14	87.38
Total	1,20,517	5,39,93,578	2.48	87.53	8.50	90.34

### 5.3.2 Habitations Not Served

It is revealed from Statement 5.3 that 12.47% of the habitations, covering 9.66% population, are not served by secondary schools/sections even within eight kilometres. The percentage of unserved habitations revealed by Statement 5.4 is the highest for the population slab 'below 500'. Considering the number of unserved habitations in different population slabs, we find that 78.87% of them belong to the population slab 'below 500'.

**5.3.3** A comparison of statewide figures shows that all the States except Arunachal Pradesh (58.62%), Madhya Pradesh (74.71%) and Rajasthan (68.95%) have secondary-stage education facilities upto a distance of eight kilometres in more than 80% of the habitations. The corresponding percentage of population served in these three states is, respectively, 78.10%, 78.17% and 74.28%, while in all other states more than 80% of the population is served by secondary sections within eight kilometres. In the States of Meghalaya, Mizoram and Nagaland, there is no habitation predominantly populated by Scheduled Castes. Hundred per cent habitations are served by secondary sections within eight kilometres in all the Union Territories, except Delhi and Lakshadweep where there is no

habitation predominantly populated by Scheduled Castes.

### 5.4 Schooling Facilities in Habitations Predominantly Populated by Scheduled Tribes

**5.4.1** As mentioned in the earlier chapters, a habitation has been considered predominantly populated by Scheduled Tribes if 50% or more of its population belong to Scheduled Tribes. In the Sixth Survey, 1,94,733 habitations have been identified as predominantly populated by Scheduled Tribes, covering a population of 6,41,19,451.

**5.4.2** Though the number of habitations served by secondary sections within themselves is only 4,353 (2.24%), as many as 1,37,000 (70.35%) habitations have these facilities within a distance of eight kilometres. In terms of population, it is found that 75.83% of the population is served within eight kilometres, including 7.80% within the habitation itself. At the time of the Fifth Survey, the percentage of habitations served by secondary sections within eight kilometres was 55.27%, covering 63.82% of the population. This shows that the position in respect of availability of facilities for secondary education has improved since the Fifth Survey.

### STATEMENT 5.5

**Habitations Predominantly Populated by Scheduled Tribes and Population in Them according to Availability of Secondary Stage Education Facilities within Various Distance Slabs**

Distance (in km)	Habitations Served by Secondary Sections		Population Served by Secondary Sections	
	Number	%	Population	%
1	2	3	4	5
Within Habitation	4,353	2.24	50,03,757	7.80
upto 2.0*	38,413	19.73	1,31,36,582	20.49

Total	1,94,733	100.00	6,41,19,451	100.00

\* But not within the habitation.

## STATEMENT 5.6

**Habitations Predominantly Populated by Scheduled Tribes  
and Population in Them Served by Secondary Sections  
in Different Population Slabs**

Population Slab	No. of Habitations in the Slab	Population of Habitations in the Slab	% of Habitations Served by Sec. Sections		% of Population Served by Sec. Sections	
			Within Habitation	Upto 8 km	Within Habitation	Upto 8 km
1	2	3	4	5	6	7
5000 & above	152	10,38,298	58.55	95.39	59.85	95.68
2000-4999	1,672	45,21,261	33.43	86.66	35.90	87.04
1000-1999	8,026	1,04,65,346	13.58	82.18	14.29	82.42
500-999	26,383	1,79,01,979	4.72	76.69	4.99	76.91
Below 500	1,58,500	3,01,92,567	0.86	68.50	1.23	70.54
Total	1,94,733	6,41,19,451	2.24	70.35	7.80	75.83

**5.4.3 Habitations Not Served**

Statement 5.5 reveals that 29.65% of the habitations, covering 24.17% of the population, are not served by secondary sections even within eight kilometres. The percentage of unserved habitations as revealed by Statement 5.6 is the highest in the population slab 'below 500'. Considering the number of these unserved habitations in different population slabs we find that 86.47% of them belong to the population slab 'below 500'.

**5.4.4** Analysing the statewise figures, we find that in all the states, except in three north-eastern States, viz., Arunachal Pradesh (25.19%), Mizoram (46.72%) and Nagaland (45.50%), secondary-stage education facilities within eight kilometres exist in more than 55% of the habitations. Also, more than 55% of the population is served by secondary sections within eight kilometres in all the states except Arunachal Pradesh (45.33%). The states of Goa, Haryana and Punjab have no habitation predominantly populated by Scheduled Tribes. All the Union Territories except A&N Islands (46.20%) have secondary-stage education facilities within eight kilometres in more than 90% of the habitations. Also, more than 85% of the population in all the Union Territories is served by secondary sections within eight kilometres. The Union Territories of Chandigarh and Pondicherry

have no habitation predominantly populated by Scheduled Tribes.

**5.5 Schooling Facilities in Villages**

**5.5.1** Statement 5.7 reveals that 51,390 (8.76%) villages have secondary-stage education facilities within themselves, out of 5,86,465 villages in the country, whereas at the time of the Fifth Survey, 38,559 (6.66%) villages had these facilities. This shows that secondary-stage education facilities have been extended to more villages than in the Fifth Survey.

**5.5.2 Schooling Facilities for Scheduled Castes**

Among the 51,390 villages having secondary-stage education facilities within them, 36,418 (70.87%) villages have Scheduled Caste population between 1% and 25%. Considering the facilities in villages with different proportions of Scheduled Caste population, it is observed that the percentage of villages having these facilities is the highest (12.70%) in respect of villages having Scheduled Caste population between 1% to 25%. However, this percentage is found to be lowest (2.07%) for villages where the Scheduled Caste population is more than 75%.

## STATEMENT 5.7

**Villages according to Proportion of Scheduled Caste  
Population and Availability of Secondary Stage  
Education Facilities within Them**

Proportion (in %) of Scheduled Castes in Villages	Total No. of Villages	Villages Having Facilities for Secondary Stage Education		
		No. of Villages	Col.3. as % of Col.2	Col.3. as % of its Total
1	2	3	4	5
Zero	1,49,451	4,086	2.73	7.95
1-25	2,86,813	36,418	12.70	70.87
26-50	1,08,362	9,390	8.67	18.27
51-75	26,847	1,186	4.42	2.31
More than 75	14,992	310	2.07	0.60
Total	5,86,465	51,390	8.76	100.00

**5.5.3 Schooling Facilities for Scheduled Tribes**

Statement 5.8 reveals that out of 51,390 villages

having secondary-stage education facilities within them, 22,852 (44.47%) villages have Scheduled Tribe population between 1% and 25%. Further, 22,526

## STATEMENT 5.8

**Villages according to Proportion of Scheduled Tribe  
Population and Availability of Secondary Stage  
Education Facilities within Them**

Proportion (in %) of Scheduled Tribes in Villages	Total No. of Villages	Villages Having Facilities for Secondary Stage Education		
		No. of Villages	Col.3. as % of Col.2	Col.3. as % of its Total
1	2	3	4	5
Zero	3,33,271	22,526	6.76	43.83
1-25	1,22,620	22,852	18.64	44.47
26-50	32,390	2,605	8.04	5.07
51-75	24,729	1,385	5.60	2.70
More than 75	73,455	2,022	2.75	3.93
Total	5,86,465	51,390	8.76	100.00

villages without any Scheduled Tribe population are having secondary-stage education facilities, which constitute 43.83% of the total number of villages having these facilities. Considering the facilities in villages with different proportion of Scheduled Tribes population, we find that the percentage of villages having these facilities is the highest (18.64%) in respect of villages having Scheduled Tribe population between 1% and 25% and the lowest (2.75%) for

villages where Scheduled Tribe population is more than 75%.

**5.6 Secondary Sections**

**5.6.1** Obviously, secondary stage education facilities exist in all the secondary schools. Besides these, all the higher secondary schools, excluding those in which only Classes XI and XII are available, have secondary-stage education facilities. Thus, there

are 65,564 secondary schools and 21,674 higher secondary schools in the country, where secondary sections are available. At the time of the Fifth Survey, secondary sections were available in 67,241 secondary and higher secondary schools. This indicates an increase to the tune of 29.74% over the figures of the Fifth Survey. As revealed by Statement 5.9, one-third of the existing secondary sections are

in urban areas and two-thirds in rural areas. Managementwise, secondary sections in the schools run by government and local bodies are 33,183 (38.04%) and 8,221 (9.42%), respectively, which together constitute 47.46% of the total number of secondary sections. Further, 33,210 (38.07%) of the secondary sections exist in private aided schools and 12,624 (14.47%) in private unaided schools.

## STATEMENT 5.9

**Managementwise Schools Having Secondary Sections**

Area/Management	Secondary Schools				Higher Sec. Schools	Total
	Boys	Girls	Co-ed.	Total		
1	2	3	4	5	6	7
Rural	2,346	3,238	42,286	47,870	10,521	58,391
Urban	2,146	3,744	11,804	17,694	1,153	28,847
Total	4,492	6,982	54,090	65,564	21,674	87,238
Government	2,326	2,976	19,257	24,559	8,624	33,183
Local Body	352	566	6,483	7,401	820	8,221
Private Aided	1,525	2,643	18,892	23,060	10,150	33,210
Private Unaided	289	797	9,458	10,544	2,080	12,624

**5.6.2** It is seen from Statement 5.9 that three-fourths of the secondary sections are part of the secondary schools and one-fourth are in higher secondary schools. Among the 65,564 secondary schools, 82.50% are co-educational, 6.85% are boys' schools and 10.65% are girls' schools. Further, 73.01% of the secondary schools are in rural areas and 26.99% are in urban areas.

**5.7 Enrolment in Classes IX and X**

**5.7.1** Two different patterns consisting of Classes VIII to X and Classes IX-X, for the secondary stage of education, are in vogue in various States and Union Territories. In eight States and three Union Territories, namely, Andhra Pradesh, Assam, Goa, Gujarat, Karnataka, Kerala, Maharashtra, Mizoram, Dadra & Nagar Haveli, Daman & Diu and

Lakshadweep, Classes VIII, IX and X constitute the secondary stage. In the remaining 21 States and Union Territories, only Classes IX and X form the secondary stage. For the sake of uniformity, we shall confine ourselves to Classes IX and X so far as enrolment at the secondary stage is concerned, irrespective of the pattern in different States and Union Territories.

**5.7.2** As revealed by Statement 5.10, there are 1,52,19,392 children enrolled in Classes IX and X. Of these, 84,19,667 (55.32%) are studying in rural schools and 67,99,725 (44.68%) in urban schools. During the Fifth Survey there were 1,15,19,996 children enrolled in Classes IX and X. This shows an increase in total enrolment to the tune of 32.11% over the figures of the Fifth Survey.

## STATEMENT 5.10

## Managementwise Enrolment in Classes IX and X

Area/Management	Boys	Girls	Total	% of Girls
1	2	3	4	5
Rural	57,05,693	27,13,974	84,19,667	32.23
Urban	39,63,217	28,36,508	67,99,725	41.72
Total	96,68,910	55,50,482	1,52,19,392	36.47
Government	36,90,723	20,42,289	57,33,012	35.62
Local Body	7,13,198	4,38,291	11,51,489	38.06
Private Aided	44,20,395	25,86,827	70,07,222	36.92
Private Unaided	8,44,594	4,83,075	13,27,669	36.39

**5.7.3 Enrolment of Girls**

The present Survey reveals that the enrolment of girls in Classes IX and X is 55,50,482, which constitutes 36.47% of the total enrolment. At the time of the Fifth Survey there were 36,53,112 (31.71%) girls enrolled in these classes. This shows that there has been an increase of 51.94% in the enrolment of girls since the Fifth Survey. However, there is still a huge gap between the enrolment of boys and the enrolment of girls as revealed by Statement 5.10. From the management point of view there does not seem to be much difference in the percentage of girls enrolled in the schools under different managements.

**5.7.4** Among the states and Union Territories, Kerala (51.42%) is the only state where the percentage of girls in the total enrolment of Classes IX and X is more than 50%. The other States and Union Territories where this percentage is more than 45% are Goa (47.63%), Manipur (46.66%), Meghalaya (46.88%), Mizoram (49.97%), Nagaland (46.26%), Sikkim, (47.90%), A & N Islands (45.61%), Chandigarh (46.48%), Delhi (45.04%) and Pondicherry (46.05%). At the other extreme, in the States of Bihar (24.85%), Madhya Pradesh (27.60%),

Rajasthan (22.46%) and Uttar Pradesh (24.75%), this percentage is even less than 30.

**5.8 Scheduled Caste Enrolment**

**5.8.1** Out of 1,52,19,392 children enrolled in Classes IX and X, there are 20,87,669 (13.72%) Scheduled Caste children. The percentage of Scheduled Castes in the country's population as per the 1991 Census is 16.48%. This indicates a gap of 2.76% between the Scheduled Caste population and children of Scheduled Caste enrolled in Classes IX and X. As per the Fifth Survey there were 15,13,571 (13.14%) Scheduled Caste children enrolled in Classes IX and X, whereas the percentage of Scheduled Castes among the total population was 17.34% as per 1981 Census. This shows that the gap of 4.20% in the year 1986 has reduced to 2.76% in 1993, which seems to be a good sign of progress. Among the Scheduled Caste students, 12,48,917 (59.82%) are studying in rural schools and 40.18% in urban schools. Managementwise, 43.91% of the Scheduled Caste students are studying in private aided schools, followed by 40.47% in government schools, 8.84% in local body schools and the rest 6.77% in private unaided schools.

## STATEMENT 5.11

## Managementwise Scheduled Caste Enrolment in Classes IX and X

Area/Management	Boys	Girls	Total	% of Girls
1	2	3	4	5
Rural	8,88,151	3,60,766	12,48,917	28.89
Urban	5,25,008	3,13,744	8,38,752	37.41
Total	14,13,159	6,74,510	20,87,669	32.31
Government	5,68,809	2,75,988	8,44,797	32.67
Local Body	1,22,724	61,724	1,84,448	33.46
Private Aided	6,21,864	2,94,859	9,16,723	32.16
Private Unaided	99,762	41,939	1,41,701	29.60

**5.8.2** Girls constitute 32.31% of the total Scheduled Caste enrolment as against 26.72% in the Fifth Survey. The girls' enrolment is higher in urban schools (37.41%) as compared to 28.89% in rural schools. Managementwise, the percentage of girls in the enrolment of Classes IX and X is more or less the same in the schools run by the different managements.

**5.8.3** Statewise analysis of figures shows that Kerala (51.04%) is the only state where the percentage of girls to the total enrolment of Classes IX and X is more than 50. The other States and Union Territories where this percentage is more than 45 are Assam (45.13), Chandigrah (45.09), Daman & Diu (49.74), Lakshadweep (50.00) and Pondicherry (47.16). On the other hand, the States of Bihar (16.52%), Madhya Pradesh (20.73%), Mizoram (23.81%), Rajasthan (11.81%) and Uttar Pradesh (17.52%), have even less than 25% girls in the total enrolment of Classes IX and X.

## 5.9 Scheduled Tribe Enrolment

**5.9.1** As per the Sixth Survey there are 7,98,813 Scheduled Tribe children enrolled in Classes IX and X, which constitute 5.25% of the total enrolment in these classes. The percentage of Scheduled Tribe in the country's population as per the 1991 Census is 8.08. This indicates a gap of 2.83% between the percentages of Scheduled Tribe population and children of Scheduled Tribe enrolled in Classes IX and X. During the Fifth Survey there were 4,99,522 Scheduled Tribe children enrolled in Classes IX and X, which constitutes 4.34% of the total enrolment in these classes whereas the percentage of Scheduled Tribe population in the country's population as per the 1981 Census was 9.54. This shows that the gap of 5.20% in the year 1986 between the percentage of Scheduled Tribe population and percentage of Scheduled Tribe children enrolled in Classes IX and X has reduced to 2.83 in the year 1993.

### STATEMENT 5.12

#### Managementwise Scheduled Tribe Enrolment in Classes IX and X

Area/Management	Boys	Girls	Total	% of Girls
1	2	3	4	5
Rural	4,11,392	1,75,334	5,86,726	29.88
Urban	1,30,981	81,106	2,12,087	38.24
Total	5,42,373	2,56,440	7,98,813	32.10
Government	2,84,305	1,12,640	3,96,945	28.38
Local Body	29,219	12,854	42,073	30.55
Private Aided	1,90,765	1,09,850	3,00,615	36.54
Private Unaided	38,084	21,096	59,180	35.65

**5.9.2** Among 7,98,813 Scheduled Tribe children enrolled in Classes IX and X, 73.45% are studying in rural schools as against 26.55% in urban schools. Further, among these Scheduled Tribe students, 49.69% are studying in government schools, 37.63% in private aided schools, and the rest 12.68% are studying in local body/private unaided schools.

**5.9.3** The present Survey reveals that girls constitute 32.10% of Scheduled Tribes enrolment in Classes IX and X, whereas in the Fifth Survey this percentage was 27.49. The corresponding percentage for the urban schools is 38.24% as compared to 29.88% in rural schools. Management-wise, this

proportion of girls is highest in private aided schools (36.54%) and lowest in government schools (28.38%).

**5.9.4** State-wise comparison shows that the percentage of girls among the Scheduled Tribe students is 50 or more in Kerala (51.86%), Mizoram (50.05%), Sikkim (52.44%), A & N Islands (50.76%) and Chandigrah (50.00%). The other States where this percentage is more than 45 are Meghalaya (48.38%), Nagaland (46.24%), Tamil Nadu (49.47%) and Delhi (46.34%). On the other hand, this percentage is even less than 25 in the States of Andhra Pradesh (22.56%), Goa (13.64%), Madhya Pradesh (21.66%), Rajasthan (10.39%) and West Bengal (23.63%).

## 5.10 Science Laboratories

**5.10.1** With the adaptation of the 10+2+3 system of education in the country uniformly, science has become an integral part of the curriculum at the secondary stage of education. It is being taught in 87,238 schools in the country as part of the general course at the secondary stage followed by streaming

at the higher secondary stage. It is essential that every school should have a science laboratory for the teaching and learning of science in a better way. This would help in better understanding of science subjects and in inculcating laboratory skills among students. Statement 5.13 gives the position about the availability of science laboratories in schools.

STATEMENT 5.13

### Schools Having Laboratory Facilities for Teaching Science at the Secondary Stage

Area/ Manage- ment	Total No. of Schools Having the Sec- ondary Stage	Schools Having Facility of			
		Science Labora- tory	Separate Labora- tories for Physics, Chemistry, Biology	Combined Labora- tory for Physics, Chemistry, Biology	Combined Laboratory for Physics, Chemistry and Separate for Biology
1	2	3	4	5	6
Rural	58,391	31,563	4,142	25,510	1,911
Urban	28,847	20,542	6,866	11,987	1,689
Total	87,238	52,105	11,008	37,497	3,600
Government	33,183	18,487	372	13,602	1,113
Local Body	8,221	3,336	501	2,635	200
Private Aided	33,210	22,005	4,762	15,621	1,622
Private Unaided	12,624	8,277	1,973	5,639	665

**5.10.2** It is revealed by Statement 5.13 that as many as 35,133 (40.27%) schools do not have the laboratory facilities for the teaching of science. Separate laboratories for physics, chemistry and biology are available in only 11,008 (12.62%) schools, and the rest of the 41,097 (47.11%) schools have only a combined laboratory for these subjects. As expected, the proportion of schools with science laboratories is higher in urban areas (71.21%) as against 54.05% in rural areas. As regards separate laboratories for physics, chemistry, biology, the situation is still worse in rural areas as only 7.09% schools in rural areas have these separate laboratories as against 23.80% schools in urban areas. Further, the proportion of schools having science laboratories as well as the proportion of schools with separate laboratories for these subjects is higher in the schools managed by private agencies than the schools managed by the government or local bodies.

**5.10.3** Considering the statewide availability of science laboratories it is observed that all the States except Goa (98.28%), Gujarat (85.26%), and Sikkim (89.89%), have science laboratories in less than 85%

of the schools. On the other hand, the States of Assam (6.18%), Meghalaya (23.92%), Orissa (15.09%) and Tripura (14.11%) have science laboratories in less than 25% of the schools. The situation is even worse with regard to separate laboratories for physics, chemistry and biology as all the States except Arunachal Pradesh (36.43%), and Uttar Pradesh (28.40%) have science laboratories separately for these subjects in less than 20% of the schools. The situation is not so bad in the Union Territories as all of them except Daman & Diu (70.00%) have science laboratories in more than 85% of the schools. However, only the Union Territories of Chandigarh (42.42%) and Delhi (48.79%) have subjectwise science laboratories in more than 40% of the schools. In Daman & Diu about two-thirds of the schools have combined laboratories, whereas in Lakshadweep all the schools have combined laboratories for science subjects.

## 5.11 Guidance Services

**5.11.1** There are 65,564 secondary schools in the country, of which 12,381 (18.88%) have provision for guidance services. As per the Fifth Survey, 4730

(9.00%) of the secondary schools had provision for guidance services. In urban areas, 21.55% schools have provision for guidance services as compared to 17.90% schools in rural areas. Managementwise, the

schools managed by private agencies are better placed than the schools being run by local bodies or government as far as availability of guidance services is concerned.

## STATEMENT 5.14

## Secondary Schools Providing Guidance Services

Area/Management	Total No. of Secondary Schools	Schools Having Facility of			
		Guidance Services	Trained Guidance Counsellor	Teacher Counsellor	Career Master
1	2	3	4	5	6
Rural	47,870	8,568	1,915	5,700	2,416
Urban	17,694	3,813	1,284	2,276	1,237
Total	65,564	12,381	3,199	7,976	3,653
Government	24,559	3,691	965	2,032	1,257
Local Body	7,901	679	160	430	164
Private Aided	23,060	5,882	1,197	4,178	1,596
Private Unaided	10,544	2,129	877	1,336	636

**5.11.2** Considering statewide figures it is observed that all the States except Gujarat (86.73%) have these facilities in less than 50% of the schools. At the other extreme there are some States and Union Territories where this percentage is even less than 5%. These are Tripura (0.89%), West Bengal (3.60%), Lakshadweep (0.00%) and Pondicherry (1.14%).

**5.11.3** It is revealed by the Survey data that a Trained Guidance Counsellor or a Teacher Counsellor or a Career Master or a combination of these has been appointed in order to provide guidance to pupils in secondary schools. However, no such staff is in existence in some of the schools. Out of 12,381 schools having a provision for guidance services,

3,199 (25.84%) have trained Guidance Counsellors, 7,976 (64.42%) have Teacher Counsellors and 3,653 (29.50%) have Career Masters. In Gujarat, where the maximum number of 3,268 schools have provision for guidance services, Teacher Counsellors are available in 3,055 (93.48%) schools. In Karnataka, out of 1,571 secondary schools having provision for guidance services, 942 (59.96%) have trained Guidance Counsellors, 762 (48.50%) have Teacher Counsellors and 1,050 (66.84%) have Career Masters. Further, in Orissa out of 1,345 secondary schools having guidance services, 1,081 (80.37%) schools have Teacher Counsellors. Similarly, in Rajasthan out of 1,284 secondary schools 909 (70.79%) have Teacher Counsellors. □

## Chapter 6

### HIGHER SECONDARY EDUCATION

#### 6.1 Introduction

The higher secondary stage of education, being a feeder stage to most of the professional courses in the country has got its own significance. Also, this stage is the terminal stage of school education before higher education. Keeping in view the importance of this stage, the Education Commission (1964-66) recommended a uniform pattern of school education in all the States and Union Territories (the 10+2 pattern). Presently this structure of 10+2 is being followed in all the States and UTs. In this Survey

efforts have been made to assess the educational facilities at this stage separately, as was done in the Fifth All India Educational Survey. In the earlier AIESs it was treated as a part of the secondary stage.

#### 6.2 Rural Habitations and Population Served

**6.2.1** Classes XI and XII constitute the higher secondary stage in all the States and UTs. The availability of this facility within and outside the habitations from 1973 onwards is given in Statement 6.1.

STATEMENT 6.1

Habitations and Their Population Served by Higher Secondary Stage of Education

Survey	Habitations					Percentage of Rural Population Served	
	Total	Served within them	%	Served within 8 km	%	Within Habitation	Within 8 km
1	2	3	4	5	6	7	8
Third AIES	9,49,967	4100	(0.43)	2,99,221	(31.50)	2.40	33.91
Fourth AIES	9,64,664	4718	(0.49)	3,52,539	(36.55)	2.78	41.08
Fifth AIES	9,81,864	8940	(0.91)	4,49,703	(45.80)	4.18	50.97
Sixth AIES	10,60,612	11728	(1.10)	6,04,161	(56.96)	5.36	63.60

**6.2.2** It is observed from Statement 6.1 that there is an increasing trend, though at slow pace, in the percentage of habitations and their population served by higher secondary sections within the habitations and within a distance of 8 km, between the two successive surveys. The percentage of population served with this facility

within 8 km at the time of the Third, Fourth, Fifth and Sixth surveys is 33.91, 41.08, 50.97 and 63.60, respectively. Statement 6.2 gives the statistics about availability of the facility in different distance slabs, and the percentage of the rural population served, which is self-explanatory.

## STATEMENT 6.2

**Habitations and their Population Served by Higher Secondary Stage of Education at Different Distances**

Distance Slab	Habitations with Higher Secondary Sections		Population Served by Higher Secondary Sections	
	Number	%	Number	%
1	2	3	4	5
Within the Habitation	11,728	1.10	3,53,72,717	5.36
0.1 to 2 km	1,51,252	14.26	10,05,35,616	15.24
2.1 to 4 km	1,58,375	14.93	10,21,00,237	15.48
4.1 to 6 km	1,54,621	14.58	10,13,12,098	15.36
6.1 to 8 km	1,28,185	12.09	8,02,41,962	12.16
Sub-total (within 8 km)	6,04,161	56.96	41 95,62,630	63.60
Beyond 8 km	4,56,451	43.04	24,01,28,418	36.40
Total	10,60,612	100.00	65,96,91,048	100.00

**6.2.3** In the country as a whole the higher secondary education facility is available to 63.60% of the rural population within a distance of 8 km. There are ten States and six UTs where the facility is available to more than 63.60% rural population. The States are Assam (75.19%), Goa (75.99%), Haryana (74.01%), Jammu & Kashmir (66.07%), Kerala (67.64%), Punjab (82.47%), Tamil Nadu (81.88%), Tripura (81.53%), Uttar Pradesh (78.49%), and West Bengal (76.84%). The six Union Territories are Andaman & Nicobar Islands (77.45%), Chandigarh (100%), Dadra & Nagar Haveli (69.69%), Daman & Diu (73.38%), Delhi (100%), and Pondicherry (91.41%). During the Fifth AIES, the facility was available to only 50.97% rural population in the country, and eight States and five UTs had the facility for more than 51% rural population. Thus it is concluded that between the Fifth and Sixth AIES, the condition

of availability of the higher secondary education facility to the rural population of the country has improved considerably.

#### **6.2.4 Habitations in Different Population Slabs and Availability of the Facility**

There are 7,119 habitations in the population slab '5000 and above'. Of these, 2,202 (30.93%) habitations have the facility within themselves, which cater to 34.34% of the rural population in the slab. Further, 5,550 (77.96%) habitations have the facility within a distance of 8 km, catering to 79.55% of the rural population in the slab. In the population slab '2000-4999', there are 52,928 habitations of which 3,905 (7.38%) have the facility within them, making available the facility to 8.36% population in the slab. Further, 35,309 (66.71%) such habitations, catering to 67.21% population in the slab, have the facility within a distance of 8 km.

## STATEMENT 6.3

#### **Rural Habitations in Different Population Slabs Served by Higher Secondary Sections within Them or within a Distance of 8 km**

Population Slab	Number of Habitations	Habitations Served within them	Col.3 as % of Col.2	% of Population Served within the Habitation	Habitations Served within 8 km	Col.6 as % of Col.2	% of Population Served within 8 km

2000-4999	52,928	3,905	7.38	8.36	35,309	66.71	67.21
1000-1999	1,25,046	2,365	1.89	2.03	79,379	63.48	63.54
500-999	2,13,059	1,621	0.76	0.79	1,30,833	61.41	61.49
Below 500	6,62,460	1,635	0.25	0.32	3,53,090	53.30	56.04
Total	10,60,612	11,728	11.06	5.36	6,04,161	56.96	63.60

**6.2.5** In the population slab '1000-1999', there are 1,25,046 of which 2,365 (1.89%) have the facility within them, catering to 2.03% population of the slab. There are 79,379 (63.48%) habitations served by the facility upto a distance of 8 km, catering to 63.54% population in the slab. The total number of habitations in the slab '500-999' is 2,13,059, of which 1,621 (0.76%) and 1,30,833 (61.41%) have the facility within them and upto a distance of 8 km, respectively, catering to 0.79% and 61.49% population in the slab.

**6.2.6** There are 6,62,460 habitations in the slab 'below 500' of which 1635 (0.25%) have the facility within them and 3,53,090 (53.30%) have the facility within a distance of 8 km. The former cater to 0.32% and the latter to 56.04% rural population in the slab.

### 6.2.7 Habitations Not Served

About 43% of rural habitations do not have the higher secondary education facility within a walking distance of 8 km. These unserved habitations

## STATEMENT 6.4

**Habitations Not Served by Higher Secondary Sections within a Distance of 8 km**

Population Slab	Number of Habitations in the Slab	Habitations not Served within a Distance of 8 km	% of Col.3 to Col.2	% of Col.3 to Total of Col.3	% of Col.3 to Total of Col.2
1	2	3	4	5	6
5000 & above	7,119	1,569	22.04	0.34	0.15
2000-4999	52,928	17,619	33.29	3.86	1.66
1000-1999	1,25,046	45,667	36.52	10.01	4.31
500-999	2,13,059	82,226	38.59	18.01	7.75
Below 500	6,62,460	3,09,370	46.70	67.78	29.17
Total	10,60,612	4,56,451	43.04	100.00	43.04

account for 36.40% of the rural population.

At the time of the Fifth AIES the percentage of habitations not served by the facility within 8 km was about 54, and they catered to about 49% of the rural population. This indicates that between the Fifth Survey and the Sixth Survey significant improvement in these facilities has taken place. But still more efforts are required to provide the higher secondary stage of education in rural areas.

## 6.3 Schooling Facilities in Habitations Predominantly Populated by Scheduled Castes

**6.3.1** There are 1,20,517 habitations predominantly populated by Scheduled Castes which account for a population of 5,39,93,578 in them. Of these, 620 (0.51%) and 73,938 (61.35%) habitations have the facility within themselves and within 8 km, catering to 2.30% and 67.03% of the population, respectively.

## STATEMENT 6.5

**Habitations Predominantly Populated by Scheduled Castes, Their Population and Availability of Higher Secondary Education Facility**

Population Slab	No. of Habitations in the Slab	Their Total Population	Habitations Having the Facility		Percentage of Population Served by the Facility	
			Within Them	Within 8 km	Within the Habitation	Within 8 km

2000-4999	2,712	74,28,929	152	1,973	6.37	73.12
1000-1999	9,287	1,24,04,751	157	6,454	1.79	69.62
500-999	21,752	1,49,47,171	133	14,369	0.63	66.18
Below 500	86,535	1,75,47,235	134	50,959	0.21	61.89
Total	1,20,517	5,39,93,578	620	73,938	2.30	67.03

Note: Figures within parentheses indicate percentages.

**6.3.2** There are 1,20,517 habitations predominantly populated by Scheduled Castes in the country and 61.35% (73,938) of them, catering to 67.03% of the rural population, have the facility within a distance of 3 km. There are eight States and five UTs providing this facility to more than 67.03% rural population within a distance of 8 km. These States are Assam (70.07%), Goa (84.34%), Jammu & Kashmir (68.93%), Punjab (86.05%), Tamil Nadu (80.53%), Tripura (90.09%), Uttar Pradesh (74.92%), and West Bengal (72.33%). Among Union Territories, Chandigarh (100%), Dadra & Nagar Haveli (100%), Daman & Diu (100%), Delhi (100%), and Pondicherry (92.10%) are providing the facility to more than 67.03% rural population. During the Fifth AIES the facility was available to 57.95% of the rural population within 8 km, and only seven States and five UTs had been providing the facility to more population in terms of percentage.

**6.3.3 Habitations in Different Population Slabs**  
There are 620 habitations predominantly

populated by SC population, having the facility within them. This number was 452 at the time of the Fifth Survey. Of the 231 habitations in the population slab '5000 and above', 44 (19.05%) have the facility within them and 183 (79.22%) have the facility within 8 km. Of the 2,712 habitations belonging to population slab '2000-4999', only 5.60% have the facility within them while 72.75% habitations have the facility within a distance of 8 km. The corresponding figures for the population slab '1000-1999' are 1.69% and 69.49%, respectively. Further, only 0.61% and 0.15% habitations of population slabs '500-999' and 'below 500', respectively, have the facility within them. The respective percentages of habitations in these slabs having facility within 8 km are 66.06 and 58.89 (Statement 6.5).

**6.3.4** The availability of the higher secondary education facility in habitations at different distances can be seen from Statement 6.6.

**6.3.5** Of the 1,20,517 habitations populated predominantly by the Scheduled Castes, only 0.51% have the

#### STATEMENT 6.6

##### Habitations Predominantly Populated by Scheduled Castes and Availability of Facility at Different Distances

Distance Slab	Habitations Having Higher Secondary Education Facility		Population Served by the Facility	
	Number	%	Number	%
1	2	3	4	5
Within the Habitation	620	0.51	12,39,966	2.30
0.1 to 2 km	18,971	15.74	97,17,836	18.00
2.1 to 4 km	20,695	17.17	96,94,590	17.95
4.1 to 6 km	18,614	15.45	87,93,390	16.28
6.1 to 8 km	15,038	12.48	67,47,605	12.50
Sub-total (within 8 km)	73,938	61.35	3,61,93,387	67.03
More than 8 km	46,579	38.65	1,78,00,191	32.97
Total	1,20,517	100.00	5,39,93,578	100.00

facility within them, 15.74% have upto a distance of 2 km, and 17.17% have the facility between 2 to 4 km. The percentage of habitations having facility between 4 to 6 km and 6 to 8 km is 15.45 and 12.48, respectively. Thus 61.35% habitations have the facility within 8 km and they cater to 67.03% of the population.

#### 6.3.6 Habitations Not Served

There are 46,579 (38.65%) habitations predominantly populated by Scheduled Castes, having 1,78,00,191 (32.97%) population which do not have the higher secondary education facility upto a distance of eight kilometres.

## STATEMENT 6.7

Total	46,579	38.65	1,78,00,191	32.97

#### 6.4 Schooling Facilities in Habitations Predominantly Populated by Scheduled Tribes

**6.4.1** The number of habitations predominantly populated by Scheduled Tribes is 1,94,733, which have a population of 6,41,19,451. Of these, only 624 (0.32%) habitations catering to 10,34,241 (1.61%) population have the facility within them. There are 71,210 (36.57%) habitations catering to 2,78,14,009 (43.38%) population having the facility within a distance of 8 km. As per the Fifth AIES, only 368 (0.22%) habitations catering to 1.00% population and 33,464 (20.50%) habitations catering to 26.56% population had the facility within them and within 8 km, respectively. This shows an increase in the facility within the habitation as well as within 8 km since the Fifth Survey.

**6.4.2** Of the 1,94,733 habitations predominantly populated by Scheduled Tribes, 36.57% (71,210) have the facility within 8 km and they cater to 43.38% of the rural population in the country. In eight States, viz. Assam (60.44%), Gujarat (67.08%), Karnataka (45.53%), Orissa (43.74%), Tamil Nadu (65.33%), Tripura (62.10%), Uttar Pradesh (71.48%) and West Bengal (61.44%), and four UTs, viz., Andaman & Nicobar Islands (73.68%), Dadra & Nagar Haveli (64.67%), Daman & Diu (100%) and Delhi (100%), the facility within 8 km is available to a larger proportion of rural population than the All India average. At the time of the Fifth AIES, the facility

was available to only 24.39% of the rural population of the country within 8 km.

#### 6.4.3 Habitations in Different Population Slabs

There are 152 habitations in the slab '5000 and above' having 10,38,298 population. Of these, 38 (25.00%) habitations have the facility within them and they cater to 25.78% population of the slab. Further, 113 (74.34%) habitations have the facility within a distance of 8 km, catering to 75.13% population of the slab. In the slab '2000-4999', there are 1672 habitations of which 129 (7.71%), catering to 8.84% population in the slab, have the facility within them. About 58% such habitations catering to about the same percentage of population in the slab have the facility within a distance of 8 km. Further, 1.93% and 0.55% habitations in the slabs '1000-1999' and '500-999' have the facility within them and they cater to 2.10% and 0.58% of the population of these slabs, respectively. As regards the availability of the facility within 8 km is concerned, about 51% habitations serving the same percentage of the population of the former slab and about 44% habitations catering to the same percentage of the population of the latter slab have the facility within a distance of 8 km. In the lowest slab of 'below 500' population, 0.10% habitations catering to 0.14% population of the slab have the facility within them. The facility within 8 km is available to 34.32% habitations which cater to 36.69% population of the slab.

## STATEMENT 6.8

**Habitations in Different Population Slabs Predominantly Populated  
by Scheduled Tribes and Their Population and Availability of Higher Secondary Education Facility**

Population Slab	No. of Habitations in the Slab	Their Total Population	Habitations Having the Facility		Percentage of Population Served by the Facility	
			Within Them	Within 8 km	Within the Habitation	Within 8 km
1	2	3	4	5	6	7
5000 & above	152	10,38,298	38 (25.00)	113 (74.34)	25.78	75.13
2000-4999	1,672	45,21,261	129 (7.71)	971 (58.07)	8.84	58.46

500-999	26,383	1,79,01,979	146 (0.55)	11,669 (44.23)	0.58	44.56
Below 500	1,58,500	3,01,92,567	156 (0.10)	54,398 (34.32)	0.14	36.69
Total	1,94,733	6,41,19,451	624 (0.32)	71,210 (36.57)	1.61	43.38

Note: Figures within parentheses indicate percentages.

**6.4.4** Apart from 624 habitations having the facility within them, 16,923 (8.69%) habitations catering to 9.81% of the population have the facility within a distance of 2 km. Further, 15,747 (8.09%) and 18,065 (9.28%) such habitations, catering to 9.79% and 11.11% population, respectively, have the facility within 2 to 4 km and 4 to 6 km. Another 19,851 (10.19%) such habitations have the facility within 6 to 8 km which cater to 11.04% population. Thus 71,210 (36.57%) habitations have the facility within a distance of 8 km and they cater to 43.38% of the rural population.

Total	1,23,523	100.00	3,63,05,442	56.62

**6.5 Schooling Facilities in Villages**

**6.5.1** There were 5,86,465 villages in the country as on 30.9.1993, which were 5,79,148 at the time of the Fifth AIES, thus showing an increase of 1.26% villages between the Fifth and Sixth surveys. Of these, only 1.96% (11,500) villages have the higher secondary education facility within them, while this percentage was 1.34 at the time of the Fifth Survey. This shows that the number of villages having higher secondary education facility within them is increasing

with time. Out of 11,500 such villages having the facility within them, 550 (4.78%) have zero per cent Scheduled Caste (SC) population, but the majority of villages, 74.83% (8606) to be precise, have SC population between 1% to 25%. Another 18.12%, 1.77% and 0.50% villages having such educational facility have SC population between 26% to 50%, 51% to 75% and above 75%, respectively. In all these groups of SC population, except the group of 1% to 25%, the percentage of villages is below the All India percentage of 1.96.

**STATEMENT 6.11**

**Villages according to Percentage of Scheduled Caste Population and Availability of Higher Secondary Education Facility within Them**

Percentage of Scheduled Caste Population in Villages	Total Number of Villages	Number of Villages Having This Facility	Col.3 as % of Col.2	Col.3 as % of Its Total

Zero	1,49,451	550	0.37	4.78
1-25	2,86,813	8,606	3.00	74.83
26-50	1,08,362	2,084	1.92	18.12
51-75	26,847	203	0.77	1.77
Above 75	14,992	57	0.38	0.50
Total	5,86,465	11,500	1.96	100.00

**6.5.2** Of the 11,500 villages having higher secondary education facility within them, 5068 (44.07%) and 5477 (47.63%) villages have zero per cent and between 1% to 25% Scheduled Tribe population in them, respectively. There are 558 (4.85%), 216 (1.88%) and 181 (1.57%) villages with 26% to 50%, 51% to 75% and above 75% ST population, having the higher secondary education facility within them.

STATEMENT 6.12

**Villages according to Percentage of Scheduled Tribes  
Population and Availability of Higher Secondary Education  
Facility within Them**

Percentage of Scheduled Tribe Population in Villages	Total Number of Villages	Number of Villages Having the Facility	Col.3 as % of Col.2	Col.3 as % of Its Total
1	2	3	4	5
Zero	3,33,271	5,068		
1-25	1,22,620	5,477	1.52	44.07
26-50	32,390	558	4.47	47.63
51-75	24,729	216	1.72	4.85
Above 75	73,455	181	0.87	1.88
			2.47	1.57
Total	5,86,465	11,500	1.96	100.00

In the villages with various percentages of the ST population, the groups of villages with 1% to 25% and above 75% ST population have more percentage than the All India percentage of 1.96 of such villages, these being 4.47% and 2.47% respectively.

## 6.6 Higher Secondary Schools

**6.6.1** The Survey reveals that there are 23,662 higher secondary schools in the country, of which 11,600 (49.02%) are in rural and 12,062 (50.98%) in urban areas. At the time of the Fifth AIES, there were 15,465 such schools in the country, depicting a sharp rise of 53% in such schools between 1986 and 1993. This percentage increase had been only 9.72 from the Third (1973) to the Fourth (1978) Survey, whereas it was 48.29 from the Fourth (1978) to the Fifth (1986) Survey. The trend of an increase of around 50% in schools has been maintained in this Survey also, which in itself is an achievement. Keeping in view the above increase, it can be safely concluded that enough efforts are being made to provide more independent higher secondary schools. Further, it is observed that during the Fourth and Fifth surveys 43.06% and 46.14% such schools were in rural areas, while now this percentage has gone to about 49. Thus a clear trend of more such new

schools being opened in rural areas is visible.

**6.6.2** Of the total 23,662 higher secondary schools, 17.73%, 14.38% and 67.89% are boys', girls' and co-educational schools, respectively. During the Fifth Survey, 30.67%, 14.13% and 55.20% were boys', girls' and co-educational schools, while these percentages were 33.08, 15.49 and 51.43, respectively, during the Fourth AIES. This reflects a visible trend that the percentage of schools for boys only, has decreased considerably from the Fourth (1978) to the Fifth (1986), and from the Fifth (1986) to the Sixth (1993) Survey, while, on the other hand, the percentage of co-educational schools has increased from 51 to 55 between the Fourth (1978) and the Fifth (1986) surveys and from 55 to 68 between the Fifth (1986) and the Sixth (1993) surveys. The respective percentages of such schools are 11.89, 4.02 and 84.09 in rural and 23.35, 24.33 and 52.32 in urban areas. This shows that in rural areas most of the schools are co-educational and very few schools cater to only girls, which is not a healthy trend. The rural Indian parents being orthodox in nature may not like to send their daughters to co-educational schools. Therefore, necessary efforts should be made to open more higher secondary schools exclusively for girls in rural areas.

## STATEMENT 6.13

## Higher Secondary Schools according to Type

Type of School	Rural			Urban			Total		
	No. of Schools	%	Relative % of Fifth Survey	No. of Schools	%	Relative % of Fifth Survey	No. of Schools	%	Relative % of Fifth Survey
1	2	3	4	5	6	7	8	9	10
Boys	1,379	11.89	25.91	2,816	23.35	34.75	4,195	17.73	30.67
Girls	467	4.02	2.42	2,935	24.33	24.17	3,402	14.38	14.13
Co-educational	9,754	84.09	71.66	6,311	52.32	41.08	16,065	67.89	55.20
Total	11,600 (49.02)	100.00	100.00	12,062 (50.98)	100.00	100.00	23,662 (100.00)	100.00	100.00

Note: Figures within parentheses indicate percentages.

**6.6.3** Of the total number of 23,662 higher secondary schools 38.61%, 3.76%, 44.99% and 12.64% schools belong to government, local body, private aided and private unaided managements, respectively. This clearly indicates that the largest number and proportion of such schools are privately managed, followed by government, private unaided and local body managed schools. It will be worthwhile to point out that a similar trend was observed during the Fifth as well as the Fourth survey. In rural and urban areas also, the same trend has been observed, as 45.03%, 43.03%, 8.57% and 3.36% higher secondary schools in rural areas are managed by

private aided, government, private unaided and local body managements, respectively and the respective percentages in urban areas are 44.99, 38.6, 12.64 and 3.76. Further, it is worthwhile to mention that the percentage of private aided schools has decreased significantly but the percentage of private unaided schools has increased when these are compared with the Fifth Survey findings. Thus it can be safely concluded that more new private unaided schools have been opened in the intervening period between the Fifth and the Sixth surveys, which reflects the increasing tendency of the public to admit their wards in private unaided schools.

## STATEMENT 6.14

## Higher Secondary Schools according to Management

Management	Rural			Urban			Total		
	No. of Schools	%	Relative % of Fifth Survey	No. of Schools	%	Relative % of Fifth Survey	No. of Schools	%	Relative % of Fifth Survey
1	2	3	4	5	6	7	8	9	10
Government	4,992	43.03	43.18	4,144	34.34	36.46	9,136	38.61	39.56

Private Aided	5,224	45.03	52.50	5,422	44.95	51.58	10,646	44.99	52.00
Private Unaided	994	8.57	3.26	1,997	16.55	8.84	2,991	12.64	6.27
Total	11,600	100.00	100.00	12,062	100.00	100.00	23,662	100.00	100.00

**6.6.4** Higher secondary sections are available in higher secondary schools only; as such the number of such sections will be automatically equal to the number of higher secondary schools. These sections are available in four categories of higher secondary schools, as detailed under:

1. Higher Secondary only: These constitute the schools having Classes XI and XII only, and Intermediate/Junior/Independent Pre-university Colleges with these two classes only.
2. Higher Secondary schools with Secondary sections, having Classes IX to XII; this category also includes other such institutions.
3. Higher Secondary schools with Secondary and Upper Primary sections, having Classes VI to

XII; this category, also includes other such institutions.

4. Higher Secondary schools with Secondary, Upper Primary and Primary sections. These are the schools having all the four stages of education, with Classes I to XII. These also include the total composite Intermediate, and such other institutions.

There are 23,662 higher secondary sections as per this Survey, of which 11,600 are in rural and 12,062 in urban areas. During the Fifth Survey, the number of such sections was 15,465, and 10,429 during the Fourth Survey. From the Fourth to the Fifth Survey, the higher secondary schools have increased by 48.29%, and by 53.00% in between Fifth and the Sixth Survey.

#### STATEMENT 6.15

##### Higher Secondary Sections as Part of Composite Schools or as being Higher Secondary Schools

Area	P, UP, S & HS	UP, S & HS	S & HS	HS	Total
1	2	3	4	5	6
Rural	1,481 (12.77)	6,736 (58.07)	2,304 (19.86)	1,079 (9.30)	11,600 (100.00)
Urban	3,283 (27.22)	5,431 (45.02)	2,439 (20.22)	909 (7.54)	12,062 (100.00)
Total	4,764 (20.13)	12,167 (51.42)	4,743 (20.04)	1,988 (8.40)	23,662 (100.00)

Note: Figures within parentheses indicate percentages.

In totality, as well in rural and urban areas too, the majority of higher secondary sections are in schools having upper primary and secondary sections also (UP, S and HS) followed by schools having P, UP and S sections and schools with S and HS sections.

#### 6.7 Enrolment in Classes XI and XII

**6.7.1** Only two classes, XI and XII, constitute this stage of school education, and as per the Sixth AIES there are 54,65,154 students studying in these classes. At the time of the Fifth AIES, 35,09,571 students, and at the time of the Fourth AIES, 18,33,573 students were studying in these two classes. From the Fourth to the Fifth Survey, the increase in terms of percentage was 91%, but this is 55.72% from the Fifth to the Sixth Survey. At the

time of the Fourth Survey, Class XII was part of higher education in many States; it had become part of school education at the time of the Fifth Survey. Therefore, the increase in enrolment was on the higher side, and comparison between the enrolment of these surveys will not be justified. However, from the Fifth to the Sixth Survey the increase of about 56% in enrolment at this school stage is quite satisfactory.

**6.7.2** Of the total enrolment, 35,01,794 (64.07%) and 19,63,360 (35.93%) are boys and girls, while these percentages were 69.23 and 30.77 at the time of the Fifth AIES. This shows that the percentage of girls has increased considerably from the Fifth to the Sixth Survey, thereby indicating that more girls are continuing their studies upto this stage. But in

rural areas the percentage of girls students is 29.76, while this is 39.73 in urban areas, which clearly indicates that the number of girls studying in rural areas is less than that in urban areas. This may be due to the reason that in rural areas the facility available for girls is too far from the distance point of view to attract them to higher secondary schools. Another reason may be that in rural areas a sufficient

number of girls' higher secondary schools are not available, and the parents of rural areas avoid sending grown-up girls to co-educational schools. Therefore, necessary efforts should be made to open new girls' higher secondary schools in rural areas. Further, in totality, 38.14% students are studying in rural areas, while this percentage was 37.86 at the time of the Fifth AIES.

STATEMENT 6.16

## Enrolment in Classes XI and XII

Area	Class	Boys	Girls	Total
1	2	3	4	5
Rural	XI	7,42,097	3,30,225	10,72,322

		(60.27)	(39.73)	(100.00)
Total	XI	17,98,602	10,40,411	28,39,013
	XII	17,03,192	9,22,949	26,26,141
	Total	35,01,794	19,63,360	54,65,154
		(64.07)	(35.93)	(100.00)

Note: Figures within parentheses indicate percentages.

## 6.7.3 Enrolment of Scheduled Castes

In Classes XI and XII, 6,60,997 children belonging to Scheduled Castes are studying, of whom 69.71% are boys and 30.29% girls. The percentage of these SC students studying in rural and urban areas is 43.91 and 56.09, respectively. Further, of the

2,90,273 rural pupils, 74.47% are boys and 25.53% girls, while of the 3,70,724 urban students, 65.97% are boys and 34.03% girls. These 6,60,997 SC students are 12.09% of the total enrolment at this stage in the country, while the respective percentage in rural and urban areas is 13.93 and 10.97 against the respective total enrolment.

STATEMENT 6.17

## Scheduled Caste Enrolment in Classes XI and XII

Area	Total Enrolment	Scheduled Caste Enrolment				
		Boys	Girls	Total	Col. 5 as % of its Total	Col. 5 as % of Col. 2
1	2	3	4	5	6	7
Rural	20,84,271	2,16,167 (74.47)	74,106 (25.53)	2,90,273 (100.00)	43.91	13.93
Urban	33,80,883	2,44,584 (65.97)	1,26,140 (34.03)	3,70,724 (100.00)	56.09	10.97
Total	54,65,154	4,60,751 (69.71)	2,00,246 (30.29)	6,60,997 (100.00)	100.00	12.09

Note: Figures within parentheses indicate percentages.

### 6.7.4 Enrolment of Scheduled Tribes

There are 2,20,706 pupils belonging to Scheduled Tribes studying at this stage of education in the country. Of these, 1,33,243 (60.37%) and 87,463 (39.63%) belong to rural and urban areas, and the percentage of boys (1,59,751) and girls (60,955) is 72.38 and 27.62, respectively. In rural areas the percentage of boys and girls is 73.71

and 26.29, while the respective percentage in urban areas is 70.36 and 29.64. Further, 1,33,243 rural ST students constitute 6.39% and 87,463 urban students constitute 2.59% of the respective total enrolment of rural and urban areas. However, 2,20,706 ST students studying at this stage constitute only 4.04% of the total enrolment in the country.

STATEMENT 6.18

#### Scheduled Tribe Enrolment in Classes XI and XII

Area	Total Enrolment	Scheduled Tribe Enrolment				
		Boys	Girls	Total	Col.5 as % of its Total	Col.5 as % of Col.2

Total	54,65,154	1,59,751 (72.38)	60,955 (27.62)	2,20,706 (100.00)	100.00	4.04

Note: Figures within parenthesis indicate percentages.

### 6.8 Enrolment in Pre-University Classes (PUC) attached to Degree Colleges

**6.8.1** The Education Commission (1964-66) recommended that the +2 stage of education should be a part of school education. In view of this, the majority of States have now adopted the 10+2 pattern. However, even now, in sixteen States and two UTs, these two classes, viz. XI and XII, are attached to degree colleges. To be specific, the States of Andhra Pradesh, Assam, Bihar, Goa, Haryana, Himachal Pradesh, Karnataka, Kerala, Maharashtra, Manipur, Meghalaya, Mizoram, Nagaland, Orissa, Punjab and West Bengal and the UTs of Chandigarh and Pondicherry, have the Classes XI and XII, termed as 'pre-university classes', attached to degree colleges. The respective number at the time of the

Fifth AIES was 17 and 2, which shows no change in the situation.

**6.8.2** As per the present Survey, 21,33,778 students are studying in Classes XI and XII attached to degree colleges, while this number was only 16,97,243 according to the Fifth AIES. Of the total 21,33,778 students, 64.84% are boys and 35.16% are girls. Further, 12.19% (2,60,098) and 6.59% (1,40,579) students, respectively, belong to Scheduled Castes and Scheduled Tribes. Among the 2,60,098 SC students, 69.36% are boys and 30.64% are girls, while the respective percentages for ST students are 66.43 and 33.57. In rural areas, the percentage of boys and girls is 68.11 and 31.89, while in the urban areas 63.84% are boys and 36.16% are girls.

## STATEMENT 6.19

Enrolment in Higher Secondary/Pre-University or  
Equivalent Classes Attached to Degree Colleges

Area	Type	Enrolment								
		Class XI			Class XII			Total

1	2	3	4	5	6	7	8	9	10	11
Rural	Boys	1,67,638	22,998	13,336	1,74,124	24,485	13,090	3,41,762 (68.11)	47,483 (69.80)	26,426 (70.15)
	Girls	80,453	10,214	5,615	79,601	10,330	5,628	1,60,054 (31.89)	20,544 (30.20)	11,243 (29.85)
	Total	2,48,091 (22.93)	33,212	18,951	2,53,725 (24.12)	34,815	18,718	5,01,816 (100.00)	68,027 (100.00)	37,669 (100.00)
Urban	Boys	5,31,368	68,343	35,206	5,10,485	64,578	31,750	10,41,853 (63.84)	1,32,921 (69.20)	66,956 (65.06)
	Girls	3,02,292	31,200	19,452	2,87,817	27,950	16,502	5,90,109 (36.16)	59,150 (30.80)	35,954 (34.94)
	Total	8,33,660 (77.07)	99,543	54,658	7,98,302 (75.88)	92,528	48,252	16,31,962 (100.00)	1,92,071 (100.00)	1,02,910 (100.00)
Total	Boys	6,99,006 (64.62)	91,341 (68.80)	48,542 (65.95)	6,84,609 (65.06)	89,063 (69.94)	44,840 (66.96)	13,83,615 (64.84)	1,80,404 (69.36)	93,382 (66.43)
	Girls	3,82,745 (35.28)	41,414 (31.20)	25,067 (34.05)	3,67,418 (34.92)	38,280 (30.06)	22,130 (33.04)	7,50,163 (35.16)	79,694 (30.64)	47,197 (33.57)
	Total	10,81,751 (100.00)	1,32,755 (100.00)	73,609 (100.00)	10,52,027 (100.00)	1,27,343 (100.00)	66,970 (100.00)	21,33,718 (100.00)	2,60,098 (100.00)	1,40,579 (100.00)

Note: Figures within parentheses indicate percentages.

**6.8.3** There are 10,81,751 students in Class XI of whom only 22.93% are studying in rural areas, and the remaining 77.07% in urban areas. This difference in percentage may be due to the reason that there are less degree colleges in rural areas than in urban. The same trend has emerged in enrolment of Class XII where 24.12% students are enrolled in rural colleges and 75.88% in urban colleges. In totality, 23.52% students are studying in rural areas and 76.48% in urban areas. Among the total SC students, 26.15% are in rural and 73.85% in urban areas, while the respective percentages for ST students are 26.80 and 73.20.

### 6.9 Total Enrolment

**6.9.1** There are about 76 lakh students in Classes XI and XII in the country of whom about 72% are in higher secondary schools and 28% are in degree colleges. Of the total 75,98,932 students, 34.03% (25,86,087) are enrolled in rural areas and the remaining 65.97% (50,12,845) are studying in urban areas, and 64.29% are boys and 35.71% are girls. Among the enrolment of higher

secondary schools, 64.07% are boys and 35.93% are girls, while the respective percentages in the enrolment of degree colleges are 64.84 and 35.16. Thus, it is concluded that in higher secondary schools as well as in degree colleges the percentage of boys and girls studying in Classes XI and XII, respectively, is almost same.

### 6.10 Courses at +2 Stage

**6.10.1** Information about different courses being taught at the +2 stage in higher secondary schools as well in degree colleges has been collected separately. Amongst the 23,662 higher secondary schools in the country, 18,433 (77.90%), 13,350 (56.42%) and 9,297 (39.29%) schools, respectively, impart education in Arts, Science and Commerce streams. Further, 996 (4.21%), 3,854 (16.29%) and 1,132 (4.78%) schools have provision for Agriculture, Vocational/Technical and Other streams. Of the 54,65,154 students belonging to these 23,662 higher secondary schools, 47.94%, 27.68% and 16.06% are in Arts, Science and Commerce streams.

## STATEMENT 6.20

## Total Enrolment in Classes XI and XII

Area	Enrolment in								
	Degree Colleges			Higher Secondary Schools			Total		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
1	2	3	4	5	6	7	8	9	10
Rural	3,41,762	1,60,054	5,01,816	14,63,985	6,20,286	20,84,271	18,05,747 (36.96)	7,80,340 (28.76)	25,86,087 (34.03)
Urban	10,41,853	5,90,109	16,31,962	20,37,809	13,43,074	33,80,883	30,79,662 (63.04)	19,33,183 (71.24)	50,12,845 (65.97)
Total	13,83,615	7,50,163	21,33,778 (28.08)	35,01,794	19,63,360	54,65,154 (71.92)	48,85,409 (100.00)	27,13,523 (100.00)	75,98,932 (100.00)
	(64.84)	(35.16)	(100.00)	(64.07)	(35.93)	(100.00)	(64.29)	(35.71)	(100.00)

Note: Figures within parentheses indicate percentages.

respectively. Further, 1.35%, 4.78% and 2.19% students are enrolled in Agriculture, Vocational/ Technical and Other streams, respectively.

**6.10.2** 2,986 degree colleges have reported having Classes XI and XII attached to them, of which 86.47%, 62.59% and 53.95% colleges, respectively, are imparting education in Arts, Science and Commerce streams. Further, the Technical/ Vocational stream is available in only 0.84% colleges while 9.28% and 2.18% colleges have Agriculture and Other streams. There are 21,33,778 students in these colleges in Classes XI and XII of whom 50.75%, 30.52% and 16.94% are in Arts, Science and Commerce streams, respectively. In Technical/ Vocational, Agriculture and Other streams the respective percentage is 0.25, 1.24 and 0.30 only.

### 6.11 Laboratories at +2 Stage

**6.11.1** The information about science laboratories has been collected only from 23,662 higher secondary schools and not from degree colleges. Of the 13,350 schools having science subjects, 5,402 (40.46%) are in rural and 7,948 (59.54%) in urban areas. Among the rural schools, 2,923 (54.11%), 384 (7.11%) and 1,236 (22.88%) have separate laboratories for physics, chemistry and biology. Another 384 (7.11%) schools have separate laboratories for physics and chemistry but none for biology. In 1,236 (22.88%) schools only one combined laboratory for all the three subjects is available. In each of the 62 (1.15%) schools, a combined laboratory for physics and chemistry is available, and they do not have any facility for

biology. There are 304 (5.63%) schools having a combined laboratory for physics and chemistry, and they have a separate laboratory for biology. In the remaining 493 (9.12%) higher secondary schools, no science laboratory exists, which is alarming. Of the 7,948 schools in urban areas, 5,671 (71.35%) schools have separate laboratories for all the three subjects while 351 (4.42%) schools have separate laboratories for physics and chemistry but none for biology. Another 830 (10.44%) schools have one combined laboratory for the three subjects while 48 (0.60%) schools have a combined laboratory for physics and chemistry but none for biology. There are 555 (6.98%) schools having a combined laboratory for physics and chemistry but a separate laboratory for biology, and in the remaining 493 (6.20%) schools there is no laboratory at all for any subject.

### 6.12 Guidance and Counselling Services

**6.12.1** Among the 23,662 higher secondary schools, 7,161 (30.26%) provide guidance services to the students, of which 40.61% are in rural and 59.39% in urban areas. At the time of the Fifth Survey, only 15.24% schools had the provision of providing guidance services. In the above 7,161 schools, there are 2,429 trained guidance counsellors, 4,140 teacher counsellors, and 2,150 career masters to guide the students.

### 6.13 Vocational Courses

**6.13.1** About vocational courses, no separate information has been collected during the Sixth Survey, and two streams, viz. vocational and

technical, have been clubbed together. In all, 3854 (16.29% of the total) schools impart education in either or both of these streams, of which 39.41% are in rural and 60.59% in urban areas. There are

2,60,973 students in vocational/technical courses, of whom 37.09% are girls and the remaining 62.91% are boys. Further, of this total enrolment, 53.51% are in Class XI and 46.85% in Class XII. □

## Chapter 7

### TEACHERS

#### 7.1 Introduction

After the country's Independence the main concern of the education planners for many years has been the quantitative expansion of education. Consequently, many new schools were opened, particularly in rural areas, to provide schooling facilities to children within a convenient walking distance. The National Policy on Education, 1986 (NPE, 1986) emphasised the need for qualitative improvement in education. Several programmes have been undertaken to implement the policy. The teacher being the main vehicle for the qualitative improvement in school education, the NPE, 1986 calls for a substantial improvement in the conditions of work and the quality of teachers' education.

In the present Survey, information about teachers has been collected through two schedules, viz., School Information Form-1 (SIF-1) and Teacher Information Form (TIF). While SIF-1 gives schoolwise data on aspects like number of teachers in position, voluntary/contractual teachers, attrition of teachers, teachers exclusively for physical education/ physical training/ yoga, teachers staying outside the village/ town where the school is located, TIF provides stagewise information about academic qualifications of teachers, preservice and inservice training, tenure of service, competence in teaching of science and mathematics and teaching experience. In this chapter an attempt has been made to discuss these aspects.

#### 7.2 Teachers in Position and Sanctioned Posts

There were 8,22,486 schools in the country as on 30 September 1993 of which 6,96,297 (84.66%) are located in rural areas. Categorywise, the number of

primary, upper primary, secondary and higher secondary schools is 5,70,455, 1,62,805, 65,564 and 23,662, respectively. The total number of teachers working in these schools is 41,97,555. Statement 7.2 shows that 94.39% of the total sanctioned posts have been filled. The corresponding percentage for rural and urban schools is 93.27% and 96.83%, respectively. This shows that the schools in rural areas have a comparatively larger percentage of sanctioned posts vacant than their counterparts in urban areas. Further, the schools run by the government have a larger percentage of posts vacant than the schools managed by other agencies. It will be worthwhile to mention here that in many schools managed by the private agencies information about sanctioned posts had not been given. In such cases the teachers working in the school have also been shown against posts sanctioned.

Statement 7.1 shows that 28,45,401 (67.79%) teachers are in position in rural schools as against 13,52,154 (32.21%) in urban schools. Managementwise, the number of teachers working in government, local body, private aided and private unaided schools is 16,52,341 (39.36%), 12,36,194 (29.45%), 8,48,438 (20.21%) and 4,60,582 (10.97%), respectively. As per the Fifth Survey, the total number of working teachers was 36,44,681 of whom 25,31,300 (69.45%) were working in rural schools. Thus an overall increase of 15.17% in the number of teachers has been witnessed during the intervening period between the two surveys. But there has been a reduction in the proportion of rural school teachers although their absolute number has increased by 3,14,101 since the Fifth Survey.

#### STATEMENT 7.1

##### Teachers in Position in Schools

Area/ Management	Primary Schools	Upper Primary Schools	Secondary Schools	Higher Secondary Schools	Total
1	2	3	4	5	6

Private Unaided	101.86	99.86	102.18	98.58	100.83

**7.2.1 Teachers in Primary Schools**

Out of 41,97,555 teachers in the country, 16,23,379 (38.67%) are working in primary schools. Of these, 12,75,218 (78.55%) are posted in rural areas and the remaining 3,48,161 (21.45%) teachers are working in schools located in urban areas. Managementwise, the schools run by local bodies have the largest percentage of primary school teachers (46.66) followed by government schools (38.11), private unaided schools (8.32) and private aided schools (6.91). According to the Fifth Survey, the total number of teachers in primary schools was 14,92,721 of whom 11,79,920 (79.04%) were teaching in rural areas. Thus the intervening period between the two surveys witnessed an increase of 1,30,658 (8.75%) teachers. The corresponding increase in the number of schools, however, was 7.89%.

The present Survey reveals that 6.17% of the sanctioned posts of teachers in primary schools are lying vacant. The corresponding percentage in rural and urban areas is 7.24 and 2.04, respectively. Further, the schools run by the government have a larger proportion of vacant posts than the schools managed by local bodies or private agencies.

**7.2.2 Teachers in Upper Primary Schools**

The number of teachers working in upper primary schools is 11,29,747 as against 10,02,136 reported at the time of the Fifth Survey, registering an increase of 12.73%. Seventy per cent of them are teaching in rural schools. Managementwise analysis of data

shows that the largest percentage of working teachers is in schools run by the government (42.24) and the lowest in private unaided schools (12.24). It is observed that a larger proportion of sanctioned posts are lying vacant in rural schools. Further, schools run by the government have a larger proportion of vacant posts than the schools run by other managements.

**7.2.3 Teachers in Secondary Schools**

There are 8,29,405 teachers employed in secondary schools, constituting 95.49% of the sanctioned posts. The corresponding percentage in rural and urban areas is 94.42 and 97.46, respectively. This shows that, comparatively, a larger proportion of sanctioned posts are lying vacant in rural areas than in urban areas. The number of teachers working in secondary schools at the time of the Fifth Survey was 7,46,954, showing an increase of 11.04% during the period between the two surveys. Managementwise, the schools run by the government have employed the largest percentage of teachers (37.83%) followed by private aided (37.52%), private unaided (14.28%) and local body schools (10.37%). Further, the schools run by government have a larger proportion of sanctioned posts vacant.

**7.2.4 Teachers in Higher Secondary Schools**

Out of 6,15,024 teachers in higher secondary schools, 2,47,584 (40.26%) are posted in rural areas. The percentage of teachers working in government, local

body, private aided and private unaided schools is 39.47, 3.87, 45.48 and 11.18, respectively. This indicates that private aided schools have appointed the largest proportion of teachers, and schools managed by local bodies the lowest. As per the Fifth Survey, the number of teachers working in higher secondary schools was 4,26,199. This shows that a sharp increase of 44.30% has been registered in their number since the Fifth Survey.

In higher secondary schools, 94.25% of the sanctioned posts are filled. Thus 5.75% of the teaching posts are lying vacant. There does not seem to be any difference in the percentage of posts filled in rural and urban schools. Further, in schools run by the government a larger percentage of sanctioned posts are lying vacant as compared to schools managed by other agencies.

### 7.3 Female Teachers

The Survey figures reveal that about one-third

(33.62%) of the total number of teachers in the country are females. As expected, the percentage of female teachers in urban areas (55.00) is much higher than that in rural areas (23.46). According to the Fifth AIES, the proportion of female teachers was 30%. The corresponding figures for rural and urban areas were 21.42% and 49.60%, respectively. This shows an increase in the proportion of female teachers in schools in rural as well as in urban areas during the intervening period between the two surveys. Considering the representation of female teachers in schools under different managements it is observed that the proportion of female teachers is the highest in private unaided schools (52.63%) and the lowest in government schools (28.70%). On examining the data school- category-wise it is found that the proportion of female teachers is comparatively lower in primary schools (31.61%) than in upper primary (35.97%) or secondary (34.68%) or higher secondary schools (33.18%).

#### STATEMENT 7.3

##### Percentage of SC, ST, OBC and Female Teachers in Schools

School Category	Area/ Management	Percentage of Teachers			
		SC	ST	OBC	Female

	Private Unaided	3.82	2.72	21.25	52.24

contd on page 72

STATEMENT 7.3 (contd)

School Category	Area/ Management	Percentage of Teachers			
		SC	ST	OBC	Female
1	2	3	4	5	6
Higher Secondary	Rural	7.59	3.24	28.86	17.84
	Urban	5.37	1.78	19.55	43.52
	Total	6.26	2.37	23.30	33.18
	Government	7.74	2.77	23.36	33.66
	Local Body	8.07	2.68	27.24	31.41
	Private Aided	5.81	2.32	24.12	26.90
	Private Unaided	2.26	1.05	18.35	57.65
Total	Rural	10.34	7.26	27.95	23.46
	Urban	6.14	2.54	21.22	55.00
	Total	8.99	5.74	25.78	33.62
	Government	9.39	8.25	26.29	28.70
	Local Body	11.85	5.14	26.36	29.64
	Private Aided	6.31	3.60	26.63	38.69
	Private Unaided	4.77	2.30	20.83	52.63

Among the States, Kerala tops the list with 65.28% of its teachers being women, followed by Goa (58.82%), Punjab (52.10%) and Tamil Nadu (49.90%). On the other hand, Bihar (19.75%) has the lowest percentage of female teachers. In Arunachal Pradesh (21.54%), Assam (24.45%), Orissa (21.08%), Uttar Pradesh (23.13%) and West Bengal (24.65%) the representation of female teachers is less than one-fourth of the total teachers in position. Further, the percentage of female teachers is higher than that of the All India average of 33.62% in all the Union Territories except in Lakshadweep. It ranges from 83.86% in Chandigarh to 26.05% in Lakshadweep.

#### 7.4 Teachers Belonging to Scheduled Castes

Statement 7.3 shows that 8.99% of the total number of 41,97,555 teachers in position belong to Scheduled Castes. Their proportion in rural and urban schools is 10.34% and 6.14%, respectively, thereby indicating that their representation is more in rural areas than in urban areas. According to the Fifth Survey, the representation of teachers belonging to Scheduled Castes was 8.62%. The corresponding figures for rural and urban areas were 9.65% and 5.27%, respectively. This shows a marginal increase (decrease) in the proportion of SC teachers in rural (urban) areas during the span of seven years since the Fifth Survey. Managementwise, the proportion of teachers belonging to Scheduled Castes is the highest in the local body schools (11.85%) and the lowest in private

unaided schools (4.77%). A similar trend is observed in the case of teachers of primary, upper primary, secondary and higher secondary schools separately.

Among the States, Tamil Nadu tops the list with 12.67% of the total teachers in the State belong to the category of Scheduled Castes. Next in order comes Maharashtra (11.60%), followed by Punjab (10.60%), Himachal Pradesh (10.47%), West Bengal (10.28%) and Madhya Pradesh (10.04%). On the other hand, Arunachal Pradesh (1.04%), Goa (0.72%), Manipur (1.91%), Meghalaya (1.56%), and Mizoram (1.04%) have less than two per cent representation of Scheduled Castes among the total teachers. Further, it is observed that the percentage of SC teachers in all the Union Territories is less than the all India average of 8.99%. Among these, Andaman and Nicobar Islands and Lakshadweep have representation of SC teachers to less than one per cent each.

#### 7.5 Teachers Belonging to Scheduled Tribes

The representation of teachers belonging to Scheduled Tribes is 5.74% in the present Survey as against 4.45% during the Fifth Survey. Further, as in the case of Scheduled Caste teachers, schools in rural areas have a considerably larger representation of Scheduled Tribe teachers (7.26%) than urban schools (2.54%). The corresponding figures at the time of the Fifth Survey were 5.54% and 1.98%, respectively. Thus there has been a discernible increase in the proportion of Scheduled Tribe

teachers in rural as well as in urban areas during the intervening period between the two surveys. Considering the representation of Scheduled Tribe teachers managementwise, it is observed that the government schools have the highest proportion (8.25%) of Scheduled Tribe teachers whereas private unaided schools have the lowest (2.30%). A similar trend to that just described has emerged in the case of primary, upper primary and higher secondary schools. However, in secondary schools the highest representation of Scheduled Tribe teachers is found in the government schools (4.83%), and the lowest representation in the local body schools (1.49%).

The Survey figures reveal that Meghalaya (80.41%), Mizoram (95.97%), Nagaland (77.86%) and Lakshadweep (78.97%) have more than three-fourths of their teachers belonging to the Scheduled Tribe category. Besides, Arunachal Pradesh (34.41%), Manipur (31.91%), Sikkim (23.16%), Tripura (23.28%), and Dadra and Nagar Haveli (39.07%) have a sizable proportion of Scheduled Tribe teachers. Further, it is observed that the schools in Haryana, Punjab and Chandigarh do not have any teacher belonging to Scheduled Tribes. There are States like Goa, Kerala, Tamil Nadu, Uttar Pradesh, Delhi and Pondicherry which have less than one per cent of the teachers belonging to Scheduled Tribes.

#### 7.6 Teachers Belonging to Other Backward Classes

Information about teachers belonging to other backward classes (OBC) has been collected for the

first time in the present Survey. From Statement 7.3 it is observed that a little over one-fourth of the total teachers in position represent the OBC category. Their representation is found to be more in rural schools (27.95%) as compared to schools in urban areas (21.22%). Further, while the proportion of the OBC teachers is about 26% each in government, local body and private aided schools, it is 20.83% in the case of private unaided schools. The representation of OBC teachers in primary, upper primary, secondary and higher secondary schools is 26.85%, 28.03%, 22.46% and 23.30%, respectively.

The State of Tamil Nadu has the highest percentage of OBC teachers (71.48%). Next in order comes Pondicherry (65.94%), followed by Karnataka (35.18%), Kerala (33.96%), Madhya Pradesh (33.60%), Orissa (31.41%) and Assam (30.92%). While Andaman & Nicobar Islands and Himachal Pradesh have a nominal representation of OBC teachers, Manipur (0.83%), Mizoram (0.98%), Chandigarh (0.73%), and Dadra & Nagar Haveli (0.73%) have less than one per cent of the teachers belonging to the OBC category.

#### 7.7 Voluntary/ Contractual/ Other Teachers

There are 85,514 voluntary/ contractual/ other teachers (herein after called 'voluntary teachers') in schools. Of these, 51,716 (60.48%) are working in schools located in rural areas. Managementwise, the largest percentage of voluntary teachers is in government schools (36.10%) and the lowest in schools managed by local bodies (15.61%).

STATEMENT 7.4

#### Voluntary/Contractual/Other Teachers in Schools

Area/ Management	Primary Schools	Upper Primary Schools	Secondary Schools	Higher Secondary Schools	Total
1	2	3	4	5	6
Rural	24,945	10,545	13,710	2,516	51,716
Urban	6,998	8,096	12,024	6,680	33,798
Total	31,943	18,641	25,734	9,196	85,514
Government	17,143	5,536	5,449	2,746	30,874
Local Body	7,313	3,625	2,173	237	13,348
Private Aided	3,448	4,302	9,949	3,254	20,953
Private Unaided	4,039	5,178	8,163	2,959	20,339

In primary schools, 78.09% of the voluntary teachers are working in rural areas. More than three-fourths of the voluntary teachers are in schools run by the government and local bodies as against 23.44% in schools managed by private agencies.

Upper primary schools have 56.57% of the voluntary teachers in them in rural areas. Government and local bodies together have 49.14% of voluntary teachers whereas the remaining 50.86% are working in private schools.

In secondary schools more than half (53.28%) of voluntary teachers are working in rural areas. A look at the managementwise figures reveal that more than 70% of the teachers are teaching in private schools as against 29.62% in government and local body schools together.

Most of the 9196 voluntary teachers in higher secondary schools are working in urban areas (72.64%). While private schools have attracted

67.56% of the voluntary teachers, government and local body schools together have 32.44% of them.

### 7.8 Part-time Teachers

There are 32,855 part-time teachers in the country as against 41,97,555 full-time teachers. More than two-fifths (42.90%) of them are females. As expected, the percentage of female teachers is much higher in urban areas (50.16) than in rural areas (32.63). Of the total part-time teachers, 21.21% are teaching in primary schools, 23.79% in upper primary schools, 23.28% in secondary schools, and the remaining 31.72% are working in higher secondary schools. The percentage of part-time teachers in urban areas (58.58) is higher than that in rural areas (41.42). Managementwise figures reveal that their percentage is the highest in private unaided schools (41.23) and the lowest in schools managed by the local bodies (9.93).

## STATEMENT 7.5

### Part-time Teachers in Schools

Area/ Management	Primary Schools	Upper Primary Schools	Secondary Schools	Higher Secondary Schools	Total
1	2	3	4	5	6
Rural	3,961	3,287	3,230	3,129	13,607
Urban	3,009	4,530	4,418	7,291	19,248
Total	6,970	7,817	7,648	10,420	32,855
Government	1,945	1,291	1,234	3,512	7,982
Local Body	1,302	953	730	212	3,197
Private Aided	705	1,567	2,355	3,503	8,130
Private Unaided	3,018	4,006	3,329	3,193	13,546

On examining the percentage of part-time teachers in different categories of schools, it is observed that in rural areas their proportion is higher in primary schools only and it is in the reverse order in the case of upper primary, secondary and higher secondary schools.

### 7.9 Attrition of Teachers in Schools

Statement 7.6 shows that there were 16,00,719

teachers in primary schools at the beginning of the academic session 1992-93. Of these, 52,310 (3.27%) teachers left the profession during the session due to various reasons. The majority of them (57.43%) retired. While 13.18% resigned from service, 12.03% were transferred to take up non-teaching posts, 10.86% teachers died and 6.50% had their services terminated.

## STATEMENT 7.6

## Attrition of Teachers in Schools

School Category	Teachers at Beginning of Session	No. of Teachers Who Left the Profession					
		Retd.	Resd.	Term.	Trans.	Died	Total
1	2	3	4	5	6	7	8
Primary	16,00,719	30,041	6,893	3,399	6,295	5,682	52,310
Upper Primary	11,15,409	18,739	7,114	2,440	3,520	3,107	34,920
Secondary	8,13,933	12,701	6,413	2,414	1,955	1,971	25,454
Higher Secondary	6,11,853	11,561	3,890	1,157	1,218	1,556	19,382

Note: Retd.- Retired; Resd.- Resigned; Term.- Terminated; Trans.- Transferred

Out of 11,15,409 teachers in upper primary schools at the beginning of the session, 34,920 (3.13%) left the teaching profession before completion of the session. More than half (53.66%) of them left due to retirement. The other major reasons for leaving their jobs are resignation from service (20.37%), and transfers to take up non-teaching posts (10.08%). Besides, 8.90% of them died and services of 6.99% of the teachers were terminated.

The total number of secondary school teachers at the beginning of the session was 8,13,933. Out of these 25,454 (3.13%) left during the session. Almost half of them retired from service. Slightly more than one-fourth resigned. Termination from service (9.48%), transfers to non-teaching posts (7.68%) and untimely death (7.74%) have also contributed towards their leaving the profession during the session.

There were 6,11,853 teachers working in higher secondary schools at the beginning of the academic session. The number of teachers who left during the session is 19,382 (3.17%). Retirement (59.65%) and resignation (20.07%) from service are the two main factors contributing towards teachers leaving the job during the session. Besides, services of 5.97% teachers were terminated; 6.28% transferred to non-teaching posts and 8.03% died during the session.

#### 7.10 Schools according to Teachers Exclusively for Physical Education/Physical Training/Yoga

Statement 7.7 shows that almost one per cent of primary schools have a teacher exclusively for physical education. This percentage is comparatively higher in urban schools than in schools in rural areas.

## STATEMENT 7.7

## Schools according to Teachers Exclusively for Physical Education/Physical Training/Yoga

Area/Management	Primary Schools		Upper Primary Schools		Secondary Schools		Higher Secondary Schools	
	Number	%	Number	%	Number	%	Number	%
1	2	3	4	5	6	7	8	9
Rural	3,363	0.66	11,202	8.67	22,582	47.17	6,162	53.12
Urban	2,253	3.58	4,668	13.91	8,598	48.59	7,327	60.74
Total	5,616	0.98	15,870	9.75	31,180	47.56	13,489	57.00
Government	779	0.31	7,661	10.24	11,706	47.66	5,202	56.94
Local Body	2,398	0.89	3,541	6.49	2,657	35.90	533	59.96
Private Aided	602	2.79	2,021	13.02	12,491	54.17	6,379	59.92
Private Unaided	1,837	7.82	2,647	14.76	4,326	41.03	1,375	45.97

Nearly one-tenth of upper primary schools have at least one teacher exclusively for physical education. The percentage of such schools is 8.67 in rural areas as against 13.91 in urban areas. Managementwise figures reveal that schools managed by private agencies have appointed such teachers in a larger proportion of schools, than the schools run by government and local bodies.

There are, in all, 31,180 (47.56%) secondary schools which have at least one physical education teacher in each school. In this regard, urban schools have slight edge over rural schools. Managementwise, the percentage of such schools is the highest among private aided schools (54.17) and the lowest among local body schools (35.90).

The number of higher secondary schools with at least one teacher exclusively for physical education is 13,489, which constitutes 57.00% of the total

number of higher secondary schools in the country. More than sixty per cent of higher secondary schools in urban areas enjoy this facility as against 53.12% in rural areas. Analysing the figures managementwise, it is observed that in almost sixty per cent of local body as well as private aided schools at least one physical education teacher has been appointed. This percentage in respect of government and private unaided schools is 56.94 and 45.97, respectively.

### 7.11 Teachers Staying Outside the Village/ Town where the School is Located

For the smooth functioning of a school, among other things it is also necessary that the teachers teaching in that school should stay in the village/ town where the school is located. But a large number of teachers stay outside the village/ town, particularly in rural areas.

## STATEMENT 7.8

### Teachers Staying outside the Village/Town Where the School is Located

School Category	Teachers Staying Outside the Village/Town					
	Rural		Urban		Total	
1	2	3	4	5	6	7
Primary	5,80,680	(45.54)	50,201	(14.42)	6,30,881	(38.86)
Upper Primary	3,05,065	(38.60)	46,063	(13.57)	3,51,128	(31.08)
Secondary	2,04,095	(38.34)	47,442	(15.97)	2,51,537	(30.33)
Higher Secondary	88,272	(35.65)	47,706	(12.98)	1,35,978	(22.11)
Total	11,78,112	(41.40)	1,91,412	(14.16)	13,69,524	(32.63)

Note: Figures within parentheses indicate percentage of teachers staying outside the village/town

Statement 7.8 shows that nearly one-third of the total teachers in the country stay outside the village/ town where the school is located. The percentage of such teachers is much higher in rural areas (41.40) than in urban areas (14.16). Considering these figures school-category-wise it is found that the percentage of those teachers who prefer to stay outside the village/ town of the school location is the highest in primary schools (38.86) and the lowest in higher secondary schools (22.11).

### 7.12 Provision of Housing Facility and Number of Teachers Benefited

Out of 5,70,455 primary schools only 8,687 (1.57%)

have provision of housing facility to teachers. These facilities are availed by 20,144 (1.24%) teachers. Statement 7.9 reveals that urban schools are slightly better placed than rural schools with regard to availability of these facilities. Considering these facilities managementwise it is observed that the schools managed by private agencies have better facilities as compared to schools run by the government sector.

In upper primary schools also, a very small fraction (2.82%) of schools have made provision of housing facility for teachers. And only 1.50% of the teachers are benefited with this facility. As in the case of primary schools, here also schools in urban

## STATEMENT 7.9

**Schools Providing Housing Facility and Number of Teachers Benefited**

Area/ Manage- ment	Primary Schools		Upper Primary Schools		Secondary Schools		Higher Secondary Schools	
	A	B	A	B	A	B	A	B
1	2	3	4	5	6	7	8	9
Rural	7,214 (1.42)	14,680 (1.15)	3,487 (2.70)	11,843 (1.50)	2,437 (5.09)	13,834 (2.60)	1002 (8.64)	10404 (4.20)
Urban	1,473 (2.34)	5,464 (1.57)	1,102 (3.28)	5,095 (1.50)	1,022 (5.78)	7,039 (2.37)	1097 (9.09)	14243 (3.88)
Total	8,687 (1.52)	20144 (1.24)	4,589 (2.82)	16,938 (1.50)	3,459 (5.28)	20,873 (2.52)	2099 (8.87)	24647 (4.01)
Government	3,853 (1.51)	7,345 (1.19)	1,994 (2.67)	7,613 (1.60)	1,411 (5.75)	9,686 (3.09)	1140 (12.48)	14410 (5.94)
Local Body	3,283 (1.21)	7,477 (0.99)	1,140 (2.09)	2,975 (0.81)	135 (1.82)	640 (0.74)	60 (6.75)	592 (2.48)
Private Aided	714 (3.31)	1,956 (1.74)	783 (5.05)	3,81 (2.19)	1,225 (5.31)	5,817 (1.87)	620 (5.82)	5596 (2.00)
Private Unaided	837 (3.56)	3,366 (2.49)	672 (3.75)	3,169 (2.29)	688 (6.53)	4,730 (3.99)	279 (9.33)	4049 (5.89)

Note: A - Number of schools providing facility

B - Number of teachers benefited

Figures within parentheses indicate percentages.

areas have a slight edge over schools in rural areas, and private schools have an edge over government or local body schools, as far as providing the housing facility to upper primary school teachers is concerned.

Secondary schools are somewhat better placed as 5.28% of them have provided the housing facility to teachers. Only 2.52% of the secondary school teachers have availed this facility. There does not seem any discernible difference in the percentage of secondary schools having these facilities in rural and urban areas. Managementwise, the percentage of schools having housing facility for teachers varies from 1.82% in local body schools to 6.53% in private unaided schools.

Out of 23,662 higher secondary schools, 2,099 (8.87%) have provision of housing facility for teachers. The percentage of teachers benefited by these facilities is 11.74. While urban schools have a little edge over rural schools with regard to availability of housing facility for teachers, the situation is the reverse in the case of teachers availing these facilities. Managementwise, the percentage of schools having housing facility for teachers ranges from 5.82% in

private aided schools to 12.48% in government schools.

From the above discussions it is evident that the proportion of schools having the housing facility for teachers as well as the proportion of teachers availing these facilities increases as the level of the school stage increases.

**7.13 Teachers according to School Stages**

A school may have one or more than one stage, depending on the classes it has. There can be a maximum of four stages in a school, comprising classes as follows:

Primary Stage	Classes I to V
Upper Primary Stage	Classes VI to VIII
Secondary Stage	Classes IX to X
Higher Secondary Stage	Classes XI to XII

The stage at which a teacher is working has been decided on the basis of teaching load. In case a teacher is teaching at more than one school stage, he/she has been considered at that stage at which his/her teaching load is maximum.

**7.13.1 Primary Stage**

An estimated number of 20,13,525 teachers are teaching at the primary stage as against 18,15,445 at the time of the Fifth Survey, thereby indicating an

increase of 10.91% over the number of teachers in 1986. Nearly three-fourths of them are working in rural areas. Of the total teachers working at the primary stage, approximately 81% are in schools run

**STATEMENT 7.10****Estimated Number of Full-Time Teachers at Various School Stages**

Area/ Management	Number of Teachers at School Stages				
	Primary	Upper Primary	Secondary	Higher Secondary	Total
1	2	3	4	5	6
Rural	15,01,857 (74.59)	7,05,664 (68.11)	5,32,515 (59.47)	1,05,371 (41.74)	2845407 (67.79)
Urban	5,11,668 (25.41)	3,30,462 (31.89)	3,62,930 (40.53)	1,47,095 (58.26)	1352155 (32.21)
Total	20,13,525 (100.00)	10,36,126 (100.00)	8,95,445 (100.00)	2,52,466 (100.00)	4197562 (100.00)
Government	7,47,228 (37.11)	4,65,442 (44.92)	3,35,387 (37.46)	1,04,287 (41.31)	1652344 (39.37)

Private Aided	1,75,241 (8.70)	1,83,030 (17.67)	381387 (42.59)	1,08,788 (43.09)	848446 (20.21)
Private Unaided	2,06,705 (10.27)	1,26,246 (12.18)	98,090 (10.95)	29,542 (11.70)	460583 (10.97)

Note: Figures within parentheses indicate percentages.

**STATEMENT 7.11****Percentage of Female Teachers at Various School Stages**

Area/ Management	Percentage of Female Teachers at School Stages				
	Primary	Upper Primary	Secondary	Higher Secondary	Total
1	2	3	4	5	6
Rural	25.99	23.01	18.93	13.26	23.46
Urban	66.14	56.91	46.01	34.18	55.00
Total	36.19	33.82	29.91	25.45	33.62
Government	31.09	25.74	28.24	26.22	28.70
Local Body	29.71	31.69	22.82	25.40	29.64
Private Aided	60.67	47.77	29.20	21.27	38.69
Private Unaided	61.65	47.81	44.19	38.12	52.62

by the government and local bodies. The remaining 19% are working in schools managed by private agencies. Female teachers constitute 36.19% of the total teachers at the primary stage. As expected, the percentage of female teachers in urban schools (66.14) is much higher than that in rural schools (25.99). Further, schools managed by private agencies appoint female teachers in a larger proportion as compared to schools run by the government and local bodies.

### 7.13.2 Upper Primary Stage

There are 10,36,126 teachers teaching at the upper primary stage. Most of them (68.11%) are posted in rural areas. Schools run by the government and local bodies have employed approximately 70% of them whereas the remaining 30% are in schools managed by private agencies. Of the total teachers working at the upper primary stage, 33.82% are females. The percentage of female teachers in urban areas is much higher than that in rural areas. managementwise, the percentage of female teachers is more or less equal in private aided and private unaided schools, which is much higher than that in schools managed by the government and local bodies.

### 7.13.3 Secondary Stage

Out of 8,95,445 teachers working at the secondary stage, 29.91% are females. The corresponding percentage in rural and urban areas is 18.93 and 46.01, respectively. At this stage private unaided schools have the largest percentage of female teachers (44.19%) in the total, followed by private aided (29.20%), government (28.24%) and local body

schools (22.82%). Of the total number of teachers at the secondary stage, 59.47% are working in rural areas as against 40.53% in urban areas. Schools run by the government and local bodies have employed 46.46% of the total teachers at this stage whereas the remaining 53.54% are working in schools managed by private agencies.

### 7.13.4 Higher Secondary Stage

There are 2,52,466 teachers working at the higher secondary stage of whom 25.45% are females. At this stage, a larger proportion of teachers are teaching in urban schools (58.26%) than in rural ones (41.74%). Managementwise figures reveal that the majority of teachers are working either in government schools (41.31%) or in private aided schools (43.09%). Local body schools and private unaided schools have their representation to the extent of only 3.90% and 11.70%, respectively.

### 7.14 Tenure of Service

Of the total number of full-time teachers, 72.89% hold permanent posts and the remaining 27.11% are working either in a temporary capacity or on ad-hoc basis. The percentage of permanent teachers at the time of the Fifth Survey, however, was 84.87, showing a decline in their proportion since the Fifth Survey. Statement 7.12 shows that the teachers working at primary, upper primary, secondary and higher secondary stages of education enjoy more or less the same job security. However, the percentage of teachers, who have been made permanent, ranges from 71.60% for the primary stage teachers to 75.01% in the case of teachers working at the secondary stage.

STATEMENT 7.12

Percentage of Full-time Permanent Teachers at Various School Stages

Area/ Management	Percentage of Permanent Teachers at				
	Primary Stage	Upper Primary Stage	Secondary Stage	Higher Secondary Stage	Total
1	2	3	4	5	6
Rural	72.87	74.65	73.99	69.46	73.40
Urban	67.87	71.49	76.52	74.84	71.83
Total	71.60	73.64	75.01	72.60	72.89
Government	74.98	77.44	69.56	64.85	73.93
Local Body	74.74	74.04	70.58	76.86	74.34
Private Aided	70.66	75.93	85.15	83.35	79.94
Private Unaided	46.75	55.51	57.88	58.92	52.30

Managementwise analysis of data reveals that the percentage of permanent teachers is the highest in government schools for teachers working at primary and upper primary stages and in private aided schools for those working at secondary and higher secondary stages, whereas this percentage is the lowest in private unaided schools irrespective of the stage they are teaching at. This implies that the job security of teachers in private unaided schools is poor whereas their jobs are more secure in government, local body and private aided schools. Further, it is observed that in rural areas the percentage of teachers holding permanent posts is higher for teachers at primary and upper primary stages and lower in the case of teachers who are teaching at secondary and higher secondary stages, as compared to the corresponding percentages in urban areas.

### 7.15 Academic Qualifications and Training

Teachers according to academic qualifications and training at different stages have been estimated on the basis of information received from those teachers who are working in the sampled schools. Deemed trained teachers have been included in the category of trained teachers as the number of the former is very small and, therefore, does not satisfy the requirement of the estimation procedure. Stagewise discussion follows in the subsequent paragraphs.

#### 7.15.1 Primary Stage

The percentage distribution of total and female teachers and teachers belonging to Scheduled Castes, Scheduled Tribes and other backward classes, according to their academic qualifications and professional training, for the primary stage is given in Statement 7.13.

STATEMENT 7.13

Percentage of Teachers according to Academic Qualifications and Training at Primary Stage

Area	Category of Teachers	Total No. of Teachers	% of Trained Teachers	% of Teachers with Qualification			
				Upto Secondary	Higher Secondary	Graduate and above	Other Qual.
1	2	3	4	5	6	7	8
Rural	Total	15,01,845	86.68	52.31	24.72	22.45	0.52
	Female	3,90,341	88.59	56.39	22.41	20.55	0.65
	SC	1,80,300	86.80	51.00	27.73	20.77	0.50
	ST	1,34,402	62.91	60.98	25.79	12.75	0.48
	OBC	4,12,870	90.22	53.13	24.15	22.42	0.30
Urban	Total	5,11,667	80.58	39.14	21.67	38.44	0.75
	Female	3,38,406	81.77	40.76	20.33	38.14	0.77
	SC	34,450	85.77	49.74	22.42	27.00	0.84
	ST	13,686	73.48	57.20	22.98	19.14	0.68
	OBC	1,07,360	85.15	48.26	21.55	29.65	0.54
Total	Total	20,13,512	85.13	48.96	23.95	26.51	0.58
	Female	7,28,747	85.43	49.13	21.46	28.71	0.70
	SC	2,14,750	86.63	50.80	26.88	21.77	0.55
	ST	1,48,089	63.89	60.63	25.53	13.34	0.50
	OBC	5,20,230	89.18	52.13	23.60	23.92	0.35

Note: Trained teachers include 'deemed trained' also.

Of the total number of 20,13,512 teachers teaching at the primary stage, most of them (85.13%) are trained. The percentage of trained teachers in rural schools is comparatively higher than that in urban schools. As regards their academic qualifications, it is observed that 48.96% teachers have qualifications upto secondary, 23.95% passed

higher secondary and 26.51% are either graduates or postgraduates. The remaining 0.58% have other qualifications (not specified). Teachers with qualifications of graduate and above are in larger proportion in urban areas (38.44%) than in rural areas (22.45%), whereas it is in reverse order in the case of teachers with qualifications upto secondary

whose proportion is much higher in rural areas (52.31%) than in urban areas (39.14%). It shows that the schools in urban areas have teachers with better academic qualifications than those teaching in rural schools.

More than 85% of the female teachers working at the primary stage are trained. The percentage of trained female teachers in rural areas (88.59%) is higher than that in urban areas (81.77%). Regarding academic qualifications, Statement 7.13 shows that nearly half of the female teachers possess upto secondary or other qualifications. The percentage of female teachers with graduate and postgraduate degrees is 28.71. The corresponding percentage in rural and urban areas is 20.55 and 38.14, respectively.

There are 2,14,750 teachers belonging to Scheduled Castes at the primary stage. Of these, 86.63% are trained. As regards academic qualifications, it is observed that 50.80% of the SC teachers have studied upto secondary, 26.88% are educated upto higher secondary, 21.77% are either graduates or postgraduates and 0.55% have other qualifications.

Out of 1,48,089 teachers belonging to Scheduled Tribes working at the primary stage, 63.89% are trained. The percentage of trained teachers in rural areas is 62.91 as against 73.48 in urban areas.

Further, most of the ST teachers have qualifications upto secondary (60.63%). Another 25.53% have studied upto higher secondary and 13.34% are educated upto graduate or postgraduate level.

Of the 5,20,230 teachers belonging to OBC, 89.18% are trained. The percentage of teachers having academic qualifications upto secondary, higher secondary, graduate and above is 52.13, 23.60 and 23.92, respectively. The remaining 0.35% of the OBC teachers have other qualifications.

### 7.15.2 Upper Primary Stage

Out of the total number of 10,36,116 teachers working at the upper primary stage, 86.90% are trained. The percentage of trained teachers in urban areas is slightly more than that in rural areas. As regards academic qualifications of teachers, it is observed that majority of them (48.80%) are either graduates or post-graduates. The percentage of teachers with higher secondary and upto secondary qualifications is 18.44 and 31.86, respectively. Approximately one per cent of them have other qualifications. This indicates that a larger percentage of teachers teaching at the upper primary stage have not studied even upto higher secondary. This percentage is higher in rural schools than the schools in urban areas.

STATEMENT 7.14

#### Percentage of Teachers according to Academic Qualifications and Training at Upper Primary Stage

Area	Category of Teachers	Total No. of Teachers	% of Trained Teachers	% of Teachers with Qualifications			
				Upto Secondary	Higher Secondary	Graduate and above	Other Qual.
1	2	3	4	5	6	7	8
Rural	Total	7,05,658	86.38	33.46	19.91	45.77	0.86
	Female	1,62,369	88.97	42.67	17.23	38.99	1.11
	SC	68,580	88.68	37.52	22.78	39.04	0.66
	ST	49,636	66.88	46.25	25.29	27.84	0.62
	OBC	2,15,495	87.48	37.01	19.92	42.49	0.58
Urban	Total	3,30,458	88.03	28.45	15.30	55.27	0.98
	Female	1,88,072	89.39	32.04	13.87	53.05	1.04
	SC	21,421	92.20	41.65	18.39	38.48	1.48
	ST	10,050	78.95	42.65	23.31	33.15	0.89
	OBC	80,065	91.46	36.87	16.60	45.92	0.61
Total	Total	10,36,116	86.90	31.86	18.44	48.80	0.90
	Female	3,50,441	89.19	36.97	15.42	46.54	1.07
	SC	90,001	89.52	38.50	21.73	38.91	0.86
	ST	59,686	68.91	45.64	24.97	28.73	0.66
	OBC	2,95,560	88.56	36.97	19.02	43.42	0.59

Note: Trained teachers include 'deemed trained' also.

Amongst the female teachers, 89.19% are trained, thereby indicating that the female teachers have a comparatively larger percentage of trained teachers as compared to male teachers. Female teachers in urban areas, with 89.39% of them being trained, have a slight edge over their counterparts in rural areas (88.97%). Regarding academic qualifications, 46.54% of the female teachers have acquired either the graduate or the postgraduate degree. More than one-third (36.97%) of them have studied upto secondary only.

There are 90,001 teachers teaching at the upper primary stage who belong to the category of Scheduled Castes. Of these, 89.52% are trained. The percentage of teachers with qualifications upto secondary, higher secondary, graduate and above is 38.50, 21.73 and 38.91, respectively. Besides, less than one per cent have other than the above-mentioned qualifications.

Of the 59,686 teachers belonging to Scheduled Tribes, 68.91% are trained. This percentage is the lowest amongst all categories of teachers teaching at the upper primary stage. Regarding academic qualifications, 28.73% are either graduates or postgraduates whereas 45.64% and 24.97%, respectively, possess qualifications upto secondary

and higher secondary.

Out of 2,95,560 OBC teachers, 88.56% are trained. Further, 36.97% have studied upto secondary, 19.02% have passed higher secondary, 43.42% are either graduates or postgraduates and the remaining 0.59% have other qualifications.

### 7.15.3 Secondary Stage

There are 8,95,431 teachers teaching at the secondary stage. Of these, 91.03% are trained. The percentage of trained teachers in urban areas (93.39) is higher than that in rural areas (89.41). As regards their academic qualifications, 65.97% of them are graduates and 32.91% possess postgraduate degrees. Teachers in urban areas can be considered better qualified academically than their counterparts in rural areas as the percentage of teachers with postgraduate and above qualifications is 38.00% in urban areas as against 29.45% in rural areas.

The number of female teachers working at this stage is 2,67,795, of whom 92.74% are trained. This percentage is comparatively higher than that of male teachers. Similarly, female teachers have little edge over male teachers as far as their academic qualifications are concerned. Slightly more than one-third of female teachers are postgraduates.

STATEMENT 7.15

Percentage of Teachers according to Academic Qualifications and Training at Secondary Stage

Area	Category of Teachers	Total No. of Teachers	% of Trained Teachers	% of Teachers with Qualifications			
				Upto Higher Secondary	Graduate	Post Graduate and above	Other Qual.

	SC	19,658	94.37	0.00	66.10	32.95	0.95
	ST	8,322	81.31	0.00	75.19	23.92	0.89
	OBC	71,165	95.05	0.00	66.28	32.80	0.92
Total	Total	8,95,431	91.03	0.00	65.97	32.91	1.12
	Female	2,67,795	92.74	0.00	65.34	33.65	1.01
	SC	56,935	90.99	0.00	69.72	29.28	1.00
	ST	27,194	72.81	0.00	79.30	19.83	0.87
	OBC	2,09,171	91.70	0.00	68.85	30.18	0.97

Note: Trained teachers include 'deemed trained' also.

Of the 56,935 teachers belonging to Scheduled Castes, 90.99% are trained. Further, 69.72% and 29.28%, respectively, have graduate and postgraduate degrees. The remaining one per cent teachers have other qualifications.

Out of 27,194 teachers belonging to Scheduled Tribes, 72.81% are trained. The percentage of teachers with graduate and postgraduate degrees is 79.30 and 19.83, respectively. This indicates that Scheduled Tribe teachers are comparatively less qualified, both academically as well as professionally, than the teachers of other categories.

There are 2,09,171 teachers belonging to OBC at the secondary stage, of whom 91.70% are trained.

As regards their academic qualifications, 68.85% are graduates and 30.18% are postgraduates.

#### 7.15.4 Higher Secondary Stage

Of the 2,52,462 teachers teaching at the higher secondary stage, 83.46% are trained. The percentage of trained teachers in rural areas is 79.81 as against 86.06 in urban areas. Regarding academic qualifications, it is observed that 98.73% of the teachers possess a postgraduate degree. A small proportion — 1.27% — have other qualifications. There does not seem to be any difference in academic qualifications of teachers in rural and urban areas.

STATEMENT 7.16

Percentage of Teachers according to Academic Qualifications and Training at Higher Secondary Stage

Area	Category of Teachers	Total No. of Teachers	% of Trained Teachers	% of Teachers with Qualifications			
				Upto Higher Secondary	Graduate	Post Graduate and above	Other Qual.

Note: Trained teachers include 'deemed trained' also

Out of 64,251 female teachers working at the higher secondary stage, 85.19% are trained. The percentage of trained teachers is higher in urban areas (87.64) than in rural areas (76.36). Almost all female teachers devoting their maximum time at the higher secondary stage possess a post graduate degree. Only 0.86% of them have other qualifications.

There are 14,203 teachers belonging to Scheduled Castes. Of these, 82.81% are trained. The percentage of SC teachers with a postgraduate degree is 98.15. The

remaining 1.85% possess other qualifications.

Nearly three-fourths of the 4,712 teachers belonging to Scheduled Tribes are trained. Regarding academic qualifications, it is observed that 99% of them are postgraduates and the remaining one per cent have other qualifications.

There are 55,939 OBC teachers teaching at the higher secondary stage. Of these, 84.32% are trained. As regards academic qualifications, 98.79% are postgraduates. Only 1.21% of the OBC teachers have other qualifications.

### 7.16 Other Trainings

In the preceding section the academic qualifications and professional training of teachers have been discussed. However, there are a good number of teachers who have acquired training in other fields

such as vocational education, fine arts, physical education, etc. A teacher may have one or more than one such training. A brief discussion about these teachers as per the training acquired by them is given below.

#### STATEMENT 7.17

##### Percentage of Teachers according to Other Trainings

Stage	Percentage of Teachers with Training in					
	Vocational Education	Fine Arts	Music/Dance	Physical Education	Home Science	Computer Science
1	2	3	4	5	6	7
Primary	3.22	1.17	1.18	2.39	1.06	0.32
Upper Primary	4.15	1.82	1.51	4.00	0.95	0.42
Secondary	4.44	2.22	1.96	6.09	1.07	0.98
Higher Secondary	4.96	1.48	2.04	4.02	1.33	1.94

Out of 20,13,525 teachers teaching at the primary stage, 3.22% have training in vocational education, 1.17% in fine arts, 1.18% in music and dance, 2.39% in physical education, 1.06% in home science and 0.32% in computer science.

Of the 10,36,126 teachers teaching at the upper primary stage, 0.42% to 4.15% teachers have acquired training in vocational education, fine arts, music and dance, physical education, home science and computer science.

There are 8,95,445 teachers teaching at the secondary stage. Amongst these, the highest percentage of teachers received training in the field

of physical education (6.09%) and the lowest in computer science (0.98%).

Amongst 2,52,466 teachers teaching at the higher secondary stage, the percentage of teachers having vocational training (4.96%) is the highest whereas it is the lowest in the field of computer science (1.94%).

### 7.17 Inservice Training

Information has been collected from teachers whether they have attended two week or more inservice training/ refresher course during the year 1992-93. Stagewise discussion follows in the subsequent paragraphs.

#### STATEMENT 7.18

##### Percentage of Teachers Who Have Attended Two Weeks or More Inservice or Refresher Course during 1992-93

Area/Management	% of Teachers Who Have Attended Inservice Training			
	Primary Stage	Upper Primary Stage	Secondary Stage	Higher Secondary Stage
1	2	3	4	5
Rural	9.51	9.83	10.72	7.17
Urban	10.02	9.72	12.95	10.84
Total	9.64	9.79	11.62	9.31
Government	12.03	11.78	13.89	13.08
Local Body	8.46	8.93	10.36	7.44
Private Aided	10.99	9.16	11.17	6.86
Private Unaided	4.87	5.14	6.71	5.61

Of the 20,13,525 teachers teaching at the primary stage, 9.64% have undergone inservice training course. This percentage is marginally higher in the case of teachers working in urban areas than of those in rural areas. Managementwise figures reveal that the proportion of teachers who enjoyed this facility is the highest in government schools (12.03%) and the lowest in private unaided schools (4.87%).

Out of 10,36,126 teachers teaching at the upper primary stage, 9.79% have attended inservice training course. The corresponding percentage for rural and urban areas is 9.83 and 9.72, respectively. Further, government schools have deputed the largest proportion (11.78%) of their teachers to such courses, followed by private aided schools (9.16%), local body schools (8.93%) and private unaided schools (5.14%).

Among the teachers teaching at the secondary stage, 11.62% enjoyed the facility of attending inservice training programmes. The percentage of such teachers in rural areas is 10.72 as against 12.95 in urban areas. Further, government schools top the list with 13.89% of its teachers have undergone inservice training, followed by private aided (11.17),

local body (10.36) and private unaided schools (6.71).

Out of 2,52,466 teachers teaching at the higher secondary stage, 9.31% have attended inservice/ refresher course during 1992-93. Teachers in urban schools (10.84%) have enjoyed this facility more than their counterparts in rural schools (7.17%). A look at the managementwise figures reveals that this proportion is the highest among the teachers of government schools (13.08%) and the lowest in the case of teachers in private unaided schools (5.61%).

### 7.18 Average Experience of Teachers

The present Survey reveals that the average experience of teachers teaching at primary, upper primary, and higher secondary stages is 15 years each, whereas it is 14 years at the secondary stage. There does not seem much variation in the experience of teachers teaching at various stages in rural and urban schools. It ranges from 14 to 16 years. Managementwise, the average experience ranges from 6 years for teachers teaching at the primary stage of private unaided schools to 18 years each in the case of teachers teaching at upper primary and secondary stages of schools managed by local bodies.

STATEMENT 7.19

#### Average Experience of Teachers Teaching at Various Stages

Area/ Management	Average Experience in Years			
	Primary Stage	Upper Primary Stage	Secondary Stage	Higher Secondary Stage
1	2	3	4	5
Rural	16	15	14	14
Urban	14	14	15	15
Total	15	15	14	15
Government	16	16	16	16
Local Body	17	18	18	15
Private Aided	14	13	15	15
Private Unaided	6	7	7	8

### 7.19 Teachers Teaching the Subject of their Postgraduation

There are 1,74,009 teachers at the upper primary stage who are postgraduates. Of these, only 42.12% are teaching the subject in which they took their

postgraduate degree. In rural schools this percentage is 38.21 as against 47.67% in urban schools. Managementwise, the highest percentage of such teachers is in private aided schools (54.61) and the lowest in schools run by the government (33.36).

## STATEMENT 7.20

## Percentage of Teachers Teaching the Subject of their Postgraduation

Area/ Management	No. of Teachers with P.G. Degree			% of Teachers Teaching the Subject of Postgraduation		
	Upper Primary Stage	Secondary Stage	Higher Secondary Stage	Upper Primary Stage	Secondary Stage	Higher Secondary Stage
1	2	3	4	5	6	7
Rural	1,01,984	1,56,654	1,03,861	38.21	59.69	76.87
Urban	72,025	1,37,893	1,45,150	47.67	66.43	76.39
Total	1,74,009	2,94,547	2,49,011	42.12	62.84	76.59
Government	84,179	1,23,264	1,03,180	33.36	55.07	74.81
Local Body	25,979	20,277	9,600	42.05	67.10	75.24
Private Aided	27,227	1,15,521	1,06,997	54.61	67.81	76.61
Private Unaided	36,624	35,485	29,234	53.05	71.24	83.24

Among the States and Union Territories, Andhra Pradesh (57.00), Arunachal Pradesh (57.11), Assam (59.38), Maharashtra (59.66), West Bengal (73.94), Chandigarh (63.66), Daman & Diu (61.54), Delhi (58.87) and Pondicherry (59.47) have the proportion of teachers teaching the subject of their postgraduation much above the all India average of 42.12. On the other hand, this proportion is much below the average in the case of Himachal Pradesh (19.70), Karnataka (22.51), Rajasthan (20.28), Sikkim (22.92), Tripura (21.15) and Lakshadweep (25.00).

Out of 2,94,547 teachers with a postgraduate degree at the secondary stage, 62.84% are teaching the subject of their postgraduation. The proportion of such teachers is higher (66.43%) in urban areas than in rural areas (59.69%). While the largest proportion of such teachers in private unaided schools (71.24%) have got an opportunity to teach the subject which they studied at the postgraduate level, it is not so in the case of teachers in government schools where this percentage is the lowest (55.07).

Statewise analysis of data reveals that the percentage of teachers teaching the subject in which they took their postgraduation degree is more than 75 in the States and Union Territories of Arunachal Pradesh (82.00), Bihar (80.41), Gujarat (78.39), Kerala (83.26), West Bengal (82.34), Dadra & Nagar Haveli (76.92), and Lakshadweep (79.31), which is much higher than the National average of 62.84. However, there are States like Himachal Pradesh (26.64), Mizoram (33.16), Nagaland (37.43),

Rajasthan (30.43) and Tripura (34.68) where less than 40% of teachers are teaching the subject of their postgraduation at the secondary stage.

More than three-fourths (76.59%) of the teachers at the higher secondary stage are teaching the subject in which they took their postgraduate degree. This percentage is marginally higher in the case of teachers in rural schools than that in urban schools. Looking at the figures of different managements, it is observed that the proportion of such teachers is the highest in private unaided schools (83.24%) and the lowest in schools run by the government (74.81).

Analysing the figures statewise it is observed that the States and Union Territories of Andhra Pradesh (95.64%), Bihar (91.28%), Kerala (91.32%), Orissa (90.94%) and Lakshadweep (95.00%) have more than 90% of teachers teaching the subject they studied at postgraduate level. However, the proportion of such teachers is less than 70% in Meghalaya (67.14%), Nagaland (67.86%), Punjab (65.50%), Rajasthan (51.62%), Tripura (40.77%) and Dadra & Nagar Haveli (50.00%).

### 7.20 Teachers according to Science Qualifications and Teaching Science Subjects

Statement 7.21 shows that the total number of teachers teaching science at the primary stage is 17,32,922. More than 97% of them studied science upto higher secondary only. Besides, 2.46% are graduates and 0.39% are postgraduates in science.

## STATEMENT 7.21

Percentage of Teachers according to Science Qualifications and Teaching Science

Teaching of Science at Stage	No. of Teachers Teaching Science	% of Teachers with Science Qualifications		
		Upto Higher Secondary	Graduate	Postgraduate and above
1	2	3	4	5
Primary	17,32,922	97.15	2.46	0.39
Upper Primary	5,81,116	88.05	10.73	1.22
Secondary	2,85,784	26.80	65.08	8.12
Higher Secondary	63,151	16.76	19.62	63.62
Not teaching at any stage	15,33,714	96.19	3.46	0.35

- Note: 1. In Col.3 teachers who have not studied science have also been included.  
 2. In Col.3 teachers who have studied science 'Below Secondary', 'Secondary' and 'Higher Secondary/PUC/Inter' have been merged.  
 3. M.Phil. and Ph.D. have been merged with P.G. degree in Col. 5.

Out of 5,81,116 teachers taking science classes at the upper primary stage, 88.05%, 10.73% and 1.22%, respectively, studied science upto higher secondary, graduate and postgraduate levels.

There are 2,85,784 teachers teaching science at the secondary stage of whom 65.08% are science graduates and 8.12% have a postgraduate degree in science. A large proportion of teachers (26.80%) are not qualified to teach science at the secondary stage as they studied science upto the higher secondary level only.

In all, 63,151 teachers are teaching science at the higher secondary stage. Of these, 63.62% are postgraduates with science. The minimum qualification required to teach at the higher secondary stage is a postgraduate degree in the subject. Thus 36.38% of the teachers teaching science at this stage are not qualified to teach. It is

discouraging to note that 16.76% of these have studied science upto higher secondary only.

The Survey figures reveal that there are 15,33,714 teachers who are not teaching science at any school stage. Most of them (96.19%) have studied science upto higher secondary level or below; 3.46% are science graduates and 0.35% have a postgraduate degree and above in science.

### 7.21 Teachers according to Mathematics Qualifications and Teaching Mathematics

There are 18,23,004 teachers teaching mathematics at the primary stage. More than 98% of them have studied mathematics upto higher secondary only. In addition to these, 1.44% are graduates and a small proportion (0.16%) are postgraduates in mathematics.

## STATEMENT 7.22

Percentage of Teachers according to Mathematics Qualifications and Teaching Mathematics

Teaching of Maths at Stage	No. of Teachers Teaching Maths	% of Teachers with Maths Qualifications		
		Upto Higher Secondary	Graduate	Postgraduate and above
1	2	3	4	5
Primary	18,23,004	98.40	1.44	0.16
Upper Primary	6,00,338	92.71	6.61	0.68
Secondary	2,54,237	36.11	57.43	6.46
Higher Secondary	26,070	21.09	18.97	59.94
Not teaching at any stage	14,93,019	97.01	2.78	0.21

- Note: 1. In Col.3 teachers who have not studied maths have also been included.  
 2. In Col.3 teachers who have studied maths 'Below Secondary', 'Secondary' and 'Hr. Secondary/PUC/Inter' have been merged.  
 3. M.Phil. and Ph.D. have been merged with P.G. degree in Col. 5.

The total number of teachers teaching mathematics at the upper primary stage is 6,00,338, of whom 92.71% studied mathematics upto higher secondary or below. The percentage of such teachers with graduate and postgraduate degrees is 6.61 and 0.68, respectively.

Of the total number of 2,54,237 teachers teaching mathematics at the secondary stage, 57.43% and 6.46%, respectively, have graduate and post-graduate degree in mathematics. A large proportion of teachers (36.11%) have mathematics qualification upto higher secondary only. In fact these teachers are not qualified to teach at the secondary stage.

Out of 26,070 teachers teaching mathematics at the higher secondary stage, 59.94% have a postgraduate degree in mathematics. The remaining 40.06% are not qualified to teach mathematics to higher secondary classes. These include 21.09% teachers who have studied mathematics upto higher secondary only.

In all, there are 14,93,019 teachers who are not teaching mathematics at all. Of these, 2.78% are graduates and 0.21% are postgraduates and above in mathematics. More than 97% have studied mathematics upto higher secondary or below. □

## Chapter 8

### OTHER FORMS OF EDUCATION

#### 8.1 Introduction

Under the Universalisation of Elementary Education, it was expected that all the children in the age-group 6 to below 14 years will be enrolled in schools. But due to some social and economic reasons, some children in this age-group are not able to attend the formal schools. Some children drop out from school as they are not able to keep pace with the increased learning activities due to some mild physical handicaps. Apart from these, there are children with severe physical handicaps who need to be imparted education in special schools only. Further, a need has always been felt for learning through playway activities before children join the formal school. Keeping all the above in view, the schemes of Non-Formal Education, special schools for children with severe disabilities, Integrated Education Programme in the schools to cater to the needs of children with mild handicaps and pre-primary schools were introduced. These schemes not only served as an alternative to the formal schools but also supplemented the efforts towards the

Universalisation of Elementary Education to some extent. Information about these schemes has been collected in the present Survey and the same is discussed in this chapter.

#### 8.2 Non-Formal Education

As an alternative to the formal education system, education planners thought of schemes through which children out of the formal school system could be imparted learning skills. One of the schemes was in the form of Non-Formal Education (NFE). The NFE centres functioned in the manner which best suited the students in terms of timings and other factors which hindered the child in attending the regular school.

##### 8.2.1 Facility of Non-Formal Education in Rural Areas

Statement 8.1 shows the availability of the NFE facility in rural areas and Statement 8.2 gives its comparative position as reported in Fourth, Fifth and the present Survey.

STATEMENT 8.1

#### Facility of Non-Formal Education in Rural Areas

Population Slab	Total No. of Villages	No. of Villages Having the Facility	No. of Villages Having NFE for		
			Primary Only	Upper Primary Only	Both Primary and Upper Primary
1	2	3	4	5	6
2000 and above	83,055	22,068 (26.57)	19,629	1,957	482
1000-1999	1,19,019	25,767 (21.65)	23,931	1,225	611
500-999	1,47,069	23,400 (15.91)	21,970	837	593
Below 500	2,37,322	20,293 (8.55)	19,222	447	424
Total	5,86,465	91,328 (15.57)	84,752 (92.80)	4,466 (4.89)	2,110 (2.31)

Note: Figures within parentheses indicate percentages.

## STATEMENT 8.2

## Comparative Position of the Non-Formal Education Facility

Survey	Total No. of Villages	No. of Villages with NFE Facility
1	2	3
Fourth Survey	5,73,842	27,210 (4.74%)
Fifth Survey	5,79,148	93,763 (16.19%)
Sixth Survey	5,86,465	91,328 (15.57%)

As is evident from Statement 8.2, the facility of NFE was available only in 4.74% of villages during the Fourth Survey (1978). The percentage of villages having this facility rose to 16.19% at the time of the Fifth Survey (1986). In the present Survey, however, only 15.57% of villages have the facility of non-formal education, thereby showing a slight decline in the facility since the Fifth Survey.

The Survey figures reveal that out of 91,328 villages with the facility of NFE, 84,752 (92.80%) villages have NFE centres which cater to the primary level only. Another 4.89% of villages have this facility for the upper primary level only. The remaining 2.31% of villages have NFE centres catering to both primary and upper primary classes. It is further observed that slightly more than one-fourth (26.57%) of villages with a population of 2000 and above are served by NFE centres. This percentage decreases as the size of the population slab decreases, and drops to 8.47%

in the case of villages having a population less than 500. This indicates that the bigger villages are better placed in terms of availability of NFE facility as compared to the smaller villages.

Statement 8.3 shows the extent of the NFE facility in the villages of different States and Union Territories. It is observed that the State of Andhra Pradesh and the Union Territory of Chandigarh have the facility of NFE in more than 50% of the villages, whereas the States of Assam, Madhya Pradesh, Manipur and Uttar Pradesh have this facility in 25 to 30 per cent of the villages. There are 11 States and Union Territories in which less than five per cent of the villages have the facility of NFE; and, lastly, ten States and Union Territories, viz., Karnataka, Nagaland, Punjab, Sikkim, Tripura, West Bengal, Dadra and Nagar Haveli, Daman and Diu, Lakshadweep and Pondicherry are yet to introduce the scheme of NFE in rural areas.

## STATEMENT 8.3

## Extent of Facility of NFE in Different States and Union Territories

% of Villages Served with NFE Facility	Number of States/UTs	Names of the States/UTs
1	2	3
More than 50	2	Chandigarh, Andhra Pradesh
25 to 30	4	Assam, Madhya Pradesh, Manipur, Uttar Pradesh
10 to 20	5	Jammu & Kashmir, Meghalaya, Mizoram, Orissa, Rajasthan
Below 5	11	Arunachal Pradesh, Bihar, Goa, Gujarat, Haryana, Himachal Pradesh, Kerala, Maharashtra, A&N Islands, Delhi, Tamil Nadu
Zero	10	Karnataka, Nagaland, Punjab, Sikkim, Tripura, West Bengal, Dadra & Nagar Haveli, Daman & Diu, Lakshadweep, Pondicherry.

### 8.2.2 Non-Formal Education Centres in Rural Areas

rural areas according to management and the level catered to.

Statement 8.4 shows the number of NFE centres in

STATEMENT 8.4

#### Number of NFE Centres in Rural Areas

Management	Number of Centres					
	Total	Only for Girls	For both Boys and Girls	Primary Only	Upper Primary Only	Both Primary and Upper Primary
1	2	3	4	5	6	7
Government	1,06,926	5,122	95,984	1,00,073	4,538	2,315
Voluntary Agencies	7,016	438	6,316	6,221	482	313
Total	1,13,942	5,560	1,02,300	1,06,294	5,020	2,628

There are, in all, 1,13,942 NFE centres in 91,328 villages which means that on an average more than one (1.25) centres per village are available wherever the facility exists. Of these, only 5560 (4.88%) centres are separately for girls, while the majority of them, i.e., 1,02,300 (89.78%) are for both boys and girls. Further, of the total NFE centres, 1,06,294 (93.29%) cater to primary classes only, 5,020 (4.41%) cater to upper primary classes only, and merely 2,628 (2.31%) NFE centres cater to both primary and upper primary

classes. Further, it is observed that 1,06,926 (93.84%) centres are managed by government agencies, while only 7016 (6.16%) centres are managed by voluntary agencies.

### 8.2.3 Non-Formal Education Centres in Urban Areas

Statement 8.5 shows the number of NFE centres in urban areas according to management and the level catered to.

STATEMENT 8.5

#### Number of NFE Centres in Urban Areas

Management	Number of Centres					
	Total	Only for Girls	For both Boys and Girls	Primary Only	Upper Primary Only	Both Primary and Upper Primary
1	2	3	4	5	6	7
Government	6,308	470	5,696	5,519	626	163
Voluntary Agencies	294	13	271	152	27	115
Total	6,602	483	5,967	5,671	653	278

In 4,641 urban areas, there are 6,602 NFE centres. Of these, only 483 (7.32%) centres are those which are meant exclusively for girls, while the majority of them, i.e., 5,967 (90.38%) are co-educational centres. Further, out of the total NFE centres in urban areas, 5671 (85.90%) cater to primary classes only, 653 (9.89%) cater to upper primary classes only, while merely 278 (4.21%) cater to both primary and upper primary classes. Further, as far as the management of these centres is concerned, 6,308 (95.55%) are managed by government agencies while the remaining 294 (4.45%) are managed by voluntary agencies. In some of the States, the position of the availability of the NFE centres in urban areas is very dismal. It is observed that none of the urban areas of Arunachal Pradesh, Goa, Himachal Pradesh and Jammu & Kashmir have NFE centres in their 10, 31, 58 and 75 cities and towns, respectively. It is discouraging to note that there are only five NFE

centres in the 94 towns and cities of Haryana. In the same way, there are only 10 NFE centres in 219 urban areas of Kerala. The State of Maharashtra has only 12 centres in its 337 urban areas. Tamil Nadu has 22 centres in its 469 small and big towns. No doubt, in urban areas too, there is a great need for the facility of NFE keeping in view the extent of drop outs and working children in urban areas who cannot afford to go to regular schools due to various reasons.

#### 8.2.4 *Instructors in Non-Formal Education Centres*

The present Survey has reported a total of 1,33,177 instructors working in 1,20,544 NFE centres. Further, 1,13,942 NFE centres, located in rural areas, have 1,25,518 instructors, and 6,602 centres in urban areas have 7,659 instructors. Statement 8.6 shows the distribution of NFE centres according to number of instructors in them.

STATEMENT 8.6

#### NFE Centres according to Number of Instructors

Number of Instructors	Number of Centres		
	Rural	Urban	Total
1	2	3	4
0	4,707	163	4,870
1	1,04,156	6,146	1,10,302
2	3,620	178	3,798
More than 2	1,459	6,602	1,20,544

Out of the total of 1,20,544 NFE centres, 4870 (4.04%) are without any instructors; 1,10,302 (91.51%) NFE centres are manned by a single instructor each; only 3,798 (3.15%) have two instructors and merely 1574 (1.3%) centres have more than two instructors.

#### 8.2.5 *Enrolment in Non-Formal Education Centres*

Statement 8.7 shows the distribution of the child population and enrolment in regular schools as well as in NFE centres for the children in the age-groups 6 to 11 and 11 to 14.

A total of 32,80,010 children are reported to be studying in NFE centres. Of these 15,11,074 (46.07%)

are girls. The majority of these children, i.e., 30,72,412 (93.67%) are from rural areas while 2,07,598 (6.33%) are from urban areas. In the same way, out of a total of 15,11,074 girls enrolled in NFE centres, 14,03,757 (92.90%) belong to rural areas and the remaining 1,07,317 (7.10%) belong to urban areas.

Further, out of a total of 32,80,010 children enrolled in NFE centres, 25,78,650 (78.62%) are in the age-group 6-11, while the remaining 7,01,360 (21.38%) are in the age-group 11-14. Similarly, out of 15,11,074 girls, 11,99,395 (79.37%) belong to the age-group 6-11, while 3,11,074 (20.63%) belong to the age-group 11-14.

In rural areas, of the 30,72,412 children, 24,15,872 (78.63%) are in the age-group 6-11, while

## STATEMENT 8.7

## Child Population, Enrolment in Formal and Non-Formal System

Area	Age Group	Child Population		Enrolment in			
		Total	Girls	Formal Education		Non-Formal Education	
1	2	3	4	5	6	7	8
Rural	6-11	8,76,90,601	4,23,44,728	5,91,36,781	2,47,11,257	24,15,872	11,14,246
	11-14	4,62,60,026	2,18,43,408	2,29,46,742	84,72,723	6,56,540	2,89,511
	6-14	13,39,50,627	6,41,88,136	8,20,83,523	3,31,83,980	30,72,412	14,03,757
Urban	6-11	3,08,50,850	1,49,47,701	1,96,07,840	91,80,878	1,62,778	85,149
	11-14	1,65,85,691	78,75,725	1,29,20,505	58,53,461	44,820	22,168
	6-14	4,74,36,541	2,28,23,426	3,25,28,345	1,50,34,339	2,07,598	1,07,317
Total	6-11	11,85,41,451	5,72,92,429	7,87,44,621	3,38,92,135	25,78,650	11,99,395
	11-14	6,28,45,717	2,97,19,133	3,58,67,247	1,43,26,184	7,01,360	3,11,679
	6-14	18,13,87,168	8,70,11,562	11,46,11,868	4,82,18,319	32,80,010	15,11,074

6,56,540 (21.37%) are in the age-group 11-14. Further, of the 14,03,757 girls in rural areas enrolled in NFE centres, 11,14,246 (79.38%) are in the age-group 6-11 and 2,89,511 (20.62%) are in the age-group 11-14.

In urban areas, of the 2,07,598 children enrolled, 1,62,778 (78.41%) are in the age-group 6-11 and 44,820 (21.59%) in the age-group 11-14. In the same way, of the 1,07,317 girls in urban areas, 85,149 (79.34%) and 22,168 (20.66%) belong to the age-groups 6-11 and 11-14, respectively.

Of the total child population of 18,13,87,168 in the age-group 6-14, 11,46,11,868 (63.19%) children are enrolled in the formal school system, while merely 32,80,010 (1.81%) are enrolled in NFE centres. Similarly, out of 8,70,11,562 girls in the age group 6-14, 4,82,18,319 (55.42%) study in formal schools, while only 15,11,074 (1.74%) girls are enrolled in NFE centres.

In rural areas, of the total child population of 13,39,50,627 in the age group 6-14, 8,20,83,523 (61.28%) children are enrolled in formal schools, while only 2.29% of the children of this age-group study in non-formal education centres. The corresponding figures for urban areas are 68.57% in formal schools and 0.44% in NFE centres.

Further out of 11,85,41,451 children in the age-group 6-11, only 25,78,650 (2.18%) children are enrolled in the non-formal system as against 7,87,44,621 (66.43%) in the formal system of education. In rural areas, out of 8,76,90,601 children in this age-group, only 24,15,872 (2.75%) are enrolled in the non-formal system whereas in urban areas,

out of 3,08,50,850 children in the age-group 6-11, only 1,62,778 (0.53%) get their education through NFE centres.

Similarly, out of 6,28,45,717 children in the age-group 11-14, only 7,01,360 (1.12%) children are enrolled in NFE centres as against 3,58,67,247 (57.07%) in formal schools. In rural areas, out of 4,62,60,026 children in this age-group, only 6,56,540 (1.42%) are receiving education through NFE centres while in urban areas, out of 1,65,85,691 children in the age-group 11-14, only 44,820 (2.70%) study in NFE centres.

### 8.3 Pre-Primary Education

Before a child enters the formal school, the pre-school experience can help the child in many ways, in particular, it removes from the tender mind of the child the fear associated with school. The pre-school experience helps the child to be independent while being away from the much protected environment of the four walls of the home and to learn through the playway activities. Apart from this, pre-primary education also works as a feeder and support to formal primary education. In India, pre-primary education is available in the form of Balwadis/Anganwadis, independent pre-primary schools and pre-primary schools which are attached to a formal school. In urban areas, such facilities are available in large numbers, which are managed by private enterprise and are very difficult to enumerate. In rural areas too, the concept of pre-primary education is catching up fast.

### 8.3.1 Pre-Primary Education Facility in Rural Areas

Of the total 5,86,465 villages in the country, only 1,74,540 (29.76%) villages have the facility of pre-primary in the form of Balwadis/Anganwadis, independent pre-primary schools or attached pre-primary sections. Of the total 1,74,540 villages which have the pre-primary facility, 1,58,779 (90.97%) villages have Balwadis/Anganwadis; 7,386 (4.23%) villages have independent pre-primary schools and 17,489 (10.02%) villages have pre-primary classes attached to a regular school. The corresponding figures for the Fifth AIES were 87,539 villages having Balwadis/Anganwadis; 5,381 villages having independent pre-primary schools and 9,087 villages having schools wherein the pre-primary sections are a part. This shows that there has been a phenomenal growth in the pre-primary facility.

More than 75% of the villages of seven States, viz. Goa, Kerala, Maharashtra, Manipur, Nagaland,

Sikkim and Tripura, have the facility of pre-primary schools, while nine States, viz. Arunachal Pradesh, Assam, Bihar, Himachal Pradesh, Jammu & Kashmir, Madhya Pradesh, Rajasthan, Uttar Pradesh and West Bengal have the pre-primary facility in less than 25% of villages. In other States 30% to 65% of villages have the pre-primary facility in one form or the other. Among the Union Territories, except for A&N Islands and Delhi, where the pre-primary facility is available in 31.55% and 61.50% of villages, respectively, the other Union Territories have the pre-primary facility in more than seventy per cent of villages. All the States and UTs have Balwadis/Anganwadis, while the States of Bihar and Nagaland and the UT of Daman & Diu have no independent pre-primary schools. In the same way, except for the UT of Lakshadweep all the States have pre-primary sections attached to the schools.

Statement 8.8 shows the number of pre-primary institutions along with teachers and students enrolled, in them in rural and urban areas.

STATEMENT 8.8

#### Pre-Primary Institutions along with Teachers and Enrolment

Area	Balwadis/Anganwadis			Independent Pre-Primary			Attached Pre-Primary		
	No. of Schools	No. of Teachers	No. of Children	No. of Schools	No. of Teachers	No. of Children	No. of Schools	No. of Teachers	No. of Children
1	2	3	4	5	6	7	8	9	10
Rural	2,34,422	2,57,163	1,11,86,438	10,376	15,028	4,72,835	22,622	28,171	8,45,568
Urban	23,490	27,189	12,01,561	3,692	8,190	2,50,810	11,873	28,955	8,35,148
Total	2,57,912	2,84,932	1,23,87,999	14,068	23,218	7,23,645	34,495	57,126	16,80,716

Of the total 2,57,912 Balwadis/Anganwadis, 2,34,422 (90.89%) are in rural areas. In these institutions, 1,11,86,438 students are enrolled, which means that on an average 48 students are studying in each. Of the total 1,15,04,841 children in pre-primary schools in rural areas, the majority of them, i.e., 1,11,86,438 (89.45%), are in Balwadis/Anganwadis. Further, in these institutions, a total of 2,57,143 teachers are involved in imparting instruction, which comes to 1.1 teacher per institution, which means that most of these are manned by a single teacher.

Of the 14,068 independent pre-primary institutions, 10,376 (73.76%) institutions are in rural areas. In these, 4,72,835 students are enrolled, which comes to on an average 46 students per school. Of

the total 1,25,04,841 students studying in pre-primary in rural areas, the share of independent pre-primary schools is only 4,72,835 (3.78%). The position of teachers per institution, which is 1.5 per institution, is a little better as compared to the Balwadis/Anganwadis.

Lastly, of the 34,495 pre-primary schools which are attached to regular schools, 22,622 schools in rural areas have the pre-primary section attached to them. In these institutions, 8,45,568 children are enrolled, which is 6.76% of the total children enrolled in the pre-primary schools in rural areas.

### 8.3.2 Pre-Primary Education Facility in Urban Areas

In 4,641 towns and cities in the country, a total of

39,055 pre-primary institutions have been reported to be imparting pre-school experience to the children. The majority of these, i.e., 23,490 (60.15%), are Balwadis/Anganwadis; 3,692 (9.45%) are independent pre-primary schools and 11,873 (30.40%) institutions are in the form of schools which have pre-primary sections attached to them. The average enrolment in Balwadis/Anganwadis is 51, and the majority of these are manned by a single instructor. In 3,692 independent pre-primary schools, there are 2,50,810 children enrolled, which means that on an average about 68 children are enrolled per institution in urban areas. There are more than two teachers per institution in these. The Survey has revealed that there are 11,873 schools in urban areas, which have pre-primary sections attached to them, and 8,35,148 children are enrolled in them. Thus the average strength in these is about 70 and, in all, 28,955 teachers are there to impart pre-school experience to children in urban areas.

#### 8.4 Education of the Disabled

In our country, unfortunately, due to lack of proper health facilities, a large number of children suffer from various disabilities. In some cases the disability is very severe, whereas in other cases the disability is quite mild. It is estimated that about 12.59 million children of school-going age suffer from various types of disabilities, like total or partial blindness, total or partial deafness, dumbness, mental retardness, handicap due to orthopaedic problems, and various other handicaps due to which either they do not get themselves enrolled or drop out quite early as they cannot cope with the pressures of school activities. Such children need the facility of special schools

which can cater to their special needs. Further, a large number of disabled children, specially with mild and moderate handicaps, can be educated with other normal children in common schools with some additional facilities in these schools. It was envisaged that the orthopaedically handicapped children and children with other mild handicaps be imparted education along with normal children by catering to their educational needs by providing special facilities so as to prevent their dropout due to continued frustration arising out of the learning difficulties due to their handicap. For such children, the scheme of the Integrated Education Programme (IEP) has been designed. During the current Survey, the information about special schools for the disabled and schools having IEP was collected.

##### 8.4.1 Education Facilities for Disabled Children in Rural Areas

Of the total 5,86,465 villages in the country, a mere 241 villages have the facility for special schools catering to various types of disabilities. Among the States and Union Territories, 12 States/UTs are such where none of the villages have any such facility in rural areas. Further, 200 (83%) of the villages wherein the special schools are located are in the States of Andhra Pradesh, Bihar, Gujarat, Haryana, Kerala, Madhya Pradesh, Maharashtra, Orissa and the Union Territory of A&N Islands.

In these villages there are a total of 272 schools. Of these, 55 are for boys only, 11 for girls only and the majority of them, i.e., 206 schools are for both boys and girls. Further, of these 272 schools, 73 schools have the facility to impart education to the blind; 128 schools can cater to the needs of the deaf

#### STATEMENT 8.9

Schools for Disabled and Number of Children Enrolled

Area	School/ Enrolment	Type of School			
		Boys Only	Girls Only	Both Boys and Girls	Total
1	2	3	4	5	6
Rural	Number of Schools	55	11	206	272
	Enrolment *	2,764	441	6,638	9,843
Urban	Number of Schools	97	33	500	630
	Enrolment *	4,223	1,775	31,421	37,419
Total	Number of Schools	152	44	706	902
	Enrolment *	6,987	2,216	38,059	47,262

\* Includes enrolment of all the disabilities together.

and dumb; 169 schools admit orthopaedically handicapped children; 70 schools can tackle the problem of mentally retarded children and 25 schools are such as have the facility for catering to the needs of various handicaps. Most of these schools admit both boys and girls. However, there are some schools which admit exclusively either only boys or only girls. In these schools only 9,843 children are reported to be enrolled, of which 1,471 (14.94%) are blind; 3,080 (31.29%) are deaf and dumb; 3,000 (30.48%) are orthopaedically handicapped; 1,202 (12.21%) are mentally retarded and 1,090 (11.07%) suffer from various other types of handicaps.

#### 8.4.2 Education Facilities for Disabled Children in Urban Areas

Of the total 6,461 towns and cities, a paltry 334 (5.1%) towns and cities have the facility of special schools catering to children suffering from various types of severe disabilities. In these towns, a total of 630 schools are functioning. Of these, 97 schools admit only boys, 33 schools are exclusively for girls, while the majority of these, i.e. 500 schools are such which admit both boys and girls. Among the States/UTs, not a single town of Manipur, Sikkim, Dadra & Nagar Haveli and Lakshadweep have any school for the disabled. Further, the 10 States, viz. Andhra Pradesh, Gujarat, Karnataka, Madhya Pradesh, Maharashtra, Orissa, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal account for 279 (83.5%) towns which have the facility for imparting special education to the disabled children. Of the 630 schools, some schools may be exclusively for a particular disability, while other schools may be catering to the needs of the children suffering from different types of disabilities. Accordingly, a total of 215 schools are such which admit children suffering

from blindness; 290 schools admit deaf and dumb children; 190 schools cater to children suffering from orthopaedical problems; 173 schools admit children suffering from mental retardedness and 60 schools admit children with other locomotive disabilities. The majority of these schools are co-educational. But, at the same time, there are schools which admit only boys. There is a clear bias against separate special schools for girls as there are very few schools which are exclusively for girls. In these 630 schools, a total of 37,419 children suffering from various disabilities are reported to be enrolled. Of these, 8,550 (22.85%) are blind; 14,856 (39.70%) are deaf and dumb; 5,556 (14.85%) suffer from orthopaedical handicap; 6,210 (16.60%) suffer from mental retardedness and 2,247 (6.00%) children suffer from other locomotive handicaps.

#### 8.5 Integrated Education Programme for the Disabled

A large number of disabled children, especially those with mild and moderate handicaps, can be educated with others in schools for normal children. It was envisaged that the orthopaedically handicapped and children with other mild handicaps should be covered along with other children under the universalisation of primary education. This involves identification of the disabled children and providing special facilities to meet effectively the educational needs of these children so as to prevent them from dropping out due to continued frustration arising out of the mounting learning difficulties. The scheme of integrated education for the disabled has been designed to achieve the above objective. Statement 8.9 shows the number of schools having the integrated education programme for the disabled.

STATEMENT 8.10

#### Schools Having Integrated Education Programme

Area	Primary	Upper Primary	Secondary and Higher Secondary	Total
1	2	3	4	5
Rural	6,986	2,688	1,738	11,412
Urban	1,796	1,521	1,565	4,882
Total	8,782	4,209	3,303	16,294

Of the total 8,22,486 schools in the country, only 16,294 (2.0%) schools have the integrated education programme. Of these, 11,412 (70.0%) are in rural areas and 4,882 (30.0%) are in urban areas. Further, only 8,782 (53.9%) primary schools, 4,209 (25.8%) upper primary schools and 3,303 secondary and higher secondary schools have IEP.

### 8.5.1 Facility of Integrated Education Programme in Rural Areas

Of the total 11,412 schools which have the IEP facility in rural areas, 6,986 schools are primary schools. Out of these 6,986 schools, 6,878 (98.5%) schools are available in the States of Andhra Pradesh, Gujarat, Madhya Pradesh, Orissa, Rajasthan and Tamil Nadu. Among these too, Madhya Pradesh has 5,124 (73.3%) schools and Tamil Nadu has 1,468 (21.0%) schools. Further, there are 12 States and UTs which have no schools as such which have the facility of IEP.

In rural areas, 2,688 upper primary schools have the Integrated Education Programme. Of these again the States of Andhra Pradesh, Gujarat, Karnataka, Madhya Pradesh, Orissa, Tamil Nadu account for 2,633 (98%) schools with IEP. The other States have drawn nil or have very few schools. At this level too, the State of Madhya Pradesh has 1,510 (56%) schools.

Lastly, there are 1,738 secondary and higher secondary schools in rural areas which have the IEP facility. Of these, 1,647 (94.76%) schools are confined to the States of Andhra Pradesh, Gujarat, Karnataka, Madhya Pradesh and Tamil Nadu. From the above

discussions, it is evident that the facility of IEP is confined to a few States only.

### 8.5.2 Facility of Integrated Education Programme in Urban Areas

Of the total 4,882 schools in towns and cities which have the IEP facility, 1,796 schools are primary schools. 1,759 (97.9%) primary schools with IEP are confined to the States of Andhra Pradesh, Karnataka, Madhya Pradesh, Mizoram, Orissa, Tamil Nadu and Delhi. Fifteen States are such as do not have any primary schools with IEP. The remaining States have only a few such schools.

Again, out of 1,521 upper primary schools with the facility of IEP, 1,499 (98.6%) are confined to the States of Andhra Pradesh, Gujarat, Karnataka, Madhya Pradesh, Maharashtra, Orissa, Rajasthan and Tamil Nadu. The other States are either having the facility in a few schools or have drawn nil.

Lastly, of the 1,565 secondary and higher secondary schools of urban areas which have the IEP facility, 1,489 (95.1%) are confined to the States of Andhra Pradesh, Gujarat, Karnataka, Madhya Pradesh, Maharashtra, Tamil Nadu and Delhi.

### 8.5.3 Resource Teachers in Schools Having IEP

It was envisaged that the schools with the Integrated Education Programme will be provided with a resource teacher, which will take care of the special needs of the disabled children. Statement 8.11 shows the availability of resource teachers in schools which have IEP.

STATEMENT 8.11

#### Resource Teachers in Schools with Integrated Education Programme

Area	No. of Teachers	Number of Schools		
		Primary	Upper Primary	Secondary and Hr. Secondary
1	2	3	4	5
Rural	0	5,155	1,521	612
	1	1,750	1,103	1,081
	>1	81	64	45
Urban	0	1,093	827	660
	1	628	577	810
	>1	75	117	95

Of the total 16,294 schools in the country, 10,068 (61.8%) schools are without a resource teacher. In rural areas, the percentage of primary, upper primary, secondary/ higher secondary schools without a special teacher is 73.8, 56.6 and 35.2, respectively. In urban areas, too, the respective percentages of primary, upper primary, secondary/ higher secondary schools without a resource teachers are 60.9, 54.4 and 42.2, respectively. The availability of a resource teacher, which can be a major factor in the care of disabled children, is almost the same in

rural and urban areas. The position is a little better in secondary / higher secondary schools as compared to primary and upper primary schools where the position in this respect is quite dismal.

#### 8.5.4 Enrolment in Schools with IEP

It was envisaged that children with mild and moderate handicaps could be imparted education with others in schools for normal children. Statement 8.12 shows the distribution of enrolment in respect of children with various mild disabilities.

STATEMENT 8.12

#### Number of Disabled Children Enrolled in Schools with IEP

Area	Stage	Number of Children Enrolled					
		Visually Impaired	Hearing Impaired	Orthopaedically Handicapped	Mentally Retarded	Others	Total
1	2	3	4	5	6	7	8
Rural	P	1,930	1,661	17,357	1,254	2,150	24,352
	UP	1,258	797	8,316	436	1,067	11,874
	S&HS	718	413	8,056	202	1,868	11,257
Urban	P	3,808	4,958	26,388	3,748	5,070	43,972
	UP	2,598	2,282	14,390	1,279	2,785	23,334
	S&HS	2,227	1,205	14,616	673	2,981	21,702

All over the country, a total of 1,36,491 children suffering from mild handicaps are enrolled in the schools for normal children. Of these, 47,483 (34.79%) are in rural areas and 89,008 (65.21%) are in urban areas. The majority of them, i.e., 89,123 (65.30%) are suffering from the orthopaedic handicap; whereas 15,921 (11.66%), 12,539 (9.19%), 11,316 (8.29%) and 7,592 (5.56%) are, respectively,

suffering from various general types of handicaps, partial blindness, hearing disorder and mental retardedness. Further, the majority of students, i.e. 68,324 (50.06%), are enrolled in primary classes; 35,208 (25.79%) are studying in upper primary classes, while the remaining 32,959 (24.15%) are enrolled in secondary and higher secondary classes. □

### SCHOOL BUILDINGS

#### 9.1 Introduction

**9.1.1** In the post-Independence era, there has been a great quantitative expansion of education at all levels, resulting in a considerable increase in enrolment. This has, however, not been followed by a corresponding increase in the physical facilities needed for attracting to and retaining in schools the children in the early segment of the school-going age, nor has an appropriate academic atmosphere, been created among the higher segment of the school-going students, through better libraries, laboratories and other facilities. A large number of schools still continue to function in thatched huts/kachcha buildings/tents or even in open spaces, in spite of the norms regarding school buildings laid down for recognition and/or affiliation by different agencies.

**9.1.2** In the present as well as in the earlier five surveys detailed information on school buildings has been collected to enable the planners to tackle this problem. The scope of the first two surveys conducted in 1957 and 1965 was limited to a simple enquiry about the condition of school buildings and the number of rooms along with floor area. In the Third Survey (1973) the scope was considerably enlarged and in the Fourth and Fifth surveys, conducted in 1978 and 1986, information was sought on: (i) condition and ownership of school buildings, (ii) shortage of accommodation and expansion potential, and (iii) availability of drinking-water, urinal, and lavatory facilities. In the Sixth Survey information has been collected on the following aspects of school buildings:

1. Condition of school buildings;
2. Ownership of school premises;
3. Additional classrooms required and expansion potential;
4. Availability of urinal and lavatory facilities in schools with an emphasis on separate facilities for girls;
5. Availability of drinking-water facilities within the school premises.

**9.1.3** It will be worthwhile to mention here that in the present Survey information regarding ownership of school premises, and additional classrooms

required and expansion potential, has been collected on a sample basis while the remaining three aspects have been studied on the Census basis whereas in previous surveys data on all the aspects of school buildings were collected on the Census basis.

#### 9.2 Condition of School Buildings

**9.2.1** The type of building, in which the majority of the classes (including sections) are held, has been classified as: 'pucca', 'partly pucca', 'kachcha', 'thatched hut', 'tent' or 'open space'. The construction of school buildings in the above categories as pucca, partly pucca, kachcha or thatched hut has been considered as per the norms of the respective States. Out of 8,22,486 schools in the country, 5,47,608 (66.58%) schools have pucca buildings, 1,58,226 (19.24%) are housed in partly pucca buildings, 68,438 (8.32%) are functioning in kachcha buildings, 20,744 (2.52%) in thatched huts, 2,352 (0.29%) in tents, and 25,118 (3.05%) in open space. As expected the proportion of schools with pucca buildings is higher in urban areas (77.09%) as against 66.67% in rural areas. Managementwise, the proportion of the schools having pucca buildings is the highest in private unaided schools (76.16%) and the lowest in government schools (58.22%). A similar trend was witnessed in the Fifth Survey.

#### 9.2.2 Primary Schools

There are 5,70,455 primary schools in the country, of which 3,71,186 (65.07) are functioning in pucca buildings and 1,06,468 (18.66%) in partly pucca buildings. Besides, 51,603 (9.05%) schools are housed in kachcha buildings, 17,250 (3.02%) in thatched huts, 2,090 (0.37%) in tents, and 21,858 (3.83%) in the open space. At the time of the Fifth Survey 2,97,483 (56.26%) primary schools were housed in pucca buildings, which shows a rise in the percentage of primary schools being run in pucca buildings over the figures of the Fifth Survey. There is a decrease in the percentage of primary schools being run in kachcha buildings, thatched huts, tents and open space since the Fifth Survey in which 73,615 (13.92%) schools were functioning in kachcha buildings, 29,223 (5.53%) in thatched huts, 2,572 (0.49%) in tents and 39,771 (7.52%) in open space.

## STATEMENT 9.1

## Primary Schools according to Type of Buildings

Area/ Management	Schools Having Buildings						Total
	Pucca	Partly Pucca	Kachcha	Thatched Huts	Tents	Open Space	
1	2	3	4	5	6	7	8
Rural	3,25,864 (64.20)	94,807 (18.68)	48,253 (9.51)	16,292 (3.21)	1,947 (0.38)	20,418 (4.02)	5,07,581 (100.00)
Urban	45,322 (72.08)	11,661 (18.55)	3,350 (5.33)	958 (1.52)	143 (0.23)	1,440 (2.29)	62,874 (100.00)
Total	3,71,186 (65.07)	1,06,468 (18.66)	51,603 (9.05)	17,250 (3.02)	2,090 (0.37)	21,858 (3.83)	5,70,455 (100.00)
Government	1,43,365 (56.31)	56,397 (22.15)	29,335 (11.53)	10,538 (4.14)	586 (0.22)	14,365 (5.64)	2,54,606 (100.00)
Local Body	1,98,285 (73.22)	42,270 (15.61)	17,605 (6.50)	4,249 (1.57)	1,431 (0.53)	6,966 (2.57)	2,70,806 (100.00)
Private Aided	11,723 (54.38)	4,894 (22.70)	2,937 (13.62)	1,530 (7.10)	45 (0.21)	428 (1.99)	21,557 (100.00)
Private Unaided	17,813 (75.85)	2,907 (12.38)	1,706 (7.26)	933 (3.97)	28 (0.12)	99 (0.42)	23,486 (100.00)

Note: Figures within parentheses indicate percentages.

Managementwise figures reveal that the proportion of schools having pucca buildings is the highest in private unaided schools (75.85%) and the lowest in private aided schools (54.38%). Further, the proportion of schools running in open space is the highest in government schools (5.64%). The condition of school buildings may be considered better in urban areas than in rural areas as 72.08% primary schools in urban areas are housed in pucca buildings as against 64.20% schools in rural areas.

Statewise analysis reveals that all the States except Andhra Pradesh (74.77%), Goa (96.60%), Gujarat (83.28%), Haryana (92.74%), Karnataka (85.62%), Kerala (78.26%), Maharashtra (70.08%), Punjab (91.41%), Rajasthan (90.64%) and Uttar Pradesh (89.76%), have pucca buildings in less than 70% of the schools. On the other hand, the States of Assam (14.20%), Manipur (9.63%), Mizoram (2.44%), Nagaland (4.00%), Sikkim (17.37%) and Tripura (17.20%) have pucca buildings in less than 20% of the schools. The position is not so dismal in the Union Territories as all of them except Delhi (47.97%) have pucca buildings in more than 50% of the schools. In Daman & Diu and Lakshadweep all the primary schools are housed in pucca buildings.

### 9.2.3 Upper Primary Schools

Out of 1,62,805 upper primary schools in the country, 1,11,571 (68.53%) have pucca buildings while, at the time of the Fifth Survey, 96,419 (69.36%) upper primary schools were housed in pucca buildings. Although there is a slight fall in the percentage of schools running in pucca buildings from the Fifth Survey to the Sixth Survey, there is a definite increase in the number of schools functioning in pucca buildings. However, 2,966 (1.82%) schools are still functioning in open space, of which more than 90% are located in rural areas. As expected, the condition of school buildings in urban areas is better in comparison to rural areas as 79.55% of the schools in urban areas are housed in pucca buildings as compared to 65.67% schools in rural areas. Managementwise, the proportion of schools functioning in pucca buildings is the highest in private unaided schools (78.83%) and the lowest in government schools (60.26%).

Analysing the figures Statewise it is observed that all the States except Andhra Pradesh (73.22%), Goa (97.46%), Gujarat (91.55%), Haryana (95.88%), Karnataka (86.31%), Kerala (75.27%), Maharashtra (73.03%), Punjab (90.44%), Rajasthan (92.67%) and Uttar Pradesh (77.98%), have pucca buildings in less

## STATEMENT 9.2

Total	1,11,571 (68.53)	33,821 (20.77)	11,775 (7.23)	2,517 (1.55)	155 (0.10)	2,966 (1.82)	1,62,805 (100.00)
Government	45,069 (60.26)	19,468 (26.03)	7,376 (9.86)	1,535 (2.05)	108 (0.14)	1,240 (1.66)	74,796 (100.00)
Local Body	42,683 (78.24)	8,179 (14.99)	1,671 (3.06)	340 (0.62)	19 (0.03)	1,664 (3.05)	54,556 (100.00)
Private Aided	9,682 (62.38)	3,714 (23.93)	1,673 (10.78)	416 (2.68)	17 (0.11)	18 (0.12)	15,520 (100.00)
Private Unaided	14,137 (78.83)	2,460 (13.72)	1,055 (5.88)	266 (1.26)	11 (0.06)	44 (0.25)	17,933 (100.00)

Note: Figures within parentheses indicate percentages.

than 70% of the schools. At the other extreme, the North-Eastern States — Assam (10.46%), Manipur (8.97%), Meghalaya (24.76%), Mizoram (3.78%), Nagaland (23.90%), Tripura (6.68%), and Sikkim (23.73%) have pucca buildings in less than 25% of the schools. Among the Union Territories, Dadra Nagar Haveli, Daman & Diu and Lakshadweep have pucca buildings in all the schools while others have pucca buildings in more than 55% of the upper primary schools.

### 9.2.4 Secondary Schools

Of the 65,564 secondary schools in the country, 59,757 (91.15%) schools are functioning in pucca or partly pucca buildings, whereas at the time of the Fifth Survey 47,823 (90.99%) schools were housed in such buildings. However, the number of schools running in open space has increased from the Fifth Survey (166) to the Sixth Survey (242). As expected, the proportion of schools housed in pucca buildings is higher in urban areas (82.00%) as compared to rural areas (63.66%). Managementwise, the proportion of schools functioning in pucca buildings is the lowest in government schools.

The Sixth Survey figures show that all the States except Assam (19.02%), Himachal Pradesh (43.61%),

Manipur (15.07%), Meghalaya (44.25%), Mizoram (11.07%), Nagaland (45.65%), Orissa (57.14%), Sikkim (57.58%), Tamil Nadu (51.58%) and Tripura (26.71%) have pucca buildings in more than 60% of the schools. In the States of Goa, Haryana and Rajasthan, however, more than 95% of the schools are functioning in pucca buildings. In all the Union Territories except Delhi (62.38%) and Pondicherry (75%) more than 90% of the secondary schools are housed in pucca buildings.

### 9.2.5 Higher Secondary Schools

Among the 23,662 higher secondary schools in the country, 19,869 (83.97%) are functioning in pucca buildings and 3,162 (13.36%) in partly pucca buildings, which together account for 97.33% of the schools. However, 52 higher secondary schools are still running in open space. At the time of the Fifth Survey, 15,261 (98.68%) higher secondary schools were functioning either in pucca or partly pucca buildings. Managementwise, the proportion of schools housed in the pucca buildings is the highest in private aided schools (88.94%) and lowest in government schools (77.75%).

Analysing the Statewise figures it is observed that all the States except Assam (41.21%), Himachal

## STATEMENT 9.3

### 9.3 Ownership of School Premises

**9.3.1** Various trusts, philanthropic organisations and individuals, apart from the government or local bodies, provide accommodation which is generally not very suitable for running educational institutions. There is also a wide variation in the ownership of premises used for running schools. The premises could either be owned by the school or the school may be paying rent for it. Sometimes the premises are even rent-free.

**9.3.2** The present Survey data reveals that out of 8,22,486 schools in the country, 7,59,991 (92.40%) schools have their own premises, while 49,130 (5.97%) are functioning in rented premises and 13,365 (1.63%) in rent-free premises. The proportion of schools functioning in their own premises is higher in rural areas (96.22%) than that in urban areas 71.31%. In urban areas 25.24% schools are running in rented premises

as compared to 2.48% schools in, rural areas. Considering the figures managementwise, it is observed that the proportion of schools functioning in rented premises is much higher in the schools managed by private agencies than the schools managed by government or local bodies.

#### 9.3.3 Primary Schools

Of the 5,70,455 primary schools in the country, 5,44,038 (95.37) are having their own premises, while 3.17% are functioning in rented premises and 1.46% in rent-free premises. The proportion of schools running in rented premises is quite high in urban areas (22.39%) as compared to 0.79% schools in rural areas. Managementwise, it is revealed that the proportion of schools functioning in rented premises is higher in the schools managed by private agencies than in the schools managed by the government or local bodies.

#### STATEMENT 9.5

##### Primary Schools according to Ownership of Premises

Areas/ Management	Schools Having Premises			
	Owned	Rented	Rent-Free	Total
1	2	3	4	5

Note: Figures within parentheses indicate percentages.

#### 9.3.4 Upper Primary Schools

There are 1,62,805 upper primary schools in the country, of which 1,49,007 (91.52%) are functioning in the premises owned by them, and 7.08% in rented premises. The proportion of schools running in rented premises is higher in urban areas (28.30%) as

compared to 1.57% schools in rural areas. Managementwise, the proportion of schools housed in rented premises is the highest in private unaided schools (40.89%), followed by private aided schools (15.53%), and less than 2% in government and local body schools.

## STATEMENT 9.6

## Upper Primary Schools according to Ownership of Premises

Area/ Management	Schools Having Premises			
	Owned	Rented	Rent-free	Total
1	2	3	4	5

Note: Figures within parentheses indicate percentages.

## 9.3.5 Secondary Schools

Out of 65,564 secondary schools, 48,913 (74.60%) are functioning in premises owned by them. Besides a sizable number of 15,182 (23.16%) schools are running in rented premises. The proportion of schools running in rented premises is higher in urban areas (32.79%) as compared to

19.60% schools in rural areas. It will be worthwhile to note that about 50% of the private unaided, and 40% of the private aided secondary schools are functioning in rented premises. The position is much more satisfactory in government and local body schools as 95% of them are housed in premises owned by them.

## STATEMENT 9.7

## Secondary Schools according to Ownership of Premises

Area/ Management	Schools Having Premises			
	Owned	Rented	Rent-free	Total
1	2	3	4	5
Rural	37,640 (78.63)	9,381 (19.60)	849 (1.77)	47,870 (100.00)

Note: Figures within parentheses indicate percentages.

### 9.3.6 Higher Secondary Schools

Of the 23,662 higher secondary schools in the country, 18,033 (76.21%) schools have their own premises, 4,345 (18.36%) schools are functioning in rented premises and 1,284 (5.43%) are housed in rent-free premises. Considering the proportion of

schools functioning in rented premises, it is observed that their percentage is the highest in private aided schools (30.05%), followed by private unaided schools (28.05%), local body schools (14.06%) and, lastly, government schools (1.99%).

## STATEMENT 9.8

### Higher Secondary Schools according to Ownership of Premises

Note: Figures within parentheses indicate percentages.

## 9.4 Additional Classrooms Required and Expansion Potential in Schools

**9.4.1** The present Survey as well as the earlier surveys reveal that a sizable number of schools are running in kachcha buildings, thatched huts, tents apart from those running in open space where generally adequate number of rooms are not available for the smooth functioning of the school. Leaving aside these schools, it cannot be taken for granted that the schools housed in pucca or partly pucca buildings have adequate number of classrooms to run the school properly. As revealed by the present Survey 5,18,797 (63.08%) schools do not have adequate number of classrooms. During the Fifth Survey, however, 5,89,437 (80.11%) schools did not have adequate number of classrooms, which shows that the position in terms of schools having adequate number of classrooms has improved since the Fifth Survey. The problem of paucity of classrooms can be overcome either by constructing new structures

on the extra land available in the school, which may be called horizontal expansion, or by raising new structures on the existing ones, if possible, which may be called vertical expansion. Out of 5,18,797 schools requiring additional classrooms, 98.67% of them have the potential for expansion either horizontally or vertically or in both directions. This gives the hope that schools can construct additional classrooms required by them in the near future depending upon the availability of funds.

### 9.4.2 Primary Schools

Out of 5,70,455 primary schools in the country, 2,14,933 (37.68%) schools have adequate number of classrooms, while 84,055 (14.73%) require one additional classroom; 2,11,210 (37.02%) require two or three additional classrooms; 53,482 (9.38%) four or five additional classrooms; and 6,775 (1.19%) more than five additional classrooms. The total number of additional classrooms required by these schools is

9,85,712. At the time of the Fifth Survey only 99,088 (18.74%) schools had adequate number of classrooms while 1,10,127 (20.83%) schools needed one additional classroom and remaining 3,19,515

(60.43%) schools needed more than one additional classrooms. This shows a significant improvement in this direction. However, there is still a long way to go.

### STATEMENT 9.9

#### Primary Schools according to Additional Classrooms Required

Area/ Management	Schools Requiring Additional Classrooms						Total No. of Additional Classrooms Required
	Nil	1	2-3	4-5	More than 5	Total	
1	2	3	4	5	6	7	8
Rural	1,84,089 (36.27)	78,813 (15.53)	1,93,024 (38.03)	46,885 (9.24)	4,770 (0.94)	5,07,581 (100.00)	8,76,154
Urban	30,844 (49.06)	5,242 (8.34)	18,186 (28.92)	6,597 (10.49)	2,005 (3.19)	62,874 (100.00)	1,09,558
Total	2,14,933 (37.68)	84,055 (14.73)	2,11,210 (37.02)	53,482 (9.38)	6,775 (1.19)	5,70,455 (100.00)	9,85,712
Government	82,888 (32.56)	32,452 (12.75)	1,04,865 (41.19)	31,582 (12.40)	2,819 (1.11)	2,54,606 (100.00)	4,47,949
Local Body	1,06,170 (39.21)	47,371 (17.49)	95,315 (35.20)	18,920 (6.99)	3,030 (1.12)	2,70,806 (100.00)	4,72,259
Private Aided	12,123 (56.24)	2,762 (12.81)	4,992 (23.16)	1,286 (5.97)	394 (1.83)	21,557 (100.00)	34,316
Private Unaided	13,752 (58.55)	1,470 (6.26)	6,038 (25.71)	1,694 (7.21)	532 (2.27)	23,486 (100.00)	31,188

Note: Figures within parentheses indicate percentages.

The proportion of schools having inadequate number of classrooms is more in rural areas (63.73%) as compared to 50.94% schools in urban areas. Managementwise, the schools managed by the private agencies are relatively better placed than the schools managed by the government or local bodies so far as percentage of schools having adequate number of classrooms is concerned.

Out of the schools requiring additional classrooms, 98.58% schools have expansion potential, either horizontally or vertically or in both the directions, for construction of these classrooms.

#### 9.4.3 Upper Primary Schools

Of the 1,62,805 upper primary schools, 57,282 (35.18%) schools have adequate number of classrooms while 17,191 (10.56%) need one additional classroom, 79,337 (48.73%) require two to five additional classrooms, and 8,995 (5.53%) need more than five classrooms. During the Fifth Survey, 28,851 (20.75%) schools had adequate number of classrooms, thereby showing an increase in

percentage of schools having adequate number of classrooms. However, still 64.82% of the schools require 3,53,804 additional classrooms.

The percentage of schools requiring additional classrooms is relatively higher in rural areas (69.18%) in comparison to 48.03% schools in urban areas. Considering the figures managementwise, it is observed that the proportion of schools having adequate number of classrooms is higher in the schools managed by private agencies than the schools managed by government or local bodies. Further, out of the schools needing additional classrooms, 98.14% have the expansion potential for construction of these classrooms.

#### 9.4.4 Secondary Schools

Of the 65,564 secondary schools in the country, 22,682 (34.60%) schools do not need additional classrooms as against 13,683 (26.03%) schools at the time of the Fifth Survey. This shows that there is an increase in the number of schools having adequate number of classrooms since the Fifth

Note: Figures within parentheses indicate percentages.

Managementwise, the schools managed by private agencies are relatively better in this respect than the schools managed by the government or local bodies. Expansion potential is available in 99% of the schools needing additional classrooms.

#### 9.4.5 Higher Secondary Schools

There are 8,792 (37.16%) schools having adequate number of classrooms, whereas at the time of the

Fifth Survey 4,712 (30.47%) higher secondary schools had adequate number of classrooms. This shows an improvement in this respect during the intervening period of the Fifth and Sixth surveys. However, 83,900 additional classrooms are still required by the 14,870 higher secondary schools having inadequate number of classrooms. The schools in urban areas (42.47%) are better placed as compared to 31.63% schools in rural areas having adequate number of classrooms.

### STATEMENT 9.12

#### Higher Secondary Schools according to Additional Classrooms Required

Area/ Management	Schools Requiring Additional Classrooms						Total No. of Additional Classrooms Required
	Nil	1-2	3-4	5-6	More than 6	Total	
1	2	3	4	5	6	7	8
Rural	3,669 (31.63)	2,030 (17.50)	2,245 (19.35)	1,960 (16.90)	1,696 (14.62)	11,600 (100.00)	44,388
Urban	5,123 (42.47)	1,827 (15.15)	1,729 (14.33)	1,666 (13.81)	1,717 (14.23)	12,062 (100.00)	39,512
Total	8,792 (37.16)	3,857 (16.30)	3,974 (16.79)	3,626 (15.32)	3,413 (14.42)	23,662 (100.00)	83,900

Private Aided	4,304 (40.43)	1,729 (16.24)	1,781 (16.73)	1,534 (14.41)	1,298 (12.19)	10,646 (100.00)	35,746
Private Unaided	1,614 (53.96)	353 (11.80)	392 (13.11)	317 (10.60)	315 (10.53)	2,991 (100.00)	7,462

Note: Figures within parentheses indicate percentages.

The proportion of schools having adequate number of classrooms is the highest in private unaided schools (53.96%), followed by private aided schools (40.43%), local body schools (36.33%) and, lastly, government schools (27.92%). Out of the schools needing additional classrooms, 98.84% of them have expansion potential.

#### 9.5 Urinal Facilities

**9.5.1** Urinal facilities are one of the essential requirements of a school for its smooth functioning. The present Survey shows that only 31.52% schools have urinal facilities, including 19.48% schools having facility of separate urinals for girls, out of the total number of 8,22,486 schools in the country. At the time of the Fifth Survey, 26.20% schools had

urinal facilities, including 12.83% schools which had the facility of separate urinals for girls. Although there is some increase in the proportion of schools having urinal facilities since the Fifth Survey, still more than two-thirds of the schools do not have these basic facilities.

**9.5.2** The proportion of schools having urinal facilities is much higher in urban areas (72.33%) as compared to 24.13% schools in rural areas. Similarly, the proportion of schools with separate urinals for girls is much higher in urban areas (51.02%) than in rural areas (13.77%). Managementwise, the proportion of schools having urinal facilities as well as the proportion of schools with separate urinals for girls is the highest in private unaided schools and the lowest in local body schools.

## STATEMENT 9.13

Note: Figures within parentheses indicate percentages.

### 9.5.3 Primary Schools

Out of 5,70,455 primary schools in the country, 1,07,986 (18.93%) schools have urinal facilities including 49,420 (8.66%) schools having the facility of separate urinals for girls. At the time of the Fifth Survey, 81,929 (15.50%) schools had urinal facilities including 27,232 (5.15%) schools which had the facility of separate urinals for girls. This shows that there is not much improvement in the urinal facilities. The position of rural schools is the worst where only 14.02% schools have urinal facilities, including 5.54% schools with separate urinals for girls. Managementwise, the proportion of schools with urinal facilities as well as the proportion of schools with separate urinals for girls is the highest in private unaided schools and the lowest in government schools.

Statewise analysis reveals that in all the States except Haryana (56.30%), Kerala (81.38%), Mizoram (72.53%) and Punjab (52.49%), urinal facilities are available in less than 50% of the schools. In the States of Bihar (3.40%) and Karnataka (4.57%) urinal facilities exist in less than 5% of the schools. The position is even worse in the case of separate urinals for girls as Kerala is the only State where these facilities are available in more than 50% of the schools. Further, ten States have the facilities of separate urinals for girls in less than 5% of the schools. These States are Andhra Pradesh (4.94%), Arunachal Pradesh (3.58%), Assam (1.63%), Bihar (0.89%), Jammu & Kashmir (2.01%), Karnataka (2.28%), Manipur (3.89%), Meghalaya (1.85%), Orissa (2.77%) and Tripura (1.63%). The position is not so bad in the Union Territories as all of them except A & N Islands (44.68%) and Dadra & Nagar Haveli (14.40%) have urinal facilities in more than 70% of the schools. However, none of the Union Territories has separate urinals for girls in more than 60% of the schools. Dadra & Nagar Haveli has separate urinals for girls in only 9.60% schools and Daman & Diu in 16.67% schools.

### 9.5.4 Upper Primary Schools

There are 1,62,805 upper primary schools in the country, of which 78,865 (48.44%) schools have urinal facilities whereas separate urinals for girls are available in 51,354 (31.54%) schools. At the time of the Fifth Survey urinal facilities were available in 57,769 (41.56%) schools and separate urinals for girls existed in 21.72% schools, which shows a slight improvement in the availability of urinal facilities. As expected, the proportion of schools having urinal

facilities as well as the proportion of schools with separate urinals for girls is higher in urban areas (78.73%; 58.65%) as compared to rural areas (40.58%; 24.51%). As in the case of primary schools, here also the proportion of upper primary schools having urinal facilities as well as the proportion of schools with separate urinals for girls is the highest in private unaided schools and the lowest in government schools.

A comparison of Statewise figures shows that all the States except Gujarat (64.52%), Haryana (88.24%), Kerala (92.63%), Mizoram (90.95%), Punjab (88.76%), Rajasthan (66.13%) and West Bengal (93.33%) have urinal facilities in less than 60% of the schools. Further, the States of Bihar (22.67%) and Jammu & Kashmir (22.86%) have urinal facilities in less than 25% of the schools. As regards separate urinals for girls, only four States, namely, Haryana (72.08%), Kerala (74.97%), Punjab (71.31%) and West Bengal (70.83%), have these facilities in more than 50% of the schools. At the other extreme, the States of Arunachal Pradesh (13.72%), Assam (14.59%), Bihar (10.50%), Jammu & Kashmir (13.73%), Orissa (13.64%) and Tripura (8.76%) have the facilities of separate urinals for girls in less than 15% of the schools. The position is not so dismal in the Union Territories as all of them except Dadra & Nagar Haveli (47.62%) and Daman & Diu (52.00%) have urinal facilities in more than 85% of the schools. Further, the facilities of separate urinals for girls are available in more than 60% of the schools in all the Union Territories except Dadra & Nagar Haveli (38.10%) and Daman & Diu (12.00%).

### 9.5.5 Secondary Schools

Out of 65,564 secondary schools in the country, 50,459 (76.96%) schools have the urinal facilities but separate urinals for girls are available in 41,020 (62.56%) schools. At the time of the Fifth Survey, urinal facilities existed in 39,515 (75.18%) schools whereas separate urinals for girls were available in 26,727 (50.85%) schools, which shows some improvement in the urinal facilities, specially in the facilities of separate urinals for girls. But 15,105 secondary schools still do not have urinal facilities at all. In urban areas the position is satisfactory as 92.58% schools have urinal facilities, including 77.95% schools with separate urinals for girls, as compared to 71.19% schools with urinal facilities in rural areas, including 56.88% schools with separate urinals for girls. Managementwise, private aided schools are better placed than the schools under

other managements as far as urinal facilities are concerned.

Statewise analysis reveals that all the States except Jammu & Kashmir (47.65%) have urinal facilities in more than 60% of the schools. Further, separate urinal facilities for girls are available in more than 45% of the schools in all the States except Arunachal Pradesh (31.65%), Bihar (43.40%), Jammu & Kashmir (31.80%) and Tripura (29.08%). The position is quite satisfactory in the Union Territories as all of them except Daman & Diu (57.14%) have urinal facilities in more than 90% of the schools. Also, separate urinals for girls exist in more than 70% of the schools in all the Union Territories except Daman & Diu (32.14%).

### 9.5.6 Higher Secondary Schools

There are 23,662 higher secondary schools in the country, of which 21,954 (92.78%) have urinal facilities whereas separate urinals for girls exist in 18,442 (77.94%) schools. At the time of the Fifth Survey, 13,564 (87.71%) schools had urinal facilities while separate urinals for girls were available in 10,219 (66.08%) schools, which shows an improvement in these facilities since the Fifth Survey.

But 1,708 (7.22%) higher secondary schools still do not have urinal facilities at all. Managementwise, the proportion of schools having urinal facilities is the highest for the private aided schools (96.11%). However, the proportion of schools with separate urinals for girls is the highest in the private unaided schools.

Considering the Statewise figures it is observed that all the States except Sikkim (73.91%) have urinal facilities in 75% or more of the schools. As regards separate urinals for girls, these facilities are available in more than 60% of the schools in all the States except Jammu & Kashmir (45.83%), Nagaland (50.00%) and Sikkim (56.52%). The position is much better in the Union Territories as all of them have urinal facilities in more than 97% of the schools. Also the facilities of separate urinals for girls are available in more than 85% of schools in all the Union Territories except Daman & Diu (66.67%) and Pondicherry (78.57%).

## 9.6 Lavatory Facilities

**9.6.1** The provision of lavatory facilities is essential for the smooth functioning of a school. Out of 8,22,486 schools in the country, only 1,67,368

STATEMENT 9.15

### Schools Having Lavatory Facilities

Private Unaided	15,253 (64.95)	12,394 (69.11)	6,563 (62.24)	2,525 (84.42)	36,735 (66.85)

Note: Figures within parentheses indicate percentages.

## STATEMENT 9.16

**Schools Having Separate Lavatories for Girls**

<i>Area/ Management</i>	<i>Primary Schools</i>	<i>Upper Primary Schools</i>	<i>Secondary Schools</i>	<i>Higher Secondary Schools</i>	<i>Total</i>
1	2	3	4	5	6
Rural	12,186 (2.40)	11,965 (9.26)	14,623 (30.55)	6,015 (51.85)	44,789 (6.43)
Urban	16,998 (27.04)	15,982 (47.62)	12,132 (68.57)	8,855 (73.41)	53,967 (42.77)
Total	29,184 (5.12)	27,947 (17.17)	26,755 (40.81)	14,870 (62.84)	98,756 (12.01)
Government	5,639 (2.21)	6,418 (8.58)	7,566 (30.81)	4,639 (50.78)	24,262 (6.68)
Local Body	8,951 (3.31)	5,735 (10.51)	2,411 (32.58)	559 (62.88)	17,656 (5.29)
Private Aided	4,057 (18.82)	5,977 (38.51)	11,129 (48.26)	7,366 (69.19)	28,529 (40.30)
Private Unaided	10,537 (44.87)	9,817 (54.74)	5,649 (53.58)	2,306 (77.10)	28,309 (51.51)

Note: Figures within parentheses indicate percentages.

(20.35%) schools have lavatory facilities. The situation is even worse with regard to separate lavatories for girls as these are available only in 98,756 (12.01%) schools. During the Fifth Survey lavatory facilities were available in 98,073 (13.33%) schools, and the facility of separate lavatories for girls existed in 54,494 (7.41%) schools; this shows a slight improvement in these facilities since the Fifth Survey. The situation is the worst in rural areas where only 12.76% schools have lavatory facilities, including 6.43% schools which have separate lavatories for girls. Managementwise, private unaided schools are better placed with regard to these facilities than the schools under other managements.

### 9.6.2 Primary Schools

There are 5,70,455 primary schools in the country, of which 61,926 (10.86%) schools have lavatory facilities, including 29,184 (5.12%) schools with separate lavatories for girls. At the time of the Fifth Survey, 33,197 (6.28%) schools had lavatory facilities. However, separate lavatories for girls existed in only 14,584 (2.76%) schools. This shows a slight improvement in these facilities since the Fifth

Survey but the position is far from satisfactory. The situation is even worse in rural areas where only 32,463 (6.40%) schools have lavatory facilities, including 12,186 (2.40%) schools with separate lavatories for girls. Considering the figures managementwise, it is observed that private aided schools are much better placed than the schools under other managements as far as these facilities are concerned. The position of government schools is at the lowest level as only 6.02% of them have lavatory facilities, whereas separate lavatories for girls are available in 2.21% schools only.

Statewise analysis reveals that none of the State except Kerala (40.29%), Mizoram (32.87%), Punjab (20.87%) and Rajasthan (21.36%) have lavatories in more than 20% of the schools. During the Fifth Survey only the State of Kerala (24.89%) was found in this category. The present Survey figures further reveal that the States of Assam, Himachal Pradesh, Jammu & Kashmir, Karnataka, Meghalaya, Orissa and Tripura have lavatories in fewer than 5% of the schools. The situation is the worst in the case of separate lavatories for girls as all the States except Kerala (12.05%) have these facilities in less than 10% of the schools. The position of the lavatory facilities

is better in the Union Territories as all of them, except A & N Islands (34.04%) and Dadra & Nagar Haveli (12.00%), have these facilities in more than 60% of the schools. Further, all the Union Territories except A & N Islands (26.06%), Dadra & Nagar Haveli (8.80%) and Lakshadweep (16.67%) have separate lavatories for girls in more than 30% of the schools.

### 9.6.3 Upper Primary Schools

Out of 1,62,805 upper primary schools in the country, 48,648 (29.88%) schools have lavatory facilities, including 27,947 (17.17%) schools with separate lavatories for girls. During the Fifth Survey, 28,040 (20.17%) schools had lavatory facilities whereas separate lavatories for girls existed in 15,625 (11.24%) schools, which shows a slight improvement over the figures of the Fifth Survey. But the situation is still far from satisfactory. Schools in urban areas (68.05%) have better lavatory facilities than schools in rural areas (19.97%). This also holds good with regard to separate lavatories for girls as 47.62% schools in urban areas have these facilities as compared to 9.26% schools in rural areas. On considering these facilities managementwise, we find that schools managed by private agencies are better placed than the schools managed by the government or local bodies.

Statewise figures reveal that all the States except Haryana (43.27%), Kerala (59.15%), Mizoram (54.28%), Punjab (60.29%), Rajasthan (45.34%) and West Bengal (61.16%) have lavatory facilities in less than 40% of the schools. In Assam, only 6.84% and in Jammu & Kashmir, only 9.80% schools have lavatory facilities. As regards separate lavatories for girls, all the States except Punjab (42.99%) and West Bengal (41.04%) have these facilities in less than 40% of the schools. The States of Assam (2.13%), Orissa (4.07%) and Tripura (1.84%) have separate lavatories for girls in less than 5% of the schools. The position is much better in the Union Territories as all of them except Dadra & Nagar Haveli (54.76%) have lavatory facilities in more than 65% of the schools. As regards separate lavatories for girls, all the Union Territories except Dadra & Nagar Haveli (40.48%) and Daman & Diu (36.00%) have these facilities in more than 50% of the schools.

### 9.6.4 Secondary Schools

Out of the 65,564 secondary schools in the country, 37,599 (57.35%) schools have lavatory facilities, including 26,755 (40.81%) schools with separate lavatories for girls. During the Fifth Survey, 25,578

(48.66%) schools had lavatory facilities and 16,371 (31.15%) schools had separate lavatories for girls, which shows an improvement in these facilities since the Fifth Survey. As expected, schools in urban areas are better placed than the schools in rural areas as far as these facilities are concerned. Further, the schools managed by private agencies are better placed than the schools managed by government or local bodies on this aspect.

A comparison of Statewise figures reveals that all the States except Assam (24.59%), Himachal Pradesh (42.93%), Jammu & Kashmir (32.37%), Karnataka (49.04%), Madhya Pradesh (44.48%), Maharashtra (47.33%), Meghalaya (45.23%), Orissa (39.91%) and Tripura (31.45%) have lavatory facilities in more than 50% of the schools. Further, the States of Goa (75.53%), Kerala (87.88%), Punjab (76.65%) and West Bengal (83.65%) have lavatory facilities in more than 70% of the schools. However, separate lavatories for girls in more than 50% of the schools are available only in the States of Goa (59.82%), Gujarat (52.71%), Kerala (65.92%), Punjab (60.58%) and West Bengal (61.15%). At the other extreme, the States of Assam (12.64%), Jammu & Kashmir (16.81%) and Tripura (9.79%) have separate lavatories for girls in less than 20% of the schools. The position is much better in the Union Territories as all of them have lavatory facilities in more than 80% of the schools. Further, separate lavatories for girls are available in more than 60% of schools in all the Union Territories except Daman & Diu (53.57%).

### 9.6.5 Higher Secondary Schools

Out of the 23,662 higher secondary schools in the country, 19,195 (81.12%) schools have lavatory facilities, including 14,870 (62.84%) schools with separate lavatories for girls. At the time of Fifth Survey, 11,258 (72.80%) schools had lavatory facilities and separate lavatories for girls were available in 7,914 (51.17%) schools, which shows an improvement in these facilities since the Fifth Survey. The position is quite satisfactory in urban areas as 92.29% of the schools have lavatory facilities. The corresponding percentage for schools in rural areas is 69.51. Also, the position of separate lavatories is better in urban areas. The schools managed by private agencies are better placed than the schools managed by local bodies or by the government as far as these facilities are concerned.

Statewise figures reveal that all the States except Jammu & Kashmir (58.33%), Nagaland (25.00%) and

Orissa (53.52%) have lavatory facilities in more than 60% of the schools. As regards separate lavatories for girls, all the States except Assam (29.82%), Jammu & Kashmir (30.83%), Madhya Pradesh (43.70%), Nagaland (25.00%), Orissa (43.86%), Sikkim (47.83%) and Tripura (41.45%) have these facilities in more than 50% of the schools. Among the Union Territories, all of them have lavatory facilities in more than 95% of the schools. Further, all the Union Territories have separate lavatories for girls in more than 75% of the schools.

## 9.7 Drinking-Water Facilities in Schools

### 9.7.1 Drinking-water is essential for satisfying a

physiological need. However, a large number of schools do not have drinking-water facilities. Out of 8,22,486 schools in the country, 4,32,523 (52.59%) schools have these facilities as against 4,02,594 (54.72%) schools in the Fifth Survey. This shows some increase in the number of schools having the drinking-water facilities although their percentage has slightly decreased. As expected, the proportion of schools having drinking-water facilities is higher in urban areas (78.01%) as compared to schools in rural areas (47.98%). Considering the proportion of schools having drinking-water facilities under different managements, we find that it is the highest in the private unaided schools (88.31%) and the lowest in government schools (43.03%).

STATEMENT 9.17

#### Schools Having Drinking-Water Facilities

Area/ Management	Primary Schools	Upper Primary Schools	Secondary Schools	Higher Secondary Schools	Total
1	2	3	4	5	6
Rural	2,10,034 (41.38)	75,404 (58.34)	38,163 (79.72)	10,477 (90.32)	3,34,078 (47.98)
Urban	42,279 (67.24)	27,930 (83.23)	16,554 (93.56)	11,682 (96.85)	98,445 (78.01)
Total	2,52,313 (44.23)	1,03,334 (63.47)	54,717 (83.46)	22,159 (93.65)	4,32,523 (52.59)
Government	88,183 (34.64)	40,741 (54.47)	19,173 (78.07)	8,139 (89.09)	1,56,236 (43.03)
Local Body	129,442 (47.80)	33,663 (61.70)	5,932 (80.15)	828 (93.14)	1,69,865 (50.91)
Private Aided	14,219 (65.96)	12,799 (82.47)	20,529 (89.02)	10,345 (97.17)	57,892 (81.79)
Private Unaided	20,469 (87.15)	16,131 (89.95)	9,083 (86.14)	2,847 (95.19)	48,530 (88.31)

Note: Figures within parentheses indicate percentages.

### 9.7.2 Primary Schools

Out of 5,70,455 primary schools in the country, 2,52,313 (44.23%) schools have drinking-water facilities within the school premises as compared to 2,50,369 (47.35%) schools in the Fifth Survey. This shows that although there is slight increase in the number of schools with drinking-water facilities, yet in terms of percentage there is a deterioration in these

facilities. As expected, the schools in urban areas (67.24%) are relatively better placed in this respect as compared to schools in rural areas (41.38%). Managementwise figures reveal that the proportion of schools with drinking-water facilities is the highest in private unaided schools (87.15%), followed by private aided schools (65.96%), local body schools (47.80%) and government schools (34.64%).

Statewise analysis of data reveals that all the States except Goa (60.41%), Haryana (76.95%), Himachal Pradesh (61.46%), Kerala (76.16%), Punjab (87.72%) and Tamil Nadu (62.34%) have drinking-water facilities in less than 60% of the schools. The position is much better in the Union Territories as all of them except Dadra & Nagar Haveli (40.00%) have drinking-water facilities in more than 60% of the schools.

### **9.7.3 Upper Primary Schools**

There are 1,62,805 upper primary schools in the country, of which 1,03,334 (63.47%) schools have drinking-water facilities within the school premises as against 93,260 (67.09%) schools in the Fifth Survey. This shows some increase in the number of schools having these facilities, but in terms of percentage there is a decline in these facilities. Drinking-water facilities are relatively better in the schools in urban areas (83.23%) than in rural areas (58.34%). Managementwise, schools managed by private agencies are better placed than the schools managed by local bodies or by the government.

A comparison of Statewise figures shows that all the States except Assam (42.60%), Jammu & Kashmir (31.08), Manipur (36.89%), Meghalaya (26.46%), Mizoram (43.75%), Nagaland (36.36%), Orissa (44.21%) and Tripura (41.47%) have drinking-water facilities in more than 50% of the schools. As regards Union Territories, all of them except Dadra & Nagar Haveli (73.81%) have these facilities in more than 90% of the schools.

### **9.7.4 Secondary Schools**

Out of 65,564 secondary schools in the country, 54,717 (83.46%) schools have drinking-water facilities within the school premises as compared to 44,672 (84.99%) schools in the Fifth Survey. This shows that there is an increase in the number of

schools having these facilities but their percentage has marginally decreased since the Fifth Survey. In urban areas, 93.56% of the schools have drinking-water facilities as compared to 79.72% schools in rural areas. Managementwise, the proportion of schools having these facilities is the highest in private aided schools (89.02%) and the lowest in government schools (78.07%).

Statewise analysis reveals that all the States except Jammu & Kashmir (49.76%), Manipur (53.72%), Meghalaya (53.55%), Mizoram (59.68%), Nagaland (57.07%) have drinking-water facilities in more than 60% of the schools. All the Union Territories except A & N Islands (87.10%) and Dadra & Nagar Haveli (87.50%) have drinking-water facilities in more than 95% of the schools.

### **9.7.5 Higher Secondary Schools**

Out of 23,662 higher secondary schools in the country, drinking-water facilities are available in 22,159 (93.65%) schools, whereas at the time of the Fifth Survey these facilities existed only in 14,293 (92.42%) schools. Although in terms of percentage of schools having drinking-water facilities there does not seem to be any improvement but there is a definite increase in the number of schools having these facilities, since the Fifth Survey. In urban areas, 96.85% of the schools have drinking-water facilities as compared to 90.32% schools in rural areas. Considering these facilities managementwise, private aided schools are relatively better placed than the schools under other managements.

A comparison of Statewise figures shows that in all the States except Jammu & Kashmir (77.50%), Manipur (72.22%), Nagaland (75.00%), Orissa (73.89%) and Sikkim (69.57%) drinking-water facilities are available in more than 80% of the schools. Among the Union Territories, all of them have these facilities in more than 95% of the schools.

## Chapter 10

### FACILITIES

#### 10.1 Introduction

The Constitution of India has enshrined free and compulsory education for all children upto the age of 14 years. The efforts in this direction have been tremendous, by expanding the educational facilities, particularly in rural areas, by opening new schools, attracting more children to school and retaining them. There has been a constant increase in the number of schools and the enrolment which is evident from the various surveys. These surveys reveal how the educational facilities have improved over the last two to three decades.

Though it is imperative to provide schooling facilities within a convenient walking distance to achieve the goal of UEE, it is also essential to provide a good quality of education to children to prepare them for the future. To impart good education to children we must provide good quality schools, which means providing certain minimum facilities in the schools to create a congenial atmosphere for the

children to study in. In this Survey as well as in earlier surveys detailed information on academic inputs like libraries, textbook banks, blackboards, supply of chalks and dusters, furniture, etc., and incentive schemes as inputs in schools has been collected for further improvement in the quality of education. This chapter deals with the availability of these facilities in different categories of schools.

#### 10.2 Libraries

The school library is an integral part of school education. It supplements classroom teaching and is essential for the efficient functioning of every school. A well equipped library helps in encouraging literary and cultural interests in students.

Like in earlier surveys in the present Survey also, an attempt has been made to identify the schools having libraries, the number of books and dictionaries available in them and gather information regarding the staff managing the libraries.

#### STATEMENT 10.1

##### Schools with Library Facilities according to Area

Category	Area	Total No. of Schools	Schools Having Libraries	Percentage of Schools Having Libraries
1	2	3	4	5
Primary	Rural	5,07,581	2,07,462	40.87
	Urban	62,874	23,700	37.69
Upper Primary	Rural	1,29,246	75,252	58.22
	Urban	33,559	22,488	67.01
Secondary	Rural	47,870	37,833	79.03
	Urban	17,694	15,047	85.04
Higher Secondary	Rural	11,600	10,366	89.36
	Urban	12,062	10,980	91.03
Total	Rural	6,96,297	3,30,913	47.52
	Urban	1,26,189	72,215	57.23
	Total	8,22,486	4,03,128	49.01

Out of the total number of 8,22,486 schools in the country, only 4,03,128 (49.01%) have libraries. The corresponding percentage in the Fifth Survey was 39.88. Out of the 6,96,297 rural schools, 3,30,913 (47.52%) are having library facilities, and out of 1,26,189 urban schools, 72,215 (57.23%) have libraries. This indicates that the proportion of urban schools having a library is approximately 10% more than rural schools.

According to the managementwise distribution of the facilities, it is found that 1,88,380 (51.88%) schools run by the government, 1,32,130 (39.60%) schools managed by local bodies, 51,464 (72.71%) private aided schools and 31,154 (56.69%) private unaided schools have libraries. Thus, there are about 60% local body schools which are without library facilities though at the time of the Fifth Survey the corresponding figure was around 75%.

**STATEMENT 10.2**  
**Schools Having Library Facilities According to Management**

Category	Management	Total No. of Schools	Schools Having Libraries	Percentage of Schools Having Libraries
1	2	3	4	5
Primary	Government	2,54,606	1,13,912	44.74
	Local Body	2,70,806	99,873	36.88
	Private Aided	21,557	10,625	49.29
	Private Unaided	23,486	6,752	28.75
	Total	5,70,455	2,31,162	40.52
Upper Primary	Government	74,796	47,336	63.29
	Local Body	54,556	26,183	47.99
	Private Aided	15,520	11,273	72.64
	Privated Unaided	17,933	12,948	72.20
	Total	1,62,805	97,740	60.04
Secondary	Government	24,559	19,115	77.83
	Local Body	7,401	5,301	71.63
	Private Aided	23,060	19,701	85.43
	Private Unaided	10,544	8,763	83.11
	Total	65,564	52,880	80.65
Higher Secondary	Government	9,136	8,017	87.75
	Local Body	889	773	86.95
	Private Aided	10,646	9,865	92.66
	Private Unaided	2,991	2,691	89.97
	Total	23,662	21346	90.21
	Government	3,63,097	1,88,380	51.88
	Local Body	3,33,652	1,32,130	39.60
	Private Aided	70,783	51,464	72.71
	Private Unaided	54,954	31,154	56.69
	Total	8,22,486	4,03,128	49.01

It is also observed that 2,31,162 (40.52%) primary schools, 97,740 (60.04%) upper primary schools, 52,880 (80.65%) secondary schools and 21,346 (90.21%) higher secondary schools have libraries. On comparing these figures with those of the Fifth Survey, it is found that the number of libraries has increased from 26.18% to 40.52% since the Fifth Survey in primary schools only while in upper primary, secondary and higher secondary schools this proportion has decreased. There is a substantial increase in the number of schools but as regards libraries, their increase is not in the same proportion.

### 10.2.1 Primary Schools

Out of 5,70,455 primary schools, only 2,31,162 (40.52%) have got a library. Of these, 2,07,462 (89.75%) are in rural areas and 23,700 (10.25%) in urban areas. In terms of proportion of schools having these facilities, 40.87% rural schools have library facilities whereas this proportion for the urban schools is only 37.69%. In earlier surveys it was always the urban schools which maintained the superiority over rural ones in terms of availability of library in primary schools.

STATEMENT 10.3

#### Primary Schools according to Number of Books in Libraries in Rural and Urban Areas

Area	Schools Having Libraries	Percentage of Schools	Schools Having Number of Books					Schools Having Dictionaries
			Upto 50	51-100	101-200	201-500	More than 500	
1	2	3	4	5	6	7	8	9
Rural	2,07,462	29.80	34,868 (16.81)	19,193 (9.25)	54,237 (26.14)	91,093 (43.91)	8,071 (3.89)	1,25,159 (60.33)
Urban	23,700	18.78	4,020 (16.96)	2,432 (10.26)	5,126 (21.63)	8,199 (34.60)	3,923 (16.55)	14,330 (60.46)
Total	2,31,162	28.11	38,888 (16.82)	21,625 (9.35)	59,363 (25.68)	99,292 (42.95)	11,994 (5.19)	1,39,489 (60.34)

Note: Figures within parentheses indicate percentages

STATEMENT 10.4

#### Primary Schools according to Number of Books in Libraries under Various Managements

Management	Schools Having Libraries	Schools Having Number of Books					Schools Having Dictionaries
		Upto 50	51-100	101-200	201-500	More than 500	
1	2	3	4	5	6	7	8
Government	1,13,912 (44.74)	26,824 (23.55)	12,518 (10.99)	27,353 (24.01)	41,631 (36.55)	5,586 (4.90)	51,483 (45.20)
Local Body	99,873 (36.88)	9,243 (9.25)	7,399 (7.41)	26,599 (26.63)	52,156 (52.22)	4,476 (4.48)	75,831 (75.93)
Private Aided	10,625 (49.29)	4,544 (14.53)	725 (6.82)	3,796 (35.73)	3,642 (34.28)	918 (8.64)	7,617 (71.69)
Private Unaided	6,752 (28.75)	1,277 (18.91)	983 (14.56)	1,615 (23.92)	1,863 (27.59)	1,014 (15.02)	4,558 (67.51)
Total	2,31,162 (40.51)	38,888 (16.82)	21,625 (9.35)	59,363 (25.68)	99,292 (42.95)	11,994 (5.19)	1,39,489 (60.34)

Note: Figures within parentheses indicate percentages.

Considering the managementwise position, it is observed that the schools under private aided management have an edge over schools managed by other agencies. While the percentage of schools having a library is the highest among private aided ones (49.29%), the schools under private unaided agencies have the lowest percentage, i.e., 28.75. This indicates that more than 50% schools under any management are still without library facilities.

In 60,513 (26.17%) schools, the total number of books available in the school library is below 100, and in 99,292 (42.95%) schools, the number of books is between 201 and 500. Only 11,994 (5.19%) schools have more than 500 books in the library. However, the proportion of schools having more than 500 books in the library is much higher in urban schools (16.55%) than in rural schools (3.89%).

The managementwise distribution reveals that private unaided schools have over 500 books in the library in 15.02% schools, while the government and local body schools are the worst placed with the respective percentages as 4.90 and 4.48.

As regards dictionaries, 60.33% rural primary schools and 60.46% urban primary schools have them. When we consider this aspect managementwise, it is observed that the local body, private aided and private unaided primary schools have dictionaries in more than 65% schools whereas only 45% government primary schools have dictionaries.

Among the States/UTs, Goa (97.47%), Haryana (89.05%), Tamil Nadu (89.71%), A & N Islands

(85.11%) Daman & Diu (93.33%) Delhi (85.37%) and Pondicherry (95.22%) have the library facility in more than 80% of the schools whereas Meghalaya (5.49%), Mizoram (7.64%) and Nagaland (2.37%) have a library in less than 10% schools. The Union Territory of Lakshadweep has reported having a library in 100% of its schools.

### 10.2.2 Upper Primary Schools

Out of 1,62,805 upper primary schools, 97,740 (60.40%) have libraries. The percentage of upper primary schools having a library (60.04%) is much higher than that of primary schools (40.52%). The percentage of schools having libraries in rural areas is 58.20 as against 67.01 in urban areas.

Managementwise analysis shows that the proportion of schools with libraries is the highest in private aided schools (72.64%), followed by private unaided schools (72.20%), government schools (63.29%) and local body schools (47.99%).

As regards number of books, in 69,499 (71.11%) upper primary schools the total number of books is below 500; in 15,395 (15.75%) schools the number is between 501 to 1000; and only in 12,846 (13.14%) schools it is more than 1000. In rural areas, 55,532 (73.79%) schools have libraries with fewer than 500 books; in 11,589 (15.40%) schools the number of books is between 501 to 1000, and only in 8,131 (10.81%) schools more than 1000 books are available, the respective percentages for urban schools are 62.11, 16.22 and 20.97.

In school libraries having more than 500 books, the highest percentage is that of the government

Total	97,740 (60.04)	17,585 (17.99)	17,511 (17.92)	34,403 (35.20)	15,395 (15.75)	12,846 (13.14)	62,385 (63.83)

Note: Figures within parentheses indicate percentages.

schools (33.14%), followed by private aided schools (30.92%), private unaided schools (28.22%) and local body schools (20.68%). As regards dictionaries, only 62,385 (63.83%) school libraries have them, and of these libraries 46,280 (74.19%) are located in rural areas. In terms of proportion of schools having dictionaries, 61.50% rural schools have dictionaries whereas this percentage for urban schools is 71.62. The highest percentage of schools having dictionaries belongs to private aided schools (80.60) and the lowest to government schools (58.42).

Among the States/UTs, Goa (97.46%), Haryana

(85.33%), Karnataka (85.02%), Kerala (81.36%), Orissa (90.41%) Rajasthan (89.09%), Sikkim (81.36%), A&N Islands (95.45%), Dadra & Nagar Haveli (95.24%), Daman & Diu (92%), Delhi (91.11%), Lakshadweep (90.91%) and Pondicherry (100%) have this facility in more than 80% schools. In the States of Madhya Pradesh (36.74%), Meghalaya (37.93%), Mizoram (20.39%), Nagaland (22.08%) and Tripura (20.25%) schools do not have libraries even in 40% schools.

## 10.2.3 Secondary Schools

Every secondary school is expected to have a library

## STATEMENT 10.7

## Secondary Schools according to Number of Books in Libraries in Rural and Urban Areas

Area	Schools Having Libraries	Percentage of Schools	Schools Having Number of Books					Schools Having Dictionaries
			Upto 500	501-1000	1001-2000	2001-5000	More than 5000	
1	2	3	4	5	6	7	8	9
Rural	37833	79.03	15,819 (41.81)	7,962 (21.05)	7,278 (19.24)	5,576 (14.74)	1,198 (3.17)	32,167 (85.02)
Urban	15047	85.04	5,201 (34.57)	2,459 (16.34)	3,083 (20.49)	2,803 (18.63)	1,501 (9.68)	13,203 (87.75)
Total	52880	80.65	21,020 (39.75)	10,421 (19.71)	10,361 (19.59)	8,379 (15.85)	2,699 (5.10)	45,370 (85.80)

Note: Figures within parentheses indicate percentages.

but the present Survey reveals that only 52,880 (80.65%) schools have a library as against 47,370 (90.12%) schools in the Fifth Survey. It is surprising to see that the percentage of secondary schools having a library has decreased from the Fifth Survey to the Sixth Survey. May be this is due to the fact

that libraries have not increased in the same proportion as the schools have increased. Of these schools, 37,833 (71.55%) are in rural areas and 15,047 (28.45%) in urban areas.

Analysing the figures managementwise, it is found that secondary schools follow the same pattern

## STATEMENT 10.8

## Secondary Schools according to Number of Books in Libraries under Various Managements

		Upto 500	500-1000	1001-2000	2001-5000	More than 5000	
1	2	3	4	5	6	7	8
Government	19,115 (77.83)	6,160 (32.23)	3,875 (20.27)	4,397 (23.00)	3,830 (20.04)	853 (4.46)	16,239 (84.95)
Local Body	5,301 (71.63)	2,517 (47.48)	1,101 (20.77)	885 (16.69)	586 (11.05)	212 (4.00)	4,956 (93.49)
Private Aided	19,701 (85.43)	7,197 (36.53)	4,096 (20.79)	3,942 (20.01)	3,176 (16.12)	1,290 (6.55)	17,447 (88.56)
Private Unaided	8,763 (83.11)	5,146 (58.72)	1,349 (15.39)	1,137 (12.98)	787 (8.98)	344 (3.93)	6,728 (76.78)
Total	52,880 (80.65)	21,020 (39.75)	10,421 (19.71)	10,361 (19.59)	8,379 (15.85)	2,699 (5.10)	45,370 (85.80)

Note: Figures within parentheses indicate percentages.

as upper primary schools in respect of being equipped with a library. Here also, private aided schools (85.43%) have the highest percentage of schools with library facilities, followed by private unaided schools (83.11%), government schools (77.83%) and schools under local bodies (71.63%).

Dictionaries are available in 85.80% schools having libraries, whereas this percentage for rural and urban schools is 85.02 and 87.75, respectively. Considering the managementwise distribution, it is found that the local body schools have the highest percentage of libraries having dictionaries, while the

lowest percentage (76.78) is that of the private unaided schools.

In the majority of these schools (79.05%), the total number of books available in the school library is below 2,000, while in 8,379 (15.85%) schools the number of books is between 2,001 and 5,000. There are only 2,699 (5.10%) schools having more than 5,000 books. The position of urban secondary schools is far better as regards the number of books is concerned. In rural school libraries, only 3.17% schools have more than 5,000 books whereas for urban school libraries the corresponding percentage is 9.98.

## STATEMENT 10.9

## Secondary Schools Having Librarians

Area	No. of Schools Having Libraries	Schools Having Full-time Librarians			Schools Having Part-time Librarians		
		Total	Trained	Untrained	Total	Trained	Untrained
1	2	3	4	5	6	7	8
Rural	37,833 (79.03)	3,997 (10.56)	2,641 (66.07)	1,356 (33.93)	2,599 (6.87)	283 (10.89)	2,316 (89.11)
Urban	15,047 (85.04)	2,907 (19.32)	1,953 (67.18)	954 (32.82)	1,843 (12.25)	544 (29.52)	1,299 (70.48)
Total	52,880 (80.65)	6,904 (13.05)	4,594 (66.54)	2,310 (33.46)	4,442 (8.40)	827 (18.62)	3,615 (81.38)

Note: Figures within parentheses indicate percentages.

As regards personnel in charge of libraries, it is found that 13.05% schools with a library have full-time librarians and 8.40% have part-time librarians. Of the full-time librarians, 4,594 (66.54%) are trained and 2,310 (33.46%) are untrained. Only 10.56% rural secondary schools have full-time librarians whereas the corresponding percentage for urban schools is 19.32. Out of 52,880 schools with libraries, 4,442 (8.40%) schools have part-time librarians. Of the part-time librarians, only 827 (18.62%) are trained. In

urban areas there are part-time librarians in 12.25% schools as against 6.87% in rural schools.

#### 10.2.4 Higher Secondary Schools

Slightly more than 90% of the higher secondary schools have library facilities. Here schools in urban areas have a slight edge over rural schools. The percentage of schools in urban areas having libraries is 91.03 as against 89.36 in rural areas.

STATEMENT 10.10

Local Body	773 (67.60)	152 (19.66)	80 (10.35)	163 (21.09)	217 (28.07)	161 (20.83)	675 (87.32)
Private Aided	9,865 (92.66)	1,422 (14.41)	950 (9.63)	1,690 (17.13)	3,354 (34.00)	2,449 (24.83)	9,117 (92.42)
Private Unaided	2,691 (89.97)	904 (33.59)	392 (14.57)	436 (16.20)	542 (20.14)	417 (15.50)	2,018 (74.99)
Total	21,346 (80.65)	3,705 (17.36)	2,255 (10.56)	3,619 (16.95)	6,557 (30.72)	5,210 (24.41)	17,937 (84.03)

Note: Figures within parentheses indicate percentages.

While comparing figures managementwise, it is found that private aided schools (92.66%) have the highest percentage of schools with library facilities, followed by private unaided schools (89.97%), government schools (87.75%) and local body schools (86.95%) .

At this stage, only 44.87% of schools with libraries have less than 2000 books in them as against 79.05% of secondary schools, having more than 5000 books is only in 5.10% secondary schools

whereas the corresponding percentage for higher secondary schools is 24.41. This clearly indicates availability of better library facilities in higher secondary schools.

17,937(84.31%) higher secondary schools have dictionaries in their libraries. The position of rural and urban schools is similar, the percentage being 83.37 and 84.65, respectively. The percentage varies from 92.42 in case of private aided schools to 74.99 in case of private unaided schools.

#### STATEMENT 10.12

##### Higher Secondary Schools Having Librarians

Area	No. of Schools Having Libraries	Schools Having Full-time Librarians			Schools Having Part-time Librarians		
		Total	Trained	Untrained	Total	Trained	Untrained
1	2	3	4	5	6	7	8
Rural	10,366 (89.36)	3,728 (35.96)	2,683 (71.97)	1,045 (28.03)	1,147 (11.06)	362 (31.56)	785 (68.44)
Urban	10,980 (91.03)	6,156 (56.06)	5,095 (82.76)	1,061 (17.23)	1,034 (9.42)	384 (37.14)	650 (62.86)
Total	21,346 (90.21)	9,884 (46.30)	7,778 (78.69)	2,106 (21.31)	2,181 (10.22)	746 (34.20)	1,435 (65.80)

Note: Figures within parentheses indicate percentages.

In most of the States/UTs library facilities are available in more than 85% higher secondary schools.

There are full-time librarians in 9,884 (46.30%) of the 21,346 higher secondary schools having library facilities, whereas 2,181 (10.22%) schools have part-time librarians. Of the 9,884 schools having full-time librarians, 7,778 (78.69%) have trained librarians. In rural areas, only 35.96% schools have full-time librarians, and of these, 2,683 (71.97%) are trained. The corresponding percentages for urban schools are 56.06 and 82.76, respectively.

11.06% rural schools with library have part-time librarians while in urban areas this percentage is 9.42.

#### 10.3 Schools Subscribing to Newspapers and Magazines

A small proportion of primary schools (4.57%) subscribe to newspapers and only 41,296 (7.24%) schools subscribe to magazines. In comparison to the Fifth Survey the percentage of schools subscribing to newspapers has gone up from 2.25 to 4.57, and for magazines it has gone up from 7.11 to 7.24.

#### STATEMENT 10.13

##### Primary Schools Subscribing to Newspapers and Magazines in Rural and Urban Areas

Area	Schools Subscribing to			
	Newspapers	Percentage	Magazines	Percentage
1	2	3	4	5
Rural	15,605	3.07	33,062	6.51
Urban	10,447	16.69	8,234	13.10
Total	26,052	4.57	41,296	7.24

Only 3.07% rural primary schools subscribe to newspapers and 6.51% to magazines; the position of urban schools in this regard is better as 16.62% schools subscribe to newspapers and 13.10% schools to magazines.

## STATEMENT 10.14

## Primary Schools Subscribing to Newspapers and Magazines according to Management

Management	Schools Subscribing to			
	Newspapers	Percentage	Magazines	Percentage
1	2	3	4	5
Government	7,225	2.84	9,736	3.82
Local Body	8,017	2.96	23,673	8.74
Private Aided	3,872	17.96	2,821	13.09
Private Unaided	6,938	29.54	5,066	21.57
Total	26,052	4.57	41,296	7.24

Analysing this aspect managementwise, it is observed that the primary schools under private unaided management have the highest proportion (29.54% and 21.57%) of schools which subscribe to newspapers and magazines, respectively, and the lowest proportion of schools (2.84% and 3.82%) are government primary schools which subscribe to newspapers and magazines, respectively.

## STATEMENT 10.15

## Upper Primary Schools Subscribing to Newspapers and Magazines in Rural and Urban Areas

Area	Schools Subscribing to			
	Newspapers	Percentage	Magazines	Percentage
1	2	3	4	5
Rural	31,426	24.31	24,946	19.30
Urban	17,017	50.71	12,696	37.83
Total	48,443	29.76	37,642	23.12

The position of upper primary schools is far better than that of the primary schools — 29.76% upper primary schools subscribe to newspapers and 23.12% to magazines. Here also, 50.71% urban schools subscribe to newspapers and 37.83% to magazines which is a much better position than what exists in the rural schools where the respective percentages are just 24.31 and 19.30.

## STATEMENT 10.16

## Upper Primary Schools Subscribing to Newspapers and Magazines according to Management

Management	Schools Subscribing to			
	Newspapers	Percentage	Magazines	Percentage
1	2	3	4	5
Government	19,278	25.77	11,946	15.97
Local Body	9,460	17.34	11,908	21.83
Private Aided	7,490	48.26	5,201	33.51
Private Unaided	12,215	68.11	8,587	47.88
Total	48,443	29.76	37,642	23.12

The managementwise position is the same as that of primary schools. Here also, private unaided schools are at the top with 68.11% schools subscribing to newspapers and 47.88% to magazines. The lowest proportion (17.34%) is of the local body upper primary schools and 15.97% of the government schools, which subscribe to newspapers and

magazines respectively.

As regards secondary schools, newspapers and magazines are subscribed to by 75.40% and 52.36% schools, respectively. In contrast to the findings in respect of primary and upper primary schools, secondary schools are far better placed so far as this aspect is concerned.

#### STATEMENT 10.17

##### Secondary Schools Subscribing to Newspapers and Magazines in Rural and Urban Areas

Area	Schools Subscribing to			
	Newspapers	Percentage	Magazines	Percentage
1	2	3	4	5
Rural	34,658	72.40	22,887	47.81
Urban	14,776	83.51	11,443	64.67
Total	49,434	75.40	34,330	52.36

There is less variation between the proportion of schools subscribing to newspapers and magazines in rural and urban areas. In urban areas, 83.51%

schools subscribe to newspapers and 64.67% to magazines whereas the corresponding percentages for rural areas are 72.40 and 47.81, respectively.

#### STATEMENT 10.18

##### Secondary Schools Subscribing to Newspapers and Magazines according to Management

Management	Schools Subscribing to			
	Newspapers	Percentage	Magazines	Percentage
1	2	3	4	5
Government	18,048	73.49	10,753	43.78
Local Body	4,348	58.75	2,201	29.74
Private Aided	18,624	80.76	14,867	64.47
Private Unaided	8,414	79.80	6,509	61.73
Total	49,434	75.40	34,330	52.36

Managementwise analysis shows that private aided schools are at the top with 80.76% schools subscribing to newspapers and 64.47% to magazines. Private unaided schools are second in order, with

79.80% subscribing to newspapers and 61.73% to magazines, followed by government schools (73.49% and 43.78%) and schools under local bodies (58.75% and 29.74%).

#### STATEMENT 10.19

## Higher Secondary Schools Subscribing to Newspapers and Magazines according to Management

Management	Schools Subscribing to			
	Newspapers	Percentage	Magazines	Percentage
1	2	3	4	5
Government	8,140	89.10	5,732	62.74
Local Body	822	92.46	632	71.09
Private Aided	10,300	96.75	8,933	83.91
Private Unaided	2,806	93.81	2,462	82.31
Total	22,068	93.26	17,759	75.05

The higher secondary schools subscribing to newspapers and magazines are 93.26% and 75.05%, respectively. The managementwise position is the same as it is in the case of secondary schools. It seems that as the level of education increases, this

facility also increases in the schools.

## 10.4 Textbook Bank

The textbook bank scheme appears to be popular in higher secondary schools, where 65.61% schools

## STATEMENT 10.21

## Schools Having Textbook Banks according to Area

Area	Percentage of Schools Having Textbook Banks			
	Primary	Upper Primary	Secondary	Higher Secondary
1	2	3	4	5
Rural	1,33,275 (26.26)	46,328 (35.84)	24,025 (50.19)	7,407 (63.85)
Urban	16,443 (26.15)	12,672 (37.75)	9,699 (54.82)	8,117 (67.29)
Total	1,49,718 (26.25)	59,000 (36.24)	33,724 (51.44)	15,524 (65.61)

Note : Figures within parentheses indicate percentages.

have textbook banks. The corresponding percentage for secondary, upper primary and primary schools is 51.44, 36.24 and 26.25, respectively. In the Fifth Survey, the percentage of schools having textbook banks in higher secondary, secondary, upper primary and primary schools was 59.00, 50.66, 37.70 and 18.56, respectively. This indicates that there is a

substantial increase in the percentage of primary schools having a textbook bank.

Textbook banks are available in larger proportion in urban areas than in rural areas in all categories of schools except primary schools where the proportion of schools having textbook bank is almost equal in rural and urban areas.

## STATEMENT 10.22

## Schools Having Textbook Banks according to Management

Management	Schools Having Textbook Banks			
	Primary	Upper Primary	Secondary	Higher Secondary
1	2	3	4	5
Government	75,255 (29.56)	23,291 (31.14)	11,529 (46.94)	5,959 (65.23)
Local Body	62,822 (23.20)	23,009 (42.18)	3,485 (47.09)	577 (64.90)
Private Aided	5,349 (24.81)	5,759 (37.11)	13,095 (56.79)	7,285 (68.43)
Private Unaided	6,292 (26.79)	6,941 (37.11)	5,615 (53.25)	1,703 (56.94)
Total	14,9718 (26.25)	59,000 (36.24)	33,724 (51.44)	15,524 (65.61)

Note: Figures within parentheses indicate percentages.

Managementwise analysis indicates that there is no clear-cut trend. Primary schools managed by the government have the highest proportion (29.56) of schools where textbook banks exist. As regards upper primary schools having textbook banks, local body schools top the list with 42.18%. In the case of secondary and higher secondary schools having textbook banks, private aided schools have the highest percentages of 56.76 and 68.43, respectively.

### 10.5 Blackboards and Supply of Chalk and Dusters

It is needless to emphasise the utility of blackboards in classroom teaching. In a poor country like India which cannot afford to provide every school with sophisticated audio-visual aids, blackboards are the only visual aid available. Survey figures reveal that a large number of schools do not even have adequate number of blackboards.

STATEMENT 10.23

#### Availability of Blackboards in Schools according to Area

Category of School	Area	Total No. of Sections	Number of Sections Having	
			Usable Blackboards	Shortage of Blackboards
1	2	3	4	5
Primary	Rural	23,39,412	14,58,658 (62.35)	8,80,754 (37.65)
	Urban	3,61,896	3,07,785 (85.05)	5,411 (14.95)
	Total	27,01,308	17,66,443 (65.39)	9,34,865 (34.61)
Upper Primary	Rural	8,50,094	6,74,892 (79.39)	1,75,202 (20.61)
	Urban	2,91,859	2,72,819 (93.48)	19,040 (6.52)
	Total	11,41,953	9,47,711 (82.99)	1,94,242 (17.01)
Secondary	Rural	3,57,713	3,32,261 (92.88)	25,452 (7.12)
	Urban	1,90,482	1,85,451 (97.36)	5,031 (2.64)
	Total	5,48,195	5,17,712 (94.44)	3,048 (5.56)
Higher Secondary	Rural	1,64,391	1,58,487 (96.41)	5,904 (3.59)
	Urban	2,41,652	2,38,577 (98.73)	3,075 (1.27)
	Total	4,06,043	3,97,064 (97.79)	8,979 (2.21)
All Schools	Rural	37,11,610	26,24,298 (70.71)	10,87,312 (29.29)
	Urban	10,85,889	10,04,632 (92.52)	81,257 (7.48)
	Total	47,97,499	36,8,930 (75.64)	11,68,569 (24.36)

Note: Figures within parentheses indicate percentages.

## STATEMENT 10.24

## Availability of Blackboards in Schools according to Management

	Local Body	3,37,064	87.28	49,104	12.72
	Private Aided	1,27,309	91.59	11,693	8.41
	Private Unaided	1,14,002	98.24	2,041	1.76
	Total	9,47,711	82.99	1,94,242	17.01
Secondary	Government	1,93,456	90.86	19,471	9.14
	Local Body	49,673	95.48	2,352	4.52
	Private Aided	2,00,758	96.73	6,781	3.27
	Private Unaided	73,825	97.52	1,879	2.48
	Total	5,17,712	94.44	30,483	5.56
Higher Secondary	Government	1,44,127	95.96	6,073	4.04
	Local Body	14,982	97.36	407	2.64
	Private Aided	1,91,847	99.03	1,870	0.97
	Private Unaided	46,108	98.65	629	1.35
	Total	3,97,064	97.79	8,979	2.43

Of the 47,97,499 sections, only 36,28,930 (75.64%) have reported having usable blackboards in them. The corresponding figures for rural and urban areas are 70.71% and 92.52%, respectively. This clearly indicates that the schools in rural areas are inadequately equipped in respect of blackboards as compared to the schools in urban areas. Analysing the data managementwise, it is observed that the schools

managed by private agencies are better equipped than government and local body schools in this regard.

## 10.5.1 Primary Sections

Of the 27,01,308 primary sections, only 17,66,443 (65.39%) have reported having usable blackboards. The corresponding percentages for rural and urban areas are 62.35 and 85.05, respectively. This clearly

## STATEMENT 10.25

## Availability of Chalk and Dusters in Schools according to Rural and Urban areas

Category of School	Area	Schools Having Adequate Supply of			
		Chalk	Percentage	Dusters	Percentage
1	2	3	4	5	6
Primary	Rural	2,96,846	58.48	2,37,827	46.85
	Urban	48,156	76.59	44,032	70.03
	Total	3,45,002	60.48	2,81,859	49.41
Upper Primary	Rural	93,125	72.05	78,697	60.83
	Urban	29,012	86.45	27,222	81.12
	Total	1,22,137	75.02	1,05,919	65.06

indicates the superiority of urban sections over rural ones in respect of blackboards.

Analysing the data managementwise, it is observed that the percentage of sections with adequate blackboards is the highest (95.65%) among the private unaided schools and the lowest (54.27%) among the government schools.

The position of supply of chalk in primary schools is unsatisfactory as only 60.48% of them have a continuous supply of chalk. An adequate supply of dusters is available with only 49.41% schools. Managementwise, it is found that the proportion of schools having a continuous supply of

chalk varies from 44.99% in government schools to 90.54% in private unaided schools; for dusters this percentage varies from 34.21% in government schools to 89.19% in private unaided schools.

### 10.5.2 Upper Primary Sections

The proportion of sections in upper primary schools with adequate number of blackboards is 82.99%, which is much higher than that of primary sections. The proportion of sections with adequate blackboards is the highest (98.24%) among the private unaided schools and the lowest (73.76%) in the case of government schools.

## STATEMENT 10.26

**Chalk and Dusters in Schools according to Management**

Category of School	Management	Schools Having Adequate Supply of			
		Chalk	Percentage	Dusters	Percentage
1	2	3	4	5	6
Primary	Government	1,14,548	44.99	87,091	34.21
	Local Body	1,91,936	70.88	1,57,385	58.12
	Private Aided	17,254	80.04	16,436	76.24
	Private Unaided	21,264	90.54	20,947	89.19
	Total	3,45,002	60.54	2,81,859	49.41
Upper Primary	Government	46,173	61.73	40,312	53.90
	Local Body	45,574	83.54	35,308	64.72
	Private Aided	13,611	87.70	13,634	87.85
	Private Unaided	16,779	93.56	16,665	92.93
	Total	1,22,137	75.02	1,05,919	65.06

Approximately three-fourths of the upper primary schools have a continuous supply of chalk, and 65.06% schools have an adequate supply of dusters. It is observed that the upper primary schools in rural areas have a higher proportion of schools without this facility.

There is a large variation in the percentage of schools with a continuous supply of chalk under different managements, the highest being 93.56 in the case of private unaided schools and the lowest (61.73) for government schools. The respective percentage for availability of dusters is also the highest (92.93) in private unaided schools and the lowest (53.90) for government schools.

### 10.5.3 Secondary and Higher Secondary Sections

Secondary and higher secondary sections in rural and urban areas do not differ much in respect of

having adequate number of blackboards. On the whole, more than 90% schools have this facility adequately. Analysing managementwise, it is found that the percentage of sections in secondary schools with usable blackboards is the highest among the private unaided schools (97.52%), followed by private aided (96.73%), local body (95.48%) and government (90.86%) schools. For higher secondary sections this percentage is the highest (99.03%) among private aided schools, followed by private unaided schools (98.65%), local body schools (97.36%) and the lowest (95.96%) for government schools.

### 10.6 Availability of Almirahs and Trunks

Every school has some records to store and for that they need some place. The present survey tried to find out whether or not the schools have almirahs or trunks for storing records.

**STATEMENT 10.27**  
**Almirahs and Trunks for Storing Records in**  
**Schools according to Area**

Category of School	Area	Schools Having			
		Both Almirahs and Boxes	Almirahs Only	Boxes/Trunks Only	Neither Almirahs nor Boxes
1	2	3	4	5	6
Primary	Rural	1,21,312 (23.90)	53,895 (10.62)	1,81,950 (35.85)	1,50,424 (29.64)
	Urban	26,912 (42.80)	15,907 (25.30)	11,042 (17.56)	9013 (14.34)
	Total	1,48,224 (25.98)	69,802 (12.24)	1,92,992 (33.83)	1,59,437 (27.95)
Upper Primary	Rural	63,471 (49.11)	29,366 (22.72)	20,186 (15.62)	16,223 (4.55)
	Urban	20,147 (60.00)	9,170 (27.33)	2,326 (6.93)	1,916 (5.71)
	Total	83,618 (51.36)	38,536 (23.67)	22,512 (13.83)	18139 (11.14)
Secondary	Rural	24,011 (50.16)	19,479 (40.69)	1,330 (2.79)	3,050 (6.37)
	Urban	9,963 (56.31)	7,002 (34.57)	234 (1.32)	495 (2.80)
	Total	33,974 (51.82)	26,481 (40.39)	1,564 (2.39)	3,545 (5.41)
Higher Secondary	Rural	7,588 (65.41)	3,488 (30.07)	140 (1.21)	384 (3.31)
	Urban	8,381 (69.48)	3,318 (27.51)	89 (0.74)	274 (2.27)
	Total	15,969 (67.49)	6,806 (28.76)	229 (0.97)	658 (2.78)

Note: Figures within parentheses indicate percentages.

### 10.6.1 Primary Schools

Out of 5,70,455 primary schools, only 1,48,224 (25.98%) have reported having both almirahs and boxes. Around 12.24% of them have only almirahs to keep the records and 33.83% have only trunks/boxes. The corresponding percentages for rural areas are 23.90, 10.62 and 35.85, respectively, whereas for urban schools these percentages are 42.80, 25.30 and 17.56, respectively. This clearly indicates that trunks/boxes are more common in rural schools whereas almirahs are common in urban schools.

When the position is analysed managementwise, it is observed that the percentage of schools having both almirahs and trunks is the highest (45.97%) among private unaided schools and the lowest (20.81%) among the government schools. The

proportion of schools having almirahs only is the highest (30.39%) among private unaided schools and the lowest (8.35%) in the case of government schools. Trunks/boxes are available in more than 37% government schools. This is evident from the fact that the proportion of private aided and unaided schools having trunks/boxes is less than half of the proportion in the government and local body schools.

### 10.6.2 Upper Primary Schools

In comparison with primary schools, upper primary schools are in a better position in respect of having both almirahs and trunks. More than 50% of the schools have both almirahs and trunks for storing records whereas the percentage is just 25.98 for primary schools. Twenty-four per cent schools have

## STATEMENT 10.28

## Almirahs and Trunks for Storing Records in Schools according to Management

	Total	83,618 (51.36)	38536 (23.67)	22,512 (13.83)	18,139 (11.14)
Secondary	Government	13,554 (55.19)	8,989 (35.79)	480 (1.95)	1,736 (7.07)
	Local Body	3,752 (50.70)	2,519 (34.09)	357 (4.82)	773 (10.44)
	Private Aided	10,980 (47.61)	10,925 (47.38)	474 (2.06)	681 (2.95)
	Private Unaided	5,688 (53.95)	4,248 (40.29)	253 (2.40)	355 (3.37)
	Total	33,974 (51.82)	2,6481 (40.39)	1,564 (2.39)	3545 (5.41)
Higher Secondary	Government	6,367 (69.69)	2,290 (25.07)	91 (1.00)	388 (4.25)
	Local Body	558 (62.77)	303 (34.08)	11 (1.24)	17 (1.91)
	Private Aided	6,953 (65.31)	3,396 (31.90)	90 (0.85)	207 (1.91)
	Private Unaided	2,091 (69.91)	817 (27.32)	37 (1.24)	46 (1.54)
	Total	15,969 (67.49)	6,806 (28.76)	229 (0.97)	658 (2.78)

Note: Figures within parentheses indicate percentages.

only almirahs and 14% have only boxes. The gap between the proportion in rural and urban schools is not as wide as in the case of primary schools.

Managementwise analysis shows that there is not much variation in schools under different managements, as regards having both almirahs and

trunks. It varies from 46.98% among private aided schools to 58.88% among private unaided schools. As regards schools having only almirahs or only trunks for keeping their records, the highest percentage (39.43) is for private aided schools having almirahs and 21.55 for local body schools having trunks only.

### 10.6.3 Secondary Schools

Out of 65,564 secondary schools, 33,974 (51.82%) have both almirahs and trunks. The corresponding percentages for rural and urban schools are 50.16 and 56.31, respectively. Almirahs are available with 40.39% schools, and trunks with 2.39%. The Survey figures reveal that the percentage of urban schools having both almirahs and trunks is higher than that of rural schools but schools having only almirahs or only trunks are in higher proportion in rural areas. In 5.41% schools, neither almirahs nor trunks are available for keeping records.

There is not much variation in the proportion of schools having only almirahs or only trunks, under different managements. The percentage varies from 34.0 for local body schools to 47.38 for private aided schools for almirahs only, and for trunks it varies from 1.95 for government schools to 4.82 for local body schools. In all, 94.59% of the secondary schools possess either almirahs or trunks or both for keeping their records.

### 10.6.4 Higher Secondary Schools

At the higher secondary stage, 67.49% of schools possess both almirahs and boxes/trunks for storing records. This indicates that as the level of the school rises, such facilities also increase. The corresponding percentage for secondary, upper primary and primary schools is 51.82, 51.36 and 25.98, respectively. However, there is not much variation in rural and

urban schools having the facility.

It is observed that there is not much variation in the proportion of schools having both almirahs and trunks, under various managements. The percentage varies from 62.77 in the case of local body schools to 69.91 in the case of private unaided schools. Similarly, not much difference is found in the case of schools possessing only almirahs or trunks. In all, 97.22% higher secondary schools have reported having almirahs, trunks or both. The corresponding percentages for secondary, upper primary and primary schools are 94.59, 88.86 and 72.05, respectively.

### 10.7 Mats and Furniture for Students

Mats and furniture are one of the essential requirements of a school for its smooth functioning. But it is astonishing that a large number of schools in the country do not have any mats/furniture. Out of 47,97,499 sections at all the school stages, 14,16,186 (29.52%) sections are without any mats and furniture. Another 7,50,297 (15.64%) sections have inadequate mats/furniture. Only 54.84% sections have adequate mats/furniture for the students, though this percentage during the Fifth Survey was just 45. The percentage of rural school sections without mats/furniture is 34.33, which is more than double the percentage of such school sections in urban areas. This clearly shows that rural schools are much worse in this respect.

STATEMENT 10.29

Availability of Mats/Furniture for Students in Schools according to Area

Category of School	Area	Total No. of Sections	Number of Sections Having		
			Adequate Mats/Furniture	Inadequate Mats/Furniture	No Mats/Furniture
1	2	3	4	5	6
Primary	Rural	23,39,412	10,10,319 (43.19)	4,44,886 (19.02)	8,84,207 (37.80)
	Urban	3,61,896	2,52,050 (69.65)	43,860 (12.12)	65,986 (18.23)
	Total	27,01,308	12,62,369 (46.73)	4,88,746 (18.09)	9,50,193 (35.18)

	Total	47,97,499	26,31,016 (54.84)	7,50,297 (15.64)	14,16,186 (29.52)

Note : Figures within parentheses indicate percentages.

### 10.7.1 Primary Schools

Of the 27,01,308 sections in primary schools in the country as many as 9,50,193 (35.18%) are without any mats/furniture. Further, only 43.19% of the primary school sections in rural areas have reported having adequate furniture as against 69.65% sections in urban areas. This clearly indicates the superiority of urban primary schools as far as availability of furniture is concerned.

Considering the managementwise distribution, it is observed that the proportion of sections of private aided and private unaided primary schools having this facility is much higher (70.50% and 86.17%) than the proportion of sections of government and local body primary schools (38.81% and 47.56%).

### 10.7.2 Upper Primary Schools

Out of 11,41,953 sections in upper primary schools, 3,77,885 (33.09%) do not have any furniture for students. The corresponding percentages for rural and urban areas are 38.63 and 16.97, respectively. Overall, 52.23% sections in upper primary schools have reported having adequate furniture. The percentage of these sections in rural and urban areas is 45.00 and 73.30, respectively. This clearly indicates that like primary school sections, the upper primary school sections also in rural areas are more disadvantaged in respect of furniture.

The pattern of managementwise distribution of upper primary school sections on this aspect is more or less similar to that of primary school sections. Here also, schools in the private sector are better placed as compared to schools in the public sector.

### 10.7.3 Secondary Schools

In the secondary schools, 11.21% sections have reported non-availability of any furniture for students whereas 77.43% have adequate furniture. The corresponding percentages for the Fifth Survey were 12.31 and 78.08. The percentage of sections having no furniture for students is 13.32 in rural areas as against 7.25 in urban areas.

Like primary and upper primary school sections, the secondary school sections in the private sector are better equipped with furniture than their counterparts in the public sector.

### 10.7.4 Higher Secondary Schools

Out of 4,06,043 sections in the higher secondary schools, 34737 (85.64%) have adequate mats/furniture for students. Only 6.57% sections have reported non-availability of furniture for students, and 7.79%, inadequate furniture. As compared to

other categories of schools, here the disparity between rural and urban areas is less. In urban areas, 88.42% sections have adequate mats/furniture as against 81.56% in rural areas.

Managementwise analysis reveals that more than 90% sections under private aided and unaided managements have adequate mats/furniture whereas the corresponding percentages for sections in the government schools and the local body schools are 76.99 and 83.35, respectively. This indicates that, as in other categories of schools, the trend is that the private sector schools are better equipped than the public sector schools.

### 10.8 Availability of Furniture for Teachers

Out of the total number of 47,97,499 sections at all the school stages, only 30,43,552 (63.44%) have reported having furniture for teachers. A large proportion of sections (36.56%) do not have furniture

STATEMENT 10.31

#### Furniture for Teachers in Schools according to Area

Category of School	Total No. of Sections			Number of Sections Having Furniture for Teachers		
	Rural	Urban	Total	Rural	Urban	Total
1	2	3	4	5	6	7
Primary	23,39,412	3,61,896	27,01,308	11,58,636 (49.53)	2,72,589 (75.32)	14,31,225 (52.98)
Upper Primary	8,50,094	2,91,859	11,41,953	5,74,939 (67.63)	2,41,512 (82.75)	8,16,451 (71.50)
Secondary	3,57,713	1,90,482	5,48,195	2,88,310 (80.60)	1,59,413 (83.69)	4,47,723 (81.67)
Higher Secondary	1,64,391	2,41,652	4,06,043	1,38,165 (84.05)	2,09,988 (86.90)	3,48,153 (85.74)
All Schools	37,11,610	10,85,889	47,97,499	21,60,050 (58.20)	8,83,502 (81.36)	30,43,552 (63.44)

Note: Figures within parentheses indicate percentages.

for teachers. Only 58.20% sections of rural schools have furniture for teachers as against 81.36% sections in urban areas. This is a clear indicator of the poor condition of our rural schools where the furniture for teachers is not available in more than 41% of the sections.

#### 10.8.1 Primary Schools

Out of 27,01,308 sections in the primary schools, 12,70,083 (47.02%) are without furniture for teachers. Only 52.98% sections have furniture for teachers. The corresponding percentage for rural sections is 49.53, and for urban sections is 75.32.

The position of the sections in primary schools regarding the availability of furniture for teachers is not satisfactory at all.

The proportion of sections having furniture is the highest among the sections in private unaided schools (86.26%), followed by the sections of private aided schools (67.45%), the sections in local body schools (54.35%) and the sections in government schools (46.20%). This shows that the sections of schools in the public sector are poor in comparison with the sections in schools in the private sector with regard to the availability of furniture for teachers.

## STATEMENT 10.32

## Furniture for Teachers in Schools according to Management

Total	27,01,308	14,31,225 (52.98)	11,41,953	8,16,451 (71.50)	5,48,195	4,47,723 (81.67)	4,06,043	3,48,153 (85.74)	47,97,499	30,43,552 (63.44)

Note: Figures within parentheses indicate percentages.

**10.8.2 Upper Primary Schools**

The position of sections in upper primary schools regarding the availability of furniture for teachers is somewhat better than that of sections in primary schools. As many as 8,16,451 (71.50%) sections have furniture for teachers as against 52.98% in the case of primary schools. The upper primary schools in rural areas are in no way better placed than the rural primary schools.

When the data under different managements is analysed it is found that the pattern regarding availability of furniture for teachers is similar to that of primary school sections. Here also, private schools are better placed than the schools in the public sector.

**10.8.3 Secondary Schools**

A majority of sections in the secondary schools (81.67%) have reported having furniture for teachers. The corresponding percentages for rural and urban areas are 80.60 and 83.69, respectively. The percentage of sections having no furniture is around 18%. Again, like primary and upper primary schools, the secondary schools under private sector are better equipped with furniture than their counterparts in the public sector.

**10.8.4 Higher Secondary Schools**

In higher secondary schools, 85.74% sections have furniture for teachers. The corresponding per-

centages for rural and urban areas are 84.05 and 86.90, respectively. The percentage of sections without any furniture for teachers is 14.26. An analysis of this facility under different managements shows that the percentage of sections having furniture for teachers is the highest (90.83%) in private unaided schools and the lowest (80.62%) in local body schools.

**10.9 Contingency Funds**

Quite often schools face difficulties in timely supply of essential things and immediate replacement of material due to the procedures prescribed by their managements, whether government, local body or private. But such situations could be dealt with if some funds are placed at the disposal of the heads of schools with proper guidance for utilisation of these funds to overcome exigencies. With this in view, information was collected from the schools regarding the availability of contingency funds in schools.

It is observed that only 2,61,658 (31.81%) schools have provision for contingency funds. Around 30% schools have the provision of contingency funds in rural areas, whereas this percentage for urban schools is 42.

Probably the provision of funds is influenced by the level and need of the institutions as only 27.23% primary schools have provision for contingency funds while this proportion is larger in the case of upper primary (36.12%), secondary

**STATEMENT 10.33**  
**Schools Having Provision of Contingency Funds**

Area	Schools				
	Primary	Upper Primary	Secondary	Higher Secondary	Total
1	2	3	4	5	6
Rural	1,33,955 (26.39)	44,522 (34.44)	23505 (48.68)	6,734 (58.68)	2,08,716 (29.98)
Urban	21,355 (33.96)	14,286 (42.57)	9607 (54.30)	7,614 (63.79)	52,942 (41.95)
Total	1,55,310 (27.23)	58,808 (36.12)	33,112 (50.50)	14,428 (60.98)	2,61,658 (31.81)

Note: Figures within parentheses indicate percentages.

**STATEMENT 10.34**  
**Managementwise Schools Having Provision of Contingency Funds**

Management	Schools				
	Primary	Upper Primary	Secondary	Higher Secondary	Total
1	2	3	4	5	6
Government	42,015 (16.52)	29,920 (40.00)	13,587 (55.32)	6,596 (72.20)	92,118
Local Body	99,050 (36.58)	14,804 (27.14)	3,590 (48.51)	515 (57.93)	1,17,959
Private Aided	6,457 (32.27)	5,975 (38.50)	11,119 (48.22)	5,495 (51.62)	29,546
Private Unaided	7,788 (33.16)	8,109 (45.22)	4,816 (45.68)	1,822 (60.92)	22,535
Total	1,55,310 (27.23)	58,808 (36.12)	33,112 (50.50)	14,428 (60.98)	261,658 (31.81)

Note: Figures within parentheses indicate percentages.

(50.50%) and higher secondary (60.98%) schools.

It is also observed that the availability of contingency funds increases as we move up from primary schools to higher secondary schools run by government, private aided and unaided managements. But there is no such trend in the case of local body schools.

Statewise analysis reveals that almost all the States except Goa (75.19%), Karnataka (80.92%), Rajasthan (71.65%) and West Bengal (71.31%) have the provision of contingency fund in less than 50% of primary schools. The States of Bihar, Haryana, Himachal Pradesh, Madhya Pradesh, Mizoram, Nagaland, Punjab and Tamil Nadu have provision of contingency in less than 10% of the primary schools. The provision is almost similar in the UTs where all of them except Delhi (89.02%) and Pondicherry (75.82%) have provision of contingency funds in less than 50% of the primary schools.

The present Survey reveals that only five States have provision of contingency funds in more than 50% of the upper primary schools. The States are: Karnataka (82.93%), Rajasthan (69.59%), Sikkim (55.08%), Tripura (80.18%) and West Bengal (54.45%). At the other extreme are the States of Bihar (3.29%), Haryana (12.98%), Himachal Pradesh (21.12%), Kerala (17.20%), Madhya Pradesh (21.76%), Mizoram (16.45%), Nagaland (14.03%) and Tamil Nadu (14.80%), which have the provision of contingency funds in less than 25% of the upper primary schools.

The position is not so dismal in the UTs as all of them except Daman & Diu (7.14%) and Lakshadweep (18.18%) have contingency funds in more than 25% of the upper primary schools.

As revealed by a Statewise analysis of the availability of contingency funds, secondary schools are quite well placed as all the States except Bihar

(21.64%), Mizoram (28.06%) and Nagaland (29.89%) have provision of contingency funds in more than 30% of the schools, while the States of Himachal Pradesh (80.39%), Jammu & Kashmir (72.81%), Karnataka (74.04%) and Tripura (89.02%) have the facility in more than 70% of the schools. The position is much better in the UTs as Lakshadweep has contingency funds available for all its secondary schools. The UTs of Chandigarh, Daman & Diu, Delhi and Pondicherry have this facility in more than 60% of the schools.

A comparison of Statewise figures shows that all the States except Bihar (40.2%), Maharashtra (40.09%), Nagaland (0%) and Uttar Pradesh (46.81%)

have provision of contingency fund in more than 50% of the higher secondary schools, while the States of Himachal Pradesh, Karnataka, Mizoram, Sikkim, Tripura and the UTs of Daman & Diu, Delhi and Pondicherry have this facility in more than 80% higher secondary schools.

#### 10.10 Playgrounds and Sports/Games Material and Students Participation

Since Independence, various committees and commissions on education in general, and physical education in particular, have recommended that physical education should be made compulsory for students at all the stages of education, with the

Note: Figures within parentheses indicate percentages.

growing realisation that health and physical education can make a significant contribution to the all-round growth and development of pupils. In order to achieve this, it has become imperative to give due importance to physical education. Some of the persisting impediments in the implementation of such programmes for all pupils are the lack of

playgrounds and inadequacy of games and sports materials. In the present Survey, like in earlier surveys, information has been collected on the availability of playgrounds and sports materials in schools. Data have also been collected about the students' participation in sports and games.

## STATEMENT 10.36

## Playground Facilities in Schools according to Management

Note: Figures within parentheses indicate percentages.

According to the Sixth Survey, out of a total of 8,22,486 schools in the country, 4,43,628 schools (53.94%) have playground facilities. Out of 4,43,628 schools, which have playground facility, there are 3,66,160 (82.54%) schools which own them; 3,57,260 (80.53%) schools have playgrounds in usable conditions, while only 2,84,692 (64.17%) schools have reported having adequate playgrounds. Regarding the location of the playgrounds, it is found that in 3,55,643 (80.17%) schools playgrounds are located within the school premises.

Generally, there are 15 sports/games played in the schools, according to the Survey figures. Of these, kabaddi is the most popular game amongst school children, followed by khokho, football and athletics. All other games are played in few schools and the position of different games and material available for these games in schools is given in Statements 10.39, 10.42, 10.45 and 10.48.

Availability of games in schools has no meaning unless students participate in them. Generally, sufficient time is not allotted in the school timetable

Note: Figures within parentheses indicate percentages.

for games. Therefore, it is essential that students participate in games after school hours. Information has been collected from schools on this aspect also.

The Survey figures reveal that in 3,06,807 (37.30%) schools children do not participate in games after the school hours whereas the respective percentage for the Fifth Survey was 49.29%, which indicates that now the position has improved as more children have started taking interest in games. In 2,58,653 schools (31.45%), upto 10% children participate in games after the school hours. In 63,535 schools (7.72%), more than 50% children participate in games after the school hours, while in 23.52% schools the participation of children in games after the schools hours varied from 11% to 50%.

### 10.10.1 Primary Schools

The present Survey has revealed that 2,68,128 primary schools (47%) have the playground facility. Out of these, 2,15,050 (80.20%) have their own playgrounds.

In 2,08,026 (77.58%) schools, the playgrounds have been found in usable condition while 1,63,611 (61.02%) schools have reported having adequate playgrounds. About 79% schools have reported having playgrounds within the premises. Statement 10.35 also shows that there is not much difference in the availability of playground facilities in schools in rural and urban areas.

The management-wise distribution shows that playground facilities are best available in private unaided schools (73.05%) and least in government schools (33.15%). The schools having their own playgrounds are the maximum amongst private unaided schools (87.28%), followed by government school (82.18%), local body schools (78.72%), and private aided (75.61%) schools. More playgrounds in usable condition are available in private unaided schools (89.29%) than in schools under other managements. Regarding adequacy of playgrounds, it is found that 77.98% private unaided schools have adequate playgrounds, followed by private aided schools (64.44%), government schools (61.26%) and local body schools (58.70%).

More than 50% schools have the facility of playgrounds in the States of Andhra Pradesh (50.09%), Arunachal Pradesh (55.50%), Gujarat (67.92%), Himachal Pradesh (56.90%), Kerala (52.75%), Maharashtra (60.35%), Nagaland (52.24%), Tamil Nadu (59.09%), Tripura (71.22%), Uttar Pradesh (61.32%) and West Bengal (64.11%). In the rest of the States this facility is available in 50% schools or much below; like in Bihar it is only available in 18.21% schools. As regards UTs, this facility is available in more than 50% schools in Chandigarh (64.29%), Dadra & Nagar Haveli (79.20%), Delhi (72.66%) and Pondicherry (56.72%); in the rest of the UTs it is much below 50%.

STATEMENT 10.39

Note: Figures within parentheses indicate percentages.

Analysing children's participation in games after the school hours, we find that 41.27% children do not participate in games after the school hours. In 30.86% schools, only upto 10% children participate in games after the school hours. In 15.48% schools, children's participation varies between 11% and 30%. In only 7.57% schools, more than 50% children participate in games after school hours.

Managementwise analysis shows that there is not much variation as regards the participation of children in games after the school hours.

### 10.10.2 Upper Primary Schools

There are 1,02,454 (62.93%) upper primary schools in the country, which have playground facilities. Out of these, 87,779 (85.68%) schools have their own playgrounds, while in 86,028 (83.97%) schools the playgrounds are in usable condition. In 85,772 (83.72%) schools, playgrounds are located within the school premises while 68,547 (66.91%) schools have adequate playgrounds.

Statement 10.35 shows that there is not much difference in the degree of availability of playground facilities in schools in rural and urban areas.

The distribution of schools under various managements shows that playground facilities are available in a large measure in private unaided schools (83.81%). Government schools with 53.02% having playground facilities stood at the lowest rung of the ladder.

Statement 10.36 reveals that most of the private unaided schools have their own playgrounds (88.33%). The private aided schools stood at the lowest rung of the ladder with 79.01% schools having playgrounds exclusively for schools. The number of schools having playgrounds in usable condition is the highest amongst private unaided schools (90.94%), followed by private aided schools (84.26%). Regarding adequacy of playgrounds, private unaided schools (80.86%) top the list, followed by the private aided (68.81%), local body (66.60%), and government (61.33%) schools.

The Statewise distribution of playground facilities in schools reveals that Tripura, with 81.33% schools having playground facilities, tops the list, and Mizoram is at the bottom with only 29.61% schools having the facility. Amongst the UTs, Dadra & Nagar Haveli tops with 85.71% schools having the facility of playgrounds. This is followed by Delhi (74.70%), and A&N Islands (70.45%) schools.

### STATEMENT 10.42

#### Upper Primary Schools according to Games Played and Material Available

Games	Number of Schools			
	Playing Games	Percentage	Having Material	Percentage
1	2	3	4	5
Football	59,546	36.58	50,333	30.92

Kabaddi	1,24,238	76.31	94,875	58.28
Archery	6,695	4.11	3,846	2.36

The present Survey reveals that in upper primary schools, as in the case of primary schools, kabaddi, played in 76.31% schools, is the most popular game, followed by khokho in 69.83% schools and football in 36.58% schools.

Analysing children's participation in games after school hours, we find that in 33.95% schools children

do not participate in games after the school hours. In 31.01% of the schools, only upto 10% children participate in games after the school hours. In 27.54% schools, children's participation is between 11% to 50%. In only 7.50% schools, more than 50% children participate in games after the school hours.

Note: Figures within parentheses indicate percentages.

There is not much variation according to management as regards children's participation in games after the school hours is concerned. More than 50% children participate in games after the school hours approximately in 7% schools, irrespective of management.

### 10.10.3 Secondary Schools

Out of 65,564 secondary schools in the country,

52,611 (80.24%) schools have playground facilities. Out of these 44,920 (85.38%) schools have their own playgrounds. In 44,784 (85.12%) the playgrounds are in usable condition, while 36,768 (69.89%) have the adequate playgrounds. There are 41,585 (79.04%) schools where playgrounds are within the school premises.

Statement 10.35 shows that playgrounds are available in more rural secondary schools (82%) than in urban secondary schools (75.49%). But in respect of the location of the playgrounds within the school premises, the schools in urban areas (81.60%) have an edge over those in rural areas (78.17%).

Playground facilities are available in a large number of private unaided schools (86.12%) and least in government schools (73.84%). The percentage of playgrounds in usable condition is higher in private unaided schools (91.75%) than in schools under other managements. Regarding the adequacy of

playgrounds, private unaided schools, with 78.51%, top the list, followed by private aided schools (69.21%), local body schools (67.76%), and government schools (67%).

The Statewise figures of playgrounds in schools reveal that in Tripura 88.72% secondary schools have playground facilities. This is followed by 86.55% schools in Kerala, 85.08% schools in Gujarat and 84.97% schools in Haryana. In the UTs of Chandigarh (88.24%), Dadra and Nagar Haveli (75%), Delhi (74.60%), Lakshadweep (87.50%) and Pondicherry (72.73%), more than 70% schools have playground facilities.

## STATEMENT 10.45

## Secondary Schools according to Games Played and Material Available

Games	Number of Schools			
	Playing Games	Percentage	Having Material	Percentage
1	2	3	4	5
Football	37,405	57.05	36,415	55.54
Hockey	7,869	12.00	7,545	11.51

*Note:* Figures within parentheses indicate percentages.

There are 9.26% government and local body schools where more than 50% children participate in games after the school hours. The percentage for private aided schools is 9.05 and for private unaided schools it is 10.10. This indicates that there is not much variation on account of school management as regards the participation of children in games after the school hours is concerned.

#### 10.10.4 Higher Secondary Schools

There are 20,435 higher secondary schools (86.36%) which have playground facilities. Out of these schools, 18,411 (90.10%) have their own playgrounds while in 18,422 (90.15%) schools playgrounds are in usable condition. 15,786 (77.25%) schools have reported having adequate playground facility. There are 17,339 (84.85%) higher secondary schools where the playgrounds are within the school premises.

Statement 10.35 shows that playground facilities are available in more rural higher secondary schools (88.12%) than in urban schools (84.67%). But in respect of the location of playgrounds within

the school premises, schools in urban areas (85.47%) have a slight edge over those in rural areas (84.23%).

The distribution of schools under various managements show that playground facilities are available in a large number of private aided schools (88.98%), and least in government schools (82.76%). Regarding schools having their own playgrounds, more than 90% of government schools, private aided schools and private unaided schools have them. Local body schools are the only exception with only 85.97% schools having their own playgrounds.

With regard to the Statewise availability of playground facilities in schools, Tripura with 92.11% schools having playground facilities tops the list, followed by Maharashtra with 91.19% and Gujarat with 90.20% schools. As regards UTs, Chandigarh, Dadra & Nagar Haveli, Daman & Diu and Lakshadweep schools have playground facilities in 100% of their schools while in the remaining three UTs this percentage is above 75%.

The Survey reveals that in higher secondary schools volleyball played in 83.82% schools, is the

**10.11 Midday Meals**

To attract children to schools and to retain them there, most of the States have implemented the scheme of midday meals in the schools. The present Survey reveals that out of 822486 schools in the country, 1,18,364 (14.39%) schools have the provision of midday meals for children. There are 91,25,082 beneficiaries of whom 62.32% are studying in rural schools. Among the beneficiaries, 54.30% are boys and 45.70% girls. Further, 18.99% of the beneficiaries belong to the Scheduled Castes and 10.03% to the Scheduled Tribes, which together accounts for 29.02% of the beneficiaries.

There are 79,374 (13.91%) primary schools where the mid-day meals scheme is available whereas the respective percentages for upper primary, secondary and higher secondary schools are 18.76%, 8.73% and 11.47%.

In terms of the proportion of primary, upper primary and higher secondary schools having the midday meals scheme, it is observed that as against 13.95%, 18.79% and 11.74% rural schools having the scheme, there are 13.59%, 18.68% and 11.20% urban schools having the scheme. In the case of secondary schools, more urban schools have this scheme than rural ones.

In primary schools, 35,89,456 students are benefited from this scheme. Among the beneficiaries,

66.57% are studying in rural schools and the remaining 33.43% are in urban schools. Further, 20.61% of the beneficiaries belong to Scheduled Castes and 13.53% to the Scheduled Tribes; the remaining 65.86% are from other categories. Among the beneficiaries 53.63% are boys and 46.37% are girls.

In upper primary schools, 34,92,570 students are getting the advantage of this scheme. Of these, 53.78% are boys and 46.22%, girls. Further, of these beneficiaries 57.60% are studying in rural schools as against 42.40% in the urban schools. Among the beneficiaries, 15.77% belong to Scheduled Castes, 9.90% to Scheduled Tribes, and the remaining 74.33% are from other categories.

During the Fifth Survey, the midday meal scheme was available in 7.20% secondary schools while in this Survey the scheme exists in 8.73% secondary schools.

A total number of 10,74,766 students of secondary schools are benefited by this scheme. Of the beneficiaries, 53.22% are boys and 46.78%, girls. A large proportion of these beneficiaries (69.37%) are studying in rural schools, and only 30.63% are in urban schools. Further, among the beneficiaries, 19.27% belong to Scheduled Castes and 5.90% to Scheduled Tribes, and the remaining 74.83% are from other categories.

	Total	5,727 (8.73)	2,07,076 (19.27)	63,448 (5.90)	8,04,247 (74.83)	5,72,022 (53.22)	5,02,744 (46.78)	10,74,766
Higher Secondary	Rural	1,362 (11.74)	1,43,795 (26.65)	23,074 (4.28)	3,72,741 (69.07)	3,44,029 (63.75)	1,95,581 (36.25)	5,39,610
	Urban	1,351 (11.20)	95,852 (22.36)	7,098 (1.66)	3,25,680 (75.98)	2,34,962 (54.82)	1,93,668 (45.18)	4,28,630
	Total	2,713 (11.47)	2,39,647 (24.75)	30,172 (3.12)	6,98,421 (72.13)	5,78,991 (59.80)	3,89,249 (40.20)	9,68,240

Note: Figures within parentheses indicate percentages.

According to the present Survey, the scheme of midday meals is in operation in 2,713 (11.47%) higher secondary schools. In rural areas this scheme exists in 11.74% of the schools as against 11.20% in urban areas.

In the higher secondary schools, 96,82,40 students are getting the benefit of midday meals. Of these beneficiaries, 55.73% are studying in rural schools and 44.27% in urban schools. Among the beneficiaries 59.80% are boys and 40.20%, girls. Further, 24.75% of the beneficiaries belong to Scheduled Castes, 3.12% to the Scheduled Tribes, and the remaining 72.13% are from other categories.

Statewise analysis shows that in some States/UTs the midday meals scheme is available in more than 80% primary schools, like in Gujarat (88.58%), Kerala (89.85%), Sikkim (90.84%) Tamil Nadu (95.84%), Tripura (87.88%), A&N Islands (89.89%), Dadra & Nagar Haveli (97.60%) and Lakshadweep (100%), whereas in some other States/UTs this

scheme is available only in less than 1% schools, e.g., Andhra Pradesh, Assam, Bihar, Haryana, Himachal Pradesh, Manipur, Orissa, Punjab and Uttar Pradesh. More over in the states of Meghalaya and Nagaland the Scheme does not exist at all. These figures tell about the state of affairs in the States.

In upper primary schools, the situation is similar to that of primary schools, with only six States and UTs having this scheme in more than 80% schools as against 8 in the case of primary schools.

The States having midday meals in more than 80% of their secondary schools are only Sikkim (87.88%) and Tamil Nadu (84.52%). Most of the other States/UTs have this scheme in less than 5% schools.

The condition of higher secondary schools having this scheme is still worse, with only one State having this scheme in more than 80% schools. The trend, however, indicates that as the level of education rises availability of the midday meals facility in schools decreases.

### 10.12 Free Uniform

Often, the children from the economically weaker sections of the society do not go to schools mainly owing to economic reasons. One of the reasons is the lack of suitable clothing for going to school. Though it is not an easy task to provide a school uniform to every pupil, several States have tried to provide free uniforms at least in a limited number of schools.

The present Survey figures reveal that out of 8,22,486 schools in the country, 2,30,745 (28.05%)

schools have some scheme or the other for providing the incentive of free uniform to students. There are 84,98,982 students who are being benefited by this scheme at all stages of school education. Of these beneficiaries, 71.70% are studying in rural schools and 28.30% in urban schools. Among these beneficiaries, 21.42% belong to Scheduled Castes, 12.36% to Scheduled Tribes and the remaining 66.22% belong to other communities. Further, among these beneficiaries, 48.50% are boys and 51.50% girls.

	Urban	2,722 (22.57)	83,545 (21.27)	11,938 (3.04)	2,97,226 (75.69)	2,04,854 (52.16)	1,87,855 (47.84)	3,92,709
	Total	4,785 (20.22)	1,78,895 (21.97)	37,512 (4.61)	5,97,692 (73.42)	4,72,306 (58.02)	3,41,793 (41.98)	8,14,099

Note: Figures within parentheses indicate percentages.

There are 5,70,455 primary schools in the country, of which 1,66,899 (29.26%) schools give free uniforms to students. The proportion of schools having this scheme in rural areas is 30.15% as against 22.03% in urban areas. In primary schools,

38,52,141 students are getting the benefit of the scheme; of them, 42.01% are boys and 57.99% girls. Further, among these beneficiaries, 22.76% belong to Scheduled Castes and 14.69% to the Scheduled Tribes, and the remaining 62.55% are from other

categories. The larger proportion of these beneficiaries are in rural schools (78.31%) as against urban schools (21.69%). Among the beneficiaries in rural primary schools, 59.03% are girls and 40.97% boys, while in urban primary schools, 54.24% are girls and 45.76% boys.

Out of 1,62,805 upper primary schools, 48,066 (29.52%) have the incentive schemes of giving free uniforms to students. In rural areas, 31.18% of the schools have these facilities as against 23.13% in urban schools. There are 30,61,306 beneficiaries in the upper primary schools. Of these, 53.72% are boys and 46.28% girls. Among the beneficiaries, 70.40% are studying in rural schools and 29.60% in urban schools. Further, 19.20% of the beneficiaries belong to Scheduled Castes, 12.03% belong to Scheduled Tribes and the remaining 68.77% are from other categories.

The incentive scheme of giving free uniform to students is available in 10,995 (16.77%) secondary schools in the country. There is a difference of approximately 7% between rural and urban areas as far as the availability of this scheme is concerned. Of the beneficiaries studying in the secondary schools, 22.99% belong to Scheduled Castes, 10.18% to the Scheduled Tribes and the remaining 66.83% are from other categories. As expected, the larger proportion of these beneficiaries are in rural schools (64.82%) as against 35.18% in urban schools. Further, among these beneficiaries 50.04% are boys and 49.96% girls.

Out of 23,662 higher secondary schools in the country, 4,785 (20.22%) have the incentive scheme of giving free uniforms to students, while at the time of the Fifth Survey this scheme was available in 19.50% schools which indicates that there is a marginal increase as regards availability of this scheme is concerned. The proportion of higher secondary schools having this scheme is relatively higher in urban areas (22.57%) as against 17.78% schools in rural areas. In higher secondary schools, 8,14,099 students are getting the benefit of the incentive scheme of free uniform. Of these beneficiaries, 21.97% belong to Scheduled Castes, 4.61% to Scheduled Tribes and remaining 73.42% are from other categories. Among these beneficiaries, 58.02% are boys and 41.98% girls. Further, 51.76% of the beneficiaries are studying in rural schools and 48.28% in urban schools.

Analysing the position Statewise, it is found that in the States of Arunachal Pradesh (86.65%),

Haryana (82.50%), Tamil Nadu (95.06%) and in the UTs of Dadra & Nagar Haveli (97.6%) and Daman & Diu (93.33%) more than 80% of primary schools have the incentive scheme of free uniforms. In some States and UTs, the free uniform scheme is implemented in less than 1% schools. These States/UTs are Manipur, Nagaland, Sikkim, Uttar Pradesh and Lakshadweep.

In the State of Tamil Nadu, 95.20% upper primary schools have the scheme of free uniforms whereas in Nagaland and Lakshadweep this scheme does not exist.

At the secondary stage, the scheme of free uniforms is available in more than 80% schools in the States of Arunachal Pradesh (83.54%) and Tamil Nadu (85.76%). In most of the States this scheme is not available even in 10% of the schools.

Tamil Nadu is the only State where higher secondary schools are having the scheme of free uniforms to the extent of 82.36%. Nagaland and Daman & Diu do not have this scheme in their higher secondary schools.

### 10.13 Free Textbooks

The distribution of free textbooks to students is one of those incentives which are given by the State governments to attract children to school and to retain them there. It is revealed by the present Survey that 4,32,568 (52.60%) schools have the provision of giving free textbooks to students. At the time of the Fifth Survey, 56.64% schools had this scheme, which shows slight decrease in this direction since then. According to this Survey, 1,77,94,631 students are being benefited by this scheme. Of these beneficiaries, 65.50% are studying in rural areas and 34.50% in urban areas. Among the beneficiaries, 44.70% are girls and 55.30% boys. Further, 22.93% of the beneficiaries belong to Scheduled Castes, 10.61% to Scheduled Tribes, and remaining 66.46% beneficiaries belong to the other categories.

Out of 5,70,455 primary schools, 3,11,263 (54.56%) have the provision of free textbooks to students corresponding percentage during the Fifth Survey was 59.62%. In rural areas, 55.78% schools have this incentive scheme as against 44.73% in urban areas. In the primary schools, 81,82,047 students are getting free textbooks. Among these beneficiaries, 70.31% are studying in rural schools and 29.69% in urban schools. During the Fifth Survey, the beneficiaries from rural schools were 81.95% and those from urban schools, 18.05%. This

Note: Figures within parentheses indicate percentages.

indicated a wide gap between rural and urban beneficiaries, which has been reduced now. Further, among the beneficiaries, 53.61% are boys and 46.39% girls.

There are 85,590 (52.57%) upper primary schools where free textbooks are supplied to pupils. At the time of the Fifth Survey, this incentive scheme was in operation in 50.98% upper primary schools, which shows small increase in the number as well as in the percentage of schools where free textbooks are being supplied to students. In rural areas 55.76% of the schools have this incentive scheme as against 40.30% in urban areas. In upper primary schools, 52,17,318 students are being benefited by this scheme; of these beneficiaries, 63.53% are studying in rural schools and 36.47% in urban schools. Among the beneficiaries, 54.92% are boys and 45.08% girls. Further, among the beneficiaries, 18.20% belong to Scheduled Castes, 10.24% to the Scheduled Tribes and the remaining 71.56% are from

the other categories.

There are 65,564 secondary schools, of which 26,329 (40.16%) have the incentive scheme of free textbooks. In rural areas this scheme exists in 41.20% of the schools as against 37.31% urban area schools. In the secondary schools, 24,65,149 students are getting the benefit of this scheme. Of these beneficiaries, 61.78% are studying in rural schools and 38.22% in urban schools. Further, 24.25% beneficiaries belong to Scheduled Castes, 7.23% to Scheduled Tribes and remaining 68.52% are from other categories. Among the beneficiaries, 55.47% are boys and 44.53% girls.

Out of 23,662 higher secondary schools in the country, 9,386 (39.67%) have the incentive scheme of providing free textbooks to students. In rural areas, 41.97% of the schools are providing free textbooks to students as against 37.45% in urban areas. In the higher secondary schools, 19,30,117 students are being benefited by this scheme. Of these

## FACILITIES

beneficiaries, 63.35% are boys and 36.65%, girls. Among these beneficiaries, 55.20% are studying in rural schools and 44.80% in urban schools. Further, among the beneficiaries, 29.43% belong to the Scheduled Castes, 10.22% to the Scheduled Tribes, and the remaining 60.35% are from other categories.

At primary stage, more than 50% States and UTs provide free textbooks to students in 75% of the schools. The UTs of Dadra & Nagar Haveli and Lakshadweep have provision of free textbooks to students in 100% primary schools. Nagaland is the only State where this scheme does not exist at all. This incentive scheme is available in even less than 5% schools in the States of Bihar, Manipur, Mizoram and Uttar Pradesh.

The availability of the incentive scheme of free textbooks in the upper primary schools is the same as that in primary schools. In the States of Bihar, Manipur and Mizoram, less than 5% schools have this scheme. In the State of Sikkim and UT of Lakshadweep, 100% schools provide this incentive scheme to students.

The position of secondary and higher secondary schools with regard to availability of this facility is

similar to that of primary and upper primary schools. In the State of Nagaland, this scheme is not available at all but in some States it is available to the extent of 90% to 100%.

#### 10.14 Attendance Scholarship for Girls

The enrolment of girls in schools is much lower than that of boys, was revealed by the earlier surveys; it has been further confirmed by the present Survey. Some State governments have instituted scholarships for girls as an incentive for them to attend school. These scholarships are meant to bring the girls of school-going age to school and to retain them there. Only 12,31,54 (14.97%) schools out of the total number of 8,22,486 in the country are providing attendance scholarships to girls; the relative percentage during the Fifth Survey was 6.40% only. At all stages of school education, 19,66,968 girls are being benefited by this incentive scheme. Of these beneficiaries, 75.66% are studying in rural schools and 24.34% in urban schools. Further, 32.13% of the beneficiaries belong to Scheduled Castes and 13.42% to Scheduled Tribes, which accounts for 51.55% of the beneficiaries.

Higher Secondary	Rural	1,371 (11.82)	28,957 (35.44)	15,652 (19.16)	37,103 (45.41)	81,712
	Urban	1,089 (9.03)	43,631 (38.05)	12,143 (10.59)	58,881 (51.35)	1,14,655
	Total	2,460 (10.40)	72,588 (36.97)	27,795 (14.15)	95,984 (48.88)	1,96,367

Note: Figures within parentheses indicate percentages.

The present Survey reveals that out of 5,70,455 primary schools in the country only 79,940 (14.01%) are having the incentive scheme of attendance scholarships for girls, whereas at the time of the Fifth Survey, the figure was 24,563 (4.65%). This shows a substantial increase since the Fifth Survey in the number as well as percentage of primary schools providing attendance scholarships to girls. In rural areas, this scheme exists in 14.76% schools as against 7.99% in urban areas. Only 8,77,853 girls are getting the benefit of this scheme. Of these, 81.90% are studying in rural and 18.09% in urban schools. Further, 34.38% girls belong to Scheduled Castes, 22.40% to Scheduled Tribes and the remaining 43.22% are from other categories.

As regards upper primary schools, 33,952 (20.85%) schools have the provision of attendance scholarships for girls while at the time of the Fifth Survey, 15,053 upper primary schools (10.83%) had this incentive scheme. This shows that there has been a substantial increase since the Fifth Survey in the number as well as percentage of upper primary schools providing attendance scholarships to girls. This incentive scheme exists in 23.60% rural-area schools and in 10.28% urban-area schools. In upper primary schools, 6,62,076 girls are getting the benefit of this scheme. Of these, 78.15% are in rural schools and 21.85% in urban schools. Further, 24.14% girls belong to Scheduled Castes, 20.01% to Scheduled Tribes and the remaining 55.85% girls belong to other categories.

There are 65,564 secondary schools, of which 6,802 (10.37%) have the provision of attendance scholarships for girls, while during the Fifth Survey, 5,599 (10.65%) secondary schools had this scheme. Unlike primary and upper primary schools, where the increase is substantial, secondary schools do not show any improvement. In rural areas, 11.68% schools are providing attendance scholarships to girls as against 6.84% in urban areas. There are 2,31,672 girls getting the benefit of this scheme in the secondary schools. Of these, 42.34% belong to Scheduled Castes, 10.87% belong to Scheduled Tribes and the remaining 46.79% belong to other categories. Among the beneficiaries, 73.75% are studying in rural schools and 26.24% in urban schools.

Out of 23,662 higher secondary schools in the country, 2,460 (10.40%) have the provision for attendance scholarships for girls whereas 1896 (12.26%) schools had provision of attendance

scholarship at the time of Fifth Survey. This shows decrease to the extent of 1.86% in this direction since then. The present Survey reveals that 11.82% of the higher secondary schools in rural areas have the scheme of attendance scholarships for girls as against 9.03% in urban areas. In higher secondary schools, 1,96,367 girls are getting the benefit of this scheme. Of these beneficiaries, 41.61% are studying in rural schools and 58.38% in urban schools. Further, 36.97% of the beneficiaries belong to Scheduled Castes, 14.15% to Scheduled Tribes and the remaining 48.88% are from other categories.

More than 80% primary schools have the incentive scheme of attendance scholarship for girls in the State/UT of Haryana (82.46%) and Daman & Diu (86.67%). In a few States, this facility ranges from 40% to 60%. In the majority of States and UTs this scheme is available in even less than 5% schools.

The present Survey reveals that only three States/UTs have incentive scheme of attendance scholarship for girls in more than 60% of the upper primary schools. The States/UTs are: Haryana (72.48%), Maharashtra (60.62%) and Pondicherry (60.68%). On the other hand, there are twenty-three States which have this facility in less than 25% of the upper primary schools.

As regards secondary and higher secondary schools, the position of availability of this incentive scheme in the States is very dismal. Haryana is the only State where this incentive scheme is available in 59.08% secondary schools, and the UT of Lakshadweep has the scheme in 100% of its schools. In the rest of the States/UTs, the scheme is available in much below 40% of the secondary schools.

All the States/UTs, except Lakshadweep (75%), have the incentive scheme of attendance scholarships for girls in fewer than 35% of the higher secondary schools.

#### **10.15 Vaccination/Inoculation and Medical Check-up of Students**

Vaccination/inoculation and medical check-up of students are very important as a means of ensuring their good health. It is expected that every school makes arrangements for vaccination/ inoculation and medical check-up of students. But the Survey figures reveal that vaccination/inoculation exists in 47.28% schools and there is provision of medical check-up in only 43.21% of the schools. At the time of the Fifth Survey, the respective percentages were 36.09 and 30.51. In spite of a substantial increase

in the percentage of students getting the facility of vaccination/inoculation and medical check-up, we are still far behind the target of providing the facility to 100% students.

### 10.15.1 Vaccination/Inoculation

Vaccination/inoculation facilities exist in 3,88,891 (47.28%) schools in the country. In urban areas, 52.04% of the schools have the provision of vaccination/inoculation as against 46.42% in rural areas. The proportion of schools which have these

facilities is the highest in secondary schools (56.88%) and the lowest in primary schools (43.65%).

Out of 5,70,455 primary schools, 2,49,029 (43.65%) schools have the provision of vaccination and inoculation. Of these, 2,19,041 schools are in rural areas and 29,988 in urban areas. Managementwise, the schools managed by the private unaided bodies have these facilities in 53.63% schools, followed by private aided schools (51.53%), local body schools (45.43%) and government schools (40.18%). The schools managed by the

Note: Figures within parentheses indicate percentages.

public sector in both rural and urban areas have been found to be better placed than those under government management as far as these facilities are concerned.

There are 1,62,805 upper primary schools in the country, of which 89,448 (54.94%) have the provision of vaccination and inoculation. In the Fifth Survey, 55,017 (39.58%) upper primary schools had this provision. Schools in urban areas (57.65%) are better placed than those in rural areas (54.24%) so far as this facility is concerned. Considering this aspect managementwise, we find that local body schools have this facility in 61.27% schools, followed by private unaided (57.73%), private aided (56.44%) and government schools (49.35%). The proportion of schools having these facilities has been found to be the highest in schools managed by the local bodies in rural areas and private unaided schools in urban areas.

Out of 65,564 secondary schools, 37,292 (56.88%) arrange to offer vaccination/inoculation facilities to their students. In rural areas, 56.87% secondary schools make these facilities available to their students as against 56.90% in urban areas. Analysing this aspect managementwise, we find that private unaided schools offer these facilities in 66.19% schools, followed by schools managed by local bodies (61.64%), private aided schools (58.60%) and government schools (49.83%).

There are 23,662 higher secondary schools, of which 13,112 (55.41%) offer vaccination/inoculation facilities. It is surprising to see that a large proportion of rural schools (58.96%) offer these facilities as against 52.01% urban schools. The managementwise distribution shows that private unaided schools make these facilities available in 59.95% schools, followed by private aided schools (55.45%), government schools (54.14%) and schools managed by local bodies (52.87%).

### **10.15.2 Medical Check-up**

The arrangement for medical check-up of students exists only in 3,55,420 (43.21%) schools in the country. This shows a sharp increase over the Fifth Survey in which 2,24,491 (30.51%) schools had medical check-up facilities for students, but a lot of efforts are still needed in this direction. A larger proportion (54.83%) of the schools having these facilities exist in urban areas as against 41.11% schools in rural areas. The facilities exist at the lowest level in primary schools (38.91%).

There are 5,70,455 primary schools in the country, of which 2,21,971 (38.91%) have the provision of medical check-up of students, while in the Fifth Survey only 1,39,449 (26.37%) primary schools had such facilities. As expected, a larger proportion of primary schools (47.44%) offering these facilities exists in urban areas as against (37.85%) schools in rural areas. Managementwise comparison reveals that 57.79% private unaided schools have provision of medical check-up, followed by private aided schools (48.07%), local body schools (42.24%) and the lowest government schools (32.85%). In rural as well as in urban areas, the private unaided schools are relatively better placed than the schools under other managements in this respect.

Out of 1,62,805 upper primary schools in the country, 83,942 (51.56%) have arrangement for medical check-up of students. There has been a considerable increase in the number of schools having these facilities since the Fifth Survey in which only 52,413 (37.70%) upper primary schools had these facilities. As usual, a large proportion of schools in urban areas (62.47%) have these facilities as against 48.73% in rural areas. Managementwise, it is observed that private unaided schools have these facilities in 62.47% schools, followed by local body schools (60.32%), private aided schools (52.87%) and government schools (42.28%). In rural areas the proportion is the highest for schools managed by local bodies (60.18%) while in urban areas it is the highest for private unaided schools (72.21%).

There are 65,564 secondary schools in the country, of which 35,231 (53.74%) have arrangements for medical check-up of students. This shows a rise in the number of schools having such facilities as compared to the Fifth Survey in which 24,080 (45.81%) secondary schools were having these facilities. Schools in urban areas (61.72%) are better placed than those in rural areas (50.79%) as far as medical check-up facilities for students are concerned. Analysing the availability of the facilities managementwise, we find that these facilities are available in 72.22% private unaided schools, followed by private aided schools (54.74%), local body schools (47.87%) and government schools (46.62%). Private unaided schools in rural as well as in urban areas are better placed than the schools under other managements in this respect.

Out of 23,662 higher secondary schools, 14,276 (60.33%) have the provision of medical check-up of

students, while at the time of the Fifth Survey such facilities existed in 8,549 (55.28%) schools. In urban areas the facilities exist in 61.99% of the schools as against 58.61% in rural areas. Managementwise, the private unaided schools have these facilities in 72.35% schools, followed by private aided schools

(59.29%), government schools (58.30%) and schools managed by local bodies (53.32%). Private unaided schools in both rural and urban areas have been found to be better placed than those under other managements as far as these facilities are concerned. □

## Chapter 11

### LANGUAGES AND MEDIA OF INSTRUCTION IN SCHOOLS

#### 11.1 Introduction

**11.1.1** Language as a vehicle of communication is very crucial to the whole process of education, since it is through language that everything is taught and learnt in a majority of teaching-learning situations, including the classroom. Though, there are certain non-verbal means and methods through which learning can take place, they are rarely used and it is mostly through language that education is imparted in schools.

**11.1.2** India is a multilingual country, but records and references about the languages and dialects spoken were not available till 1901. For the first time, the Linguistic Survey, which was taken up along with the Census of 1901, brought out a coherent picture of linguistic reality of India. According to the Linguistic Survey there are 172 languages and 544 dialects in India. The Census of India, 1961, has reported the number of mother tongues spoken in India as 1,652; the Third All India Educational Survey conducted in 1973, reported the number of mother tongues spoken as 368, while the Census of India, 1991, reported 216 mother tongues and 114 languages.

**11.1.3** Even though many of these languages are not well developed, these are to be used as their speakers do not know any other language. Therefore, with the educational development in the country, a large number of languages have been accepted either as a medium or as a subject by the education system, particularly, for meeting the needs of people living in small and remote regions.

**11.1.4** The Eighth Schedule of the Constitution of India has specified 18 Modern Indian Languages. Of these, Hindi has been accorded the status of the official language of India, English has been accorded the status of an associate language of the Union.

**11.1.5** The educational system of the country is, therefore, faced with the requirement of implementing the Constitutional obligation, on the one hand, and the specific needs of some regions, on the other.

#### 11.1.6 Language Policy

**11.1.6.1** The language policy of India is basically embodied in Part XVII of the Constitution of India

along with the Eighth Schedule (Article 345, 351), and in the Articles dealing with the Fundamental Rights. The aforesaid Articles of the Constitution give full freedom to the States to choose one or more languages of the Eighth Schedule or languages spoken in the region as their official languages. The use of Hindi in Devnagari script has been prescribed for all official purposes as the language of the Union Government. English will continue as an associate official language of the country.

**11.1.6.2** The modern Indian languages recognised by the Constitution for use as official languages by the different States are mentioned in Statement 11.1.

**11.1.7** Since Independence, the Government of India has appointed various Committees and Commissions to study the language policy exclusively for or as a part of the total educational system. These Committees and Commissions recommended various formulae for the study of languages at different school stages. In 1957, the Central Advisory Board of Education examined this problem in relation to the national needs and the Constitutional requirements and suggested the three-language formula. This formula was reviewed at the meeting of Chief Ministers of the States in 1961. The meeting came to the conclusion that at the school stage a child should study: (i) the regional language, (ii) Hindi in non-Hindi areas and any other language in Hindi areas, and (iii) English or any other modern European language. Later, the Education Commission, 1964-66, examined the implementation of the three-language formula in different States and Union Territories and recommended a modified three-language formula.

**11.1.7.1** According to the modified three-language formula : (i) the first language should be the mother tongue / regional language and is to be taught from Class I to Class X ; (ii) the second language could either be Hindi or English, which is to be taught compulsorily from the 5th standard to the 10th (at this stage a student can also offer English or Hindi, whichever is not offered as a compulsory language, as an optional language); and (iii) the third language to be taught between 8th to 10th standards could either be Hindi or English whichever is not studied

## STATEMENT 11.1

**Languages Recognised by the Constitution for Use as Official  
Language by Different States/Union Territories**

<i>Language</i>	<i>State/ Union Territory</i>
1	2
1. Assamese	Assam
2. Bengali	West Bengal
3. Gujarati	Gujarat
4. Hindi	Bihar, Chandigarh, Delhi, Madhya Pradesh, Haryana, Himachal Pradesh, Rajasthan and Uttar Pradesh
5. Kannada	Karnataka
6. Kashmiri	—
7. Konkani	Goa
8. Malayalam	Kerala
9. Manipuri	Manipur
10. Marathi	Maharashtra
11. Nepali	West Bengal, Sikkim
12. Oriya	Orissa
13. Punjabi	Punjab
14. Sanskrit	—
15. Sindhi	—
16. Tamil	Tamil Nadu
17. Telugu	Andhra Pradesh
18. Urdu	Jammu & Kashmir

previously. During these three years a student could also study optionally one or more Indian languages. At the higher secondary stage, a student has to study compulsorily any two of the languages he had studied earlier or any two of the following, and one more Indian Language optionally.

1. Modern Indian Languages
2. Classical Languages (Indian or Foreign)
3. Modern Foreign Languages

**11.1.7.2** Thus, the first, second and the third languages are to be studied compulsorily for ten, six, and three years, respectively, and any two of the three languages studied earlier could be continued for two more years. Also, it is only the Modern Indian Languages, including English, which are to be studied as the first, second and the third languages upto Standard 10. The classical languages, both Indian and Foreign, can only be studied optionally after Standard 10 for two years.

**11.1.7.3** Although this revised three-language formula as recommended by the Education Commission has been accepted by the Government

of India, all the States and Union Territories have not yet accepted and implemented it.

**11.1.8** In all, six All-India Educational Surveys have been conducted so far. But only during the Third, Fifth and the Sixth (the present Survey) the data have been collected on languages and media of instruction. In the present Survey information has been collected on the following aspects, namely: (i) Languages taught at different stages of school education; (ii) Schools following the three-language formula at the upper primary and secondary stages of school education, (iii) Medium or media of instruction in schools; and (iv) Schools teaching in the mother tongue at the primary and upper primary stages of school education.

### **11.2 Languages Taught in Schools**

**11.2.1** According to the national language policy, a child is required to study three languages in school. These are termed as the first language, the second language and the third language, in the order in which these are introduced in school. The languages used in Indian schools as the first

## STATEMENT 11.2

## Languages Used in Schools

S.No.	Language	S.No.	Language	S.No.	Language
1.	Angami	15.	Kannada	29.	Nepali
2.	Ao	16.	Kashmiri	30.	Nicobaree
3.	Arabic	17.	Khasi	31.	Oriya
4.	Assamese	18.	Konkani	32.	Oriya (lower)
5.	Bengali	19.	Konyak	33.	Persian

14.	Kakbarak	28.	Mizo		

language, the second language and the third language are given in Statement 11.2.

**11.2.2** It is evident from Statement 11.2, that in all, there are 41 languages used in Indian schools as the first, the second or the third language. During the Fifth AIES the number of languages used as the first, the second or the third language were reported as 44. The languages which have not been reported during this Survey are Bodhi, German and Rajasthani.

**11.3 Three-language Formula**

**11.3.1** The three-language formula, as reported by schools, has been adopted by the majority of States in the country. Statement 11.3 shows that the majority of schools, both at the upper primary stage and at the secondary stage, are pursuing the three-language formula.

**11.3.2** Statement 11.3 shows that at the upper primary stage, 82.16% schools are following the three-language formula but there is no perceptible

## STATEMENT 11.3

## Schools Following Three-Language Formula at the Upper Primary and Secondary Stages

Area	Upper Primary Stage	Secondary Stage
1	2	3
Rural	13,84,328 (82.03)	47,014 (80.52)
Urban	46,057 (82.58)	22,379 (77.58)
Total	1,84,495 (82.16)	69,393 (79.54)

Note: Figures within parentheses indicate percentages.

difference between rural and urban schools. At the secondary stage, 79.54% schools are adhering to the three-language formula; in rural areas this percentage is 80.52, while in urban areas it is 77.58.

**11.3.3** Statewise analysis shows that at the upper primary stage the majority of States and Union Territories are following the three-language formula in more than 80% schools. The exception to this are the States of Tamil Nadu (in 5.03%), Bihar (33.5%), Jammu & Kashmir (42.5%), West Bengal (52.26%), Nagaland (59.79%), and Tripura (63.8%) schools, and the Union Territories of Pondicherry (16.12%) and Daman & Diu (67.3%) schools.

**11.3.4** Statewise analysis at the secondary stage shows that 17 States/UTs follow the three-language formula in more than 80% schools. Exception to this are A & N Islands (1.39%), Tripura (8.59%), Arunachal Pradesh (9.29%), Tamil Nadu (12.46%), Pondicherry (16.54%), Chandigarh (16.91%), Nagaland (20.74%), Sikkim (32.58%), West Bengal (39.09%), Haryana (45.46%), Bihar (47.47%), Delhi (56.39%), and J & K (57.21%) schools.

#### 11.4 First Language

**11.4.1** The first language is generally introduced in the first year of school education and generally continues to be studied until the end of the secondary stage, particularly if it is also the medium of instruction. According to this Survey, there are 26 languages used as the first language at the primary stage, 23 at the upper primary stage and 25 at the secondary stage.

**11.4.2** Though the majority of schools have only one language as the first language, a few schools also provide for more than one language as the first language to cater to the needs of linguistic minorities. But the proportion of schools having more than one language as the first language increases as we go upto the higher stages of school education. This Survey also reveals that the percentage of schools having more than one language as the first language is higher in urban areas than in rural areas. The estimated number of schools according to one or more languages as the first language is given in Statement 11.4.

STATEMENT 11.4

#### Schools according to the First Language

School Stage	Area	Schools Offering			
		One Language	%	Two or More Languages	%
1	2	3	4	5	6
Primary	Rural	5,84,722	96.17	23,300	3.83
	Urban	93,771	95.87	4,041	4.13
	Total	6,78,493	96.13	27,341	3.87
Upper Primary	Rural	1,60,724	95.23	8,049	4.77
	Urban	52,350	93.87	3,421	6.13
	Total	2,13,074	94.89	11,470	5.11
Secondary	Rural	55,264	94.64	3,127	5.36
	Urban	26,140	90.62	2,707	9.38
	Total	81,404	93.31	5,834	6.69

**11.4.3** Statewise analysis of schools having one language or more than one language as the first language shows that the majority of schools in all the States/UTs have only one language as the first language at all the stages of school education. A very small proportion of schools offer more than one language as the first language at all the stages of school education.

**11.4.4** At the primary stage, schools with two or more languages as the first language exist in all the States/UTs. But the number of these schools is very small in the majority of States. The States of Bihar (22.10%), Goa (11.73%), Jammu & Kashmir (9.58%), Kerala (13.62%), Tripura (30.50%), A & N Islands (27.15%) and Chandigarh (45.93%) are the exception

which have a substantial number of schools providing more than one language as the first language.

**11.4.5** At the upper primary stage all the States/UTs have schools with two or more languages as the first language, with the exception of Mizoram, where no school has more than one language as the first language. But the States/UTs of Bihar (31.06%), Jammu & Kashmir (16.84%), Kerala (25.91%), A & N Islands (27.19%), Chandigarh (51.08%) and Lakshadweep (80.95%) have more than one language as the first language in their schools.

**11.4.6** At the secondary stage, there are 28 States/UTs which have schools with two or more languages as the first language. The States which do not have two or more languages as the first language in their schools are Arunachal Pradesh, Nagaland, Sikkim and Daman & Diu. The States/UTs where more than 10% schools have two or more languages as the first language are Bihar (39.48%), Jammu & Kashmir (19.72%), Karnataka (11.80%), Kerala (22.11%), A & N Islands (30.56%), Chandigarh (53.64%) Dadra & Nagar Haveli (30.33%), Delhi (10.44%), Lakshadweep (90%) and Pondicherry (14.17%).

**11.4.7** Of the 26 languages used as the first language, the majority of schools have either one or more of the constitutionally recognised 19 languages or 18 languages of the Eighth Schedule and English. These languages are used in many States and Union Territories. The remaining languages are confined to a small percentage of schools and to a very few States, and/or Union Territories. The major languages along with the number of schools at different stages of school education are shown in Statement 11.5 (see pages 163 and 164).

**11.4.8** It is evident from Statement 11.5 that a majority of schools in the country are using Hindi as the first language at all the stages of school education. English is taught in a very small proportion of schools as the first language.

**11.4.9** At the primary stage, in rural areas, only 10,485 (1.66%) and in urban areas, 4,852 (4.75%) schools offer English as the first language. Other schools — 98.34% in rural areas and 95.25% in urban areas — offer one of the Indian languages, including Hindi, as the first language. The percentage of schools which offer English has increased substantially after the Fifth AIES when it was just

0.56% in the rural areas and 4.25% in the urban areas.

**11.4.10** At the upper primary stage only, 2.91% schools in the rural areas and 8.25% in the urban areas are teaching English as the first language. As in the case of the primary stage, there is a substantial increase in the percentage of schools teaching English as compared to the Fifth AIES. In the Fifth AIES, this percentage was 1.14 in rural areas and 6.42 in urban areas.

**11.4.11** At the secondary stage also, the number of schools that offer English is not much different than what it is at the primary and upper primary stages of school education. At this stage the percentage of schools offering English is 4.06 in rural areas and 11.42 in urban areas. The corresponding figures during the Fifth AIES were 2.84 in rural areas and 9.89 in urban areas.

**11.4.12** Schools using Hindi as the first language at the primary stage are 40.49%, at the upper primary stage this percentage is 35.97, while at the secondary stage it is 28.50. The other prominent Indian languages taught as the first language are: Assamese in 3.56% schools at the primary stage, 3.07% schools at the upper primary stage and 3.53% schools at the secondary stage; Bengali in 8.31% at the primary stage, 4.23% at the upper primary stage and 6.57% at the secondary stage; Gujarati in 4.19% at the primary stage, 7.5% at the upper primary stage and 5.49% at the secondary stage; Kannada in 4.75% at the primary, 6.73% at the upper primary and 5.89% at the secondary stage; Marathi in 7.98% at the primary, 11.13% at the upper primary and 11.35% at the secondary stage; Oriya in 5.57% at the primary, 4.73% at the upper primary and 5.69% at the secondary stage; Tamil in 4.89% at the primary, 4.72% at the upper primary and 5.84% at the secondary stage; and Telugu in 7.74%, 5.54%, 7.56% at the primary, upper primary and secondary stage, respectively. In addition to these languages, Urdu is taught as the first language in 3.24% schools at the primary, 3.25% schools at the upper primary and 3.16% schools at the secondary stage; English is taught as the first language only in 2.09% schools at the primary, 4.25% schools at the upper primary and 6.57% schools at the secondary stage of education.

**11.5 Second Language**

**11.5.1** Many of the languages taught as the first language are tribal or unrecognised languages and, also, are not fully developed. These undeveloped languages cannot be used in imparting

higher education. Therefore, the teaching of a well developed language as a second language becomes a necessity.

**11.5.2** The second language is generally introduced after the introduction of the first language and before

the third language. But in some States the first and second or the second and the third languages are introduced simultaneously in the same class.

**11.5.3** The present Survey has revealed that 26 languages are used as the second language at the primary stage as well as at the upper primary stage of education. The languages used as the second language at the secondary stage are 32 in number.

**11.5.4** Statement 11.6 reveals that the proportion of schools offering the second language increases as we go upto the higher stages of school education. It goes from 34.85% schools at the primary stage to 96.65% at the secondary stage. It also reveals that the percentage of schools teaching the second language is higher in urban areas at all the school stages than in rural areas.

# STATEMENT 11.6

## Areawise Schools Teaching the Second Language

Area	Number of Schools at					
	Primary Stage	%	Upper Primary Stage	%	Secondary Stage	%
1	2	3	4	5	6	7
Rural	2,03,529	33.47	1,60,823	95.29	56,234	96.31
Urban	42,486	43.44	53,761	96.40	28,083	97.35
Total	2,39,662	34.85	2,14,584	95.56	84,317	96.65

**11.5.5** The Survey has also revealed that 2,39,662 schools (34.85%) at the primary stage, 2,14,584 (95.56%) at the upper primary stage and 84,317 (96.65%) at the secondary stage offer the second language. The corresponding figures during the Fifth AIES were 1,73,756 (27.52%) at the primary stage, 1,87,482 (99.94%) at the upper primary stage and 67,045 (99.71%) at the secondary stage.

**11.5.6** Statement 11.7 shows that a majority of schools offer only one language as the second language at all the stages of school education. A very

small proportion of schools offer more than one language as the second language. As in the case of the first language, the proportion of schools offering more than one language as the second language increases as we go upto the higher stages of school education. The statement also reveals that the percentage of schools offering more than one language as the second language is higher in urban areas than in rural areas.

**11.5.7** The languages which are used as the second language at the primary, upper primary and

	Total	79,137	93.91	5,135	6.09

secondary stages, along with the number of schools teaching these languages are given in Statement 11.8.

**11.5.8** Statement 11.8 shows that a majority of schools are teaching English as the second language from the primary to the secondary stage of school education. This was the position regarding Hindi as the first language. English is being taught as the second language in 60.33% schools at the primary stage, 55.05% at the upper primary stage and 54.12% at the secondary stage. The other prominent languages taught as the second language are Hindi

in 11.97% schools at the primary stage, 29.81% schools at the upper primary stage and 31.99% schools at the secondary stage; Sanskrit in 18.38% schools at the primary stage, 8.08 schools at the upper primary stage and 5.79% schools at the secondary stage; and Urdu in 2.31% schools at the primary stage, 1.89% schools at the upper primary stage and 1.16% schools at the secondary stage. Other languages are taught as the second language in around one per cent or less than one per cent schools only.

Note : Figures within parentheses indicate percentages.

**11.5.9** Statewise analysis of schools having one language or more as the second language shows that majority of schools in all the States/UTs offer only one language as the second language. A very small proportion of schools offer more than one language as the second language at all the stages of schools education.

**11.5.10** At the primary stage, schools with two or more languages as the second language exist in 31 States/UTs, with the exception of Nagaland. The States/UTs where more than 10% schools are offering two or more languages as the second language are Sikkim (15.19%), Chandigarh (50.30%) and Laskhadweep (40.0%).

**11.5.11** At the upper primary stage, 30 States/UTs have schools with two or more languages as the second language. The State of Mizoram and the Union Territory of Daman & Diu do not have any school with two or more languages. The States/UTs where more than 10% schools have two or more than two languages as the second language are Bihar, Sikkim, A & N Islands, Chandigarh and Dadra & Nagar Haveli.

**11.5.12** At the secondary stage as in the case of upper primary, 30 States/UTs have two or more than two languages as the second language, with the exception of Arunachal Pradesh and Mizoram. The States where more than 10% schools are having two or more than two languages as the second language

at this stage are Bihar (39.23%), Sikkim (84.24%), Chandigarh (48.39%), Dadra & Nagar Haveli (100%), Delhi (27.33%) and Lakshadweep (20%). In Dadra & Nagar Haveli all the schools have two or more than two languages, both in rural and urban areas. In Sikkim also, all the schools in urban areas have two or more languages as the second language.

### 11.6 Third Language

**11.6.1** The National Language Policy has emphasized the need of studying three languages in Indian schools. The third language is introduced generally after or along with the second language. It is introduced either in upper primary classes or in secondary classes.

**11.6.2** The present Survey reveals that, in all, 36 languages are used as the third language in Indian schools. There are 21 languages at the primary stage, 30 at the upper primary stage and 26 at the secondary stage, which are used as the third language. The number of languages used as the third language during the Fifth AIES was 29. The languages used at the primary stage were 16, while at the upper primary and at the secondary stages were 23.

**11.6.3** Statement 11.9 presents the areawise distribution of schools teaching the third language.

**11.6.4** Statement 11.9 reveals that 65,519 (9.28%) schools at the primary stage, 1,97,602 (88.00%) at the upper primary stage and 70,499 (80.18%) schools at the secondary stage offer the third language. The corresponding figures for the third language during the Fifth AIES were 1337 (0.21%) at the primary stage, 171273 (91.30%) at the upper primary stage and 49457 (73.55%) at the secondary stage. This shows that there is a substantial increase in the percentage of schools having the third language at the primary stage since the Fifth AIES. But the percentage of schools teaching the third language at the upper primary stage has declined in this Survey as compared to the Fifth AIES, though in absolute terms it has increased. The areawise distribution of schools shows that there is a higher percentage of schools offering the third language in urban areas as compared to rural areas, at the primary and upper primary stages of education, though at the secondary stage the position is otherwise.

**11.6.5** As in the case of the first language and the second language, the majority of schools offer one language as the third language and a very few schools offer more than one language as the third language.

**11.6.6** Statement 11.10 (see page 169) reveals that as in the case of the first and the second language, the proportion of schools offering more than one language as the third language increases as we go

STATEMENT 11.9

#### Areawise Schools Teaching the Third Language

Area	Number of Schools at					
	Primary Stage	%	Upper Primary Stage	%	Secondary Stage	%
1	2	3	4	5	6	7
Rural	48,485	7.97	1,48,114	87.76	47,778	81.82
Urban	17,034	17.42	49,488	88.73	22,721	78.86
Total	65,519	9.28	1,97,602	88.00	70,499	80.81

upto the higher stages of school education. It also reveals that the percentage of schools having more than one language as the third language is higher in urban areas as compared to rural areas.

**11.6.7** Statewise analysis further shows that at the primary stage there are 28 States/UTs which have the facility of teaching of the third language in their schools. The States in which the third language is not taught at this stage are Arunachal Pradesh, Nagaland, Sikkim and Daman & Diu. The States/UTs where the third language is available at this stage

in more than 10% schools are Bihar (39.48%), Jammu & Kashmir (19.72%), Karnataka (11.80%), Kerala (22.11%), A & N Islands (30.56%), Chandigarh (53.64%), Dadra & Nagar Haveli (13.33%), Delhi (10.44%), Lakshadweep (90%) and Pondicherry (14.17%).

**11.6.8** At the upper primary stage 30 States/UTs have the facility of teaching the third language in their schools, with the exception of Arunachal Pradesh and Mizoram. The States/UTs in which more than 10% schools are teaching the third

## STATEMENT 11.10

## Schools according to the Third Language

School Stage	Area	Schools Offering			
		One Language	%	Two or More Languages	%
1	2	3	4	5	6

language are Bihar (39.23%), Sikkim (84.27%), Chandigarh (48.39%), Dadra and Nagar Haveli (100%), Delhi (27.33%) and Lakshadweep (20%).

**11.6.9** At the secondary stage, schools offering the third language belong to 28 States/UTs, with Arunachal Pradesh, Manipur, Mizoram and Nagaland as the exception. The States where more than 10% schools have this facility are Assam (13.25%), Bihar (24.60%), Goa (53.62%), Gujarat (14.02%), Haryana (13.58%), Himachal Pradesh (30.43%), Jammu & Kashmir (11.06%), Karnataka (10.68%), Orissa (91.24%), Sikkim (13.51%), Tamil Nadu (21.24%), Tripura (14.29%), West Bengal (16.52%), A & N Islands (16.67%), Chandigarh (13.11%), Dadra and Nagar Haveli (85.21%), Daman and Diu (52.38%),

Delhi (14.49%) and Lakshadweep (10%).

**11.6.10** The position of different languages offered as the third language in rural and urban areas at different stages of school education as revealed by the present Survey is presented in Statement 11.11.

**11.6.11** Statement 11.11 (see pages 170 and 171) reveals that English is being taught as the third language in a large number of schools at all the stages of school education. The other languages which are offered as the third language in more than 9% schools are Hindi and Sanskrit. The remaining Indian languages are offered only in less than 1% schools, except Urdu which is offered in 1.57% schools at the upper primary stage and 1.28% schools at the secondary stage.

## STATEMENT 11.11

Note : Figures within parentheses indicate percentages.

**11.7 Medium or Media of Instruction**

**11.7.1** The present Survey reveals that the number of languages used as media of instruction is 33 at the primary stage, 25 at the upper primary stage, 21 at the secondary stage and 18 at the higher secondary stage. The corresponding figure during the Fifth Survey was 43 at the primary stage, 31 at the upper primary stage, 22 at the secondary stage and 20 at the higher secondary stage.

**11.7.2** It can be seen from the above that the larger number of languages used as media of instruction is at the primary stage. As we go up the educational

ladder, the number of languages used as media of instruction goes on declining.

**11.7.3** The geographical distribution of languages used as media of instruction shows that only 18 major languages recognised by the Constitution are used as medium of instruction in a large number of States and Union Territories, and most of the remaining languages display a localized pattern confined to one or two States/UTs. The distribution of States/UTs on major languages used as media of instruction at different stages of school education is shown in Statement 11.12.

## STATEMENT 11.12

## Languages Used as Media of Instruction at Different Stages of School Education in Different States/UTs

### 11.8 Schools Teaching through the Mother Tongue

**11.8.1** In line with the policy of the State governments, the mother tongue of the child is generally the medium of instruction, particularly at the primary and upper primary stages of school education. The present Survey reveals that about 92% schools at the primary stage and about 89% schools at the upper primary stage are imparting education through the mother tongue.

**11.8.2** Areawise analysis shows that there is no perceptible difference between rural and urban schools in imparting instruction through the mother tongue at the primary stage, though at the upper primary stage more schools in rural areas than in urban areas provide education through the mother tongue.

**11.8.3** Statewise analysis shows that the majority of States/UTs are teaching through the mother tongue as medium of instruction in the majority of schools, both at the primary and upper primary stages of school education. But there are States which are the exception to this. The States of Arunachal Pradesh, Jammu & Kashmir, Nagaland

and Sikkim are not imparting education through the mother tongue in the majority of schools, both at the primary and upper primary stages of school education. Further, the States of Goa, Meghalaya, and Union Territory of Chandigarh are not imparting education through the mother tongue in the majority of schools at the upper primary stage.

**11.8.4** Generally, education in a State is imparted through the language spoken by the majority of the people in the State. Whenever the majority language of the State is not the mother tongue of some students, and they are in sufficient number (at least 10 students in a class) and seek to be educated through their mother tongue, their mother tongue is allowed to be used as medium of instruction.

**11.8.5** Therefore, the majority of schools in the country are imparting education through the majority languages of States/UTs along with the facility of imparting education through other languages, including tribal languages, to cater to the needs of linguistic minorities. This situation has necessitated the use of more than one language as medium of instruction in schools.

#### STATEMENT 11.13

##### Schools with Mother Tongue as Medium of Instruction at Different Stages of Education

Area	Primary stage	%	Upper Primary stage	%
1	2	3	4	5
Rural	5,57,562	91.70	1,51,036	89.94
Urban	89,326	91.32	48,001	86.07
Total	64,66,888	91.62	1,99,037	88.64

**11.8.6** It is evident from Statement 11.14 (on page 173) that the majority of schools are imparting instruction through one medium only at all the stages of school education.

**11.8.7** Statement 11.15 (on page 173) shows that there is a very small proportion of schools which are imparting education through two or more than two media of instruction in schools. The Statement also reveals that the number of the schools with two or more media of instruction is 50,924 (7.21%) at the primary stage, 28,042 (12.49%) at the upper primary stage, 11,636 (13.34%) at the secondary stage and 4,117 (17.40%) at the higher secondary stage. The

corresponding figures during the Fifth AIES were 10,465 (1.66%) at the primary stage, 5,240 (2.79%) at the upper primary stage, 3,850 (5.73%) at the secondary stage and 1,825 (11.79%) at the higher secondary stage.

**11.8.8** The percentage of schools with more than one medium is more in urban areas than in rural areas at all the stages of school education. A similar trend was observed during the Fifth Survey. The Statement also shows that as we move up the education ladder the number of schools with more than one medium goes on increasing, both in rural and urban areas.

## STATEMENT 11.14

**Estimated Number of Schools according to Number of Media of Instruction at Different School Stages**

School Stage	Area	Number of Schools Having	
		One Medium	Two or More Media
1	2	3	4
Primary	Rural	5,64,832 (92.90)	43,190 (7.10)
	Urban	90,078 (92.09)	7,734 (7.19)
	Total	6,54,910 (92.79)	50,924 (7.21)
Upper Primary	Rural	51,239 (87.75)	7,152 (12.25)
	Urban	24,363 (84.46)	4,484 (15.54)
	Total	75,602 (80.66)	11,636 (13.34%)
Secondary	Rural	1,47,789 (87.57)	20,984 (12.43)
	Urban	48,713 (87.34)	7,058 (12.55)
	Total	1,96,502 (87.51)	28,042 (12.49)
Higher Secondary	Rural	9,865 (85.04)	1,735 (14.96)
	Urban	9,680 (80.25)	2,382 (19.75)
	Total	19,545 (82.60)	4,117 (17.40)

Note: Figures within parentheses indicate percentages.

## STATEMENT 11.15

**Schools according to Medium of Instruction**

School Stage	Area	School Teaching through			
		One Medium	%	Two or More Medium	%
1	2	3	4	5	6
Primary	Rural	5,64,832	92.90	43,190	7.10
	Urban	90,078	92.09	7,734	7.91
	Total	6,54,910	92.79	50,924	7.21
Upper Primary	Rural	1,47,789	87.57	20,984	12.43
	Urban	48,713	87.34	7,058	12.64
	Total	1,96,502	87.51	28,042	12.49
Secondary	Rural	51,239	87.75	7,152	12.25
	Urban	24,363	84.46	4,484	15.54
	Total	75,602	86.66	11,636	13.34
Higher Secondary	Rural	9,865	85.04	1,735	14.96
	Urban	9,680	80.25	2,382	19.75
	Total	19,545	82.60	4,117	17.40

**11.8.9** Statewise analysis of schools with one medium or more than one medium shows that in all the States/UTs, the majority of schools impart education through one medium at all the stages of school education. Exceptions to this are Nagaland, Chandigarh at the primary and upper primary stages

of education, the State/UT of Jammu & Kashmir and Chandigarh at the secondary stage, and the States/UTs of Bihar, Himachal Pradesh, Jammu & Kashmir, A & N Islands, Chandigarh and Daman & Diu at the higher secondary stage. □

# INCOME, EXPENDITURE AND FEE STRUCTURE IN SCHOOLS

## 12.1 Introduction

**12.1.1** Six All India Educational Surveys (AIESs) have been conducted so far. It is for the first time that an attempt has been made to collect data on school finance during the Sixth AIES. The data on this aspect have been collected from two sources, viz., school and district. The data from schools have been collected in the sample mode while the data from districts have been collected on the census basis, covering all the revenue districts in the country.

**12.1.2** In the Sixth AIES, six schedules have been canvassed. Out of these, two schedules, 'School Information Form-2 (SIF-2)' and 'Educational Finance Form (EFF)', have been used to collect data on finance. SIF-2 has been used to collect data on finance along with the other information from schools, while the other schedule 'Educational Finance Form (EFF)' is entirely devoted to collecting information on finance from districts. The data on finance from districts cover income/expenditure on: (i) establishments at the district levels, (ii) government and local body schools; and (iii) grant-in aid to private aided schools. It does not include any information on private unaided schools, and income/expenditure at the regional/State headquarters.

**12.1.3** Initially, the following analysis on school finance was planned:

1. Statewise fee structure at different stages of school education.
2. Income and expenditure in schools.
3. Statewise district-level income and expenditure in schools.

The above-mentioned first two items of analysis were to be undertaken on the data of the SIF-2 schedule and the third item was analysed on the basis of the EFF schedule collected from districts. On scrutiny of filled-in SIF-2 schedules, it was observed that the majority of schools had not filled any information in the items on finance. This has happened because in the case of primary (government and local body) schools, funds are not vested in these schools. Instead, funds are controlled at the block/district level. Similarly, in the case of upper primary, secondary and higher secondary government

schools, on many items they are not empowered to spend, and hence they could not provide data on those items. In the case of private aided and private unaided schools, the majority of them did not respond to these items. Even if some schools have supplied the data, these were inconsistent. Hence, it was decided not to analyse the data pertaining to fee structure, and income and expenditure of schools, contained in the filled-in SIF-2 schedule.

**12.1.4** Thus, information on fee structure in schools was collected directly from the States. This information was only with regard to government, local body and private aided schools. In addition to this, the fee structure followed in the Kendriya Vidyalaya has also been given.

Therefore, the fee structure in the case of private unaided schools, and for some States for private aided schools also, could not be provided by the States as the fee structure varied from school to school. Besides, the States of Haryana and Nagaland did not provide information on fee structure.

**12.1.5** In view of the above, the discussion in this chapter is confined to three aspects of school finance, viz., (i) Statewise fee structure at different stages of school education, (ii) Statewise, district-level income and expenditure in schools, and (iii) Expenditure per student.

## 12.2 Fee Structure in States

**12.2.1** The fee structure, as is evident from Tables 58 to 61, differs at various stages of school education, that is, primary, upper primary, secondary, and higher secondary, within a State.

**12.2.2** Out of the 30 States/UTs which supplied the data, there are 14 States/UTs which provide free education at the primary stage. These are Andhra Pradesh, Bihar, Goa, Gujarat, Kerala, Maharashtra, Orissa, Sikkim, Tamil Nadu, West Bengal, Dadra & Nagar Haveli, Daman & Diu, Lakshadweep, and Pondicherry.

**12.2.3** There are eight States/UTs which provide free education at the upper primary stage. These are Goa, Gujarat, Maharashtra, Sikkim, Daman & Diu, Dadra & Nagar Haveli, Lakshadweep, and Pondicherry.

**12.2.4** Seven States/UTs provide free education at the secondary stage. These are Goa, Gujarat, Maharashtra, Sikkim, Daman & Diu, Dadra & Nagar Haveli and Lakshadweep.

**12.2.5** There are only four States/UTs in the country, namely, Goa, Sikkim, Dadra & Nagar Haveli and Lakshadweep, which provide free education at all the four stages of school education, that is, primary to higher secondary.

**12.2.6** The State of Maharashtra is the only State in the country which provides free education to the wards of primary school teachers. In Rajasthan, fee is charged according to the income of the guardian; children of non-income tax payees are being charged 50% of the prescribed fee.

**12.2.7** A number of States give special concession in the form of exempting Scheduled Caste and Scheduled Tribe children from payment of school tuition fee and also, in some States, both tuition fee and funds. The States/UTs of Goa, Gujarat, Karnataka, Maharashtra, Mizoram, Orissa, Sikkim, Dadra & Nagar Haveli, and Lakshadweep do not charge any amount in any form upto Class XII from students belonging to Scheduled Castes and Scheduled Tribes. This is true for both boys and girls. The States/UTs of Andhra Pradesh, Arunachal Pradesh, Assam, Madhya Pradesh, Rajasthan, Uttar Pradesh, Chandigarh and Delhi do not charge any tuition fee upto Class XII from these students, but other funds are charged. In Rajasthan, Scheduled Caste and Scheduled Tribe children are charged for the development fund at 50% of the normal rate, while in Uttar Pradesh they are exempted from paying for the development fee which is the major part of the total fee charged. The State of Himachal Pradesh and the Union Territory of Daman & Diu do not charge any tuition fee from girl students belonging to Scheduled Castes and Scheduled Tribes, but in these states, boys of these communities pay the fee at the same rate as applicable to boys of the general category.

**12.2.8** To motivate girls to attend school, a number of States/UTs give them special concession. The States/UTs of Goa, Gujarat, Maharashtra, Rajasthan and Daman & Diu do not charge any kind of fee upto Class XII from girl students. In the case of Rajasthan, this exemption is only for those girls whose parents are not income tax payees. The States/UTs of Andhra Pradesh, Arunachal Pradesh, Assam, Himachal Pradesh, Madhya Pradesh, Rajasthan, Chandigarh,

Daman & Diu do not charge any tuition fee from girl students upto Class XII, but do charge other funds.

### **12.3 Fee Structure at Primary Stage**

**12.3.1** As already mentioned in the preceding section, 14 States/UTs, viz. Andhra Pradesh, Bihar, Goa, Gujarat, Kerala, Maharashtra, Orissa, Sikkim, Tamil Nadu, West Bengal, Dadra & Nagar Haveli, Daman & Diu, Lakshadweep and Pondicherry provide free education at the primary stage. Besides, Kendriya Vidyalayas also provide free education at the primary stage. The other States/UTs with the exception of Meghalaya (which charges tuition fee in Classes III to V in government schools) and Chandigarh (government model schools only) do not charge any tuition fee but do charge some amount in the form of funds. The amounts charged annually by these States/UTs are given in Table 58.

**12.3.2** In Tripura and A & N Islands, the fee charged is higher for private aided schools. It is Rs 16 as against Rs 13 charged by government schools in Tripura, while in A & N Islands it is Rs 390 to Rs 735 for private aided schools as against Rs 20 for government schools. In Chandigarh, model schools charge Rs.504 as against Rs 28 for ordinary schools.

**12.3.3** The States of Karnataka (Re 1), Madhya Pradesh (Rs 3), Mizoram (Re 1) and Delhi (Rs 1.20) are charging fee only symbolically.

**12.3.4** Manipur is the only State where the fee is different in different classes of the primary stage. In Classes I and II, it is charged at Rs 10, while Rs 14, Rs 18 and Rs 22 are being charged in Classes III, IV and V, respectively.

**12.3.5** In Meghalaya, while private aided schools are providing free education in all classes of the primary stage, government schools are providing free education only in Classes I and II.

### **12.4 Fee Structure at Upper Primary Stage**

**12.4.1** The States of Goa, Gujarat, Maharashtra, Sikkim, and UTs of Dadra & Nagar Haveli, Daman & Diu, Lakshadweep and Pondicherry provide free education at the upper primary stage. Though the other States do charge a certain amount in one form or the other, they do not charge any tuition fee, except Meghalaya and Chandigarh (which charge tuition fee in government model schools though not in ordinary government schools) as is evident from Table 59.

**12.4.2** Manipur charges fee at differential rates for different classes. The amount varies from Rs 30.50

for Class VI to Rs 41.50 for Class VIII. The States of Mizoram, Tripura and A & N Islands allow a higher amount for private aided schools. In West Bengal, urban schools charge a higher amount than their counterparts in rural areas. Similarly, model schools in Chandigarh charge higher rates than ordinary schools.

**12.4.3** Schools in Andhra Pradesh, Assam, Karnataka, Kerala, Madhya Pradesh, Tripura (government schools) and A & N Islands (government schools) charge less than Rs 20, while the States/UTs prescribing more than Rs 60 are Arunachal Pradesh, Jammu & Kashmir, Mizoram (aided schools), West Bengal, A & N Islands (aided schools) and Chandigarh.

## 12.5 Fee Structure at Secondary Stage

**12.5.1** At the secondary stage of education, Goa, Gujarat, Maharashtra, Sikkim Dadra & Nagar Haveli, Daman & Diu and Lakshadweep provide free education. Andhra Pradesh, Arunachal Pradesh, Assam, Bihar, Himachal Pradesh, Jammu & Kashmir, Karnataka, Madhya Pradesh, Orissa, Tripura, Uttar Pradesh, West Bengal, A & N Islands and Pondicherry do not charge tuition fee, a certain amount is charged in the form of funds as is evident from Table 60.

**12.5.2** The State of Tripura and the Union Territory of A&N Islands have higher rates of fees for private aided schools. Manipur has different rates for Classes IX and X. West Bengal urban schools charge higher rates. Similar is the case of model schools in Chandigarh. Delhi has reported different fee rates for Classes IX and X and also higher rates for boys. Tamil-medium schools in Tamil Nadu charge Rs 35 as against Rs 200 charged from students of English-medium schools.

**12.5.3** As at the upper primary stage, government schools in the State of Meghalaya charge more than

private aided schools.

**12.5.4** The States /UTs which charged less than Rs 50 annually, as funds are Andhra Pradesh, Assam, Bihar, Orissa, Tamil Nadu (Tamil medium schools), Tripura (Government schools), A&N Islands (Government schools) and Pondicherry. The maximum amount of Rs 749 is being charged by the model schools in Chandigarh.

## 12.6 Fee Structure at Higher Secondary Stage

**12.6.1** The States/UTs of Goa, Sikkim, Dadra & Nagar Haveli and Lakshadweep provide free education at this stage. The States/UTs of Arunachal Pradesh, Uttar Pradesh, West Bengal, A & N Islands, and Pondicherry do not charge tuition fee. This is evident from Table 61.

**12.6.2** The rates fixed in the States for the higher secondary stage become quite complex because of differential rates for streams, management, girls, etc.

## 12.7 Income at District Level

**12.7.1** The funds available at district level from different sources are Rs 10,62,197.49 lakh (income data are not available for the States of Goa, Maharashtra, Nagaland and A&N Islands). The budgeted expenditure on education of the States/UTs during the financial year 1992-93 given by the MHRD, is Rs 16,70,126.51 lakh (it does not include the expenditure on education for the States of Goa, Maharashtra, Nagaland and UT of A & N Islands). The district level funds received from various sources are 63.60% of this amount. This indicates that 36.40% of the amount was allocated at the regional/State headquarters.

**12.7.2** The amount under different heads is as presented in Statement 12.1. Its Statewise distribution is given in Table 62. Statement 12.1

### STATEMENT 12.1

#### Income under Different Heads of Account during 1992-93

Sl No.	Head of Account	Amount (Rs in lakh)	% of the Total
1	2	3	4
1	Government grants	10,22,143.10	96.23
2	Management contribution	8,888.58	0.84
3	Total Fee	12,436.54	1.17
4	Donations	2,362.08	0.22
5	Endowments	1,764.21	0.17
6	Others	14,602.98	1.37
	Total	10,62,197.49	100.00

shows that the main source of income for the districts is government grants which account for 96.23% of the total income. The management hardly contributes to the income as it accounts only for 0.84%. Further, the fee contributes about 1.17% and other sources also contribute to the tune of 1.72%. Other sources include development fund, electricity charges, and such things.

### 12.8 Expenditure at District Level

**12.8.1** The total expenditure incurred at the district level in the year 1992-93 in States and UTs is Rs 10,36,687.34 lakh which is 97.60% of the total income at the district level. This total expenditure is divided into two heads: (i) Recurring and (ii) Non-recurring. The Statewise distribution is

given in Table 63.

**12.8.2** Of the total expenditure, the recurring expenditure is Rs 10,03,174.01 lakh (96.77%) and the non-recurring expenditure amounts to Rs.33,513.33 lakh. The recurring expenditure is spent under the different heads as shown in Statement 12.2.

**12.8.3** It is evident from Statement 12.2, that 97.01% of the total amount is incurred towards salary of teaching and non-teaching staff, and the amount available under the remaining heads is only 2.99%. In fact, the proportion of the amount spent on games and sports, libraries and laboratories (consumable) is only 0.48%, which is a very meagre amount. The Statewise distribution of the amount under different heads is given in Table 64.

#### STATEMENT 12.2

##### Recurring Expenditure under Different Heads of Account

Sl. No.	Head of Account	Amount (Rs in lakh)	% of the Total
1	2	3	4
1	Salaries of teaching staff	8,97,167.30	89.43
2	Salaries of non-teaching staff	76,005.05	07.58
3	Library	1,785.67	0.18
4	Laboratory (consumable)	1,797.39	0.18
5	Rent	1,468.49	0.15
6	Maintenance	3,351.92	0.33
7	Games and Sports	1,239.53	0.12
8	Contingency	7,550.99	0.75
9	Others	12,764.97	1.28
	Total	10,03,174.01	100.00

**12.8.4** The non-recurring expenditure of Rs 33,513.33 lakh accounted for only 3.23% of the total expenditure incurred at the district level. The

expenditure incurred under different heads is given in Statement 12.3 and the Statewise distribution in Table 65.

#### STATEMENT 12.3

##### Non-recurring Expenditure under Different Heads of Account

Sl. No.	Head of account	Amount (Rs in lakh)	% of the Total
1	2	3	4
1	Construction	19,664.97	58.68
2	Office Equipment	1,627.46	4.86
3	Furniture	2,594.00	7.74
4	Laboratory	1,241.34	3.70
5	Land	3,296.13	9.84
6	Games	744.62	2.22
7	Others	4,344.81	12.96
	Total	33,513.33	100.00

**12.8.5** Statement 12.3 shows that the major proportion (68.52%) of the non-recurring expenditure is spent on construction and land acquisition. Another 12.60% is spent on furniture and office equipment while just 5.92% is spent on the purchase of laboratory equipment and games material.

## **12.9 Per Student Expenditure**

**12.9.1** The per student expenditure at the National level for students studying in primary to higher secondary stages in government, local body and private aided schools together is found to be Rs 855.21. It is Rs 774.48 for government schools and Rs 1,185.84 for private aided schools.

**12.9.2** It is further found that at the National level, for all schools the recurring and non-recurring expenditures are Rs 827.56 and Rs 27.65, respectively. The corresponding figures for government schools are Rs 751.57 and Rs 22.92, while for private aided schools, these are Rs 1,138.66 and Rs 47.18, respectively.

**12.9.3** Table 66 shows that the per student expenditure is maximum in Mizoram (Rs 5,294.53) and the minimum in Orissa (Rs 364.01). It further

shows that the per student expenditure is much higher than the National average of Rs 855.21 in the North-Eastern States with Mizoram (Rs 5,294.53) topping the list, followed by Manipur (Rs 3,030.03), Sikkim (Rs 2,849.74), Arunachal Pradesh (Rs 2,505.09), Tripura (Rs 1,517.16) and Meghalaya (Rs 1,224.25), with the exception of Assam (Rs 776.50). The data for Nagaland are not available. The other States/UTs where the per student expenditure is on higher side are Lakshadweep (Rs 3,905.52), Dadra & Nagar Haveli (Rs 2,141.90), Chandigarh (Rs 1,914.32) Daman & Diu (Rs 1,627.13) and Delhi (Rs 2,253.73).

**12.9.4** It is evident from Table 67 (giving per student expenditure in government schools) that out of 28 States/UTs, 20 States/UTs incurred an expenditure of more than the National average of Rs 774.48. Further, it can be seen that Mizoram spent as high as Rs 5,406.20 on this account.

**12.9.5** Table 68 indicates that in the case of private aided schools there are 15 States/UTs which incurred more expenditure per student per year than the National average of Rs 1,185.84. In the case of Himachal Pradesh, it is on the top with an expenditure of Rs 5,956.54 per year per student. □

## Chapter 13

### MAIN FINDINGS OF THE SURVEY

#### 13.1 Rural Habitations

1. There are 10,60,612 habitations in the country located in 5,86,465 villages, with a rural population of about 66 crore.
2. On an average, each village has 1.81 habitations.
3. Tripura has the highest habitations (7.95) per village, followed by Kerala (6.31) and Sikkim (3.19). Among UTs, Dadra & Nagar Haveli has the maximum (6.88) habitations per village.
4. Of the 10,60,612 habitations, only 17.45% have 1,000 and above population, but these habitations have 56.47% of the rural population.
5. 62.46% habitations have less than 500 population but they have 20.90% of rural population.
6. There are 1,20,517 (11.36%) habitations predominantly populated by Scheduled Castes. The percentage of Scheduled Tribe-dominated habitations is 18.36.
7. The majority of SC-dominated habitations (53.14%) have less than 300 population but 10.15% such habitations have more than 1,000 population.
8. About two-thirds of ST-dominated habitations (63.68%) have less than 300 population; only 5% such habitations have more than 1,000 population.

#### 13.2 Primary Education

1. The percentage of habitations served by primary sections within one kilometre is 83.36 including 49.79% having facilities within the habitations themselves.
2. The percentage of the rural population having access to primary sections within one kilometre is 93.76 including 77.81% enjoying the facilities within the habitation of residence.
3. In Gujarat, Haryana, Punjab, Tamil Nadu, Daman & Diu and Lakshadweep, more than

93% of their habitations, accounting for more than 98% of the rural population, have access to primary education within one kilometre.

4. In Andhra Pradesh, Gujarat, Haryana, Karnataka, Maharashtra and Mizoram, more than 90% of the habitations with population 300 or more have primary schooling facilities within the habitations themselves.
5. There are 40,440 (6.97%) habitations with a population of 300 or more which are not served by primary sections upto one kilometre.
6. Out of 1,20,517 habitations predominantly inhabited by Scheduled Castes, 82.30% have access to primary education within one kilometre, including 37.30% having such facilities within the habitations themselves.
7. 91.32% of the population of the habitations predominantly inhabited by Scheduled Castes has access to primary education within one kilometre, including 64.27% enjoying these facilities within the habitation of residence.
8. There are 4,975 (8.81%) habitations predominantly inhabited by Scheduled Castes and having a population of 300 or more which do not have primary schooling facilities within one kilometre.
9. Of the 1,94,733 habitations predominantly inhabited by Scheduled Tribes, 76.31% are served by primary sections within one kilometre, including 45.96% habitations which have such facilities within the habitations themselves.
10. 88.55% of the population of those habitations, which are predominantly inhabited by Scheduled Tribes, is served by primary sections within one kilometre, including 71.43% enjoying these facilities within the habitation of residence.
11. There are 5,635 (7.97%) habitations, predominantly inhabited by Scheduled Tribes, and having a population of 300 or more which do not have primary schooling facilities within one kilometre.

12. Out of 5,86,465 villages in the country, 4,17,422 (71.18%) have primary education facilities within themselves.
13. In Arunachal Pradesh, Himachal Pradesh, Bihar, Meghalaya, Orissa, Uttar Pradesh, A & N Islands and Pondicherry, more than one-third of the villages do not have primary education facilities within themselves.
14. There are 7,05,834 primary sections in the country of which 5,70,455 (80.82%) are independent primary schools. Out of the total number of primary sections, 86.14% are located in rural areas.
15. Of the 5,70,455 primary schools, 88.98% are in rural areas. The percentage of primary schools under government, local body, private aided and private unaided management is 44.63, 47.47, 3.78 and 4.12, respectively.
16. The percentage of single-teacher primary schools in the country is 20.12. The corresponding figures for rural and urban areas are 22.07 and 4.33, respectively.
17. In Andhra Pradesh, Arunachal Pradesh, Jammu & Kashmir, Meghalaya and Dadra & Nagar Haveli, more than one-third of the primary schools are single-teacher schools.
18. The overall pupil-teacher ratio in primary schools is 40. The corresponding figures for rural and urban schools are 41 and 37, respectively. The ratio is the highest in Bihar (50) and the lowest in Sikkim (11).
19. The total enrolment in Classes I to V is 9,70,29,235, of which 74.69% is in rural schools.
20. Girls constitute 43.16% of the total enrolment in Classes I to V. The corresponding figures for rural and urban areas are 41.96% and 46.71%, respectively.
21. Meghalaya has the highest percentage (50.14) of girls enrolled in Classes I to V, and Rajasthan the lowest (33.75). Besides, Goa, Himachal Pradesh, Karnataka, Mizoram, Nagaland, Tamil Nadu, A & N Islands, Delhi and Pondicherry have more than 47% of girls enrolled in these classes.
22. The total enrolment of SC children in Classes I to V is 1,90,35,297, which is 19.62% of the total enrolment in these classes.
23. The percentage of girls in the SC enrolment of Classes I to V is 41.66. The corresponding figures for rural and urban areas are 40.97 and 45.97, respectively.
24. The total enrolment of ST children in Classes I to V is 88,09,631, which is 9.08% of the total enrolment in these classes.
25. The percentage of girls in the ST enrolment of Classes I to V is 41.45. The corresponding figures for rural and urban areas are 40.96 and 45.52, respectively.
26. The overall age-specific enrolment ratio is 66.40. The corresponding figures for boys and girls are 73.20 and 59.13, respectively.
27. The overall net enrolment ratio is 64.22. The corresponding figures for boys and girls are 70.84 and 57.15, respectively.

### 13.3 Education at Upper Primary Stage

1. The percentage of habitations served by an upper primary school or section within a distance of five kilometres has increased from 50.34 in 1957 to 90.28 in 1993. However, when viewed from the distance criterion of three kilometres, only 76.15% of habitations were served in the Sixth Survey as compared with 58.26% in the Third Survey.
2. The percentage of population served by a school with upper primary stage within a distance of three kilometres has moved from 71.97 in 1973 to 85 in 1993.
3. Of the total 10,60,612 habitations in the country, 2,52,956 are unserved; these have no school with the upper primary stage within a distance of three kilometres.
4. 1,88,168 (74.39%) of the unserved habitations belong to smaller habitations with the population slab 'below 500'. The progress of the schooling facilities as represented by the national average, by and large, was confined to larger habitations. Consequently, the habitations with smaller population continue to remain unserved.
5. Of the 7,119 habitations, which have population of 5,000 and above, 98.1%, accounting for 98.21% population, have a school with the upper primary stage within a distance of three kilometres.
6. 93.75% of the 52,928 habitations in the population slab '2,000-4,999', covering 94.22% of the population, have schools with the upper

- primary stage within a distance of three kilometres.
7. Of the total habitations in the population slab '1,000-1,999', 85.97%, accounting for 86.45% population, have the schooling facility within a distance of three kilometres.
  8. In the population slab '500-999', 79.43% habitations, accounting for 79.65% of the population, have schooling facilities at upper primary stage within a distance of three kilometres.
  9. Of the total 6,62,460 habitations in the population slab 'below 500', 71.60% have the upper primary stage within a distance of three kilometres. The population of these habitations is 74.02%.
  10. The States and UTs having 20% or more unserved population, which do not have the schooling facility within a distance of three kilometres, are Andhra Pradesh, Arunachal Pradesh, Himachal Pradesh, Madhya Pradesh, Meghalaya, Nagaland, Rajasthan, Sikkim, A&N Islands and Dadra & Nagar Haveli.
  11. Of the total 1,20,517 habitations predominantly populated by Scheduled Castes, 93,571 (77.64%) have a school with the upper primary stage within a distance of three kilometres.
  12. Some of the bigger States, like Andhra Pradesh, Madhya Pradesh, Rajasthan and Uttar Pradesh, have 20% or more population belonging to habitations predominantly populated by Scheduled Castes which do not have the schooling facility within a distance of three kilometres.
  13. 1,16,768 (59.96%) of the 1,94,733 habitations predominantly populated by Scheduled Tribes have access to the upper primary stage within a distance of three kilometres. The population covered by these habitations is 68.95%. Out of 77,965 unserved habitations, 68,293 (87.59%) belong to the population slab 'below 500'.
  14. The habitations (predominantly populated by Scheduled Tribes) belonging to the larger population slabs have better schooling facilities within a distance of three kilometres than those belonging to the smaller population slabs.
  15. Some of the bigger States, namely, Andhra Pradesh, Madhya Pradesh and Maharashtra, which have more than 30% population of habitations (predominantly populated by Scheduled Tribes), do not have the schooling facility within a distance of three kilometres.
  16. Of the 2,24,544 schools with the upper primary stage, 75.16% are in rural areas. 72.47% of these schools are managed by the government (44.94%) or local body (27.53%), while 16.39% are private aided and 11.14% are private unaided.
  17. In rural areas, government and local body managements together have 81.52% schools, while 12.95% are private aided and 5.53% are private unaided. This indicates that the government has been giving a major thrust to the expansion of education in rural areas while private managements are playing an important role in urban areas.
  18. The total enrolment at the upper primary stage is 3,40,71,058, out of which 63.0% belong to rural areas. The percentage of enrolment in Classes VI to VIII has decreased by more than 11%, i.e. from 38.95% to 27.65% in rural areas. The corresponding decrease in urban areas is below 6%, i.e. from 36.34% to 30.99%. This indicates that educational backwardness in rural areas is higher than that in urban areas.
  19. The overall percentage of girls enrolled at the upper primary stage is 39.62. The States, which have shown a lower percentage of enrolment of girls than the national average are Rajasthan (25.4), Bihar (29.6), Uttar Pradesh (31.8) and Madhya Pradesh (34.7).
  20. The States, which have shown enrolment of girls below 30% in rural areas, are Rajasthan (18.1), Bihar (26.5), Uttar Pradesh (27.4) and Madhya Pradesh (29.8). It is worthwhile to note that the above-named four States are the most backward States in respect of girls' education.
  21. The States, which have registered more than 48% of enrolment of girls at the upper primary stage, are Kerala (48.8), Meghalaya (48.6), Mizoram (48.3), Nagaland (49.1) and Sikkim (48.8).
  22. The enrolment of Scheduled Caste children at the upper primary stage is 53,01,922. This shows a 335% increase from the Third Survey (1973) to the Sixth (1993) Survey, i.e. in a time-span of twenty years, i.e. an average increase of 16.75% per annum. This rate of growth is much higher than that of the enrolment of all

- communities, which is only 6.84% per annum.
23. The States, in which the percentage of girls' enrolment of Scheduled Castes remained low, are Bihar (22.42), Madhya Pradesh (29.70), Rajasthan (17.48) and Uttar Pradesh (25.68).
  24. The States/UTs, where the percentage of the SC girls' enrolment is higher than the national percentage, are Assam (44.65), Kerala (48.34), Nagaland (44.53), Sikkim (49.44), Tamil Nadu (45.81), Chandigarh (44.95), Dadra & Nagar Haveli (47.03), Delhi (47.35) and Pondicherry (49.84).
  25. There are 35.77% ST girls enrolled in Classes VI to VIII. The States, which record less than 30% ST girls' enrolment, are Andhra Pradesh (26.76), Rajasthan (15.46) and West Bengal (29.78). The States, which have recorded more than 48% of girls' enrolment, are Kerala (48.18), Meghalaya (49.62), Mizoram (48.39), Nagaland (49.24) and Sikkim (52.67). The States of Haryana and Punjab do not have any enrolment of Scheduled Tribe girls.
  26. The overall age-specific enrolment ratio in the age-group 11 to below 14 years is estimated as 65 for boys, 48.2 for girls and 57.1 for boys and girls combined.
  27. The States, where even 50% of the children in the age-group 11 to below 14 are not going to school, are Andhra Pradesh (41.2), Bihar (31.6) and Uttar Pradesh (42.4). The States/UTs, where this ratio is more than 90, are Kerala (94.3), Manipur (90.4) and Lakshadweep (92.5) and Pondicherry (95.1).
  28. The States, where the age-specific enrolment ratio for boys is below 50, are Andhra Pradesh (47.9) and Bihar (40.6). The States/UTs, where it is more than 90, are Gujarat (90.6), Kerala (94.9), Manipur (95.3), Tamil Nadu (91.0), Lakshadweep (91.8) and Pondicherry (98.7).
  29. The States/UTs, where the girls' age-specific enrolment ratio is below 50, are Andhra Pradesh (33.8), Bihar (20.7), Jammu & Kashmir (41.4), Madhya Pradesh (37.5), Orissa (40.4), Rajasthan (27.0), Uttar Pradesh (29.8) and Dadra & Nagar Haveli (48.5), while the States, which have enrolled more than 90% of the girls in the age-group 11 to below 14, are Kerala (93.7), Lakshadweep (93.3) and Pondicherry (91.4).
- secondary education facilities within eight kilometres, including 5.04% habitations which have these facilities within themselves.
2. 90.06% of the rural population have access to secondary education facilities within eight kilometres, including 18.29% of the population having these facilities within the habitations of residence.
  3. About three fourths of the unserved habitations belong to the population slab 'Below 500'.
  4. More than 65% of the rural population is served by secondary sections within eight kilometres in all the States and Union Territories except three north-eastern States, namely, Arunachal Pradesh, Mizoram and Nagaland.
  5. Out of 1,20,517 habitations predominantly populated by the Scheduled Caste population, 87.53% have secondary sections within eight kilometres including 2.48% habitations which have these facilities within themselves.
  6. 90.34% of the population of those habitations which are predominantly populated by Scheduled Castes, is served by secondary sections within eight kilometres.
  7. Of the 1,94,733 habitations predominantly populated by the Scheduled Tribes, 70.35% are served by secondary sections within eight kilometres, covering 75.83% population of those habitations.
  8. Out of 5,86,465 villages in the country, only 8.76% have secondary-stage education facilities within themselves.
  9. There are 65,564 secondary schools and 21,674 higher secondary schools in the country, where secondary sections are available. Two-thirds of these schools are in rural areas.
  10. Among the secondary schools, 82.50% are co-educational, 6.85% are boys' schools and 10.65% are girls' schools.
  11. There are 1,52,19,392 children enrolled in Classes IX and X in the country, of which 55.32% are studying in rural schools. Among these, 36.47% are girls.
  12. Kerala is the only State where the percentage of girls is more than 50 in the total of enrolment of Classes IX and X. At the other extreme, this percentage is even less than 30 in Bihar, Madhya Pradesh, Rajasthan and Uttar Pradesh.
  13. There are 20,87,669 Scheduled Caste children

### 13.4 Secondary Education

1. About 85% of the rural habitations have the

- enrolled in Classes IX and X, which constitute 13.72% of the total enrolment. Among these Scheduled Caste pupils, 32.31% are girls.
14. There are 7,98,813 Scheduled Tribe children enrolled in Classes IX and X, which constitute 5.25% of the total enrolment. Among these Scheduled Tribe pupils, 32.10% are girls.
  15. The majority of the secondary schools (47.11%) have combined laboratories for science subjects. Only 12.62% secondary schools have separate laboratories for these subjects, and the remaining 40.27% schools do not have science laboratories at all.
  16. In urban areas, 71.21% of the secondary schools have science laboratories as against 54.05 schools in rural areas.
  17. The States of Goa, Gujarat, Sikkim and all the Union Territories except Daman & Diu have science laboratories in more than 85% of the schools. On the other hand, Assam, Meghalaya, Orissa and Tripura have science laboratories in even less than 25% of the secondary schools.
  18. About 19% of the secondary schools have provision for guidance services. In Gujarat, 86.73% of the secondary schools have these facilities. On the other hand, in Tripura, West Bengal, Lakshadweep and Pondicherry these facilities are available in even less than 5% of the secondary schools.
- 13.5 Higher Secondary Education**
1. More than half (56.96%) habitations are served by the higher secondary education facility within eight kilometres. This percentage includes the habitations (1.10%) served by the facility within themselves.
  2. About two-thirds (63.60%) of the rural population is served by the facility within a distance of eight kilometres, including 5.36% population served within the habitations.
  3. Among the habitations predominantly populated by Scheduled Castes, 61.35% have the facility within a distance of eight kilometres, including 0.51% habitations having the facility within themselves.
  4. About two-thirds (67.03%) of the population of predominantly SC-dominated habitations is served by the facility within a distance of eight kilometres, including 2.30% population served within the habitations themselves.
  5. 36.57% habitations predominantly populated by Scheduled Tribes(ST) are served by the higher secondary education facility within a walking distance of eight kilometres. This includes 0.32% such habitations also, which are served by the facility within the habitation of residence.
  6. Less than half (43.38%) of the population belonging to ST-dominated habitations is served by the facility within a distance of eight kilometres, including 1.61% population having the facility within the habitations.
  7. In the country, 63.60% of the rural population is served by the facility within a walking distance of eight kilometres. There are nine States and five Union Territories providing the facility to more population than the All India average. These States and Union Territories are: Assam (70.07%), Goa (84.34%), Gujarat (64.93%), Jammu & Kashmir (68.93%), Punjab (86.05%), Tamil Nadu (80.53%), Tripura (90.09%), Uttar Pradesh (74.92%), West Bengal (72.33%), Chandigarh (100%), Dadra & Nagar Haveli (100%), Daman & Diu (100%), Delhi (100%) and Pondicherry (92.10%).
  8. Of the 5,86,465 inhabited villages in the country, only 11,500 (1.96%) have the higher secondary education facility within themselves.
  9. Of the 11,500 villages having the facility within themselves, only 2.27% and 3.45% are predominantly populated by Scheduled Castes and Scheduled Tribes, respectively.
  10. There are 23,662 higher secondary schools in the country, of which 49.02% are in rural areas.
  11. About two-thirds (67.89%) higher secondary schools are co-educational, 17.73% are for boys and 14.38% for girls.
  12. About 45% higher secondary schools are under private aided management, and 42.37% are run by government and local body managements.
  13. 51.42% higher secondary schools have upper primary, secondary, and higher secondary classes, while another 20.13% schools have all the four stages of education (Classes I to XII). 20.04% schools have only secondary and higher secondary classes, and the remaining 8.40% have only two Classes—XI and XII.
  14. There are 54,65,154 students in Classes XI and XII admitted in 23,662 higher secondary schools of the country.

15. Of the total enrolment, 64.07% are boys and 35.93% are girls. Further, 38.14% students are enrolled in rural schools.
  16. In all, 6,60,997 (12.09%) students belong to Scheduled Castes, of which 43.91% are studying in rural schools.
  17. There are 2,20,706 (4.04%) Scheduled Tribe students, of which 60.37% are in rural area.
  18. Girls constitute 30.29% among SC and 27.62% among ST students.
  19. Seventeen States and two UTs have higher secondary classes attached to degree colleges, called 'pre-university classes'. There are 21,33,778 students in Classes XI and XII in degree colleges. Of this total enrolment, 64.84% are boys and 35.16% are girls, and 23.52% are in rural and 76.48% in urban colleges. Of the total students in Classes XI and XII in degree colleges, 2,60,098 (12.19%) are SC and 1,40,579 (6.59%) ST.
  20. There are 75,98,932 students in Classes XI and XII, of which 28.08% are in degree colleges and 71.92% in higher secondary schools; 34.03% are in rural and 65.97% in urban areas; and 64.29% are boys and 35.71% girls.
  21. Of the 23,662 higher secondary schools in the country, 77.90%, 56.42% and 39.29% impart education in the Arts, Science and Commerce streams, respectively, while among the 2986 degree colleges having Classes XI and XII, the respective percentages are 86.47, 62.59 and 53.95.
  22. Among the 13,350 higher secondary schools teaching science subjects in the country, 40.46% are in rural and 59.54% in urban areas.
  23. Only 30.36% higher secondary schools provide guidance and counselling services to students.
  24. 3,854 (16.29%) higher secondary schools have the vocational and/or technical streams.
- 13.6 Teachers**
1. There are 41,97,555 teachers at all the stages of school education in the country. Of these, 33.62% are females. The percentage of teachers working in rural areas is 67.79.
  2. There has been an increase of 15.17% in the total number of teachers during a span of seven years since the Fifth Survey.
  3. The number of teachers working in primary schools is 16,23,379, of whom 31.61% are females. More than three-fourths (78.55%) of the teachers are posted in rural areas. Schools run by local bodies have the largest percentage of teachers (46.66), followed by government schools (38.11), private unaided schools (8.32) and private aided schools (6.91).
  4. The number of teachers working in upper primary schools is 11,29,747. Seventy per cent of them are teaching in rural schools. The largest percentage of working teachers is in schools run by the government (42.24), and the lowest in private unaided schools (12.24).
  5. There are 8,29,405 teachers working in secondary schools. Of these, 34.68% are females. The percentage of teachers posted in rural areas is 64.18. Schools run by the government have employed the largest percentage of teachers (37.83%), and local body schools the lowest (10.37%).
  6. Out of 6,15,024 teachers in higher secondary schools, 2,47,584 (40.26%) are posted in rural areas. About one-third (33.18%) of the total teachers are females. The percentage of teachers working in government, local body, private aided and private unaided schools is 39.47, 3.87, 45.48 and 11.18, respectively.
  7. Out of the total teachers in the country, 8.99% belong to Scheduled Castes. Their proportion in rural and urban schools is 10.34% and 6.14%, respectively.
  8. The representation of teachers belonging to Scheduled Tribes is 5.74%. The corresponding figures for rural and urban areas are 7.26% and 2.54%, respectively.
  9. A little over one-fourth of the total working teachers belong to the OBC category. The corresponding figures for rural and urban schools are 27.95% and 21.22%, respectively.
  10. There are 85,514 voluntary/ contractual/ other teachers in schools. Of these, 60.48% are working in schools located in rural areas. The largest percentage of voluntary teachers is in government schools (36.10%), and the lowest in schools managed by local bodies.
  11. There are 32,855 part-time teachers in the country, of whom 42.90% are females. The percentage of these teachers in rural areas is 41.42.

12. An estimated number of 20,13,525 teachers are teaching at the primary stage. Nearly three-fourths of them are working in rural areas. Female teachers constitute 36.19% of the total teachers at the primary stage.
13. There are 10,36,126 teachers teaching at the upper primary stage, of whom 68.11% are posted in rural areas. Of the total teachers working at the upper primary stage, 32.82% are females.
14. Out of 8,95,445 teachers working at the secondary stage, 29.91% are females. The corresponding percentages in rural and urban areas are 18.93 and 46.01, respectively.
15. There are 2,52,466 teachers working at the higher secondary stage, of whom 25.45% are females. At this stage, a larger proportion of teachers are teaching in urban schools (58.26%) than in rural ones (41.74%).
16. Of the total number of full-time teachers, 72.89% hold permanent posts and the remaining 27.11% are working either in a temporary capacity or on an ad hoc basis.
17. Out of 20,13,512 teachers teaching at the primary stage, 85.13% are trained. As regards their academic qualifications, 48.96% teachers have studied upto the secondary; 23.95% have passed the higher secondary; 26.51% are either graduates or postgraduates and 0.58% have other qualifications.
18. More than 85% of the female teachers working at the primary stage are trained. Nearly half of the teachers possess upto secondary or other qualifications, and 28.71% teachers have either the graduate or postgraduate degree.
19. The percentage of trained teachers teaching at the primary stage and belonging to SC, ST and OBC categories is 86.63, 63.89 and 89.18, respectively.
20. Out of 10,36,116 teachers teaching at the upper primary stage, 86.90% are trained. As regards their academic qualifications, 31.86% teachers have qualifications upto secondary; 18.44% have passed the higher secondary; 48.80% are either graduates or postgraduates and approximately one per cent have other qualifications.
21. 89.19% of the female teachers working at the upper primary stage are trained. More than one-third (36.79%) of the teachers have studied upto secondary only and 46.54% teachers have acquired either the graduate or postgraduate degree.
22. The percentage of trained teachers teaching at the upper primary stage and belonging to SC, ST and OBC categories is 89.52, 68.91 and 88.56, respectively.
23. Out of 8,95,431 teachers teaching at the secondary stage, 91.03% are trained. As regards their academic qualifications, 65.97% of them are graduates and 32.91% are post-graduates.
24. 92.74% of the female teachers working at the secondary stage are trained. Slightly more than one-third of the teachers are postgraduates.
25. The percentage of trained teachers teaching at the secondary stage and belonging to SC, ST and OBC categories is 90.99, 72.81 and 91.70, respectively.
26. Out of 2,52,462 teachers teaching at the higher secondary stage, 83.46% are trained. As regards their academic qualifications, 98.73% of them possess a postgraduate degree.
27. 85.19% of the female teachers working at the higher secondary stage are trained. Almost all the female teachers possess a postgraduate degree.
28. The percentage of trained teachers teaching at the higher secondary stage and belonging to SC, ST and OBC categories is 82.81, 74.72 and 84.32, respectively.
29. The percentage of teachers who have undergone in-service training, teaching at the primary, upper primary, secondary and higher secondary stages is 9.64, 9.79, 11.62 and 9.31, respectively.
30. The percentage of teachers at the upper primary, secondary and higher secondary stages, who are teaching the subject of their postgraduation is 42.12, 62.84 and 76.59, respectively.
31. Out of 2,85,784 teachers teaching science at the secondary stage, 65.08% are science graduates and 8.12% have a postgraduate degree in science.
32. Of the 63,151 teachers teaching science at the higher secondary stage, 63.62% are postgraduates in science.
33. Out of 2,54,237 teachers teaching mathematics at the secondary stage, 57.43% and 6.46%,

respectively, have the graduate and post-graduate degree in mathematics.

34. Of the 26,070 teachers teaching mathematics at the higher secondary stage, 59.64% are postgraduates in mathematics.

### 13.7 Other Forms of Education

#### *Non-Formal Education*

1. Out of 5,86,465 villages in the country, only 91,328 (15.6%) have the facility for Non-Formal Education (NFE).
2. As compared to earlier surveys, the facility of NFE was reported to be available only in 4.74% of villages in the Fourth Survey (1978); a substantial increase to 16.19% was reported in Fifth Survey (1986). In the present Survey, it is marginally decreased to 15.57%.
3. 92.8% of villages, where the facility of NFE is available, have the facility at the primary level. 4.89% of villages have the NFE centres for upper primary classes, and only 2.31% of villages have the facility for both primary and upper primary classes.
4. The Union Territory of Chandigarh and the State of Andhra Pradesh have the facility of NFE in 70.83% and 54.28% villages, respectively, whereas the States of Assam, Madhya Pradesh, Manipur and Uttar Pradesh have the facility of NFE in about a quarter of their villages. There are another 11 States and Union Territories in which less than 5% of the villages have the facility of NFE; the remaining 10 States and Union Territories, viz., Karnataka, Nagaland, Punjab, Sikkim, Tripura, West Bengal, Dadra & Nagar Haveli, Daman and Diu, Lakshadweep and Pondicherry are yet to introduce the scheme of NFE in rural areas.
5. There are, in all, 1,13,942 NFE centres in 91,328 villages. Of these, only 5,560 (4.88%) centres are exclusively for girls, while the majority of them, i.e., 1,02,300 (89.78%) cater to both boys and girls.
6. Of the total NFE centres, 1,06,294 (93.29%) cater to primary classes, 5,020 (4.41%) cater to upper primary classes and the remaining 2,628 (2.31%) cater to Classes I to VIII.
7. In rural areas, 1,06,926 (93.84%) NFE centres are managed by government agencies, while only

7,016 (6.16%) are managed by voluntary agencies.

8. There are 6,602 NFE centres in 4,641 urban areas. Of these, only 483 (7.32%) centres are those which are meant exclusively for girls, while the majority of them, i.e., 5,967 (90.38%) are co-educational.
9. Out of the total NFE centres in urban areas, 5,671 (85.90%) cater to the primary classes only and 653 (9.89%) cater to upper primary classes only, while a mere 278 (4.21%) cater to both primary and upper primary classes.
10. In urban areas, 6,308 (95.55%) NFE centres are managed by the government while the remaining 294 (4.45%) are managed by voluntary agencies.
11. Out of the total of 1,20,544 NFE centres in the country, 4,870 (4.04%) are without any instructor; 1,10,302 (91.51%) are manned by a single teacher; only 3,798 (3.15%) are having two teachers and a mere 1,574 (1.3%) have more than two instructors.
12. A total of 32,80,010 children are reported to be studying in the NFE centres. Of these, 15,11,074 (46.07%) are girls. The majority of these children, i.e., 30,72,412 (93.67%) are from rural areas while 2,07,598 (6.33%) are from urban areas.
13. Out of a total of 15,11,074 girls enrolled in the NFE centres, 14,03,757 (92.90%) belong to rural areas and the remaining 1,07,317 (7.10%) belong to urban areas.

#### *Pre-Primary Education*

14. Of the total 5,86,465 villages in the country, only 1,74,540 (29.76%) villages have the facility of pre-primary in the form of Balwadis/Anganwadis, independent pre-primary schools or attached pre-primary sections.
15. Of the total 1,74,540 villages which have pre-primary facility, 1,58,779 (90.97%) villages have Balwadis/Anganwadis; 7,386 (4.23%) villages have independent pre-primary schools and 17,489 (10.02%) villages have pre-primary classes attached to a regular school.
16. As compared to earlier surveys, the corresponding figures for the Fifth All India Educational Survey (1986) were 87,539 villages having Balwadis/Anganwadis; 5,381 villages

having independent pre-primary schools and 9,087 villages having schools wherein the pre-primary sections are part of a bigger school. This shows that there has been a phenomenal growth in the pre-primary facility.

17. There are in all 3,06,475 pre-primary institutions. Of these 2,67,420 (87.26%) are in rural areas. Of the 2,67,420 pre-primary institutions of rural areas, the majority of them, i.e., 2,34,422 (87.66%) are Balwadis/Anganwadis. A total of 1,25,04,841 children are enrolled in pre-primary schools of rural areas.
18. In 4,641 towns and cities in the country, there are 39,055 pre primary institutions. The majority of these, i.e. 23,490 (60.15%) are Balwadies/Anganwadis; 3,692 (9.45%) are independent pre-primary schools and 11,873 (30.40%) institutions are in the form of schools which have pre-primary sections attached to them. A total of 22,87,519 children are enrolled in pre-primary institutions of urban areas.
19. In all a total of 3,65,276 teachers are teaching in 3,06,475 pre-primary institutions. Of these 3,00,362 (82.23%) are in rural areas and the remaining 64,914 (17.77%) are in urban areas.

### **Education of the Disabled**

20. Of the total 5,86,465 villages in the country, only 241 villages have the facility of special schools catering to various types of disabilities.
21. In these 241 villages there are a total of 272 schools. Of these, 55 are for boys only, 11 for girls only, and the majority of these, i.e. 206 schools are for both boys and girls.
22. In these schools a mere 9,843 children are reported to be enrolled, of which 1,471 (14.94%) are blind; 3,080 (31.29%) are deaf and dumb; 3,000 (30.48%) are orthopaedically handicapped; 1,202 (12.21%) are mentally retarded and 1,090 (11.07%) suffer from various other types of handicaps.
23. Of the total 6,461 towns and cities, a paltry 334 (5.1%) have the facility of special schools catering to children suffering from various types of severe disabilities. In these towns, a total of 630 schools are functioning.
24. In these 630 schools, a total of 37,419 children suffering from various disabilities are reported to be enrolled. Of these, 8,550 (22.85%) are

blind; 14,856 (39.70%) are deaf and dumb; 5,556 (14.85%) suffer from orthopaedical handicaps; 6,210 (16.60%) suffer from mental retardedness and 2,247 (6.00%) children suffer from other locomotive handicaps.

### **Integrated Education Programme for the Disabled**

25. Of the total 8,22,486 schools in the country, only 16,294 (2.0%) schools have the integrated education programme. Of these, 11,412 (70.0%) are in rural areas and 4,882 (30.0%) are in urban areas. Further, only 8,782 (53.9%) primary schools, 4,209 (25.8%) upper primary schools and 3,303 secondary and higher secondary schools have IEP.
26. Of the total 16,294 schools with IEP in the country, 10,068 (61.8%) schools are without a resource teacher. In rural areas, the percentage of primary, upper primary, secondary/higher secondary schools without a special teacher is 73.8, 56.6 and 35.2, respectively. In urban areas, the respective percentage of primary, upper primary, secondary/higher secondary schools without a resource teachers is 60.9, 54.4 and 42.2, respectively.
27. All over the country, a total of 1,36,491 children suffering from mild handicaps are enrolled in the schools for normal children. Of these, 47,483 (34.79%) are in rural areas and 89,008 (65.21%) are in urban areas.

### **13.8 School Buildings**

1. There are 65.07% primary schools which are functioning in pucca buildings. At the other extreme, 0.37% primary schools are functioning in tents and 3.83% in open space.
2. The States of Assam, Manipur, Mizoram, Nagaland, Sikkim and Tripura have pucca buildings in fewer than 20% of the primary schools.
3. Among the upper primary schools, 68.53% are housed in pucca buildings. On the other hand, 1.82% upper primary schools are functioning in open space. Ninety per cent of these are in rural areas.
4. The North-Eastern States, Assam, Manipur, Meghalaya, Mizoram, Nagaland, Tripura and Sikkim, have pucca buildings in even less than 25% of the upper primary schools.

5. 68.61% of the secondary schools are functioning in pucca buildings. In rural areas 63.66% secondary schools are housed in pucca building as against 82.00% in urban areas.
6. In the States of Goa, Haryana and Rajasthan, more than 95% of the secondary schools are functioning in pucca buildings.
7. Among the higher secondary schools, 83.97% are housed in pucca buildings.
8. The Union Territories are relatively better placed than the States so far as the percentages of different categories of schools having pucca buildings are concerned.
9. 95.37% of the primary schools have their own premises and 3.17% are functioning in rented premises. The proportion of schools running in rented premises is appreciably higher in urban areas (22.39%) as compared to rural areas (0.79%). About 40% of the private unaided primary schools are functioning in rented premises.
10. There are 91.52% upper primary schools which are functioning in premises owned by them. In urban areas, 28.30% of the upper primary schools are functioning in rented premises as against 1.57% in rural areas. About 40% of the private unaided upper primary schools are housed in rented premises.
11. Among the secondary schools, 74.60% are functioning in premises owned by them, and 23.16% are housed in rented premises. About 50% of the private unaided and 40% of the private aided secondary schools are functioning in rented premises.
12. 76.21% of the higher secondary schools are housed in premises owned by them; 18.36% are functioning in rented premises and 1,284 (5.43%) are housed in the rent-free premises. About 30% of the private aided and 28% of the private unaided higher secondary schools are functioning in rented premises.
13. Among the primary schools, 37.68% have an adequate number of classrooms, while 14.73% require one additional classroom, 37.02% require two or three additional classrooms, and the rest of the primary schools need four or more additional classrooms.
14. There are 35.18% upper primary schools which have an adequate number of classrooms, while 10.56% need one additional classroom, 48.73% require two to five additional classrooms and the rest of the upper primary schools require more than five additional classrooms.
15. Among the secondary schools, 65.40% do not have an adequate number of classrooms.
16. There are 62.84% higher secondary schools which do not have an adequate number of classrooms.
17. Schools in urban areas are relatively better placed than those in rural areas so far as the percentages of different categories of schools having an adequate number of classrooms are concerned.
18. The proportion of schools having an adequate number of classrooms is higher among schools managed by private agencies than among schools managed by government or local bodies.
19. Expansion potential is available in more than 98% of the schools needing additional classrooms.

#### **Drinking Water**

20. The drinking water facility exists in only 44.23% of the primary schools, 63.47% of the upper primary schools, 83.46% of the secondary schools and 93.56% of the higher secondary schools. The corresponding percentages for different categories of schools in urban areas are 67.24, 83.23, 93.56 and 96.85 as against 41.38, 58.34, 79.72 and 90.32 in rural areas.
21. The position of drinking-water facilities in schools is much better in the Union Territories as compared to the States.
22. The proportion of schools having drinking-water facilities is relatively higher among schools managed by private agencies than among schools managed by government or local bodies.

#### **Urinals**

23. Among the primary schools, 18.93% have urinal facilities, including 8.66% schools with the facility of separate urinals for girls. The corresponding figures for urban areas are 58.53% and 33.85% as against 14.02% and 5.54% for rural areas.
24. There are 48.44% upper primary schools which have urinal facilities, but separate urinals for girls exist in only 31.54% of the upper primary schools. The corresponding figures for urban

areas are 78.73% and 58.65% as against 40.58% and 24.51% for rural areas.

25. Among the secondary schools, 76.96% have urinal facilities, including 62.56% schools having the facility of separate urinals for girls.
26. The urinal facility is available in more than 92% of the higher secondary schools but separate urinals for girls exist only in 77.94% of the schools.
27. The proportion of schools having urinal facilities as well as the proportion of schools with separate urinals for girls is relatively higher among schools managed by private agencies than among schools managed by the government or by local bodies.
28. The Union Territories are relatively much better placed than the States as far as schools with urinal facilities or with separate urinals for girls are concerned.

#### **Lavatories**

29. Among the primary schools, 10.86% have lavatory facilities, including 5.12% schools with separate lavatories for girls. The corresponding figures for rural areas are as low as 6.40% and 2.40%, respectively.
30. About 30% of the upper primary schools have lavatory facilities but separate lavatories for girls exist in only 17.17% schools. The corresponding figures for rural areas are 19.97% and 9.26% as against 68.05% and 47.62% for urban areas.
31. Lavatory facilities are available in 57.35% of the secondary schools, including 40.81% schools with separate lavatories for girls. The corresponding figures for rural areas are 47.01% and 30.55% as against 85.31% and 68.57% for urban areas.
32. About four-fifths of the higher secondary schools have lavatory facilities, including 62.84% schools with separate lavatories for girls.
33. The Union Territories are relatively much better placed than the States so far as schools with lavatory facilities as well as schools with separate lavatories for girls are concerned.
34. The schools managed by private agencies are relatively better placed than the schools managed by the government or local bodies so

far as lavatory facilities or separate lavatories for girls are concerned.

### **13.9 Facilities**

#### **Libraries**

1. There are 49.01% schools with libraries in the country; the percentages for rural and urban schools are 47.52 and 57.23, respectively.
2. The percentage of primary schools having libraries is 40.52, while 60.04% upper primary, 80.65% secondary and 90.21% higher secondary schools have this facility.
3. In rural areas, libraries are available in 40.87% primary, 58.22% upper primary, 79.03% secondary, and 89.36% higher secondary schools as against 37.69% primary, 67.01% upper primary, 85.04% secondary and 91.03% higher secondary schools in urban areas.
4. Only 13.05% of the secondary schools have full-time librarians whereas the corresponding percentage for higher secondary schools is 46.30.
5. The percentages of the primary schools subscribing to newspapers and magazines are 4.57 and 7.24, respectively. The corresponding percentages for upper primary, secondary and higher secondary schools are 29.76 and 23.12; 75.40 and 52.36; and 93.26 and 75.05.
6. The percentages of the schools having book banks are 26.25 for primary, 36.24 for upper primary, 51.44 for secondary, and 65.61 for higher secondary schools.

#### **Blackboards**

7. Nearly 76% sections at all the school stages have usable blackboards whereas 24.36% sections do not have any blackboards.
8. Usable blackboards are available in 70.71% sections in rural schools as against 92.52% in urban schools.
9. The percentages of the sections with usable blackboards are 65.39 at the primary, 82.99 at the upper primary, 94.44 at the secondary, and 97.79 at the higher secondary stage.
10. In rural areas, the percentages of the sections without blackboards are 37.65 in the primary, 20.61 in upper primary, 7.12 in secondary, and 3.59 in the higher secondary stages as against

14.95 in primary, 6.52 in upper primary, 2.64 in secondary, and 1.27 in higher secondary sections in urban schools.

### **Supply of Chalk**

11. There is an adequate supply of chalk in 60.48% primary and 75.02% upper primary schools.
12. In rural areas, there is an adequate supply of chalk in 58.48% primary and 72.05% upper primary schools as against 76.59% primary and 86.45% upper primary urban schools.

### **Availability of Dusters**

13. 49.41% primary schools have an adequate supply of dusters while the corresponding percentage for upper primary schools is 65.06.
14. In rural areas, this facility is available in 46.85% primary and 60.89% upper primary schools as against 70.03% primary and 81.12% upper primary schools in urban areas.

### **Furniture**

15. 29.52% sections at all the school stages do not have any mats/furniture for students. The percentage of the sections having inadequate mats/furniture for students is 15.64%, while remaining 54.84% sections have adequate mats/furniture for pupils.
16. In 35.18% sections of the primary schools no mats/furniture is available; the percentages for the sections at the upper primary, secondary and higher secondary stages are 30.09, 11.21, and 6.57, respectively.
17. In rural areas, 37.80% sections in primary schools, 38.63% sections in upper primary, 13.32% sections in secondary, and 8.61% sections in the higher secondary schools do not have mats/furniture for pupils as against 18.23% sections in primary, 16.97% sections in upper primary, 7.25% sections in secondary and 5.18% sections in higher secondary schools in urban areas.
18. The percentage of sections without any furniture for the teachers is 36.56; the percentages for sections in the primary, upper primary, secondary and higher secondary schools are 47.02, 28.50, 18.33 and 14.26, respectively.

### **Storing Facilities**

19. The highest percentage of schools without any almirahs or trunks for storing records is 27.95 in the primary schools whereas this percentage for upper primary schools is 11.14, and for secondary schools, 5.41, the lowest (2.78) being for higher secondary schools. This indicates that as the level of education rises this facility also increases.

### **Contingency Funds**

20. Contingency funds are available in 27.23% primary, 36.12% upper primary, 50.50% secondary and 60.98% higher secondary schools.

### **Playground and Sports/Games Material and Students Participation**

21. There are 4,43,628 schools (53.94%) in the country which have the playground facility. Out of these, 3,66,160 schools (82.54%) have their own playground, while 3,55,643 (80.17%) schools have playgrounds within the school premises. 3,57,260 schools (80.53%) have playgrounds in usable condition, and 2,84,692 schools (64.17%) have adequate playgrounds.
22. There are 3,06,807 schools (37.30%) in the country where children do not participate in games after school hours. In 31.46% schools, only upto 10% children participate; in 23.52% schools, children's participation varies from 11% to 50%; and in only 7.72% schools more than 50%; children participate after school hours.

### **Incentives**

#### **Midday Meals**

23. Middy meals are provided in 13.91% primary, 18.76% upper primary 8.73% secondary and 11.47% higher secondary schools.
24. In rural areas, 13.95% of the primary, 18.79% of the upper primary, 8.68% of the secondary and 11.74% of the higher secondary schools have provision for midday meals as against 13.59% primary, 18.68% upper primary, 8.88% secondary, and 11.20% higher secondary schools in urban areas.
25. There are 91,25,082 beneficiaries of the midday meals scheme in all the schools. Of these, 62.32% are studying in rural schools, and 45.70% are girls. Further, 18.99% of the

beneficiaries belong to Scheduled Castes and 10.03% to Scheduled Tribes, which together accounts for 29.02% of the beneficiaries.

### **Free Uniforms**

26. Free Uniforms to students are provided in 29.26% primary, 29.52% upper primary, 16.77% secondary and 20.22% higher secondary schools.
27. In rural areas, the incentive scheme of free uniforms to students is available in 30.15% primary, 31.18% upper primary, 15.76% secondary and 17.78% higher secondary schools as against 22.03% primary, 23.13% upper primary, 22.34% secondary and 22.57% higher secondary schools in urban areas.
28. At all stages of school education taken together, 84,98,982 students are getting free uniforms. Among these beneficiaries, 21.42% belong to Scheduled Castes and 12.36% to Scheduled Tribes. Girls constitute 51.50% of the beneficiaries. Further, among the beneficiaries, 71.70% are studying in rural schools.

### **Free Textbooks**

29. The facility of free textbooks to students exists in 54.56% primary, 52.57% upper primary, 40.16% secondary and 39.67% higher secondary schools.
30. In rural areas, free textbooks are supplied to 55.78% primary, 55.76% upper primary, 41.20% secondary and 41.97% higher secondary schools as compared to 44.73% primary, 40.30% upper primary, 37.31% secondary and 37.45% higher secondary schools in urban areas.
31. At all stages of education, 1,77,94,631 children are getting free textbooks. Of these beneficiaries, 65.50% are studying in rural schools. Among the beneficiaries 44.70% are girls. Further, 22.93% beneficiaries belong to Scheduled Castes and 10.61% to Scheduled Tribes.

### **Attendance Scholarship for Girls**

32. The incentive scheme of attendance scholarship for girls is available in 14.01% primary, 20.85% upper primary, 10.37% secondary and 10.40% higher secondary schools.
33. In rural areas, attendance scholarship for girls is provided in 14.76% primary, 23.60% upper

primary, 11.68% secondary and 11.82% higher secondary schools as against 7.99% primary, 10.28% upper primary, 6.84% secondary and 9.03% higher secondary schools in urban areas.

34. The total beneficiaries of this scheme are 19,66,968 girls. Of these beneficiaries, 75.66% are studying in rural schools. Further, 32.13% of the beneficiaries belong to Scheduled Caste and 13.42% to Scheduled Tribes.

### **Medical Facilities**

35. The facility of Vaccination/Inoculation is provided almost in equal percentages in upper primary (54.94%), secondary (56.88%) and higher secondary (55.41%) schools but relatively it is less in primary schools (43.65%).
36. The provision for medical check-up of students is available in more than 50% upper primary (51.56%), secondary (53.74%) and higher secondary (60.33%) schools but it is available only in 38.91% primary schools.

### **13.10 Languages and Media of Instruction in Schools**

1. About 92% schools at the primary stage and about 89% at the upper primary stage are imparting education through the mother tongue.
2. About 82% schools at the upper primary stage and 80% at the secondary stage follow the three-language formula.
3. There are 41 languages which are used in Indian schools as the first, the second or the third language.
4. 26 languages are used as the first language at the primary stage, 23 at the upper primary stage and 25 at the secondary stage.
5. 26 languages are used as the second language at the primary stage and at the upper primary stage, and 32 at the secondary stage.
6. 21 languages at the primary stage, 30 at the upper primary stage and 26 at the secondary stage are used as the third language.
7. 40.49% schools at the primary stage, 35.97% at the upper primary stage and 28.50% at the secondary stage are teaching Hindi as the first language.
8. 2.09% schools are teaching English as the first language at the primary stage, 4.25% at the

upper primary stage and 6.57% at the secondary stage.

9. 34.85% schools at the primary stage, 95.56% at the upper primary stage and 96.65% at the secondary stage offer the second language.
10. 9.28% schools at the primary stage, 88% at the upper primary stage and 80.18% at the secondary stage offer the third language
11. 60.33% schools at the primary stage, 55.05% at the upper primary and 54.12% at the secondary stage offer English as the second language. Other prominent languages taught as the second language are Hindi, Sanskrit and Urdu.
12. 69.67% schools at the primary stage, 38.02% at the upper primary stage and 35.79% at the secondary stage offer English as the third language.
13. The number of languages used as media of instruction is 33 at the primary stage, 25 at the upper primary stage, 21 at the secondary stage and 18 at the higher secondary stage.
14. 30 States/Union Territories are imparting education in other than the majority language, both at the primary and at the upper primary stages of school education, to cater to the needs of linguistic minorities.
15. 31 States/UTs at the primary stage and 30 States/UTs at the upper primary and secondary stages have the provision of teaching more than one language as second language in their schools. The number of schools, though, that have this facility is very small.
16. There are 28 States/UTs at the primary stage, 30 States/UTs at the upper primary stage and 28 States/UTs at the secondary stage which have the facility of teaching the third language in their schools.

### **13.11 Income, Expenditure and Fee Structure in Schools**

1. There are 14 States/ UTs which provide free education at the primary stage. These are Andhra Pradesh, Bihar, Goa, Gujarat, Kerala, Maharashtra, Orissa, Sikkim, Tamil Nadu, West Bengal, Dadra & Nagar Haveli, Daman & Diu, Lakshadweep and Pondicherry.
2. There are 8 States/UTs which provide free

education at the upper primary stage. These are Goa, Gujarat, Maharashtra, and Pondicherry.

3. The seven States/UTs providing free education at the secondary stage are Goa, Gujarat, Maharashtra, Sikkim, Daman & Diu, Dadra & Nagar Haveli and Lakshadweep.
4. There are only four States/UTs in the country, namely, Goa, Sikkim, Dadra & Nagar Haveli and Lakshadweep, which provide free education at all the four stages of school education, that is, from primary to higher secondary.
5. The State of Maharashtra is the only State in the country which provides free education to the wards of primary school teachers. In Rajasthan, fee is charged according to the income of the guardian, non-income tax payee being charged fee at 50% of the rate.
6. A number of States give a special concession in the form of exempting Scheduled Caste and Scheduled Tribe children from payment of school tuition fee and in some States, from both tuition fee and funds. The States/UTs of Goa, Gujarat, Karnataka, Maharashtra, Mizoram, Orissa, Sikkim, Dadra & Nagar Haveli, and Lakshadweep do not charge any amount in any form upto Class XII from students belonging to Scheduled Castes and Scheduled Tribes. This is true for both boys and girls. The States/UTs of Andhra Pradesh, Arunachal Pradesh, Assam, Madhya Pradesh, Rajasthan, Uttar Pradesh, Chandigarh and Delhi do not charge any tuition fee upto Class XII from these students but other funds are being charged. In Rajasthan, development fund is charged at the rate of 50% while in Uttar Pradesh they are exempted from paying the development fee, which is the major part of the total fee charged. The State/UT of Himachal Pradesh and Daman & Diu do not charge any tuition fee from girl students belonging to Scheduled Castes and Scheduled Tribes. But these States do charge tuition fee from the boys of these communities at the same rate as they charge from the boys of the general category.
7. To motivate girls to attend school, a number of States give them a special concession. The States of Goa, Gujarat, Maharashtra and Rajasthan and the UT of Daman & Diu do not charge any kind of fee upto Class XII from girl students. In the case of Rajasthan, this exemption is only for those girls whose parents are

- not income-tax payees. The States of Andhra Pradesh, Arunachal Pradesh, Assam, Himachal Pradesh, Madhya Pradesh and Rajasthan and the UTs of Chandigarh, Daman & Diu do not charge any tuition fee from girl students upto Class XII.
8. The main source of income for the districts is government grants which account for 96.23% of the total income. Management hardly contributes to the income as it accounts only for 0.84%. The fee contributes only 1.17% and other funds also contribute to the tune of 1.72%; the others include development fund, electricity charges.
  9. Of the total recurring expenditure, 97.01%, is incurred towards the salary of teaching and non-teaching staff whereas the amount available under the remaining heads is only 2.99%. The proportion of amount spent on games and sports, libraries and laboratories (consumable) is only 0.48% which is very meagre.
  10. The major proportion (68.52%) of the non-recurring expenditure is spent on construction activities. Another 12.60% is spent on furniture and office equipment while just 5.92% is spent on the purchase of laboratory equipment and games material.
  11. The per-student expenditure at the National level for students studying in primary to higher secondary stages in government, local body and private aided managed schools is found to be Rs 855.21. It is Rs 774.48 for government schools and Rs 1,185.84 for private aided schools.
  12. At the National level, for all schools, the recurring and non-recurring expenditures are Rs 827.56 and Rs 27.65 respectively. The corresponding figures for government schools are Rs 751.57 and Rs 22.92, and for private aided schools, Rs 1,138.66 and Rs 47.18, respectively.
  13. The per-student expenditure is the maximum in Mizoram (Rs 5,294.53) and the minimum in Orissa (Rs 364.01). Further, the per-student expenditure is much higher than the National average of Rs 855.21 in the North-Eastern States.
  14. The government schools, in 20 States out of 28 States, incurred expenditure more than the National average of Rs 774.48. Mizoram spent as high as Rs 5,406.20.
  15. In the case of private aided schools there are 15 States/Union Territories which incurred more expenditure per student per year than the National average of Rs 1,185.84. □

## Associate Project Team

### NCERT

#### Project Associates

1. Shri Arvind Kumar Sinha  
(from 17.5.94 to 17.8.94)
2. Shri Vishva Bandhu  
(from 4.1.94 to 25.10.95)
3. Dr (Ms) Alka Chaudhary  
(from 4.4.94 to 25.11.94)
4. Shri Gulam Haider  
(from 4.4.94 to 31.3.96)
5. Dr Saroj Kumar Adhikari  
(from 18.3.94 to 27.1.97)
6. Dr Gauri Modwel  
(from 12.4.94 to 30.8.96)
7. Dr Sayed Zahid Mumtaz  
(from 6.5.94 to 28.2.97)
8. Shri Dharendra Kumar Kar  
(from 27.5.94 to 31.3.96)
9. Dr Ajay Kumar Sharma  
(from 8.11.96 to 30.6.97)
10. Ms Krishna Panda  
(from 5.11.96 to 30.3.97)

#### EDP Staff

1. Shri Mohd. Arif Sadiq  
(upto 2.12.97)
2. Shri Vishva Bandhu  
(from 1.4.97)
3. Shri B.V. Rama Reddy  
(from 20.12.96 to 3.12.97)
4. Shri K. Murugan  
(from 15.4.97)

### HRDI Division, NICHQ

1. Shri P.K. Srivastava  
Senior Systems Analyst
2. Dr S.S. Singh  
Senior Systems Analyst
3. Shri Harvinder Singh  
Systems Analyst
4. Ms Veena Malhotra  
Systems Analyst
5. Shri Kamal Singh  
Systems Analyst
6. Shri M. Subha Rao  
Programmer
7. Shri Vinod Kumar Verma  
Tradesman E

#### SIF-1 Report Generation at RCC Calcutta

1. Dr Subir Roy, Acting Director
2. Shri I. Basu, Systems Manager  
and His Colleagues

#### SIF-2 Report Generation at A & M Division, NICHQ

1. Shri R.K. Gupta  
Senior Technical Director
2. Shri V.V. Ramana  
Senior Systems Analyst
3. Ms Rama Hariharan  
Senior Systems Analyst
4. Ms Daizi Gupta, Programmer
5. Shri Mohd. Rafey, Ad hoc Programmer

#### EFF Report Generation at NIC, Pune

1. Ms P.V. Kamat  
Technical Director
2. Shri Ashish Mirajkar  
Systems Analyst

## State Survey Officers

1. Shri P. Veerabhadra Reddy  
Deputy Director  
School Education  
Andhra Pradesh
2. Shri N. Dutta  
Joint Director of Public  
Instruction  
Arunachal Pradesh
3. Shri H.K. Sharma  
Joint Director of School Education  
Assam
4. Shri Tulanath Choudhary  
Department of Primary, Secondary  
and Adult Education  
Bihar
5. Shri K. Verlekar  
Joint Director of Education  
Goa
6. Shri P.V. Patel  
Director of  
Primary Education  
Gujarat
7. (i) Shri J. P. Gupta  
Deputy Director of Education  
Haryana  
(ii) Shri Ashok Bhalla  
Deputy Director of Education  
Haryana
8. (i) Shri R. S. Thakur  
Deputy Director of Education  
Himachal Pradesh  
(ii) Shri K.D. Upreti  
Deputy Director of Education  
Himachal Pradesh
9. (i) Shri G.H. Gilkar  
Deputy Director of Education  
Jammu & Kashmir  
(ii) Shri G.M. Bhatt  
Deputy Director of Education  
Jammu & Kashmir  
(iii) Shri B.K. Pandita  
Joint Director of Education  
Jammu & Kashmir
10. Ms M. Jalajabai  
Joint Director of Public Instruction  
Karnataka
11. (i) Ms J. Santhakumari  
Additional Director of  
Public Instruction  
Kerala  
(ii) Shri M. Gopalan  
Additional Director of  
Public Instruction  
Kerala
12. (i) Dr U.S. Chaturvedi  
Additional Director  
of Public Instruction  
Madhya Pradesh  
(ii) Shri P.P. Singh  
Director of Public Instruction  
Madhya Pradesh
13. Shri A.D. Sadawarte  
Divisional Chairman  
Boafd of Secondary and Higher  
Secondary Education  
Maharashtra
14. Shri Th. Shamungou Singh  
Director  
School Education  
Manipur
15. Shri S.R. Jyrwa  
Statistical Officer  
Office of D.P.I.  
Meghalaya
16. Shri F. Lallura  
Director of School Education  
Mizoram
17. Shri K. John Lohe  
Research Officer  
Directorate of Education  
Nagaland
18. (i) Shri Laxmi Narian Mohapatra  
Deputy Director  
Elementary Education  
Orissa  
(ii) Dr Phani Mohanty  
Deputy Director  
Elementary Education  
Orissa
19. (i) Ms S. Hundal  
Deputy Director  
SCERT, Punjab  
(ii) Shri A.S. Sawhney  
SCERT, Punjab
20. (i) Shri K.C. Maloo  
Director, SIERT  
Rajasthan  
(ii) Shri S.C. Purohit  
Director, SIERT  
Rajasthan

21. (i) Shri Ram Krishna Sharma  
Deputy Director of Education  
Sikkim  
(ii) Shri O.P. Basnett  
Deputy Director of Education  
Sikkim
22. (i) Shri M. Murugesan  
Assistant Director  
Department of School Education  
Tamil Nadu  
(ii) Ms Manjula Sivaraman  
Deputy Director of  
Secondary Education  
Tamil Nadu
23. (i) Shri B.K. Sarkhel  
Senior Research Officer  
Directorate of School Education  
Tripura  
(ii) Shri S. Roy Choudhury  
Statistical Officer  
Directorate of School Education  
Tripura
24. (i) Shri U.N.Mishra  
Deputy Director of Education  
Uttar Pradesh  
(ii) Shri A.C. Shukla  
Deputy Director of Education  
Uttar Pradesh
25. Dr A.K. Das  
Additional Director  
School Education  
West Bengal
26. Shri K.N. Khanduri  
Assistant Director of Education  
A & N Islands
27. Ms. Pritpal Kaur  
Assistant Director  
Vocational Education Unit  
Chandigarh
28. (i) Shri V.B. Shukla  
Assistant Director of Education  
Dadra & Nagar Haveli  
(ii) Shri M.C. Solanki  
Statistical Officer  
Directorate of Education  
Dadra & Nagar Haveli
29. Shri J. Pandey  
Statistical Officer  
Tribal Sub Plan Cell, Collectorate  
Daman & Diu
30. (i) Shri I.P. Agarwal  
Assistant Director of Education  
Delhi  
(ii) Dr R.K. Sharma  
Assistant Director of Education  
Delhi
31. (i) Shri N.P. Kasmikoya  
Education Officer  
Directorate of Education  
Lakshadweep  
(ii) Shri E.P. Muthukoya  
SEO  
Directorate of Education  
Lakshadweep  
(iii) Shri D. Verma  
Senior Administrative Officer  
Directorate of Education  
Lakshadweep
32. Shri P. Muthu  
Joint Director of Education  
Pondicherry

## NIC Officers

### NIC Headquarters

1. Dr N. Seshagiri  
Special Secretary and  
Director General  
New Delhi
2. Dr Y.K. Sharma  
Deputy Director General  
New Delhi

### Regional Centres

1. Dr N.V. Koteswara Rao

New District Name \_\_\_\_\_

New Tehsil Name \_\_\_\_\_

New C.D. Block Name \_\_\_\_\_

PLEASE READ THE INSTRUCTIONS GIVEN OVERLEAF BEFORE FILLING  
THIS FORM

### **Instructions**

**Introduction**

The present educational survey, sixth in the series, is being conducted throughout the country. In this survey data are being collected from each and every village, city/town and school to assess the status of educational facilities and their utilization.

**Village Information Form (VIF)**

This Form seeks information relating to population, schooling and other educational facilities in the revenue village as on 30-09-1993.

**Your Help Needed**

The quality of the results of this survey depends on the accuracy and completeness of the information to be furnished by you. Therefore, please answer each item carefully and accurately.

**How to Answer**

[a] This Form is to be filled in by the headmaster of the recognised school of the village with the help of Village Officer/Patwari.

[b] Please use the international numerals while supplying the information in numbers.

[c] The information collected from you will be computerised by the National Informatics Centre. Take extra care to read the procedures of supplying the information which are printed in italics.

[d] In certain items the information is to be provided after converting it into numeric codes.

[e] Certain terms are defined and explained below. Please read these before answering.

### **Definition and Explanation for Item 3**

(1) Habitation : A habitation is

(a) a distinct cluster of houses existing in a compact and contiguous manner;

(b) with a local name; and

(c) its population should not be less than 25 in plain areas and not less than 10 in hilly/desert/sparsely populated areas

(2) Any habitation with population less than 10 in hilly /desert /sparsely populated areas or with population less than 25 in plain areas may not be given a separate status of a 'habitation' and its population be included in the nearest habitation of the same village. But this condition will not apply to a village with one habitation only.

(3) The distance between a habitation and a school is the convenient walking distance between the central point of the habitation and the school.

(4) A village may have one or more than one habitation, except when it is a deserted/ Bechirag village.

**Thank you for your cooperation**

**VILLAGE INFORMATION FORM (VIF)**

1. Give actual population, if available, otherwise give estimated population of the village as on 30 September 1993.

Population : \_\_\_\_\_

2. Number of recognised school(s) in the village as on 30 September 1993.

Types of Recognised Schools	Number of Schools
(a) Primary Schools	_____
(b) Upper Primary (Middle) Schools	_____
(c) Secondary Schools	_____
(d) Higher Secondary Schools (Senior Secondary Schools/PUC/ Inter/Junior Colleges)	_____
(e) Degree colleges having Classes XI and XII/PUC attached	_____

3. Population and schooling facilities in each habitation of the village.

- (a) Number of habitations \_\_\_\_\_
- (b) Give details of habitations in the given table on the next page.
- Start with main habitation.
  - Distance of schooling facility from habitation is to be given up to one decimal place of km.
  - In column 4  
If SC population is 50% or more, write 1  
If ST population is 50% or more, write 2  
Otherwise, write 3.

(contd.)

[illegible]

**Note:** (i) The degree colleges with attached Classes XI and XII/PUC are to be considered in Columns 5, 6, 7, 14 and 15 only.

(ii) If the village has more habitations, use a separate sheet with the same format. Please attach this sheet with this form.

4. Number of Unrecognised schools in the village as on 30.09.93. \_\_\_\_\_

### Type of Unrecognised Schools

Number of Schools

(a) **Primary Schools**

(b) Upper Primary (Middle) Schools

(c) Secondary Schools

(d) Higher Secondary Schools (Senior Secondary Schools/PUC/Inter/Junior Colleges)

5. Non-Formal Education Centres in the village as on 30-09-1993.

— Include only those Centres which cater to the children of school-going age (6-14 years).

— Write 0 if there is no Centre and proceed to Question 6

(a) Number of Centres: \_\_\_\_\_

(b) In case the village has Non-Formal Education (NFE) Centre(s) please provide the following information.

- Provide information for each NFE Centre separately.
- Under Column 3 write 1 for Primary; 2 for Upper Primary; and 3 for both Primary and Upper Primary.
- Under Column 4 write 1 for government; and 2 for voluntary agencies.
- Under Column 5 write 1 for boys; 2 for girls; and 3 for both boys and girls.

Sl. No.	Name of the NFE Centre	Level Catering to	Management of Centre	Type of Centre	No of Children in age-group				No of Instructors
					6 to below 11		11 to below 14		
					Boys	Girls	Boys	Girls	
1	2	3	4	5	6	7	8	9	10

6 School(s) for the disabled (handicapped) children in the village as on 30-09-1993.

Write 0 if there is no school and proceed to Question 7

(a) Number of schools : \_\_\_\_\_

(b) In case the village has schools for disabled children, please list them along with other information in the following table.

- Provide information for each school separately.
- Under Column 3 write 1 for boys; 2 for girls and 3 for both boys and girls.

Sl. No.	Name of the School	Type of School	Disability-wise Enrolment				
			Blind	Deaf and Dumb	Orthopaedically Handicapped	Mentally Retarded	Others
1	2	3	4	5	6	7	8

- 7 (a) Whether the facility for pre-primary education exists in the village?  
(write 1 for 'Yes', 2 for 'No' in the box)

- (b) If 'yes', please give the following information as on 30-09-1993.

Sl. No.	Type of facility	Number of Institutions	Number of teachers		Number of children	
			Male	Female	Boys	Girls
1	2	3	4	5	6	7
1.	Balwadi/Anganwadi					
2.	Independent Pre-primary School					
3.	Pre-primary stage/classes attached to a school (including LKG, UKG and Nursery)

**Introduction**

The present educational survey, sixth in the series, is being conducted throughout the country. In this survey data are being collected from each and every village, city/town and school to assess the status of educational facilities and their utilization.

**Urban Information  
Form (UIF)**

This Form seeks information relating to population, schooling and other educational facilities in the city/town as on 30 September 1993.

**Your Help Needed**

The quality of the results of this survey depends on the accuracy and completeness of the information to be furnished by you. **Therefore, please answer each question carefully and accurately.**

**How to Answer**

[a] Please use the **international numerals** while supplying the information in numbers.

[b] The information collected from you will be computerised by the National Informatics Centre. Take extra care to read the procedures of supplying the information which are printed in italics.

[c] In certain items the information is to be provided after converting it into numeric codes.

**Thank you for your cooperation.**

### Urban Information Form (UIF)

1. Give actual population, if available, otherwise give estimated population of the city/town as on 30 September 1993.

Population : \_\_\_\_\_

2. Number of recognised school(s) in the city/town as on 30 September 1993.

Types of Recognised Schools		Number of Schools
(a)	Primary Schools	_____
(b)	Upper Primary (Middle) Schools	_____
(c)	Secondary Schools	_____
(d)	Higher Secondary Schools (Senior Secondary Schools/PUC/ Inter/Junior Colleges)	_____
(e)	Degree colleges having Classes XI and XII/PUC attached	_____

3. Non-formal Education Centres in the city/town as on 30-09-1993.

- Include only those Centres which cater to the children of school-going age (6-14 years).

- Write 0 if there is no Centre and proceed to Question 4.

- (a) Number of Centres : \_\_\_\_\_

- (b) In case the city/town has Non-Formal Education (NFE) Centre(s), please provide the following information.

- Provide information for each NFE Centre separately.

- Under Column 3 write 1 for Primary; 2 for Upper Primary; 3 for both Primary and Upper Primary.

- Under Column 4 write 1 for government; and 2 for voluntary agencies.

- Under Column 5 write 1 for boys; 2 for girls; 3 for both boys and girls.

[illegible]

4. School(s) for the disabled (handicapped) children in the city/town as on 30-09-1993.

- Write 0 if there is no school and proceed to Question 5.

- (a) Number of schools : \_\_\_\_\_

- (b) In case the city/town has schools for disabled children, please list them along with other information in the following table.

- Provide information for each institution separately.  
 — Under Column 3 write 1 for boys; 2 for girls; and 3 for both boys and girls.

Sl. No.	Name of the School	Type of School	Disability-wise Enrolment				Others
			Blind	Deaf and Dumb	Orthopaedically Handicapped	Mentally Retarded	
1	2	3	4	5	6	7	8

5. (a) Whether the facility for pre-primary education exists in your city/town?

(Write 1 for 'Yes'; 2 for 'No' in the box)

- (b) If 'yes', please give the following information as on 30-09-1993.

Sl. No.	Type of facility	Number of Institutions	Number of teachers		Number of children	
			Male	Female	Boys	Girls
1	2	3	4	5	6	7
1.	Balwadi/Anganwadi

## **INSTRUCTIONS**

### **Introduction**

The present educational survey, sixth in the series, is being conducted throughout the country. In this survey data are being collected from each and every village, city/town and school to assess the status of educational facilities and their utilization.

### **Teacher Information Form (TIF)**

This Form seeks information relating to educational qualifications, experience, specialisation and other activities of the teachers as on 30.9.1993. All full-time teachers, voluntary teachers, contractual teachers and other similar teachers are to fill this Form.

### **Your Help Needed**

The quality of the results of this survey depends on the accuracy and completeness of the information to be furnished by you. **Therefore, please answer the questions carefully and accurately.**

### **How to Answer**

- (a) Please use the **international numerals** while supplying the information in numbers.
- (b) The information collected from you will be computerised by the National Informatics Centre.
- (c) In most of the items two or more alternative responses have been provided. Each alternative has been provided with a code. Within the brackets is the code for that response. In addition, a blank box is provided in the right margin.

### **Writing the response code in box is essential for computerisation**

In such items, only one alternative is applicable to your school situation. Please put a tick mark in the bracket (✓) of the applicable response and write its code in the box provided in the right margin.

**Example:** Management of school

- Government ( 1 )
- Local body ( 2 )
- Private aided ( 3 )
- Private unaided ( 4 )

4

In this example, the applicable response is 'Private Unaided'. A tick in the bracket has been put against 'Private Unaided' and the code 4 is written in the box.

- (d) Certain terms need elaboration and explanation. These are given below. Please read these before answering the questions.

### **Definition and Explanation**

#### **Item 3**

**Permanent** teachers are those who are working against regular posts and have received the orders from the concerned authority declaring them Permanent.

Teachers working against regular posts but who have not been given written orders as Permanent will be treated as **Temporary**.

The teachers who are working against Non-regular (temporary) posts, will be treated as **Ad-hoc**.

**Thank you for your cooperation.**

### Teacher Information Form (TIF)

**1. Stage at which teaching predominantly.**

*Choose the stage at which you are devoting maximum time per week. If you are teaching at more than one stage and you are devoting equal time at two or three stages then please choose the highest stage at which you are teaching.*

- |   |     |  |
|---|-----|--|

## INSTRUCTIONS

### Introduction

The present educational survey, sixth in the series, is being conducted throughout the country. In this survey data are being collected from each and every village, city/town and school to assess the status of educational facilities and their utilization.

### School Information Form-1 (SIF-1)

This Form seeks information about enrolment in different classes, teaching posts sanctioned and other facilities as on 30.9.1993 from recognised schools/Junior colleges/Intermediate colleges/Pre-University colleges not attached to degree colleges. This Form will be completed by the Headmaster/Principal of the school/college.

### Your Help Needed

The quality of the results of this survey depends on the accuracy and completeness of the information to be furnished by you. **Therefore, please fill in each item of this Form carefully and accurately.**

### How to Answer

- (a) Please use the **international numerals** while supplying the information in numbers.
- (b) The information collected from you will be computerised by the **National Informatics Centre**. Take extra care to read the procedure of supplying the information which is printed in *italics* along with the questions.
- (c) Most of the items have been provided with two or more alternative responses. Each alternative has been provided with a code. The number in brackets is the code for that response. In addition, a blank box is provided in the right margin for writing the response code.

### Writing the response code in box is essential

In such items, only one alternative is applicable to your school situation. Please put a tick mark in the brackets (✓) of the applicable response and write its code in the box provided in the right margin.

**Example:** Management of school

- Government ( 1 )
- Local body ( ☒ 2 )
- Private aided ( 3 )
- Private unaided ( 4 )

2

In this example, the applicable response is 'Local body'. A tick in the bracket has been put against 'Local body' and the code 2 is written in the box.

- (d) Regarding items 2 and 4 certain terms are defined below. Please read these before answering the questions.
- (e) **The part A of this Form is to be filled in by all the schools whereas part B of the Form is to be responded by Secondary/Higher Secondary/Junior Colleges, etc.**

### Definition and Explanation for Certain Terms

#### Item 2

**Government Schools :** All schools run by the state government, central government, public sector undertakings or autonomous organisations completely financed by the government.

**Local Body Schools :** All schools run by the municipal corporations, municipal committees, notified area committees, zila parishads, panchayat samities, cantonment boards, etc.

**Private Aided Schools :** All schools run by private organisations or agencies receiving maintenance grant from the government or local bodies.

**Private Unaided Schools :** All schools managed by private organisations or agencies and not receiving maintenance grant from the government or local bodies.

#### Item 4

**Boys School :** A school is 'school for boys' if boys are admitted to all classes and admission of girls is restricted to some specific classes only.

**Girls School :** Similarly, a school is 'school for girls' if girls are admitted to all classes but admission of boys is restricted to some specific classes only.

**Co-educational School :** A school is co-educational, if both boys and girls are admitted to all the classes in the school.

**Thank you for your cooperation.**

**School Information Form - 1****Part A***( To be filled in by all schools )*

1. Area in which school is located

Rural ( 1 )      Urban ( 2 )

2. (a) Management of school

Government ( 1 )

Local body ( 2 )

Private aided ( 3 )

Private unaided ( 4 )

(b) If Government, the school is managed by

State Government ( 1 )

Navodaya Vidyalaya Samiti ( 2 )

Kendriya Vidyalaya Sangathan ( 3 )

Other Central Government Agency ( 4 )

3. (a) Does the school have a minority community status?

Yes ( 1 )      No ( 2 )

(b) If 'Yes', is it a

Religious minority? ( 1 )

Linguistic minority? ( 2 )

Both Religious and Linguistic minority? ( 3 )

4. Type of School

Boys ( 1 )

Girls ( 2 )

Co-educational ( 3 )

## 5. Classes taught in recognised schools (including permitted classes)

*Do not include pre-primary classes, if any*

From Class

From Class

To Class

## 6. Are the majority of pupils taught through their mother tongue at each of the following stages?

*If the school does not have a particular stage, then give response as 'Not Applicable' for that stage*

## (a) Primary stage

Yes (1)

No (2)

Not Applicable (3)

## (b) Upper primary stage

Yes (1)

No (2)

Not Applicable (3)

## 7. Does the school follow three-language formula at each of the following stages?

*If the school does not have a particular stage, then give response as 'Not Applicable' for that stage*

## (a) Upper primary stage

Yes (1)

No (2)

Not Applicable (3)

## (b) Secondary stage

Yes (1)

No (2)

Not Applicable (3)

8. **Majority** of classes (including sections) are held in*The construction may be considered Pucca, Partly Pucca, Kachcha or Thatched hut as per State norms.*

Pucca building (1)

Partly Pucca building (2)

Kachcha building (3)

Thatched hut (4)

Tent (5)

Open space (6)

## 9. (a) Total number of rooms in the school \_\_\_\_\_

## (b) Number of rooms used for Teaching purposes (excluding Laboratories, Library,

Staff-room, Workshops, Craft-room, etc.) \_\_\_\_\_

10. Is drinking water facility available to students within school premises?

Yes (1) No (2)

11. (a) Does the school have urinal(s) within school premises?

Yes (1) No (2)

(b) If 'yes', is there a separate urinal for girls?

Yes (1) No (2)

12. (a) Does the school have lavatory(ies) within school premises?

Yes (1) No (2)

(b) If 'yes', is there a separate lavatory for girls?

Yes (1) No (2)

13. (a) Give the number of teaching posts sanctioned in your school as on 30.9.1993. \_\_\_\_\_

(b) Furnish the following information about teachers in position as on 30.9.1993.

*Include all the full-time teachers and also those who are on short leave. Exclude honorary teachers and also teachers appointed for a specific period.*

Category	Number of Full-time teachers in Position		
	Male	Female	Total
1	2	3	4
All Communities			
Scheduled Castes			
Scheduled Tribes			
Other Backward Communities (OBC)*			

\* As per state norms.

## 13. (c) Number of Voluntary / Contractual / Other teachers

(i) Male \_\_\_\_\_

(ii) Female \_\_\_\_\_

## (d) Number of part-time teachers

(i) Male \_\_\_\_\_

(ii) Female \_\_\_\_\_

## 14. Number of teachers staying outside the city/town/villages in which the school is located.

Male \_\_\_\_\_

Female \_\_\_\_\_

## 15. (a) Does the school management provide housing facility to teachers?

Yes (1) No (2)

☐

## (b) If 'yes', number of teachers availing housing facility

Male \_\_\_\_\_

Female \_\_\_\_\_

## 16. Give following information about teachers for the academic session 1992-93 (excluding teachers appointed for specific period).

(a) Number of teachers in position at the beginning of the session

\_\_\_\_\_

(b) Number of teachers retired

\_\_\_\_\_

(c) Number of teachers resigned

\_\_\_\_\_

(d) Number of teachers whose services were terminated

\_\_\_\_\_

(e) Number of teachers transferred to take up non-teaching posts (excluding teachers on lien temporarily)

\_\_\_\_\_

(f) Number of teachers who died

\_\_\_\_\_

## 17. Number of teachers exclusively for physical education/physical training/yoga/other similar activities.

\_\_\_\_\_

18. Give below the class-wise **enrolment** as on 30.9.1993

Class	Number of Students					
	All Communities		Scheduled Castes		Scheduled Tribes	
	Boys	Girls	Boys	Girls	Boys	Girls
1	2	3	4	5	6	7
I						
II						
III						
IV						
V						
VI						
VII						
VIII						
IX						
X						
XI						
XII						
Total						

19. (a) Does the school have Integrated Educational Programme (IEP) for the disabled (handicapped) children?

Yes (1)

No (2)

(b) If 'yes', number of Resource Teachers \_\_\_\_\_

(c) Give below the enrolment of disabled children

*In column 6, others include children with multiple disabilities, spastics, etc.*

Stage	Number of Disabled Children				
	Visually Impaired	Hearing Impaired	Orthopaedically Handicapped	Mentally Retarded	Others
1	2	3	4	5	6
Primary					
Upper Primary					
Secondary					
Higher Secondary					

20. Does the school have pre-primary classes (including unrecognised also) attached to it?

Yes (1)

No (2)

25. (a) Does the school have indoor hall for games?

Yes ( 1 ) No ( 2 )

(b) If 'Yes',

(i) is it in usable condition?

Yes ( 1 ) No ( 2 )

(ii) is the facility open to the community after school hours?

Yes ( 1 ) No ( 2 )

26. (a) Does the school have laboratory facilities for teaching science at the **Secondary stage**?

Yes ( 1 ) No ( 2 )

(b) If 'Yes', which **one** of the following combinations is available?

Separate laboratories for Physics, Chemistry and Biology

( 1 )

Combined laboratory for Physics, Chemistry and Biology

( 2 )

Combined laboratory for Physics and Chemistry but separate for Biology ( 3 )

**For Schools with Higher Secondary stage**

27. Types of courses available at Higher Secondary stage  
( + 2 stage ) only

(a) Arts (Humanities and Social Sciences)

Yes ( 1 ) No ( 2 )

(b) Science

Yes ( 1 ) No ( 2 )

(c) Commerce

Yes ( 1 ) No ( 2 )

(d) Agriculture

Yes ( 1 ) No ( 2 )

(e) Vocational / Technical

Yes ( 1 ) No ( 2 )

(f) Any other \_\_\_\_\_  
(Please specify)

Yes ( 1 ) No ( 2 )

28. Give below the enrolment in Classes XI and XII for the different courses.

Type of Course	XI						XII					
	ALL		SC		ST		ALL		SC		ST	
	B	G	B	G	B	G	B	G	B	G	B	G
1	2	3	4	5	6	7	8	9	10	11	12	13
Arts (Humanities & Social Sciences)												
Science												
Commerce												
Agriculture												
Vocational / Technical												
Any other (Please specify)												

B — BOYS G — GIRLS

29. If the school has provision of teaching science at the **Higher Secondary** stage,

(a) Does the school have facility to teach the following subject(s)?

(i) Physics

Yes ( 1 ) No ( 2 )

(ii) Chemistry

Yes ( 1 ) No ( 2 )

(iii) Mathematics

Yes ( 1 ) No ( 2 )

(iv) Biology

Yes ( 1 ) No ( 2 )

(b) Does the school have qualified teachers exclusively for teaching of the following subject(s)?

(i) Physics

Yes ( 1 ) No ( 2 )

(ii) Chemistry

Yes ( 1 ) No ( 2 )

(iii) Mathematics

Yes ( 1 ) No ( 2 )

(iv) Biology

Yes ( 1 ) No ( 2 )

## 29. (c) Does the school have

- (i) separate laboratories for Physics, Chemistry and Biology? ( 1 )
- (ii) separate laboratories for Physics and Chemistry but none for Biology? ( 2 )
- (iii) combined laboratory for Physics, Chemistry and Biology? ( 3 )
- (iv) combined laboratory for Physics and Chemistry but none for Biology? ( 4 )
- (v) combined laboratory for Physics and Chemistry but separate for Biology? ( 5 )
- (vi) no laboratory for any of the subjects? ( 6 )

Postal Address \_\_\_\_\_

\_\_\_\_\_ Pin 

--	--	--	--	--	--

PLEASE READ THE INSTRUCTIONS GIVEN OVERLEAF  
BEFORE FILLING THIS FORM

## INSTRUCTIONS

### Introduction

The present educational survey, sixth in the series, is being conducted throughout the country. In this survey data are being collected from each and every village, city/town and school to assess the status of educational facilities and their utilisation.

### School Information Form-2 (SIF-2)

This Form seeks information about media of instructions, type of school building, incentive schemes, etc. as on 30.9.1993 from recognised schools/Junior colleges/Intermediate colleges/Pre-University colleges not attached to degree colleges. This Form will be completed by the Headmaster/Principal of the school/college.

### Your Help Needed

The quality of the results of this survey depends on the accuracy and completeness of the information to be furnished by you. **Therefore, please answer fill in each item carefully and accurately.**

### How to Answer

- (a) Please use the **International numerals** while supplying the information in numbers.
- (b) The information collected from you will be computerised by **National Informatics Centre**. Take extra care to read the procedure of supplying the information which are printed in *italics*, along with the items.
- (c) Most of the items have been provided with two or more alternative responses. Each alternative has been provided with a code. The number in brackets is the code for that response. In addition, a blank box is provided in the right margin for writing the response code.

**Writing the response code is in the box is essential.**

In such items, only one alternative is applicable to your school situation. Please put a tick mark in the brackets (✓) of the applicable response and write its code in the box provided on the right-hand side.

#### Example:

Management of school

Government (1)

Local body (2) ✓

Private aided (3)

Private unaided (4)

2

In this example, the applicable response is 'Local Body', a tick in the bracket has been put against 'Local body' and the code 2 is written in the box.

(d) **In items 2, 3 and 16(a), response is to be given in codes only.** Codes to each alternative response are explained along with the corresponding items. Please select codes as per your school situation and write them at the indicated places.

**Thank you for your cooperation.**

**Language Codes**

<i>Language</i>	<i>Code</i>	<i>Language</i>	<i>Code</i>	<i>Language</i>	<i>Code</i>
Angami	01	Kakbarak	17	Nicobaree	33

**School Information Form - 2****1. Stages of education in the school :**

(a) Primary	Yes ( 1 ) No ( 2 )	<input type="text"/>
(b) Upper Primary	Yes ( 1 ) No ( 2 )	<input type="text"/>
(c) Secondary	Yes ( 1 ) No ( 2 )	<input type="text"/>
(d) Higher Secondary	Yes ( 1 ) No ( 2 )	<input type="text"/>

**2. Write code for medium/media of instruction at different stages of education.**

- Medium of Instruction is the language through which subjects other than languages are taught.
- There can be more than one medium of instruction at each stage of education. Give codes for as many media as applicable (maximum 4) to your school situation.
- The language codes are given on page 3.

Stage of Education	Number of Media of Instruction	Medium/Media of Instruction (Write language code in box)			
Primary		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Upper Primary		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Secondary		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Higher Secondary		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

**3. Write code for language taught as first, second and third language at different stages of education.**

For each first/second/third language, there is provision for 4 languages. Write language codes (given on page 3) as many as applicable to your school situation.

**(a) Primary Stage**

Language Status	Number of Languages	Language(s) Taught (Write language code in box)			
First Language		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Second Language		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Third Language		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

**(b) Upper Primary Stage**

<i>Language Status</i>	<i>Number of Languages</i>	<i>Language(s) Taught (Write language code in box)</i>			
First Language		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Second Language		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Third Language		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

**(c) Secondary Stage**

<i>Language Status</i>	<i>Number of Languages</i>	<i>Language(s) Taught (Write language code in box)</i>			
First Language		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Second Language		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Third Language		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

**(d) Higher Secondary Stage**

<i>Language Status</i>	<i>Number of Languages</i>	<i>Language(s) Taught (Write language code in box)</i>			
First Language		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Second Language		<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

4. Major portion of school building is

Owned ( 1 )

Rented ( 2 )

Rent-Free ( 3 )

5. (a) Total area of the school campus  
conversion : 1 sq.ft. = 1/10 sq.m. (approx.)

\_\_\_\_\_ sq.m.

(b) Total covered area of the school building  
covering all the floors

\_\_\_\_\_ sq.m.

6. (a) Does the school require additional classrooms? Yes (1) No (2)

(b) If 'Yes', number of additional classrooms required  
(or in case of schools running in open space or tents,  
write total number of rooms required) \_\_\_\_\_

(c) How can additional classrooms be added, if required?

(i) Using available land Yes (1) No (2)

(ii) Constructing additional storeys  
on the existing building Yes (1) No (2)

7. School premises is generally used for

(i) Another school/college Yes (1) No (2)

(ii) Adult education/functional literacy classes Yes (1) No (2)

(iii) Non-formal education centre for  
children of school-going age Yes (1) No (2)

(iv) Other educational purposes Yes (1) No (2)

(v) Any other purpose Yes (1) No (2)

8. Give information about blackboards, furniture for teachers and furniture for students.

( Please check : col. 5 + col. 6 + col. 7 = col. 2 )

Stage	Number of Sections	Number of Usable Blackboards	Number of Sections having Furniture for Teachers	Number of Sections having		
				Adequate Mats/ Furniture for Students	Inadequate Mats/ Furniture for Students	No Mats/ Furniture for Students
1	2	3	4	5	6	7
Primary						
Upper Primary						
Secondary						
Higher Secondary						

9. For storing records does the school have

(a) Almirah(s)? Yes (1) No (2)

(b) Trunk(s)/Box(es)? Yes (1) No (2)

10. (a) Does the school have adequate supply of chalks? Yes (1) No (2)
- (b) Does the school have adequate number of dusters? Yes (1) No (2)
11. (a) Does the school have a library? Yes (1) No (2)
- (b) If 'Yes', mention the total number of books in the library \_\_\_\_\_
- (c) If the school has a library, are dictionaries available? Yes (1) No (2)
12. (a) Does the school subscribe to newspaper(s)? Yes (1) No (2)
- (b) Does the school subscribe to magazine(s)/journal(s)? Yes (1) No (2)
13. Does the school have a textbook bank? Yes (1) No (2)
14. Does the school have contingency fund? Yes (1) No (2)
15. (a) Does the school have playground facility? Yes (1) No (2)
- (b) If 'Yes', is playground facility
- (i) exclusively for the school? Yes (1) No (2)
- (ii) in usable condition? Yes (1) No (2)
- (iii) adequate? Yes (1) No (2)
- (iv) within school premises? Yes (1) No (2)
16. (a) Give information regarding games and sports played and availability of material for those games in your school.  
In each column, write 1 for 'Yes' and 2 for 'No' for every game/sport as applicable.

Games and Sports	Whether Played (Write 1 for Yes and 2 for No)	Whether Material Available (Write 1 for Yes and 2 for No)
i) Football		
ii) Hockey		
iii) Cricket		
iv) Basketball		
v) Volleyball		
vi) Badminton		
vii) Shotput		
viii) Javelin		
ix) Hammer		
x) Discus throw		
xi) Gymnastics		
xii) Athletics		
xiii) Kho Kho		
xiv) Kabbadi		
xv) Archery		

(b) Percentage of time assigned for sports and games in a week in the school time-table.

- Nil (1)  
Up to 5% (2)  
6-10% (3)  
11-15% (4)  
Above 15% (5)

(c) Percentage of children that participate in games after school hours.

- Nil (1)  
Up to 10% (2)  
11-20% (3)  
21-30% (4)  
31-50% (5)  
More than 50% (6)

17. (a) Does the subject teacher(s) take classes for physical education and sports in the school?

Yes (1) No (2)

(b) If 'Yes', number of such teachers

\_\_\_\_\_

18. (a) Is physical education a compulsory part of the school curriculum?

Yes (1) No (2)

(b) If 'Yes', is there an evaluating system for judging performance of children for being promoted to next higher class?

Yes (1) No (2)

19. (a) Does the school arrange for medical check-up of students annually?

Yes (1) No (2)

(b) Does the school arrange for vaccination/inoculation of students?

Yes (1) No (2)

20. Does the school have provision for work experience or SUPW activities?

Yes (1) No (2)

21. Give information regarding **incentive schemes** in the school for the academic year 1992-93.

SL No.	Incentive Scheme	Whether Available (Write 1 for Yes and 2 for No)	If Yes, Number of Students Getting Benefit					
			Total Number of Beneficiaries		SC		ST	
			Boys	Girls	Boys	Girls	Boys	Girls
1	2	3	4	5	6	7	8	9
1.	Mid-day Meals							
2.	Free Uniform to Students							
3.	Free Textbooks to Students							
4.	Attendance Scholarship to Girls							

25. Give below the class-wise **repeaters** as on 30.9.1993 :

*Repeater : A student who was in the same class in the previous year.*

Class	Number of Repeaters					
	All Communities		Scheduled Castes		Scheduled Tribes

PLEASE READ THE INSTRUCTIONS GIVEN OVERLEAF  
BEFORE FILLING THIS FORM

**Instructions**

**Introduction** In the case of fees charged from students in private aided schools, it is presumed that in all schools the fees will be same at respective school stages like government schools in the entire district.

**Educational Finance Form (EFF)** The total recurring and non-recurring expenditure at the district level separately for government and private schools may please be given.

**How to Answer** (a) Please use the **international numerals** while supplying the information in numbers.

(b) The information collected from you will be computerised by the **National Informatics Centre**. Take extra care to read the procedure of supplying the information which is printed in *italics* below the item.

**Note:** The information about Local Body Schools is to be included in the information about Government Schools.

**Thank you for your cooperation.**

**Educational Finance Form (EFF)**

1. Please give details of fees charged from per student per annum of the government and private aided schools separately, for all the four school stages.

Sl No	Items of Information	Annual Fee Charged Per Student in Rupees
